

Our Sixty-Second Year—No. 27

LINDSAY, ONTARIO, FRIDAY, JULY 5, 1907.

Terms—\$1.00 per year in Advance.

IN FORD'S JULY CLEARING SALE

You can Save a Plump One-Quarter to Half of Regular Prices.
AND WE PAY YOUR RAILROAD FARE.

This is a remarkable opportunity. There is a whole store full of price inducements here.

The long and short of the matter is, that, because of the backward season, wholesalers and retailers are overstocked.

Now we do not allow our stock to get "humpy"—to pile up on our hands. We get right after them and put the price so as to produce a normal evenness. That's what we are doing now in this sale and as an extra inducement we will pay your railroad fare on any \$12.00 purchase from any point given in last week's advertisement, or any other of the same distance. Come as soon as you can this month.

Only a mere mention of some lines here—more in last week's paper. See them, too.

Window Shades, Carpets and Linoleums

3 pieces, 2 yards wide, English Linoleum, block or floral patterns, regular 60c a square yard. Sale price, 43c.

IMPROVE YOUR APPEARANCE

Retain your youthful freshness so that no one can remark, "he is past his prime." To appear younger and more attractive than the average woman you must be particular that your hair shows no sign of being thin, short or scraggy. A Dorenwend Transformation, Pompadour, Wave, Curl or Switch will substitute nature's defects.

Your hair can be perfectly matched in color and texture so that detection is out of the question.

CONSULT PROFESSOR DORENWEND DURING THIS VISIT

MAN TO MAN—ABOUT BALDNESS

If you are bald, or partially so, you must realize that it makes you look old. Notwithstanding the desire to have back your one time bushy head of hair, you hesitate before wearing a natural hair covering, simply because you imagine it is going to be noticed by others. Now you never make a greater mistake. Thousands of men, who thought the same as you do, are to-day wearing a

DOREWEND PATENT TOUPEE

and instead of carrying the handicap that baldness proved to them, they are now enjoying the advantage of "looking young," and that is what counts to-day in business and social life. They act as a protection, preventing colds and catarrhs, so common to bald men.

Now do not neglect this opportunity—come and see for yourself. A few minutes' demonstration will convince you.

DOMINION DAY IN LINDSAY

Rain Interfered with but Did Not Mar the Sports.

The Marathon Races Filled Well, and Proved a Great Attraction—Lindsay Were a Cinch for St. Mary's, Toronto, at Base Ball—The Green Horse Race Amused the Crowd Greatly.

Evening Post of July 2.

Following a morning as fine as could be desired, clouds began to gather yesterday before noon, threatening rain. All morning people had been flocking into town by train, boat and vehicle, and when the Sylvester Band rendered some of their lively airs, and citizens came down town to hear the music, the wide pavements of our spacious Kent-st. were packed with spectators and the success of the sports—arranged for the afternoon by the Catholic Literary Association, in honor of the day, seemed to be beyond peradventure.

But Jupiter Pluvius appeared to have planned otherwise. At 1 o'clock rain began to fall, angry-looking clouds swept down from the west against a S.W. breeze from the south, and soon lightning was flashing and thunder following. At 1.20—the hour for the starting of the ten mile Marathon race at the foot of Kent-st.—rain was descending in torrents and the crowd had sought shelter wherever it could be found. For half-an-hour the defuge continued, but a full hour after a few minutes before 2 o'clock, Starters Patton, Halsey and McNulty got the runners off as the clock struck. They were: No. 1, N. Morgan, of West End Y.M.C.A., Toronto; No. 2, A. Taylor, West End Y.M.C.A., Toronto; No. 3, B. Howard, Hawatha Indian Reserve, Rice Lake; No. 4, F. Simpson, Hawatha Reserve. The course was up Kent-st. and Adelaide-st. to the Fair grounds, and 17 times around the half-mile track in front of the grand stand.

At about 2.30 the clouds broke, the weather cleared up, and the crowd determined not to be shut out from a good thing—began to arrive. By 3.30 about 1200 spectators were present. Meanwhile the Marathon runners had been plodding gamely through the mud, which bogged them as they ran up the water. Morgan, who had taken the lead at the start, set the pace for the others until the 14th lap, when he bled back, looking fagged. On the last lap Simpson, a lanky Indian with a great stride, began to push his team-mate. The fight to the wire was a pretty one. Simpson winning in 1 hr. 10 min. 20 sec. Howard came in 3 seconds later. Taylor 1.29, Morgan, 1.23. It was a good race.

At about 2.30 the clouds broke, the weather cleared up, and the crowd determined not to be shut out from a good thing—began to arrive. By 3.30 about 1200 spectators were present. Meanwhile the Marathon runners had been plodding gamely through the mud, which bogged them as they ran up the water. Morgan, who had taken the lead at the start, set the pace for the others until the 14th lap, when he bled back, looking fagged. On the last lap Simpson, a lanky Indian with a great stride, began to push his team-mate. The fight to the wire was a pretty one. Simpson winning in 1 hr. 10 min. 20 sec. Howard came in 3 seconds later. Taylor 1.29, Morgan, 1.23. It was a good race.

Some Remarks on Things in General

By "THE STROLLER."

(Continued from page 9.)

Our citizens are being treated these days to a lot of good sport that is not costing them a cent, except such collection as they choose to put in for Redemptors. We don't think the boys who play on complain of either the crowds who go to see them or the collections. We understand that there is enough on hand to pay all legitimate expenses and leave something over. This is the kind of sport — not baseball, particularly — that we think ought to commend itself to our citizens. As far as we know, all who play are playing for the love of the game, and both they and the people who watch them enjoy everything to the full. Sport of all kinds is to be commended when it is played clean, whether amateur or professional. We have heard ministers grumble against professional sport, but they hardly know what they were talking about. Like everything else it can be abused, although ordinarily a professional sportsman is the highest type of a citizen, yet this word contains a large quantity of people, and provisions must be made for all kinds. It is possible to have clean professional sport and we believe we have it. Certainly, if we could push ball so that we could command ten thousand a year, as some are said to do, we should not be turning the midnight oil over this column at the price we are supposed to be receiving.

The sport that we are being entertained with just now is of that nature that appeals to the people who most need recreation, viz., the ordinary citizen who has to put in his last day's work in the week and sometimes he is treated to a homily on sport and certain men, who are able to devote lots of time to it, are held up as examples to the boys. All very good but everybody is not master of his time, and the people rather to be held up as examples are such boys, or young men, as are playing nightly up at the grounds — men who work ten and eleven hours a day year in and year out and yet are not above freshening themselves up, as well as the spectators, by giving us good ball for an hour and a half, each night. There are one or two points, however, that might be improved on both by players and spectators. On the part of some of the players there is too much talk, — "chewing" the boys call it. If the umpire did not the governor, we would be in favor of giving him the power to fine any player who talks back at him — either a money fine or deprive him from playing until he learns how to behave. On the part of the spectators — that is, some of them — there is too much tobacco spitting and too much loud language used. Neither are the signs of a gentleman, and now, that quite a few ladies grace the grounds with their presence, both ought to be cut out. There is a law against spitting on the sidewalks — it should also apply to the grass. There is a law against swearing in public places and any citizen who is in violation of it should be fined. It might do some of our careless citizens a good turn to have them before the "bench". The police are very foolish, to say the least.

The average citizen who does not look very closely into the matter seems to have an idea that government work of any kind is not a good thing to watch the simplicity and honesty of purpose that the same people would give were they working for a private concern. We don't know how it is in the inside service, either in Toronto or Ottawa, but we can speak of the outside service with knowledge, and have no hesitation in saying that, when for man, the government set as good an example as any corporation or private party does. As a matter of fact, our experience has been that those in government service are more particular — particularly, we would call it, when not in good humor, than they would be were they working for anybody else. Take out local services in Lindsay. We don't if anyone would say that other than the custom house or the post office was either over-manned or over-paid, and as for not getting good service and the best of attention, the day is past when any government officer could afford to treat the public with anything but courtesy and respect. There is a case in all communities — who took on a government job or a job for the government in no good clean gain. A man may be getting on a \$1,000 from a government job and would easily get \$1500 at anything else, and yet even his friends, and certainly his enemies — political, of course, look at it as if he was very fortunate in getting something away from the common way. The same thing applies to sales made. If a citizen sells the Government \$100 worth of goods he is talked about as if he had struck a gold mine. We have handed government money and never found it to go any further than any other money, and we have refused to tender with government orders simply because they were more of a nuisance than anything they were worth. Yet this will not prevent people who don't or won't know, from going on thinking that a government officer or a government man is all gold.

The immediate cause of this little rebellion on the part of the little friends these days over that little house they are building for Geo. Mills down at the bridge. As commentators and puzzleers are the feature of the day, they must you and ask if we can tell how much of the surplus will be left after the tax is paid, and other such provoking little things. Well, we took the trouble to go down and examine that house the other day, and we really do not see that it is being delayed in any way, or that money is being squandered on it. The men who are working on it are the people they are working for want an honest job

and without a good one. An extra man as the late P. T. Barnum said he would never leave a man work for him except by the day. He understood human nature about as well as Abe Lincoln, and his experience was that he got better value for his money from men who were working by the day than when working by the job. We presume this same reason wants the house to be there for a few seasons and wants its occupants to be comfortable, and even if a few days could have been knocked off, which is doubtful, we don't think there is any great harm in waiting at having the job properly done.

NECK WAS BROKEN

Sad Case of Suicide Near Kirkfield — Inquest Unnecessary.

Evening Post of June 27.
The body of Peter Graham, of the 11th con. of Eldon, near Kirkfield, was found hanging from a pulley frame, with a logging chain around the neck yesterday morning at 9 o'clock. His brother Duncan discovered the body hanging from the beam, but as it was high above his head, and no ladder being available, he was unable to do anything until he had summoned help from his house, over half-a-mile distant.

Coroner Dr. Wood, of Lindsay, was notified by telephone and immediately left for the place. He found that death had resulted from the neck being broken, and as the condition pointed to suicide, decided that an inquest was unnecessary, the rash deed having evidently been committed during an attack of temporary insanity.

The details of the melancholy affair are meagre as yet. The victim was a bachelor and about 30 years old. Two bachelor brothers and a maiden sister, all well up in years, survive the deceased.

DEATH IN THE KISS.

Glasgow, May 29th. — Dr. Clamers, the medical officer of the city, has completed an elaborate investigation of the recent high rate of mortality by spotted fever, and has concluded that there is death in kissing. He condemns the prevailing habit of kissing infants, which, he says, is an unmistakable carrier of disease. For weeks the city hospital has never had fewer than 100 patients.

Every Man His Own Landlord.

(Toronto Globe).

The annual report of the Barlin (Ont.) Board of Trade draws attention to a condition of affairs probably unique in this land of home-owners. Out of 3,126 persons entered on the assessment roll, nearly 70 per cent. are owners of property. Can any other Ontario town beat this record?

Forgetful.

(From Judge.)

A minister having given out his "notices" was about to read the hymn when he was reminded of one he had forgotten. Stopping, he made this announcement, apologizing for his forgetfulness. "Much to the amusement of his audience, he began to line out the hymn as follows: "Lord, what a thoughtful watchman art thou!"

Who Will Weigh It.

In a small town in British Columbia two brothers are engaged in the coat business. A noted evangelist visited the town, and the elder brother was converted. For two weeks after his conversion he endeavored to persuade his brother to join the church. One day he said to him: "Why can't you, Jim, join the church, as I did?" "It's all right for you to be a member of the church," replied Jim, "but I join, who's going to weigh the coal?"

A Species of Kawartha Whale.

Mind and Empire: Hundreds of people were attracted yesterday by a huge fish of the species mackinonze displayed in the Yonge-St. window of the Canadian Pacific ticket office. This fine fellow weighed 26 pounds, 46 inches long and 18 1/2 girth, and was caught on Wednesday by Mr. W. R. Cranall, proprietor of the Rockland house at Bobcaygeon, to whom the more credit is due in that he was landed without aid or graft or net, after putting up a strenuous fight. Mr. J. J. Ross, popular traveling passenger agent of the U. C. R., and himself an ardent fisherman, witnessed the "kill" and promptly brought the big brute to Toronto to show the kind of sport the C.P.R. offers its patrons.

A Famous American.

(Cassell's Journal.)

One day some Americans on a visit to Wales expressed a wish to see a certain old and historic church. The incumbent was only too pleased to show them round, especially as he believed it would end in a donation being given to his parochial fund. He is as proud of the school as he is of the church, and finished up by asking them in there also, and inviting them to question the scholars. One of the party accepted the invitation. "Can you tell me, little boy," said he to one lad, "what George Washington was?" "Is, sir," said he, "he was a 'Merican'." "Quite right," said the American. "And can you tell me what George Washington was remarkable for?" "Is, sir," he was remarkable 'cos he was a 'Merican" an' told the truth." The American didn't question further.

TRAINSMASHING C.P.R.

Five Killed in Head-On Collision Near Kenora.

SEVERAL CARS DESTROYED

Passengers Were Mostly Chinamen—Some Rather Badly Injured—Guard Also Killed—Crash Was Terrific—Celestials Were Terror-Stricken—Both Engines Demolished—Traffic Was Delayed.

Winnipeg, June 29.—A head-on collision occurred at 5 o'clock last evening between the westbound express and an extra loaded with Chinese at Badley, two stations west of Ignace. Four Chinese and M. E. O'Connor of St. John, N. B., guard on that train, were probably fatally injured. Several passengers on the westbound train were also injured, but they are not believed to be seriously hurt. Both engines, together with the baggage and two coal cars on the extra, were damaged. Auxiliary trains were despatched from Kenora and Ignace, and doctors were hurried to the scene on a light engine to render every possible attention to the injured. The injured Chinamen were sent to Fort William on a special train. Traffic was not long delayed.

RESCUED AT RAPIDS.

Steamer Nearly Overturns and Many Lives Are Endangered.

Latchford, Ont., June 29.—On Wednesday the steamer running north from Port Raptids was nearly overturned. It was in the afternoon and the boat had just started on its trip north and less than 100 yards from the shore, when she refused to answer to the rudder, and going sideways, struck a rock and went over half way.

Fifty people were on board and eight men sitting on the stern and ten canoes on the hurricane deck were sent over into the river. Four struggling men were swept down the rapids, and the fourth was sinking for the third time when a prospector, who was fortunately coming up in the rapids and at the risk of his own life, paddled to the drowning man and got him in his canoe.

DROWNED WHILE BATHING.

Boy Seized With Cramp and Sank Immediately—One Saved.

Ayr, June 29.—A drowning occurred at Ayr on the River Nith, when Earl Garbutt, a boy of 7, was drowned, and Bert Walton, a boy of 12 or 13, was saved in time to prevent drowning.

They were both swimming in a deep hole, when Earl said: "I have a pain in my leg." He sank immediately. Young Walton was swimming, too, at the same time, and had a cramp, too. Some big boys arrived in a short time and pulled out Walton, but Garbutt had sank.

FARMERS WERE BUNCOED.

Bought Telegraph Poles From Bogus C.P.R. Official.

Chatham, June 29.—A swindler cleaned up several hundred dollars from farmers around Louisville, a village near here, by a new trick. The man who has gone away with the money posed as a C.P.R. superintendent at the head of a gang of men who were to remove the telegraph poles and put the wires underground.

Many farmers paid \$7 a hundred cash for poles, but the poles are still standing.

BIGAMIST'S STRANGE PLEA.

Sister-in-Law Has Four Husbands—Why Not Two Wives?

Toronto, June 29.—Alfred Middleton, an Englishman, charged with bigamy, admitted Magistrate Denison that he had married a Toronto woman knowing that he had a wife and family in England. "My wife's sister has four husbands, why shouldn't I have two wives," he argued as the magistrate sentenced him to six months' hard labor in the Central Prison.

ITALIAN'S HORRIBLE DEATH.

Ground to Pieces Under Locomotive at Port Arthur.

Port Arthur, June 29.—An Italian sectionman met a horrible death near Gurney on Wednesday. The handcar on which he and several companions were travelling the track was struck by a freight locomotive. The unfortunate man was thrown on the track and ground to atoms under the engine wheels.

200 BUILDINGS DESTROYED.

Big Fire in Arizona Only Stayed by Use of Dynamite.

Bisbee, Ariz., July 2.—Fire broke out here on Saturday and threatened to destroy Bisbee, which has a population of over 20,000. Over 200 residences have been destroyed. There was a high wind and the water supply was scant. The fire was brought under control before noon by blowing up buildings with dynamite.

An area of ten acres was burned over. Over 200 houses in the section known as Chihuahua Hill were burned. Part of the business portion also was destroyed.

The fire started from a gasoline explosion in the Colorado Hotel.

Indian's Break For Liberty.

Edmonton, June 2.—The Indian Uellum, imprisoned for horse-stealing, made a daring attempt to escape from the penitentiary. The Indian was working with numbers of other convicts at the brickyard. Being near the river bank, while the attention of the guard was for a moment distracted, he dashed for the bush, into which he disappeared. Guard Stewart captured him, bringing him back at the point of a revolver. Stewart was the captor of Bill Miner and his crew of train robbers in Kamloops last summer.

Methodist Church and Other Buildings Burned.

THREE HORSES ALSO PERISH

Hotels Had Narrow Escape—\$300,000 Blaze at Birmingham—Origin Unknown—Readville Race Track Visited by Flames—Grand Stand Gone, and Other Property Destroyed—Losses Insured.

Little Current, June 29.—At 4 o'clock yesterday morning, fire broke out in the Mansion House barn, destroying E. M. Bradley's barn, insured; Queen's Hotel barn (fully insured); R. Malta's store and stock (small insurance); May Bros' new livery barn (fully insured), and the Methodist Church (insured). Three good horses were lost in Bradley's barn. R. Malta's loss is heavy, he having a big stock with little insurance.

Good work by the engine and willing workers saved the two hotels.

\$300,000 Fire in Birmingham.

Birmingham, Ala., June 29.—Fire early yesterday destroyed the Chalfoux Building. The loss is estimated at \$300,000. The origin of the fire is unknown.

Fire at Readville Track.

Boston, June 29.—Fire Thursday night destroyed the grand stand, bleachers, 10 trotting sulkies and other property of the New England Trotting Horsebreeders' Association at the Readville race track. The stables were saved.

MAY GIVE UP THRONE.

Report That King of Portugal Intends to Abdicate.

London, June 29.—The Madrid correspondent of the Standard says it is rumored there that King Carlos of Portugal is determined to abdicate in favor of the Duke of Oporto, his brother. It is probable that martial law will be proclaimed.

The Mail's Madrid correspondent says it is rumored that the King will retire in favor of the Crown Prince, the Duke of Braganza, adding that the rumor is not generally credited in view of the fact that the Crown Prince has gone on a tour of the Portuguese African colonies.

DANGER FROM MINES.

Suggestions for Protection by Japan and Italy at The Hague.

The Hague, June 29.—Various amendments have been presented to the British proposal, now before the sub-committee on maritime war of the peace conference, on the subject of submarine mines, all aimed at diminishing danger in the event of mines becoming derelict.

Japan suggests that only mines which are inoffensive after a limited time be used, and Italy proposes that an apparatus be attached to floating mines making them inoffensive an hour after they get adrift, and that fixed mines be rendered useless so soon as they break loose.

WILL SEND CHINESE HOME.

Their Presence in Transvaal Undesirable Says Gen. Botha.

Pretoria, July 2.—In announcing the policy of the Government, Gen. Botha stated that it had been decided not to re-enact the labor ordinances, but to send the Chinese home immediately on the expiration of their indentures. The Government would begin to expire this month, and sixteen thousand would expire before December 31 next. The Government had been pressed to amend the constitution to enable a temporary renewal of the contract. After ample and careful consideration, however, it had been decided not to introduce such legislation this season, but let repatriation occur as the indentures expired. The Government was moved not only by the unalterable conviction that the presence of the Chinese was in the highest degree inimical to the interests of the Transvaal, and should cease at the earliest possible moment, but also by the consideration that the supply of native labor had for some time, in a marked manner, been exceeding the demand. General Botha proceeded to declare that the Government native labor bureau would supervise the recruiting of natives in South Africa, and would improve, control and safeguard the interests of the natives, thereby increasing their confidence in their employers. When in England, continued General Botha, he had endeavored to safeguard the rights and the freedom of the Transvaal, consistently with the obligations of the Colony to the Empire. The warmest thanks of the Transvaal were due to the Imperial Government for the generous way in which it had guaranteed the £5,000,000 loan.

The exact number of coolie indentures expiring before Dec. 31 next is 16,759.

TANKEE DOCTOR FASTS.

Goes Without Food For a Month and Is Little the Worse.

Belleville, Ills., July 2.—After fasting since May 30, during which time he tasted nothing but water, Dr. I. J. Eales broke his abstinence by taking a small quantity of malted milk. His fast was instituted to test his theory that total abstinence from food for a period is beneficial to health.

After taking the malted milk he said he would fast for 24 hours longer, to ascertain what effect the nourishment would have upon his system.

Beginning his fast at 192 lbs., Eales has lost 25 lbs. His chest measurement has been reduced from 43 to 40 inches and his waist measurement from 44 to 34 inches.

He lifted a man weighing 225 lbs. Sunday to demonstrate that his strength has not yet diminished.

EXPRESS OFF TRACK APPEAL OF LAURIER

Eastbound Train Wrecked Near Medicine Hat.

WENT DOWN EMBANKMENT

Orangeville Man Killed—Cars Caught Fire and Eight Were Burned—Passengers Had Narrow Escape—None Severely Injured—Gas Tank Exploded—Broken Wheel Was the Cause.

Calgary, July 2.—Shortly before six o'clock Sunday night No. 2 express, eastbound, was wrecked at Brook Station, 96 miles west of Medicine Hat, and Express Messenger William McKinley of Orangeville, Ont., was killed through the explosion of the acetylene gas tank. His leg was blown off and he died a few hours later. Eight passenger cars were burned, as there were no means available to quench the fire, and no way of freeing the train, as the engine was on the wrong side of the fire. The line was reported clear at ten o'clock yesterday morning. The passengers have not yet been brought to Medicine Hat.

A broken wheel on the second baggage car is said to have caused the derailment, as this was the first car to leave the track, dragging with it two colonist cars, first-class coach and diner, in the plunge down the embankment. Another coach left the rails and plowed along the ties, ripping them into matchwood. Baggage-man McDonald was thrown about in the baggage car and stunned, but was able to crawl outside. None of the passengers suffered severe injury.

STRIKE-BREAKERS PELTED.

Ice-Drivers Cause Trouble and Give Police Lively Time.

New York, July 2.—Police reserves were called to quell several street disorders yesterday when the American Ice Co. made an effort to break the strike of the ice drivers. The company hired several scores of strike-breakers and issued an ultimatum that if the strikers did not return to work the new men would be put in their places.

When two wagons, driven by strike-breakers, drove from the company's pier on the East River yesterday a crowd of men set upon the drivers. Clubs and bricks were hurled and police charged the crowd, which finally fell back. Two policemen were then assigned to each wagon.

More trouble occurred on Avenue C, when a score of men set upon a driver, but were beaten off by the police.

Divorces Actress Wife.

Geneva, Switzerland, July 2.—Herr Wollfing, who formerly was Archduke Leopold of Austria, but who renounced his expectations and honors about four years ago in order to marry Wilhelm Adamovic, an Austrian actress, has been granted a divorce from his wife. The latter offended her husband by joining the Ascona Anchorites, in accordance with whose tenets she became a vegetarian, went without clothes in taking "sun baths," and acquired other eccentricities, with the result that Herr Wollfing sued for divorce.

Heavy Quake Recorded.

Washington, July 2.—The coast and geodetic survey service reports that an earthquake was recorded at the Cheltenham, Maryland, observatory yesterday, beginning at 8 hours, 15 minutes and 53 seconds and lasting an hour. The principal disturbance was from 8.22 to 8.25 o'clock, the largest motion being in a north-south direction. The shock was comparatively greater than that at Kingston, but not so great as the San Francisco earthquake.

Albany, N. Y., July 2.—The seismograph at the state museum at Albany registered a fairly large earthquake movement yesterday morning. The disturbance originated apparently at a remote point about 7,000 miles to the southwest.

According to State Geologist Clarke, "it is not unlikely that considerable damage may have been done if it occurred in a settled area."

Five Hundred Dollars Disappeared.

Kingsville, Ont., June 29.—On May 30 Ernest Brown of Brown & Wagle shipped a package of money containing about \$500. He gave it in care of William Wilson, a hotelkeeper who conducts the stage business in the town, who in turn gave it to his driver, Clay Cooper, to be delivered to Edward Liddle, the agent at the Pere Marquette Railroad. Liddle denied that Cooper had given him the parcel, although the stage driver said he had. Wilson has made good the amount.

Sentenced for Bigamy.

Welland, July 2.—Police Magistrate Burger yesterday sentenced H. Gibson of Sherbrook to three months in jail, and let Mrs. Sidney Beam go on suspended sentence for bigamy. This couple, who both have former partners living, went to Buffalo two weeks ago and were married.

Father Accused of Murder.

New York, July 2.—Thomas Boylan, father of little Viola Boylan, who was assaulted and murdered several days ago, was arrested by the police yesterday and taken before a magistrate, but was discharged, there not being sufficient evidence against him to warrant his detention.

Fingers Cut Off By Machine.

Brookville, July 2.—Emil Gouthier of Ogdensburg, while grinding sausage at his father's meat shop, had all the fingers of his right hand cut off in the grinder.

Toronto Man Drowned.

Buffalo, July 2.—While taking soundings from a dredge off the foot of Porter avenue, yesterday, Joseph Roach, a deckhand 24 years old, employed by the Empire Engineering Co., which is deepening the harbor near the Buffalo Yacht Club, fell into the water and was drowned. The body was recovered and removed to the morgue.

Fellow workmen said Roach was an excellent swimmer, but it is thought his clothes hampered him. He lived in Toronto.

Holiday Railway Rates.

(The Weekly Sun, May 24.)

All over Canada an enormous number of persons are being carried to-day upon the railways at far below the ideal two cents a mile. The railways do it willingly on such occasions, because they know the traffic can be got at this particular time by the mere process of bidding for it with a tempting rate. It is the necessity of running the accommodation all the time whether the business comes or not, that compels the railway to charge more at times when there is no certainty of a large demand for transportation. There will come a time in Canada, as there has already come in more thickly populated countries, when a two-cent rate will be sufficient to call out a regular and persistent traffic all the time, just as the four-cent return and lower rates of holiday time today bring out a most profitable business. It is simply a question of the number of people who can travel. When a man's business or a woman's family cares prevent him or her from leaving home, reduced fares on no fares at all are powerless to make passengers of them.

TO FACE SERIOUS CHARGE.

Tweed Storekeeper Arrested for Alleged Criminal Assaults.

Belleville, Ont., July 2.—Philip Ketcheson, a storekeeper of Tweed, was arrested, charged with assault, committed on the 27th inst., on Mabel Arbuckle, 10 years old, and Edith Beatty, 14 years old.

The mother of the little Arbuckle girl came to the city Friday and laid the complaint.

The prisoner is now in jail here. He is a married man, about 45 years of age, with grown-up children.

Second baseman Flood of Toronto was arrested yesterday. Despatches say he assaulted Umpire Conway. If it was because of a decision like some this Umpire made here, maybe Flood was justified.—Buffalo News.

A TIE GAME.

Tooth and nail the Victors and Maybes fought it out on Wednesday in the Junior League, and the score ended a tie, 2-2. The Victors started the scoring, and the Maybes caught up later. The game was a good exhibition. Batteries: Maybes—Spratt and Anderson; Victors, P. Spratt and J. Spratt.

PETERBORO IN MIDLAND LEAGUE.

The four frontier towns that composed the Midland League have commenced the season tonight. Peterboro has been called in to fill the breach. Port Hope now leads the league, and it will be a fight between the Quaker City nine and that of the Ontario town.

AT BARRIE.

A double header was played by the Wideawakes at Barrie on Monday and the visitors broke even, capturing one game. The locals could not bring a full team, and "Solly" Sharpe and Nicholson, of Toronto, were brought along. The latter pitched the morning game, which was won by Barrie, 9-4. Bill Cinnamon, himself, did the twirling in the second game. The score was 3-3 when the rain stopped the play. To revert to even innings, the score was 3-2 in the Wideawakes' favor.

TO CUT OUT ROWDYISM.

The affair in Toronto police court where Tim Flood, the Toronto second baseman, was sentenced to fifteen days in jail at hard labor, has created no little excitement in athletic circles. The general opinion seems to be that, though the sentence was very severe, the time as arrived when something had to be done to put a stop to rowdism in baseball and preserve the fair name of the game. The sentence will have a salutary effect on all players with inclinations tending towards rowdism, and will ease the burden on umpires.

BASEBALL LANGUAGE.

"Graham hit a weak and nervous roller to Kelly, who stabbed at it."
"The two men on bases were tearing around like tomcats filled with birdshot."
"Pardon was throwing the mud high as he ploughed."
"McBrain gathered the damp horsehide and charged."
"A convulsive gasp and Gerrard had it."
"The fielding on both sides was green with saffron touches."
"The signal to turn the electricity on was made by Allendort."
"Weatherwax pored it through to left."
"Moore nipt a single off Sheppard."
"Towns and Nicholson grabbed the bounding atmosphere."
"Bean and Moore got demerits for seizing their right feet."
"Bailey tried a damp sling."

COMPARISONS.

Montreal Witness: Comparisons are odious, the saying goes, but, however that may be, they are at any rate interesting. With the season rather more than a third on the way through, the standing of the clubs in the Eastern League ranks during the past three years compared with that of previous years shows some remarkable changes in the form by the competitors.
The Royals appear to have been pretty consistent and still hover about near the bottom of the season division. The most noticeable point in the whole bag of tricks is the meteoric career of the Toronto Club. At this stage of the game two years ago they were leading the second division, last year they were at the foot of the table, and now they are at the top, and appear to be likely to stay there.

UMPIRE IN FULL CONTROL.

The following item explains itself: Sporting Editor Star: Two teams A and B, play a town league ball game after tea. The umpire states that they are to play seven innings. A team leads by 5 to 1 at the 11th inning. B team goes in for their 7th inning with 3 runs behind. They score 2 runs, have a man on 2nd and a man on 3rd, and only one man out. When A team's manager asks to call the game, when the umpire does not do, B team scores two more runs and wins the game, 7th inning equal, by 8 to 2.

A team's manager protested the umpire's decision on account of darkness. The committee on protests decided that the game revert to the 11th inning, score 5-4, in favor of A team at the time, and orders two more innings to be played to decide the game. Is this a just or proper decision?—Lindsay Baseball Fan.
The game should stand as played. The umpire is the sole judge on questions of fact and his decision should be final. The committee on protests should have disallowed the protest and should have upheld the umpire in his decision.—Sporting Editor Star.

NERVOUS INDIGESTION.

A Severe Case Cured by Dr. Williams' Pink Pills.

"I suffered so much from nervous dyspepsia that I feared I would become insane," says Mrs. Alfred Austin, of Varney, Ont. "For months," says Mrs. Austin, "I was prostrated with this trouble. I got so bad I could not eat a mouthful of food without it nearly choking me. I was affected with such terrible feelings of dizziness and nausea that I had to leave the table sometimes with just two or three mouthfuls of food for a meal. My nerves were all unstrung, and grew so weak that I could not even sweep the floor. In fact, my nerves affected me to such an extent that I feared to be left alone. I could not sleep at nights, and used to lie awake until I feared my reason would leave me. I was taking medicine constantly, but it did me no good. I had used Dr. Williams' Pink Pills on a former occasion with good results, and at last I determined to try them again. I can say nothing better than that these pills have been a blessing to me, as they have made me well again. Every trace of the indigestion is gone, and my nerves are as strong and sound as they were in girlhood. Now I can eat anything that is on the table, and I get sound refreshing sleep at nights. All this I owe to the faithful use of Dr. Williams' Pink Pills, which I shall never cease to praise."

Dr. Williams' Pink Pills fill the veins with new rich blood. That is why they strengthen the nerves and every organ in the body. That is why they cure all troubles due to bad blood, such as aching nerves, such as anemia, with its grinding, wearing backaches, headaches and dizziness, rheumatism and neuralgia, heart palpitation, indigestion, kidney troubles, and those special ailments that render the lives of so many women and growing girls a burden. But you must get the genuine pills with the full name, "Dr. Williams' Pink Pills for Pale People," on the wrapper around each box. Sold by all medicine dealers or by mail at 50 cents a box or six boxes for \$2.50 from the Dr. Williams' Medicine Co., Brockville, Ont.

Barn Raisers in Ops.

The house of Mr. T. Curries, North Ops, was the scene of festivities on June 26th, the occasion being the raising of a new barn on a stout foundation. A large crowd was present and a jolly time spent. The frame structure is 40x60 in size, and will be a great improvement to the farm. Mr. Neil Gray built the frame work and Mr. John Nesbitt the stout work.

Trip Through the Canal.

Orillia Times: Last Friday the Str. Ella took a party to Kirkfield Lock. The trip was a very pleasant one, though much floating and sunken drift wood was encountered, and a large boat would have difficulty in navigating the canal at present. Between Lakes Simcoe and Kirkfield there are five locks, five swing bridges, and two overhead bridges. The opening of the first lock at Kirkfield on Saturday, July 6, will complete 600 miles of navigable canal, and gives a direct water route between Orillia and Peterboro.

Seasonable Recipes.

Pineapple Marmalade.—Remove the skin and eyes from the pineapples. Then grate the pulp from the hard centre. Weigh the juice and pulp together, and allow the juice of one lemon and three-fourths of a pound of sugar to one pound of pulp and juice. Let the pineapple simmer over the fire until well scalded, then add the lemon juice and the sugar, mix hot in the oven, and let the whole cook until when tested on a cold saucer no watery liquid separates from the mass. Store as in other preserving.

Rhubarb and Orange Peel Jelly.—Cut a pound and a half of rhubarb into pieces an inch length, sprinkle over them a cupful and a half of tender orange peel cut into fine bits, and also a little hot water. Cook directly over the fire or cover and bake, until the rhubarb is tender. For three cupfuls of this softening one-third a package of gelatin in one-third a cupful of cold water; when well softened turn into the hot rhubarb. Harden in a mold. Serve with cream, flavored and whipped with an egg beater. Garnish with figures of candied orange peel. Cook the peel in sugar and water if it is necessary to soften.

REPORTS ADOPTED BY COUNTY COUNCIL

Supplementary Recommendations Introduced by Finance and Assessment and Equalization Committees.

Below we present second reports introduced at the adjourned session of the County Council, which met Tuesday and Wednesday.

EQUALIZATION REPORT.

The second report of the Equalization committee was introduced and adopted as follows:

Gentlemen.—On the re-assembling of the Council after the adjournment your Committee entered upon the consideration of the report of the valuers of the real property in the county. A comprehensive memorandum prepared by the county solicitors relative to the equalization of the assessment has been submitted. The valuers have attended at the sittings of your Committee and made statements respecting the procedure followed in discharging their duties; and your Committee have verified themselves of the opinions of R. A. McDiarmid, esq., one of the solicitors, R. J. McLaughlin, esq., K. C., and Thomas Stewart, esq., barrister, as to the legal sanctions possessed by the Council to increase or decrease the values fixed by the valuers.

Your Committee beg to recommend that the value of the real property in the respective municipalities, set forth in the report of the valuers, be made the basis of the equalization of the real property in the County until such values may be varied in accordance with the provisions of the Assessment and Municipal Acts, and that the report of the valuers be appended to this report and made a part of the same.

It has become apparent to your Committee that the business assessment and taxable income of the municipalities must be equalized and added to the value of the real property. Your Committee recommend that the amounts of the business assessment and taxable income shown in the assessment rolls for the year 1906 be the amounts of such assessments for the purpose of the present equalization.

Your Committee beg to recommend that the values of the real property, the business assessment and the taxable income, set forth in the schedule annexed hereto be the qualified values, and that the total of such values shown in the schedule after the name of each municipality be the required value of such municipality for the purpose of levying county rates in and for the year 1906, and that leave be given to introduce a by-law to give effect to the foregoing recommendations, and to provide that in case of appeal the Council is willing to have the final equalization of the assessment made by the County Judge.

Your Committee beg to recommend that the equalized value adopted in the year 1906 be the basis for the purpose of levying the county rates in the present year.

FINANCE AND ASSESSMENT.

STURGEON POINT JOTTINGS.

Happenings of Note at Lindsay's Popular Summer Resort.

Evening Post of July 2.

Dr. Robt. Allen's new headquarters bearing completion, and the painters will be at work on it in a few days. It bids fair to be the finest looking structure of its kind on the shore line. It contains several sleeping apartments upstairs, in which the Dr. will take up his quarters.

Every resident of the Point will learn with pleasure that our old friend, Mr. C. H. Graptham, of Toronto, who was seriously ill all winter and spring, has picked up in health so satisfactorily that he hopes to be able to complete the cure by spending a month or six weeks at the Point. He will arrive shortly, and will camp with Dr. Allen, taking his meals at Dickson's popular boarding house.

Mr. F. Knowlson, Town Clerk and Treasurer, and family, have again taken up their residence for the season in the Flood cottage.

Mr. A. O. Hoxe has meant work building a substantial dock for his yacht in front of his handsome cottage. The dock makes the fourth one dock constructed this season, each costing from \$300 to \$800.

The wild life to be seen on the river constitutes one of the chief charms of the trip to and from Lindsay. Canoes, bitterns, mudhens, grebes, wood ducks, blackbirds, kingfishers, fish hawk, etc., are numerous, and passengers on the Str. Knibbison the other morning were introduced to a new variety. While the steamer was passing a raft of drift wood a couple of turtles that had been sunning themselves on the logs, or perhaps gathering flies

Gentlemen.—Your committee have examined the report of the auditors and statements of accounts for the year 1906, and beg to recommend that the same be received and adopted.

Your committee have given special consideration to the suggestion in the auditors' report relative to commissions paid on the amount of fees for auctioneers' and pedlars' licenses, in certain cases, and beg to recommend that all resolutions heretofore passed providing for the payment of commissions be rescinded by the adoption of this clause, and that the special duty of enforcing compliance with the provisions of the by-laws affecting auctioneers' and pedlars' licenses be entrusted to the high constable of the County either to take action himself or by any constable whom he may direct or authorize, and that ten per cent, be paid by the treasurer on the amount of any license fee contributed by reason of such action on the order of the high constable, it being understood, however, that the right of duty of any constable to prosecute under the statutory provisions are in no wise restricted by the terms of the clause.

In further reference to the House of Refuge case, respecting which a recommendation was made in a former report, your committee having heard the report of the meeting of the Board of Management held on the 21st inst., beg to express approval of the action of the Board and of their decision, and that no further action be taken in the matter.

Your committee have considered the estimates as set forth, following:

Less amount to be allowed the Town of Lindsay, Police Magistrate's salary	58.00	
House of Refuge maintenance	2993.44	
House of Refuge buildings, etc.	1042.35	4035.75
House of Refuge debt-bare rate	2944.00	
Less amount levied for int. 1906 for 1907	1600.00	1344.00
		\$34188.00
A rate of 2 6-10 mills on \$13,171,522.00, the value of the County as required in 1906 would realize	34246.00	
Less to be allowed to Lindsay	58.00	
		\$34188.00

Your committee beg to recommend that the rate be 2 6-10ths mills on the assessed value adopted in the year 1906, and that the amounts of the estimates be apportioned accordingly.

Christian Charity.

(Kingston Whig.)

The police magistrate of Brantford has been asked to resign. In a moment of irritation he spoke disrespectfully to a preacher. The grievance kept for a couple of years, and then, as somebody wanted the magistrate's job, it had to be avenged. And this is Christian charity.

NOTICE TO OUR SUBSCRIBERS.

In last week's issue we are enclosing a number of bills for subscription due on The Post. Our subscribers are urged to realize that we need the money very urgently just now to meet pressing liabilities, and we trust they will respond promptly. In no case is the amount large, but no doubt our friends will readily understand that when we have a number of such accounts they total up a considerable amount, and if each subscriber who owes us a dollar or more, responds quickly, we shall feel greatly obliged for the help given.

A SHIFTY PREMIER.

Leader Graham makes the point that Mr. Whitney has changed his politics since he was in Opposition. His talk at one time was free books. Now it is cheap books.—Kingston Whist.

There have been many changes in Whitney's "policy" points out the Hamilton Times. He was going to take the license administration out of politics. He has made it a partisan machine. He was going to make the Ontario civil service safe and unpartisan. He has adopted the worst features of the Yankee spoils system. He was going to develop electric power and make it as "free as air." He adopted a farcical scheme which gives the Government an immense patronage and loads on the municipalities all cost and all risk. He was going to abolish the "robbery" and "outrage" of the succession duties. He immediately sets about making them more onerous and applies the law to estates of as low as \$10,000. He was going to reduce taxation. He has been diligent in seeking subjects for taxation. He denounced the Liberals for extravagance in officials and salaries. He multiplies officials and increases their salaries. He changed what the Liberal Ministry was excessively paid. He adds \$2,000 apiece to his own and his colleagues' remuneration. Oh, yes! Whitney has drifted far from his Opposition policy promises.

EDITORIAL NOTES.

In two months Canada's foreign trade has amounted to 9 1-2 millions. That is pretty good for a youngster.

Mr. Bowden recalls the assurance of Sir Wilfrid Laurier and says he does not expect a dissolution of the federal parliament before the next session. Perhaps Sir Mackenzie will now reverse his opinion.

The Toronto Telegram is disgusted with processions, and proposes to relegate them all to the back streets. It says the circus procession, twelfth of July parade and every other impediments to street car traffic must go.

The Dominion Radiator Co., Toronto, has been fined \$250 by Chief Justice Mulock for conspiracy in restraint of trade because of an agreement with the Plumbers' Association to differentiate against all non-members thereof. Another blow at grasping combinations.

The Government bill for qualifying women to sit as aldermen and councillors on county and borough councils was carried in the Imperial House on its second reading by 111 votes to 33. The success attending this measure shows that the suffragist movement is having its influence on public opinion.

In the hope of saving \$1,500,000, estimated to be lost each year through uncollected fares, the Metropolitan Street Railway Company, of New York, has purchased a hundred and fifty cars, built somewhat after the plan of the Montreal cars. They have a large rear platform, go constructed that fares will be taken when the passengers enter, and exit will be through another door. These may-as-you-enter cars are said to be very convenient and comfortable,

save the conductor as well as the passengers a lot of trouble, and also save the company much loss through uncollected fares.

The average rate of duty on dutiable imports in the last six months has been 26.74 per cent, as compared with 27.05 in the corresponding period of 1906. The rates on all imports were 15.81 and 16.31 for the same periods. The British preference was 21.15 per cent, under the new tariff, as compared with 21.72 per cent, formerly.

The Opposition is half scared to death that there will be a Dominion election this fall. The leaders have been holding meetings to consider the situation, and the party press has been declaring that if Laurier does not hold another session before dissolution he will have broken his sacred pledge to Borden. All of which goes to show that the Tories recognize that they are not in a position to win an election, and that they are now starting for wind.

Chicago street railways are to be rehabilitated at a cost of about \$40,000,000, and if the council desires, the scheme will include a complete double decked system of subways for the business district, involving three trunk lines running north and south through the city close to the surface, the west side being served by means of three trunk lines deep enough to come under the Chicago river. The plan makes the city a sharer in the profits of the system.

Catholic Register: The fact is that there is too much gambling in all conditions of society—in work and business as well as in recreation. To cure the evil on the race track is like a poor fellow trying to be sober for a month out of the year. When the damoz who flock to the races, merely to have their dresses described in the morning paper stay at home, or attend with greater simplicity, we have look for the improvement which is surely needed, but which in our opinion will never be attained by an act of legislation.

It is pleasant to read of honors being paid to an old employee in these days when old men have to sandpaper their hair and shave off their whiskers to enable them to go hold some class of jobs. The old employee, who was honored by the T. Eaton Co., Toronto, recently, was 80 years of age and is still in the employ of the firm. They entertained him and his wife at a wedding feast on their golden wedding day, and presented him with a purse containing \$500 in gold. Who says corporations have no souls, remarks an exchange, in alluding to an event in which the parents of Mr. Adam Watson, of this town, recently figured.

Goldwin Smith notes that the trouble in India has passed away, as it was pretty sure to do, but he is not clear as to the future. "Nature," he says, "is still there, forbidding the resting of English children in Hindustan, and thereby the permanent occupation of the country by the English race. Military occupation may be carried on long, but it can hardly be carried on forever. When it ceases, what will be the condition of India?" It is too early to despair yet. Perhaps British respect and example may in time make all present guesses worthless. Half a century or so is but a small period in the life of a nation.

Referring to Lord Dundonald's resignation from the British Army because the War Office left him without a job, the Toronto Saturday Night, which might be expected to look on the favorable side of His Lordship's case, says:

Lord Dundonald was very popular in Canada, and his ability as a military man was held in high respect by officers of the militia, but it might as well be admitted, at this date, that he placed himself at the disposal of unwise counsellors when he took on a quarrel with the Militia Department. That was the one thing that he should not have done. In doing that he destroyed all his other work and made impossible all that he aimed to do. Not only so, but the strife, of which he became the centre, led to the abolition of the office which he held. The fact is, Dundonald treated the Minister of Militia as if he were merely a clerk to register his desires, instead of being the real head of the forces.

STORE PATRONS READ THIS.

Ladies and Gentlemen.—We wish to address you on a very pleasant subject, to wit, the five o'clock closing movement, which went into effect yesterday. Make it a boon and a pleasure to the down-trodden clerks by doing your trading early in the morning, if possible, because it is cooler, and the clerks, being calm and collected, will give you their best service and attentions before they are worried in the afternoon rush by that old worn-out phrase, "WILL IT WASH?"

Ladies, our sympathies go out to other clerks in other occupations who do not enjoy the five o'clock privilege the dry goods clerks have. Could you not start a movement that would extend to clerks in other trades? We are sure it would be highly appreciated, and result in even a closer attention to your wants, if it were possible. What do you think of it ladies? Try it.

Men, the clothing stores are included in this 5 o'clock closing, so hope it is not necessary to give you any advice.—Yours, etc., THE DRY GOODS CLERKS.

Mrs. Adamson's Recital.

Mrs. Drechsler Adamson, violin teacher, of Toronto, gave another of her interesting recitals last Tuesday at the home of Mr. W. Flavelle by her pupils to a number of invited friends. The entertainment given was a most enjoyable one, and the excellent work shown by those taking part, and the marked advancement shown by several pupils who have taken part in previous recitals, is a credit to both the pupils and their excellent teacher.

Visited American Cities.

—Dr. J. Neale has returned from an extended two weeks' holiday to Michigan and other points. The Dr. visited Grand Rapids, Mount Pleasant, Rosebush and other thriving towns, and speaks highly of the country. In the vicinity of Mount Pleasant the sugar beet industry, the Dr. says, has reached considerable proportions. The artesian wells of Rosebush were also a subject of comment by Dr. Neale.

Out-Herding Herod.

(London Tit-Bits.) An American visiting Dublin told some startling stories of the height of New York skyscrapers. "Ye haven't seen our newest hotel, have ye?" asked an Irishman. "No," replied the Yankee. "Well," said the Irishman, "it's so tall that we have to put the two top storeys on hinges."

SUDDEN DEATH AT KIRKFIELD

Duncan MacKenzie, Brother of Railway Magnate, Passes Away (Special to The Post.) Kirkfield, July 3rd.—Duncan MacKenzie, eldest brother of Wm. MacKenzie, of the Canadian Northern Railway, passed away this afternoon at his residence here from heart failure.

Deceased was born in Montreal on May 23rd, 1833. He leaves three sons, John, Charles E. and William, and three daughters, Mary, Melinda M. and Sarah C. Four brothers also survive him, Alexander, William, and R. Ewen, of Toronto; Robert, of Winnipeg; and three sisters, Mrs. John MacTavert and Mrs. C. R. Stovel, of Winnipeg; and Mrs. L. MacFadden, of Kirkfield. The funeral will take place next Friday from the residence to Lakeside cemetery.

C. P. R.'S NEW CROSS-CONTINENT FLYER.

"Trans-Canada" Makes Fastest Time Across America.

The business of the country is growing to such an extent that the C.P.R. finds it necessary to run an additional train between Montreal and Vancouver, making three trips a week during July and August.

This train, which will be known as the "Trans-Canada Limited", will make the fastest time of any train across the American continent.

It will carry baggage car, dining car and palace sleeping cars only, of the very latest design and with most modern appointments, and only first-class passengers will be carried. She will leave Montreal on the first trip July 2nd. Bertha can be reserved in Toronto for passage from North Bay to points west of Winnipeg at which the "Trans-Canada Limited" stops.

No passengers will be carried east thereof as Winnipeg passengers arrive only one hour later by taking the "Imperial Limited". List of stops, full particulars and berth reservations can be obtained at C.P.R. local ticket office, or from C. B. Foster, D. P. D., C.P.R., Toronto.

Police Court Calendar.

That it is a bad policy to tamper with the law too far was demonstrated by the heavy fine administered to Mr. Wm. McNaney, of Victoria Road, on Saturday last. The charge was selling liquor after hours, preferred by License Inspector Thornbury. The fine was \$40 and costs.

BIRTHS.

BROWN.—In Lindsay, on July 1st, to Mr. and Mrs. W. Brown, a daughter.

PORTER.—At 649 Boulevard St. Joseph, Montreal, on Saturday, June 29th, 1907, to Mr. and Mrs. H. S. Porter, a daughter.

MARRIAGES.

PURDY-EDGAR.—At St. James' rectory, Fenelon Falls, by the Rev. W. H. A. French, on Tuesday, June 25th, 1907, Mr. Bertram C. Purdy, of Bobcaygeon, to Miss Minnie E. Edgar, of Red Rock, Verulam.

GATHERED BY POST REPORTERS ON THEIR DAILY ROUNDS

What is Happening in Town and the Country About Us.

—Mr. B. Gungl is improving his livery stable.

—Mr. Lobbie Calder has taken up residence on William-st. north.

—Mr. A. Clarke has installed a new silent salesman in his tailor shop.

—The Grand Orange Lodge of British North America will meet at Midland next year.

—For some time past no watchman has been stationed at the U. T. R. Kent-st. crossing.

—Mr. W. A. Fanning is having a balcony built on the southern wall of his building on William-st.

—During the past month License Inspector Thornbury has collected over \$200 in fines from breakers of the liquor law.

—To those who rock a little boat we confidently say: Please do not wear your Sunday coat. The lake is wet to-day.

—Lindsay builders are now being supplied with lumber on stone across the Fenelon Lake section of the Trent Canal. It is brought down anaways by Mr. Parker Davis.

—The garden party under the auspices of St. Paul's church held last Friday on the lawn of Rev. Mr. Marsh, the Rector, was a decided success and was largely attended.

—St. James' Sunday school, Orillia, will run its excursion down the Trent Canal to the new hydraulic lift lock at Kirkfield on July 10. This will be the first excursion from Orillia down the canal.

—Drift wood gatherings are busy in the drowned land along the river. The drift collected is rafted and towed to town, where the owners go at it with crescent saws and cut it into fuel for the winter.

—Peterboro considers itself \$175 out in one particular as a result of the visit of Forepaugh & Sells Bros. circus. The damage done to Lockport by the big circus wagons will amount to \$200, and \$25 was the amount of the license the city collected.

—At the recent closing of Moulton's Ladies' College, Toronto, the principal, Mr. Edwin A. Hardy, formerly a teacher at the Lindsay Collegiate Institute, made a plea for more co-operation between the school and the community in domestic science and other branches of study.

—(Urbidge Journal): The second flowing well near the park pond is not nearly so good as the first, but is clear and running steadily. The flow at No. 1 is about 57,000 gallons per day, according to the report of the statement at Council Chamber last evening.

—By an Act passed last session it is made compulsory to sue farmers for overdue accounts for machinery, etc., at the Division Court nearest their home, and Act is held to be compulsory even after a farmer waives his right to the benefit of its provisions.

—It is get quick and certain relief from Dr. Shoop's Magic Ointment. Please note it is made alone for piles, and its action is positive and certain. Itching, painful, protruding, or blind piles disappear like magic by its use. Large nickel-capped glass jars 50 cents. Sold by all dealers.

—Mr. Frank Folbert has—perhaps unwittingly—become a public benefactor. Recently he had an eight placed in position over his doorway, and the additional light thrown upon the roadway and dark spots in the vicinity is welcomed by all. His premises is now known as "The Arc Light" shop.

—In a few weeks people will be coming the heavens to catch a glimpse of an approaching comet. This comet has recently passed its perihelion, and is now seen with eyeglasses early in the morning towards the southeast. In a few weeks it will be distinguishable to the naked eye.

—Mr. Robt. Bryans has severed his connection with the Baker & Bryans lumber industry, his large holdings of stock having been purchased by Mr. Baker and a number of associates. Mr. B. will take things easy for a time and may possibly take a trip West to look after his interests there.

—Toronto Star: Mr. W. R. Gray, of 104 Delaware-ave., has in his garden sweet peas which were in bloom on June 23. This is pretty early for this flower, and Mr. Gray is of the opinion that he has the first sweet peas of the season.—Mr. Ed. Armstrong, of Dundas st. east, has secured fine specimens of the sweet pea in bloom on June 19th.

—We are informed that at least three circuses may visit Lindsay this season, each of considerable size and well-known repute. Hargrave's circus will be here on July 12th. This circus has never been seen in Canada before. Cole Bros. will follow to Lindsay circus-goers, and Hagenback & Wallace's big circus and menagerie, may also be seen in Lindsay.

—We have had the pleasure of scanning the first number of The Saturday Sunset, published at Vancouver, B. C., the proprietors of which are Mr. J. Ford, (town), and Mr. J. P. McConnell, artist and writer, late of the Saturday Night, Toronto. The new weekly is a replica of the latter, and will no doubt attain a great sale in the West. The first issue was made up of 20 pages.

—I will mail you free to prove merit, samples of my Dr. Shoop's Restorative, and my book on either Dyspepsia, the Heart, or the Kidneys. Troubles of the stomach, heart or kidneys are merely symptoms of a deeper ailment. Don't make the common error of treating symptoms only. Symptom treatment is treating the result of your ailment and not the cause. Weak stomach nerves—the inside nerves—mean stomach weakness, always. And the heart and kidneys as well have their controlling or inside nerves. Weakness in these nerves, and you inevitably have weak vital organs. Here is where Dr. Shoop's restorative has made its fame. No other remedy ever claims to treat the "inside" of the body. Also for bloating, indigestion, bad breath or complexion, use Dr. Shoop's Restorative. Write me to-day for sample and free book. Dr.

SCHOOL TROUBLE SETTLED.

ARBITRATORS DECIDED ON TWO SCHOOLS.

Met in Fenelon Falls on Saturday Last—Their Report on the Question.

The arbitrators appointed by the County Council to settle the question whether to have one school section or two in the Union S. S. of Fenelon, Verulam and Sturgeon, met in Fenelon Falls on Saturday. Previously it had been one school section and the school had been burned. Some of section wanted two schools while others stood up for one. After considerable discussion the County Council appointed arbitrators. They met in Fenelon Falls on Saturday, and presented the following report:

We, the arbitrators, appointed by the Council of the County of Victoria to consider the matters of U. S. S. No. 3, Verulam, Fenelon and Sturgeon Point, after examining the reports and securing all available information, have decided unanimously, on the following points:

(1) The said U. S. S. No. 3, Verulam, Fenelon and Sturgeon Point, shall be changed in boundary, the northern part thereof being formed into a nonunion section, to be known as S. S. No. 13, Verulam. This new section shall contain the parcels of land known as W. 1/2 of lots 19, 20, 21, 22, 23, and the N. 1/2 of lot 24 in the first concession of Verulam, and those known as the E. 1/2 of lots 19, 20, 21, 22, 23 and 24 in the first concession of Verulam. Also those known as the W. 1/2 of lots 19, 20, 21, 22, 23, and 24 in the second concession, and those known as the E. 1/2 of lots 17, 18, 19, 20, 21, 22, 23 and 24 in the third concession of Verulam.

The arbitrators further recommended that the S.W. 1/4 of lot 24 in the first concessions of Verulam and the E. 1/2 of lot 25 in the first concession of Verulam, and the second concession of Verulam should form a part of S. S. No. 13, Verulam. These lots are now attached to the village of Fenelon Falls for school purposes. The remaining part of U. S. S. No. 3, Verulam, Fenelon and Sturgeon Point shall be known by the same name as before the change.

(2) We also determine that as ordinary expenses of running U. S. S. No. 3, Verulam, Fenelon and Sturgeon Point, as now constituted, (the old section) shall be paid till the close of 1907, and any balance then remaining shall be divided equally between U. S. S. No. 3 and the newly formed S. S. No. 13. This clause does not affect this award going into operation at once, as far as erecting new school buildings is concerned.

(3) We also determine that on and after the first day of January, '08, the following shall be the percentage for school purposes of equalization for U. S. S. No. 3, Verulam, Fenelon and Sturgeon Point, viz., Verulam 45 p.c., Fenelon 30 p.c., and Sturgeon Point 25 p.c.

Those present from the southern portion (i.e. U.S.S. No. 3) gave the assurance that they were willing to erect on or near lot 15, in the first concession of Verulam, those from the northern portion (i.e. S.S. No. 13, Verulam) likewise gave the assurance that their new building would be erected on or near lot 23 in the second concession of Verulam.

The Kirkfield lift lock is a great affair, but one small boat can get a good deal more in proportion.

Circus day comes on July 12th. Between the Orangemen's parade and the circus attraction the farmers will have lots of amusements.

Did't ever notice the joyful expression on the face of a man wearing a straw hat out in a rainstorm? It's very amusing—if yours is a felt one.

The hearts of many clerks in the stores were made glad by the inauguration of early July and August closing yesterday. (The scheme is a good one.)

Our Kirkfield correspondent states that the general opinion in his vicinity among those who tried the high school entrance exams. is that they were rather difficult.

Reports say that a terrific storm raged in Fenelon Falls and at Sturgeon Point on Dominion Day. The lightning was extremely vivid and dangerous. No damage is as yet reported.

W. B. Corbett and Frank Hall, of New York, who are stopping at Brockville, caught two lunge this week weighing 38 and 25 pounds respectively. These fish were caught on eight and a half ounce rods.

Let your pain free. To show you first—before you spend a penny—what my Link Pain Tablets can do, I will mail you, free, a trial package of them.—Dr. Shoop's Headache Tablets, Neuralgia, headache, toothache, period pains, etc., are due almost to blood congestion. Dr. Shoop's Headache Tablets simply kill pain by coaxing away the unnatural blood pressure. That is all. Address Dr. Shoop, Racine, Wis. Sold by all dealers.

Get a free sample of Dr. Shoop's "Health Coffee" at our store. It is clear of stimulants, your stomach, liver heart or kidneys, then try this clever coffee imitation. Dr. Shoop has closely matched Old Java and Mocha coffee in flavor and taste, yet it has not a single grain of real coffee in it. Dr. Shoop's Health Coffee is made of cereals, with malt, nuts, etc. Made in a minute. No tedious wait. You will surely like it. Sold by all dealers.

For a Hay Crop.

Indications point to a poor hay crop in this vicinity this year. If clover hay there will be very little, and the crop of timothy is reported to be very thin. The conditions are not very favorable for the hay crop. It is the cause. Hay harvesting will commence in a couple of weeks.

TOWN COUNCIL HOLD SESSION

ADDRESSED BY MANY CITIZENS—PETITION IS PRESENTED

Purchase of Sylvester Lot For Park Purposes Ratified—Other Business.

The Town Council held a regular meeting last Tuesday in the Council chamber, Mayor Vrooman and every alderman being present.

The minutes of former meetings held during the month were read and approved.

The following communications were read by the Clerk:

From Mr. Geo. Foster, tendering his resignation as poll tax collector.

From the Ontario Municipal Association, presenting statement of annual fee for the town of Lindsay as a member of the Association, and giving dates of its next meeting.

The extract from the minutes of the Board of Health regarding the passing of a by-law prohibiting the keeping of certain animals within the fire limits and in reference to the unsanitary condition of the premises of Mrs. Eva Jackson.

The above matters were referred to the Finance Committee.

From Mr. Lawrence Duke, asking for the refund of the interest added to arrears of taxes upon his house property.—Referred to the town solicitor for his opinion as to making such remission.

From Messrs Horn Bros. Woolman Company, Ltd., complaining of the overflow of surface water near their warehouse on William-st.—Board of Works.

From William Woodley, asking for sufficient plank to construct a crossing on Lindsay-st. south.—Board of Works.

The following accounts were presented for payment and were referred to the various committees to which they belong:

Dundas & Flavelles Ltd. \$20.00

Light Heat & Power Co. 350.00

Flavelles Limited 223.00

Jos. Maunders & Son 508.00

Baker & Bryans 1.50

Kennedy & Davis Mfg. Co.75

James O'Connell 150.00

The report of the Market clerk for the months of April and May was read, and on motion was ordered to be filed.

On motion, Mr. Thomas Stewart, on behalf of Mr. James Hamilton and the company known as the Dominion Wheel Company, now under organization, was heard asking that the assessment of the company's plant be fixed at \$1000.00 for a term of ten years, and that the company be given free water, not exceeding \$20 annually for same term as an inducement to establish a carriage wheel factory plant at Lindsay.

Moved by Ald. Weldon, seconded by Ald. Devitt, that the assessment of the Dominion Wheel Company, occupying the property of Mr. James Hamilton, be fixed at \$1000 for the year 1907, and that they be given free water, not exceeding \$20 per year, upon their establishing a carriage wheel factory at Lindsay and employing at least ten men, and that this Council recommend the succeeding councils for the next nine years to grant the Dominion Wheel Company, Ltd., similar concessions.—Carried.

Mr. Rea read a petition from Mr. J. A. Gillogly and others for a sanitary sewer and cellar drain on Glenelg and Huron-sts., connecting with the Russell and Ridout-st. sewer, and a petition from Mr. Samuel Walker and others for a granolithic sidewalk on the east side of Sussex-st. between Russell and Glenelg-sts. The clerk having certified to the sufficiency of said petitions, they were received and referred to the town commissioner for his report.

The town commissioner having reported upon the petitions, the report was read and the motion for the sewer and cellar drain was adopted, and the clerk was instructed to advertise a Court of Revision for same. The report for the construction of the sidewalk on the east side of Sussex-st. was referred to the Board of Works for consideration.

Mr. Rea also read a petition from Mr. J. H. Fleury and others for a granolithic walk on the south side of Glenelg-st. from Lindsay to Harold-st. The clerk stated that the petition in its present form was insufficient, and on motion Mr. Fleury was heard presenting a petition from himself and others urging that the work be proceeded with upon the initiative plan.—Referred to the Board of Works for consideration.

On motion Mr. McGilvray was heard. He said on receiving his pay as fireman from the town clerk he got a short of what he was entitled to. The shortage, he was informed, was the result of an unaccounted for by the chief on account of his being late at a recent fire. He said he had been fireman for five years and this was the only occasion he had been late, and it occurred by the clock being sent up on the alarm system, but taken at the hall.

The matter was discussed by the Council, and while they apparently favored remitting the fine, they decided to consult Chief Bell before taking any action. The matter was referred to the Town Property Committee.

Mr. J. Ingram, a resident of Lindsay, addressed the Council in reference to an unsightly hole left by removing the old plank walk in front of his premises.

Ald. Rea said the property owners in petitioning for the granolithic walk, had agreed to fill in any hole left by the old walk.

Ald. Begg said the town did not undertake to make boulevards where works had been, as the expense would be more than the town finances could afford. He also called attention to the need of a granolithic crossing at the Court House, on Cambridge-st. north of Fenelon-st.

The crossing was a very important one, and the crossings were entirely gone.

The Council concurred with Mr. Begg and a motion was made by Ald. Begg, seconded by Ald. Jordan, authorizing the construction of the crossing.—Carried.

Mr. John Fleury addressed the Council in reference to a hole which had become a nuisance at the corner of St. Lawrence and Huron-st. He asked that the Council authorize the deepening of the present drain to let

the water away.—Board of Works.

Alex. Gullon made enquiry as to whether the sewer would be built as soon as the necessary legal steps were completed.

Mr. Burrows addressed the Council on the necessity of having two members of the Board of Health from the south ward in place of having three from the east ward and only one from the south ward. He thought the complaints from his ward would receive more consideration, were a member a resident of the locality.

In answer to an enquiry from Mayor Vrooman the clerk said the members were appointed for three years and as Mr. O'Reilly had only recently been appointed, a vacancy would not be created.

Mr. Chalmers also addressed the Council in reference to a nuisance that is maintained adjoining his property on William-st., and asked that the Council afford him some relief. He had offered to buy the property in order to get rid of the nuisance, and although he considered his offer a generous one it had been declined.—Board of Health.

The recommendation of the Board of Health to make Lindsay's Civic Holiday on the same day as that of Toronto, brought out considerable discussion. It was decided to allow it to continue as it had been.

A representative of a cement mixing machine addressed the Council on the merits of his machine, but as the season's work on the walks is about completed, the matter was not entertained.

Mayor Vrooman said that the purchase of the Sylvester lot for park purposes had been completed and wished the Council's sanction of the payment of \$300, the purchase money. On motion the expenditure was authorized after which Council adjourned.

CONCERNING PUBLIC OWNERSHIP

(Peterboro Daily Examiner.)
Edmonton seems to have made a
success of the ownership and oper-
ating of public utilities. Mr. G. J.
Kinnaird, one of the commissioners
of the city, who is on a visit to
Toronto, tells The World of its suc-
cess. As an instance of the city's
successful operation of its utilities,
Mr. Kinnaird cites the electric light
and power supply, where last year
the rates were reduced by 25 per
cent, after making full allowance
for the sinking fund and depreciation
of plant and paying all working
expenses. Even after all that there
remained an \$8,000 surplus, and fur-
ther reductions in prices are in con-
templation for the current year.
Edmonton has gone further afield
in the interest of its citizens. Find-
ing that the cost of coal acted as a
hardship on its operations, the
city has purchased a coal field of
its own, from which supplies will
later be obtained at much lower cost.
But the success of Edmonton has not
been achieved by "municipal opera-
tion in the ordinary sense of the
term. The municipal council, as a
body, has no hand in mending or
building matters in connection with
municipal operation. The function
of the Edmonton council is simply
legislative—the actual work of or-
derly administration is entrusted to
two paid commissioners, who get \$3-
100 each. The mayor is ex-officio a
commissioner. Under these circum-
stances the commissioners can, and
do, devote their whole time to the
duties of their office, and, being,
presumably capable business men,
distracted by no consideration which
would appeal to the ordinary coun-
cillor or alderman, can do the right
thing without considering concilia-
tion of electors, or interests with a
pull. The commissioners can do right
and fear not. It is probable that
these are the only conditions under
which municipal operations can be
successfully handled. There is con-
siderable municipal ownership in the
air in Peterboro at present. Before
undertaking the plunge, the City
Council should naturally study the
situation. The weight of evidence, as
furnished by the experience of Ed-
monton, Galveston, Texas, and other
southern cities, strongly favours
the commission idea. Many have long
held that municipal councils are so
large, and the personnel changes so
often, that agreement on the right
way to administer the public service
and opportunity to acquire the neces-
sary skill that experience alone can
give, are not easy and available. We
know that our Waterworks system
is well administered by a commission,
and if the membership were made
more permanent and the remunera-
tion larger, their duties might be
extended to include services in rela-
tion to other public utilities with
distinct advantage to the city. For
instance, the care of the streets and
all the work that comes under the
province of the Board of Works
could be much more effectively done
than under the present system, or
rather, complete lack of system.
Even a perfunctory consideration of
the question and the evidence afford-
ed by the experience of only a few

cities leads to the conviction that
municipal operation of public util-
ities can only be regarded with favour
by eliminating a municipal council
as a factor, and substituting an ef-
ficient commission. A board of ef-
ficient commissioners, a corporation of
four or five manages its business suc-
cessfully, whereas, a committee of
shareholders, elected by the other
shareholders under conditions simi-
lar to those which decide the elec-
tion of aldermen, would make a
muddle of it. Municipal ownership
and operation of public utilities are
only desirable when the work is
properly done, and the weight of
sound evidence is that it cannot be
properly done by a municipal council
except under conditions which the
postponement of the millennium for-
bid us to expect or realize.

MISCHIEF-MAKING.

The Montreal Witness deals very
effectively with that portion of Or-
ange Grand Master Sproule's mischief-
making address which referred to the
alleged object of Sir Wilfrid Laurier's
visit to Rome. It says:
"We doubt if Dr. Sproule, had he
been speaking in Quebec would have
quoted the Nationalist as a 'well-
informed French-Canadian organ,'
and especially as one likely to be
well-informed as to Mr. Fielding's
alleged dealing with the Vatican. If
Dr. Sproule knows anything at all
about this Province, which seems
doubtful, he knows that the Nation-
alist is not an organ of anybody ex-
cept of Mr. Oliver Asselin, that his
delight is in saying things that are
preposterous, and that, if its name
implies anything in the mind of its
readers, it means that it is section-
alist in the extreme. That Sir Wil-
frid Laurier and Mr. Fielding, after
such protracted and exhausting tasks
as have long engrossed them, should
visit Rome and Venice and other
foreign cities together, would not be
unnatural. Rumor couples their al-
leged visit to Rome with an effort to
improve our trade relations with the
Italian Government. Rumor never
fails to see significant purpose be-
hind the movements of the great.
They would, no doubt, when in Rome,
call on the secular magnates, and we
may assume that, if they could do
anything to promote good religion,
they would not fail. They would nat-
urally also call upon the Pope if
permitted. Sir Wilfrid is a Roman
Catholic and it would be only civil
for him to pay his respects. There
was a time when the Pope would
see anybody who had any dealings
with the King's Government. We may
rest assured that, if such a rule pre-
vailed now, Sir Wilfrid would not
have seen the Pope at all, as his first
duty as a Canadian Premier would
be to a friendly power. As for Mr.
Fielding, he would also, we presume,
call upon the Pope if occasion offered.
Possibly Dr. Sproule would do the
same. Certain it is that most emi-
nent tourists are willing enough
to take in such a function. Mr. Field-
ing might even think it would serve
him politically to do so. Most politi-
cians have that question eternally
buzzing in the backs of their heads.
Possibly, for the same reason, Dr.
Sproule would have denied himself
the pleasant experience. But to de-
clare that Sir Wilfrid Laurier and
Mr. Fielding visited Rome to secure
the sanction of the Vatican to Mr.
Fielding's succession, in view of
Canadian conditions, is such non-
sense that Dr. Sproule should be
ashamed to repeat it. The mischief-
making intent of the story should
have been obvious to him. But who
is authority, save Mr. Oliver Asselin,
for the idea that there is any
prospect of a change of Premier?
May that event be remote! A very
flimsy tale disposes of all this terri-
ble history. Mr. Fielding did not go
to Rome at all. At least, so we are
assured by the Canada, which is a
very well-informed French-Canadian
organ. So meantime until we can
convert them, let us accord to our
Roman Catholic fellow citizens the
ordinary right of citizens to have a
religion. If that religion has a par-
liamentary agent, it is no more than
every other organization has that can
afford it, little as ministers love such
representatives of special interests.
But let Dr. Sproule and his friends be
assured that their French-speaking
countrymen want clerical interference
in civil matters as little as they do.

While saying this, we cannot but add
that the language of the Canada in-
surance of Dr. Sproule's charge is
of a nature too bitter to repeat.
Offensive phrases used in either di-
rection between sections of our com-
munity are inflammatory and mis-
chievous.

TO CHECK INCENDIARISM.

The Monetary Times urges that
some steps be taken to ascertain the
causes of fires, and as Canadians
have been strangely remiss in making
any resolute, united effort to put a
stop to it. It seems to be nobody's
business. The Times has frequently
urged the wisdom of some system of
investigation into the cause of fires,
believing that such would tend to
diminish the general fire loss and ex-
pose incendiarianism. There are some
States in the neighboring republic in
which excellent results have been ac-
quired from such investigations. Our
contemporary points out that last
year the fire marshal system was in
operation in thirteen States and the
district of Columbia, and the effect
of the law and the efforts of mar-
shals under it in the State of Maine
is that, taking a period from May
26th to December 31st, there is
shown a reduction of incendiary fires
from 8.64 per cent. in 1895, year by
year, down to 1.10 per cent. in
1904. In the same period fires from
unknown causes were reduced from
32.54 per cent. to 20.23 per cent.
In North Carolina there have been forty
convictions under the law in four
years, and many prosecutions with
no convictions, but the prosecutions
were excellent deterrents, for we are
told: "The operation of the law has
been entirely satisfactory to the citi-
zens of the state, as well as to the
insurance companies. Nothing will
do more to lessen the fire waste and
reduce our insurance rates."
From other States come favorable
reports. Boston's fire marshal gives
facts bearing on the law, and its ef-
fect up to 1898. During the year
1897 there had been fifty-six arrests
and forty-one convictions under the
act, and the percentage of incendiary
fires in Boston that year was only 3
per cent, whereas in former years
the average percentage throughout
the state had ranged from 35 to 18
per cent. It was found in that year

that one-third of the total number
of incendiary fires were set for the
purpose of incendiary insurance com-
panies; 8 per cent. from motives of
revenge; 2 per cent. from insanity;
1 per cent. from pyromania.

In 1903 the Ohio fire marshal re-
ported investigations into 1,664 fires
that year, resulting in 91 arrests for
arson and 76 indictments. Of these
cases 36 resulted in convictions, 9
commitments to asylums for insane,
and 27 cases were pending when the
report was issued. These figures go
to prove the need for investigation.

What are the insurance men doing
that they fail to press this matter on
the Government?

SIR BEN
(Imp.) (5408) (12739)

The undersigned again wishes to
give the public notice that he still
has the pure bred Clydesdale stallion,
Sir Ben. This horse is proving him-
self to be one of the best stock horses
in this section of the country. Being
a good individual himself, and
having so much good breeding, he is
sure to make a marked improvement
in this class of the horse industry.
Sir Ben is a horse of great quality,
heavily built, with good bone
and of quick disposition; color
brown, with strip on face, and four
white feet with fine, silky feather.
He stands 17 1/2 hands and weighs
about 2000 lbs. He was bred by Pe-
ter Olgie, Old Mains, Renfrewshire,
Scotland.

PEDIGREE.

Sire, Sir Simon (5406) (10165), is a
horse of great breeding qualities,
standing in the front rank amongst
the best in Scotland, being a half-
brother to Baron's Pride, The Sum-
mit, and Guy Everard. Gr. sire Sir
Everard, has been champion on many
occasions, having won the Glasgow
premium three years in succession,
and has left an everlasting impres-
sion on the minds of all Scotchmen
to be one of the best ever owned,
being the sire of Baron's Pride and
other noted horses tracing back to
Top Gallant.

Darvel—1st dam, Lily of Old
Mains (7444), vol 27, by Kyles of
Fuba (4896) is a mare of great sub-
stance and quality, having on many
occasions taken prizes at the West
of Scotland Shows. 2nd dam, Nancy,
(3966) dam of Room at the Top, bred
by Wm. Dunn, sired by Darvel (222).
3rd dam, Jean, by Scotsman (759).
4th dam, Lily, by Prince Royal (647).
SIR BEN will stand for the season
1907 at his own stable, lot 10, con-
10, Emily. Terms—To insure \$14, to
be paid 1st February 1908.

Parties from a distance wishing to
leave their mares can arrange for
pasture.

Some Remarks on

Things in General

By "THE STROLLER."

The following letter speaks for itself:

Dear Stroller, I look forward with a great deal of pleasure to your remarks on things in general, and read them over with the same. In the main I agree with what you say, but there are some things that go beyond me, and I hope you won't think I am trespassing in referring to one of them. Last week you took up the question of gambling, and now I understand, made the assertion that anyone who bought wheat or stocks for a rise or fall was in the same class as one who bet on a horse race or a ball game. Don't you think the comparison rather odious? I know quite respectable men—good church members—in this town, who buy wheat or stocks, who would no more like to be classed as a gambler than as a bungler. Hoping you will explain a little further, believe me—Yours, MORE LIGHT.

We are very glad to have the above from our friend, and say that we will be pleased at any time to answer, to the best of our ability, any letter that any one may choose to send in, not that we profess to be an oracle, but just to keep up the interest. That is, with limitations. Such queries as, "Where was Moses when the light went out?" "Who was Cain's wife?" "What is home without a mother-in-law?" are posers, and we are afraid we would have to turn them over to our friend Alex. Patton, who could play rings around us in answering them, but with anything of an industrial or political or municipal nature we would be pleased to do our best.

To answer the above letter, we have always been taught that the only way to get money honestly was to earn it. Economists tell us that all wealth is the result of production or labor. If a man who may have nothing whatever to do with grain buys 10,000 bushels of wheat on margin, with the expectation that it is going to rise, and it rises 10c. per bushel, thus putting \$1,000 into his pocket—whose \$1,000 is it? Where did it come from?

The world is actually no richer—there is actually the same quantity of wheat, but he is \$1,000 ahead, and must have come from somewhere. The chances are that some other man, or men, have put up the same amount of money on the chances of a fall, and they have lost while the "bull" has won. This is called "bucking the tiger," and, in our estimation, simply one form of gambling. Sometimes a man with more money than brains, tries to corner wheat, or some other necessary of life, and if he is successful thousands of people starve or do with less than they actually need in order that he may gather his millions. If he loses, which more often happens, his family and friends suffer. The same thing takes place in the buying and selling of stocks. When it is done for an investment and a man buys outright, it has a semblance of propriety, but when bought on margin it is gambling, pure and simple. The gambler who stakes his all on the cast of a die or the turn of a card is no worse than the other—if anything, a shade better, for there is no hypocrisy about him—he admits he is a gambler. This get-rich-quick idea is the bane of our age. We see the results of it every day. Within the past year one bank has been completely wiped out, and another has had its capital and reserve cut in two, all the result of gambling.

There was a very foolish speech made the other day in Pictou by our friend the Premier of Manitoba. According to him, we were going to be swamped, especially in the West, by foreigners, and it would not be long before they would hold the balance of power. He said, further, that as there was no particular advantage to be gained in our connection with Britain, the present conditions, these foreigners, when they got in the majority, would want the present relations severed. We want to keep this column as free from politics as possible, but really it looks to us as if this speech was a part of a concerted plan to bully the people in power at Ottawa into asking for a referendum, in spite of Sir Wilfrid's plain statement that that was a matter entirely in the hands of the British people themselves. In the first place, Mr. Roblin seems to be entirely astray in his facts. The majority of people coming into our country are not foreigners, unless he counts the Americans as such. At the head of the list are the English, Irish and Scotch, the same people who peopled Ontario and made it what it is, and it can safely be conceded that they will count as good as one to six of any turbulent nation seeking people here, in the matter of keeping them in line. The next in numbers are coming from the great republic to the south of us. As a rule these are our own kind, the English people who have an ancestor either on one side or the other, or both, who were born here or in Britain, or themselves are expatriated Canadians. With the freedom we have in Canada, surely it will not take long for this class to become as truly Canadian as we to the main born?

Then the whole West right through to the Coast is being permeated by good leaven from Ontario and the Maritime provinces that will surely count for something. This leaven, then, just the natural foreigners, of what class are they? From reliable information published, it would appear that those who are settling are very anxious to be counted as Canadians—not Slaves or Douks, or anything else—just Canadians. These people are not fools, and they know a good thing when they see it. When they come to look into matters they will see that as a nation, it does not cost us a dollar to be represented in other countries. It does not cost us a dollar for a navy, and the little money we spend on soldiering is more to give this boys a outing than to scare anybody. Were we to cut off and separate, our

expenses for these three items would be at least \$15,000,000 a year to begin with, and an enormous increase as the years rolled on. Instead of spending it for non-productive trifles of that kind, we now are putting it into railways and canals, lighthouses and experimental farms. The foreigners who cannot see this and become thoroughly disgusted with it, had better get out walking stick, and the sooner the better. No doubt his neighbors can attend to him. INTERESTING FARM NOTES

CLOVER HAY BETTER TOO GREEN THAN TOO RIPE

John Jackson says: To make first class clover hay, and there is no other way, it should be cut when in full flower. When there is a large quantity to handle, begin several days earlier (better too green than too ripe)—and especially if the weather is favorable for cutting. Cut late in the day, to be put up on the following day—or it may be cut in the morning, as soon as the dew is off, to be put up the same day. When a little wilted, shake it up well; this is best done with the tedder, late in the afternoon. When the heat of the day is past, rake and put in small cocks, which should be turned bottom up every evening till sufficiently cured to put in the mow. If bad weather caps would be a great advantage. It is hardly possible to make the best clover hay and preserve the leaves without curing the cock. Much depends on just the sort of weather.

Arthur Johnston says: We count on cutting our clover when in full bloom, and we begin when the clover is quite dry. I mean in the afternoon. If the day is fine we put the hay tedder on after dinner, and if the day is still fine we put it in cocks when there is the slightest dew or rain on it. We then frequently take it into the barn next day if the weather remains fine. I think it would be better longer in cocks if the weather were settled. I do not like putting in the barn sooner than a day after being coiled. Clover only needs to be free from all dampness to be put in cocks. If it is very green, I am certain any kind of hay of this kind being coiled, even timothy, when it is raked up and put into the barn, you have dry grass, but not made hay.

R. S. Munson says: My plan is this: Commence to cut as soon as the dew is dried off the grass. As soon as we have an acre or so cut we start the tedder. We are anxious to have the hay tedded before noon. Immediately after dinner we commence to rake and cock. The next morning, if the weather is fine, we turn out these cocks to expose them to the air and sun for a short time, then commence to draw the hay in. We have never put in stacks in fact, this has been our plan for some years, and our hay is very much better than when cured in the old way. I do not think there is the least danger of spontaneous combustion, and as for musty, it will have to be a very much greater than ours if that happens.

THE GOOSEBERRY.

For some time previous to last year gooseberries, when mature, commenced dropping off the bush till not a berry was left. It was proved that this falling is caused by the presence of a little maggot in the berry. The eggs which produce the grubs are deposited in the berry when young by a small moth. Last year, the first for years, about 50 per cent. came to maturity and ripened.

The gooseberry will thrive and yield large crops upon almost any soil that is enriched with plenty of manure. A heavy, open loam, well manured, would be perfection, especially for the American varieties. Before a plot is set for plants it should be fallowed and made rich. Several varieties six feet apart each way.

Mulching gives very good results in a dry year, but for a wet season cultivation is better. Care must be taken for a few weeks, just as the fruit is forming, not to go too deep under and about the bushes, especially if the weather is dry.

Native varieties do not need much pruning for three years after they are set, and if a branch is to be cut, cut it close to the stem. As soon as a branch grows dark-colored and hard-bound, and the fruit commences to run small, cut it away, and allow a sucker to take its place. The fall is the best time to prune. But the young suckers, except those needed for renewal, should be cut away as soon as they are a few inches high.

After testing 60 foreign varieties, I am convinced that none of them is as improvement upon our own Red Jacket, Pearl or Downing. Foreign varieties have nothing to recommend them but size. Their thick skin is disagreeable if they are allowed to ripen, or nearly ripe, before being cooked. Red Jacket and Pearl are large enough for all purposes; in fact, they are as large as many of the English varieties tested—Stanley Spellette, in Canadian Horticulturalist.

Entertained Her Friends.

Last Friday the home of Miss Agnes Meehan, East Ops, was the scene of a jolly gathering, when a number of her friends were entertained. The evening passed delightfully with music and dancing. Later refreshments were served, and a pleasant social time was enjoyed. It was with regret that their happy party was brought to their popular young hostess and returned to their homes.

AGRICULTURE IN SCHOOLS.

Victoria County Farmers Cordially Favor New Departure.

During the past week Mr. Simpson Rennie, of Toronto, and Mr. P. H. Reed, teacher of Agriculture, Lindsay Collegiate, have been holding a series of meetings at Major Hopkins' farm, Fendron Falls, Woodville, Oakwood, and Little Britain. Mr. Rennie gave a talk on weeds and methods of eradication, and on the improvement of farm crops through careful seed selection.

Mr. Rennie is a man of very wide experience, and was a most successful farmer. He was for years the champion plowman of the province; in 1883 he won a gold medal for the best farm in his county, and in 1886 he was awarded a sweepstakes prize of a \$100 silver tea service for the best farm in the province; also for 15 years he was a prominent exhibitor of grains and roots at all the large fairs, and at Toronto Exhibition. In his talks Mr. Rennie gives to his fellow farmers the benefit of lessons learned through many years of earnest endeavor and painstaking, successful experimenting. Mr. Rennie's addresses have the happy combination of being both entertaining and instructive; they are packed with useful lessons and suggestions, presented in a manner both interesting and inspiring.

Mr. Reed, in his remarks, outlined the new departure in agricultural education which is being inaugurated in Victoria county. He reports that everywhere the scheme is meeting with hearty approval from the farmers. They realize, as many of them express it, that this is the farmer's first chance in the Collegiate Institute, and many of them have expressed the intention to send in their sons and take a two years' course. The short course in grain and stock judging is even more popular, and very many, both old and young, will take the judging course, and the many good lectures, which will then be given by prominent men on the feedings, care and management of stock. Also he states that the people of Lindsay realize that anything which is of direct benefit to the farm is of indirect benefit to the town, and are even more enthusiastic over the course than the farmers. The course, as outlined, will appeal to both town and country boys, and soon many boys from both town and country will be taking the new course in agriculture.

SIZE OF BERRY BOXES.

Fruit Inspectors Insist on Cutting Out Small Sizes.

Ottawa, June 24.—There are to be no small berry boxes this year. The fruit inspectors have been after the box manufacturers, or have served notice upon all and sundry that anything less than the legal size will mean prosecution. The law declares that a berry box shall contain no less than four-fifths of a quart. The law was on the statute books for a long time without any attention being paid to it. In the first place it was the duty of the trade and commerce officials to administer it; then that duty was turned over to the land revenue department, but the officials of these two departments were too busy to worry about size of berry boxes, and the result was they kept getting smaller. When they got down to about two-fifths of a quart the administration of the law was turned over to the inspectors of the fruit branch. The berries arrive during their slack season, so last summer with warnings which were renewed this spring, the result is they have reported to Ottawa that they have so far found no undersized berry boxes on the market, and the manufacturers state that none have been ordered. The boxes from the United States are all reported to be up to the Canadian standard of size.

TO TAP IRON DEPOSITS:

Canadian Northern Completed to Moose Mountain.

Toronto, June 25.—The Canadian Northern system is now completed as far as the Moose Mountain mines, according to Eugene Coste, one of the consulting engineers of that railway. These Moose Mountain mines are in Hutton township in New Ontario and they contain immense iron ore deposits.

"There are millions of tons of excellent iron ore in these mines," was the comment of Mr. Coste. "It is only a short time before shipments will be commenced from here. At present there is a little machinery on the ground for the simple reason that none is required just now. When machinery is needed it will be ready to do business."

Mr. Coste said the ore was of the kind that has been mined in Sweden and in great demand. The mines are some thirty miles north of Sudbury, while another ridge of the iron producing territory lies about the same distance to the north of that.

It is likely that the deposits to the north will be developed by the Canadian Northern people as well, since their railway may easily be extended to the newer districts. That one will be transported by rail to the lake for the present, and from there sent to different smelters at Midland, Hamilton and perhaps to some United States points.

SERIOUS RUNAWAY ACCIDENT

Turner Trux in Ross Hospital in a Badly Bruised Condition.

Evening Post of June 28.

This morning a very serious runaway accident happened on the Fendron Falls road about two miles north of the town. Mr. Turner Trux, the victim, is in the Ross Hospital with serious injuries. Several bones in his nose are broken and his face and head badly cut. Twelve stitches were required to close his wounds. The shafts of the buggy are smashed and it is otherwise damaged.

Turner, the injured man, is a resident of Somerville, four miles from Cobocok. He was in Lindsay on business, and on returning the Indian pony he was driving, for some unknown reason ran away, and he was pitched out on his head with the above results. A passing farmer drove him to town. Medical men say it was lucky his neck was not broken.

No Use For Him.

(The Bohemian.)

The railroad president was hearing complaints.

"What is the charge against this brakeman?" he inquired.

"Please sir," responded the spotter, "I have frequently heard him calling the names of stations so clearly that people could understand what he said."

"This is a direct violation of one of our chief rules," observed the president, warmly, "Fire him."

A SUNDAY SCHOOL STORY

(Harper's Weekly.)

It happened in Sunday school. None of the children had studied their lesson apparently, and as for Johnny, the new boy, he wasn't supposed to know much about it, anyhow. "Now, Willie, said the teacher, 'who was it swallowed Jonah?' 'I dunno,' giggled Willie. 'Bobbie, can you tell me who swallowed Jonah?' continued the teacher. 'You can search me,' said Bobbie. 'Tommy, who swallowed Jonah?' asked the teacher, a little severely this time. 'Please ma'am,' whimpered Tommy. 'Well I declare!' ejaculated the teacher. Then, turning to the new boy, she asked, 'Johnny, who swallowed Jonah?' 'I'll bite,' said Johnny, 'what's the answer?'

MINISTERS AND POLITICS

Several Anglican Synods have declared for the purification of politics, and the subject has been discussed also in the Presbyterian General Assembly, and in one or more Methodist Conferences. To enforce these declarations, it is highly important that ministers should themselves keep clear of the seamy side of politics. It is very doubtful whether the Rev. Mr. Chambers ought to have accepted the position of governor of the Toronto jail. The disclaimer of Governor VanAntwerp brought about by the most dishonourable means, and if Mr. Chambers had refused the office he would have censured these methods, condemned the spoils system, and greatly aided the purification of the spoils system. Brantford politicians are making an excuse for the dismissal of Magistrate Woodruff. Mr. Woodruff got into a dispute with two local clergymen, Messrs. Imrie and Thompson. The latter case, says the Brantford Courier, was considered at a meeting of the Lord's Day Alliance, and also at a meeting of the ministerial Association of the city. In both instances resolutions were passed declaring that the matter should be taken up with the Government. A deputation was appointed to see Mr. Whitney, and Rev. Mr. Caswell and Rev. Mr. Thompson went to Toronto. Without discussing the merits of these disputes, it may be pointed out that it looks very much as if the Brantford ministers are being used to carry out the designs of local Conservative politicians, and to lend an appearance of respectability to the spoils system. This is a danger which the denominational parliaments cannot afford to ignore.—Toronto Star.

CHURCH NOTES

In his annual report to the alumni of Yale University on Tuesday, President Hadley stated that in seven years the students in regular courses had increased from 2,517 to 3,247. As in other universities, he said, there has been a falling off in the number of students in the theological department.

Rev. R. E. McLaren, Presbyterian Home Mission Societies, who returned on Friday from his extended visit to the British Isles in quest of men for the Canadian mission fields, had better success than he had hoped for, having secured about fifty men to come out this fall. Most of them he obtained in England, two or three in England, and two or three in Ireland and some ten in the north of Ireland.

RECITAL AT ST. JOSEPH'S

Musio-Loving Citizens Enjoyed a Treat

Last Thursday Evening.

The recital at St. Joseph's Academy on Thursday to Miss Bertha Clapp, laureate of Paris Conservatoire, and Miss Marie Loeve, Dip. of R.A.M. and R.C.M., London, Eng., was attended by all who could be accommodated in the music room of the Academy, and was one of the finest musical treats of the season. The press notices which have appeared in reference to both ladies were not overdrawn, but rather under-estimated the abilities of both ladies. Miss Loeve possesses a voice of great compass, sweetness and expression, which indicates careful training by competent masters. Her rendering of "Elizabeth's Prayer," was most enjoyable, as in fact were all the numbers. Miss Clapp, pianiste, is a very clever musician—her treatment of her several numbers was most artistic, and her interpretation of the works of great masters was most realistic and musical. Her touch is excellent and the vim and spirit which she throws into her work is most fascinating, and effective.

Miss Grace Dodge gave a reading of Dr. Drummond's, "When Albion Sang," in good diction and with excellent expression, and was applauded. Ten little girls—Kathleen Watters, Louisa Labelle, Madeline Cathro, Helen Patton, Helen Campbell, Kathleen Prunty, Mary Gilroy, Miss Brien, Pearl O'Neill and Daisy Shinnon, gave the Lily Drill, a graceful and fascinating performance that pleased the audience and elicited hearty applause.

A SURPRISE PARTY:

Sunday School Class Honor Their Teacher

on Eve of Departure.

The home of Mrs. Perry, Sussex-st., was the scene of a pleasant gathering on Thursday, when the members of her Sunday school class assembled as a surprise party to express their regret at their teacher's pending departure for Brantford. As a slight token of respect the class presented Mrs. Perry with a silver fern pot and an address. Miss Muriel Marks read the address, and Miss Flossie McArthur made the presentation. The address was as follows: "Dear Teacher—It is with regret we hear of your departure from our midst, but we take this opportunity to express our gratitude to you for the interest you have taken in our welfare. Through many little acts of kindness you have endeared yourself to all of us, and we will miss you much. The many pleasant hours we have spent in your company will be as a light in our minds, and our best wishes for the future go with you. Should you return at any time we would be very glad to have you feel at home in our school. Kindly accept this slight token of our appreciation and love for you. Mrs. Perry, in a few words most suitably acknowledged the gift, and heartily thanked her former class. Later refreshments were served and a social time was enjoyed.

Fashionable Wedding at Omeme.

The marriage of Miss Maude Grandy, daughter of Mr. and Mrs. S. Grandy, of Omeme, to Dr. W. J. Cook, of Sturgeon Falls, took place in Omeme, at the home of the bride's parents, on Wednesday afternoon, June 26th.

The ceremony was performed by Rev. Mr. McCullough, Methodist minister, of Omeme, assisted by Rev. Wm. Cook, father of the groom. The bride was given away by her father, and was attended by her sister, Miss Gertrude Grandy, of Omeme, and her cousin, Miss Alberta Thekton, of Millbrook. Mr. Bea Miller, of Toronto, was best man, and Master Percy Eaton, son of Mr. and Mrs. J. E. Eaton, Toronto, acted as ring bearer. The bride wore a lace gown trimmed with seed pearls over silk and carried white roses; she also wore a diamond and pearl necklace, which was the gift of the groom. The bridesmaids were attired in white and carried pink roses.

The groom's gift to the bride—made of gold necklaces set with pearls. The wedding march was played by Mr. Will Staples, of Toronto. Mrs. J. C. Eaton, of Toronto, sang "O Perfect Love" after the ceremony was over. A reception was held, after which Dr. and Mrs. Cook left on a trip to Montreal, Thousand Islands and other places. Guests were present from Toronto, Rochester, St. John, N.B., Peterboro, Lindsay, Millbrook and Belleville. After their return Dr. and Mrs. Cook will reside at Sturgeon Falls.

COMMUNICATIONS

A WRONG VIEW OF SOCIALISM.

(To the Editor of The Post.)

Sir,—In your "Stroller" column of 17th inst., when discussing Socialism and Socialists, the following appears: "As to all people being equal, that 'will hardly come to pass—we do not 'it was ever intended.' I take it for granted that your correspondent would not knowingly advance or create any wrong impression or belief, and therefore feel that you will allow me to point out that Socialism is not what the article in question either expresses or implies. Where your correspondent errs is when he assumes that social equality and economic equality are one and the same thing. Socialism is not a social equality, any more than is religion or politics. Two or more men might come together, either in the church or on the hustings, and while there they are on common ground, but the moment they are outside of the society-owned church building, or away from the state-owned polling booth, the law of social equality (or society) stops in and says that the one is not the social equal of the other. On the public-owned streets or highways all men (whether they be rich or poor, black or white, large or small, or whatever their social status), are economic equals, but between the occupants of either side (although they may be the same people who are on the highway) social equality does not exist. The arguments that are today used against the abolition of economic slavery are the same that were used against the freeing of the slaves; those in favor of abolitionists they all they freed the negro they would have to make a social equal of him, but time has proven that not only in this case, but the evidence has shown that there was more intercourse between the races, in certain ways, in the days of chattel slavery, than there has been since.

Socialism seeks to liberate the economic slave and to establish a just industrial system, which shall apply to every man, woman and child, no matter what their creed, color, nationality or previous condition. Confusion of the ideas of economic equality and social equality lead to confused ideas of what Socialism really is. Socialism has to do wholly with economic equality, or the equal opportunity for each to make a living, and also equal opportunity to live after it is made. Whether people associate, or live together or separately, as a matter to be determined by those immediately concerned. There is no doubt but that Socialism, by its demand that economic equality be removed, is the forerunner of a better and more just condition (both social and economic) it is either by the removal of the perpetuating of economic wrongs that the social plane is established. The money or the pedigreed aristocracy of to-day is the descendant of the plebeian of yesterday, but until all economic wrongs are done away with, and until the economic slave is free, Socialism has not, not can it have, anything to do directly with the question of social equality.

In another paragraph of that same article "Stroller" says: There is "only one way to raise people up, and that is, from within. Mind right—there it will not be difficult to add 'one little outward wrong' to which Socialists will say, amen. When Christ met the one possessed of the devil he did not cause the man, but commanded the devil to come out of him; he knew that under proper conditions the man was all right. If we could undo the devil of selfishness (which is private greed) and entrance the God of Love and Justice, all would be well here, but until that is done it is impossible that we love our neighbor as ourselves, or that we do unto others as we would have others do unto us, for the law of selfishness or private profit, is that we shall and must do our fellow, instead of

Indigestion

Stomach trouble is but a symptom of, and not itself a true disease. We think of Dyspepsia, Heartburn, and Indigestion as real diseases, yet they are symptoms only of a certain specific Nerve sickness—nothing else. It was this fact that first correctly led Dr. Shoop to the discovery of that now very popular Stomach Remedy—Dr. Shoop's Restorative. Going direct to the stomach nerves, alone brought that success and favor to Dr. Shoop and his Restorative. Without that original and highly vital principle, no such lasting accomplishments were ever to be had. For stomach distress, bloating, biliousness, bad breath and salivary complexion, try Dr. Shoop's Restorative—Tablets or Liquid—and see for yourself what it can and will do. We sell and cheerfully recommend.

Never scrape an iron enamel pot or pan, as that is what ruins it. Zinc is best cleaned with soap water, then polish with kerosene and coal ashes.

When polishing stoves a fine gloss is obtained by adding a teaspoonful of alum to the ordinary black lead.

When making a steamed or boiled pudding put a pint in the cloth, at the top to allow the pudding to swell.

To clean a fishy frying pan fill with cold water and place on the fire to boil. When boiling put a red hot cinder in, then wash in the usual way.

Turpentine and beeswax melted to the consistency of thin cream makes a fine polish for upholstered furniture.

The tops of old stockings make excellent dust cloths, as they neither scratch nor shed lint. Sewed over a square of leather cut from a shoe top they make desirable holders, pliable to the hand, but, because of the leather, slow to heat through.

In buying a hair mattress choose one filled with black rather than white hair, as the latter has generally been bleached, which deprives it of springiness and makes it "mat" more quickly than the black or gray hair.

Whipped cream added at the last minute before sending to the table is a great addition to the cream soup, whatever its kind.

THESE ARE TRUE

Five Thousand Facts About Canada, the Young Nation.

IMMIGRATION

For every British immigrant in ten years there has been one from the U.S.

Sir Wilfred Laurier: "2,300,000 people will have settled in Canada from 1901 to 1911.

Sixty-five per cent. of total immigration for 10 years was English-speaking; 35 per cent. foreign.

Cost of bringing immigrants to Canada, 1904: Continental, \$2.24 per head; Great Britain, \$4.68; United States, \$4.53; general average, \$3.98.

The immigration of 1906 was twice that for 1902; four times that of 1901.

The British immigrants for 1906 were: 77,144 English, 19,309 Scotch, 3,867 Irish.

Figured by population, Scotland sent one in every 230; England one in every 400; Ireland one in every 115-2.

Emigration from Scotland has increased 100 per cent. in three years. Foreign arrivals, 1901, were: Germans, 7,723; Russians, 2,985; Danes, 1,207; other Austrians, 2,201; Scandinavians, 4,203; Russians and Finns, 2,848; French and Belgians, 2,392.

The immigration of 1906 averaged 3,700 per week. If this comes true, it will make Canada the dominating state in the Empire.

Lord Strathcona predicts that at the end of the 20th century, Canada will have a population twice as large as that of the British Isles.

204,600 Anglo-Saxon immigrants came to Canada in three years, 1903-5, as against 107,000 foreigners. It takes only three years for an immigrant to earn a vote in Canada.

Salvation Army brought in 13,000 immigrants in 1906, estimated 40,000 for 1907. In 1903, 42 per cent. of inhabi-

ants of western Canada were either foreign or children of foreign born parents. That percentage is now being lowered.

INDIANS

Population, June 30, 1906, 1905-1904, net gain from natural increase, 182; 91 less than in 1904-5.

Of the 109,394, 88,650 are in reserves, and 20,744 not.

Births, 1905-6, 2,511; deaths, 2,323. Income derived from exercise of Indians themselves passed the 5 million mark, exceeding previous years by 1-2 million.

Of this value of farm produce, \$1,779,382; wages earned, \$1,727,000. 85,507 engaged in agriculture, cultivating 47,955 acres; raising 1,405,000 bushels of grain and roots, and 118,000 tons of hay.

Capital of Indian trust fund, \$4,868,622.

Cost of Indian Department, 1905-6, \$1,198,350. There are 301 Indian schools—223 day; 50 boarding; 23 industrial.

Over 200 Indian youths are learning trades in industrial schools. 144 schools under Roman Catholic; 89 Church of England; 43 Methodist; 10 Presbyterian; 1 Salvation Army.

10,088 pupils enrolled. 29,000 of the Indians are Protestant. 35,000 Roman Catholic; 11,000 pagan (outside of far north).

The Indians own 70,000 horses and horned stock.

There is more Catholic in this section of the country than all other diseases put together, and the last few years was applied to be incurable. For a great many years doctors used a local anesthetic and procured local anesthesia and by constantly falling to cure with local treatment, procured it incurable. Science has proven catarrh to be a constitutional disease and therefore requires constitutional treatment. Halls Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, is the only catarrh cure on the market. It is taken internally in doses from 10 drops to a teaspoonful. It acts directly on the blood and mucous surfaces of the system. They offer one hundred dollars for any case it fails to cure. Send for circulars and testimonials.

MERRY WEDDING BELLS.

Somers—Weldon.

A very pretty wedding was solemnized at the residence of Mr. and Mrs. Orson Weldon on Tuesday, June 25th, when their youngest daughter, Florence E., was united in marriage to Mr. Milton S. Somers, of Tilsonburg. The ceremony was performed by Rev. T. Brown, of Oakwood, in the presence of the immediate relative and a few intimate friends. The wedding march was played by Miss Florence O. Weldon, cousin of the bride. The bride and groom were attended and stood beneath an arch of evergreens and white flowers. The bride was tastefully attired in a dress of white point d'esprit, over white tulle, and wore bridal roses in her hair. She carried a shower bouquet of white roses and maiden hair fern. Her only attendant was a cousin of pearls, the gift of the groom. After the ceremony and the reception which followed, Mr. and Mrs. Somers left on the evening train for Toronto, and thence to the Thousand Islands, the bride traveling in a suit of gray with hat to match. Upon their return they will reside at Tilsonburg, Ontario.

Kawartha Summer School at Chemung.

Kawartha Summer School for the study of the Bible and Missions and the best methods of working in connection with Epworth League and Sunday schools opened to-day at Chemung Park, and will continue until the 7th. The programme to be given is one of unusual merit. Among speakers are such men as Rev. Prof. McLaughlin, Rev. Dr. Crumney, Rev. Dr. Shorey, Rev. Dr. Bishop, Rev. R. Emberson, Rev. Dr. Adams, and several others of note. Reduced railway rates and special accommodation at the park.

Police Court Calendar.

Evening Post of July 2.
Fists were flying on Saturday evening last, and as a result the town is richer by a few dollars. Two Englishmen with pugilistic tendencies started the fun in the Pym House. One bore the rather aristocratic name of Henry E. Osborn— he is an ex-soldier of well-known figure. Joseph Denham was the other. Chief Ralph Vincent happened along opportunely—or rather inopportunely for the "serappers"—and promptly arrested them. Osborn showed unwillingness to accompany the guardian of our peace, and the Chief had to use physical force and a pair of handcuffs to bring him along. Mr. Malcolm Myles was called upon and rendered assistance. A crowd of about 25 sympathizers with the row-makers went along to see "fair play." Court was held, and the pair of worthies fined \$5.00, including costs.

A W. Faulkner, of Linden Valley, will be a little more careful to keep his hands in his pockets after this. He is out \$13.25 for striking Mr. Myles, who was called on by the Chief to assist in the above arrest. Faulkner will know better next time. Sylvester Scott donated \$7 to the town for being drunk, disorderly, and swearing.

Another Man Saved Through Perkins' National Herbs

Mr. Wm. Jones, 526 Manning Ave., Toronto, says: "For over 15 months I have been a great sufferer from Insomnia, which resulted in Nervous Prostration. I was completely exhausted through sleepless nights and long days of restlessness. I (his latest photo) spent three weeks in the hospital and during that time I only slept two hours. I had dreadful pains in my kidneys and every organ of my body was affected. I grew despondent and my memory failed me completely. All ambition was gone and I longed for death to come and relieve me of my sufferings. I was on the verge of despair as all treatments had failed to help me when Captain Perkins of the Salvation Army called on me and requested me to try Perkins' National Herb Tablets. He assured me they would certainly reach my case as they had done for thousands of others. I am pleased to inform you that after a few weeks' treatment they have made me a well man. To all sufferers of this dreadful disease Insomnia, by all means give Perkins' National Herbs a trial. Free sample sent to any address upon request. Price 25c., 50c. and \$1 a box. OH! PERFECT DAY.

O gift of God! O perfect day;
Whereon shall no man work, but play;
Whereon it is enough for me,
Not to be doing, but to be!
Through every fibre of my brain,
Through every nerve, through every vein,
I feel the electric thrill, the touch
Of life, that seems almost too much
To bear the strain among the trees
Playing celestial symphonies;
I see the branches downward bent,
Like keys of some great instrument.
And over me unrolls on high
The splendid scenery of the sky.
Where through a sapphire sea the sun
Sails like a golden galleon,
Towards yonder cloud-land in the West,
Towards yonder islands of the Blest,
Whose deep sierra far uplifts
Its craggy summits white with drifts.
Blow, winds! and waft through all the rooms
The snow-flakes of the cherry-blossoms
Blow, winds! and bend within my reach
The fiery blossoms of the peach!
O Life and Love! O happy throng
Of thoughts, whose only speech is song!
O heart of man! canst thou not be
Blithe as the air is and as free?
—Longfellow.

IMPORTANT NEWS OF THE DISTRICT

Told In Interesting Form by the Bright Correspondent of The Post at the Various Centres.

CAMBRAY.

(From Our Own Correspondent.)
A large congregation assembled in the Presbyterian church on Sunday last to listen to the farewell sermon preached by Rev. A. F. Webster, who is about to leave the district. The sermon was a very earnest and timely one, and was well received. The service was held at 10 o'clock, and was attended by a large number of the congregation. The Rev. Mr. Webster's departure is a great loss to the district, and his services will be missed. He has been a very successful minister, and his departure is a great loss to the district. He has been a very successful minister, and his departure is a great loss to the district. He has been a very successful minister, and his departure is a great loss to the district.

(From Our Own Correspondent.)
We are having a very favorable season. Farmers say the harvest will not be much later, as the crops are coming up well. Reports from Manitoba friends are of the same nature. Another Dominion Day has passed, which was joyfully celebrated here. The sports were held on the river, and the day was a very successful one. The balance of the program of sports on land and water were keenly contested, and the prizes offered being well earned.

(From Our Own Correspondent.)
The Presbyterian lawn social on the evening of July 1st passed off successfully, the proceeds amounting to about \$100. The refreshments served by the ladies were simply grand, and the music and decorations seemed to please everyone. We notice that every public day here has fewer drunks and disorderly conduct.

(From Our Own Correspondent.)
It seems to be a disgrace and a shame to have an exhibition with the human race that is not seen amongst dumb animals. The L. O. L. lodge and orangemen intend going to Milledgeville, where an old-time gathering is to be held. Many of the old heads will be missing in the ranks by removal by death and other causes.

(From Our Own Correspondent.)
There is an excursion to Kirkfield, Ont., from Lindsay, many from here will take advantage of notice given.

SCOTCH LINE.

(From Our Own Correspondent.)
Our school has closed on vacation, affording the children opportunity to enjoy a much needed holiday and take advantage of the good fishing. The garden party in connection with St. David's church will be held on July 18th, on the lawn of Mr. Guy Beatty. Both local and foreign talent will be engaged for the evening.

Rev. Mr. Bingham paid our school a brief visit last week, held on Sunday evening in the Baptist church. The happenings of the Association meeting at Brooklyn were told in interesting form by the Misses Ethel and Grace Robertson, after which the meeting was thrown open for discussion, in which a prominent part was taken by Mr. Thos. Robertson, who spoke of some length on the work of the Sunday school in the Baptist church of Scotch Line, in which he stated the encouraging as well as the discouraging features of the work. Sunday school had been held in the school for some forty years, during which time Mr. Thos. Robertson, Mr. Kennedy, J. Kennedy and William Kennedy had successfully occupied the position of superintendent, the last named being the present superintendent. It was thought advisable to have lady teachers for boys' classes, as the interest could be more easily obtained if held in kind way.

A women's circle had a mission study class will be organized as soon as possible.

KIRKFIELD.

(From Our Own Correspondent.)
One of the firm of Neelands & Irvine, dentists, Lindsay, will be at the Queen's hotel, Woodville, on Tuesday, July 9th, and Campbell's hotel, Kirkfield, on Wednesday, the 10th. Call in forenoon if possible. Great preparations are being made to entertain the large crowd that is expected here for the opening of the 10th look on Saturday. The R. C. and Presbyterian congregations are preparing dinners and lunches in the vicinity of the docks, and a good time is anticipated.

We regret the serious illness of Mr. Duncan MacKenzie. Mr. MacKenzie has been in poor health for some time, but his illness has now become most critical. Many friends hope for his recovery.

Mr. and Mrs. E. N. Rutherford, of St. Catharines, spent the holidays with Mr. and Mrs. H. Campbell.

Miss Evelyn Fraser left on Saturday last for Cornwall, where she will spend a few weeks with relatives.

Miss Lou McClelland, of Toronto, is spending a week's visit with her friend, Miss Lucy.

Mr. J. Walker and Mr. Macgregor, of the Sterling Bank, spent the 1st of July in Lindsay.

Messrs. Wm. Ewen and Alex. MacKenzie, of Toronto, spent a few days with their brother, Mr. Duncan MacKenzie, during the week.

A large number of pupils, (forty) wrote on the entrance examinations held here last week. The general opinion was that papers were too difficult.

Mr. W. J. Mitchell arrived home from the Old Land last Monday, looking well and happy, and received a hearty welcome from everyone. Mr.

Mitchell enjoyed the trip, but says there is no place like Kirkfield, and he is just about right. Kirkfield is at its prettiest now. Anyone driving into the village cannot help admiring the clean streets and the beautiful scenery.

BRONDALE.

(From Our Own Correspondent.)
We are making the farmers of the district so pleased. Why the recent warm showers have greatly improved the appearance of the crops, which for a while did not look very promising. Mr. Bailey, Inspector of Colonization Roads, passed through here this week inspecting the work that is being done on these roads.

Miss Martha Maxwell and Miss Lilla Filkin left on Tuesday morning to write on the Entrance examination in Minden. We wish the young ladies success. Owing to the rain storm on Wednesday last the picnic was not so successful as it otherwise would have been. However, quite a gathering enjoyed the short program and the dairy tea in a nearby house.

Much sympathy is felt for Mr. and Mrs. Barr in their sad bereavement. Miss Beatrice Newell was the guest of Miss Eva Nowell for a few days. Some of the young men of Irondale arrived home from the drives this week. A Farmers' Institute was formed here on Saturday forenoon. We think the lectures given on Friday evening and Saturday morning were splendid and encouraging to the farmers.

Mr. A. Curry has purchased a fine new car.

Mr. J. Maxwell is spending a few days in Minden this week. Miss E. Newell was a visitor at White Lake last Sunday, the guest of Mrs. S. Switzer.

DAKEWOOD.

(From Our Own Correspondent.)
On Dominion Day about fifty of our young people spent the day at Washburn's Island, and a very enjoyable time was spent. Among the visitors here was Rev. S. J. Cummings, of Pittsburg; Miss Graham, of Longford Mills; Mr. and Mrs. G. H. Rennie, Miss Maude Prouse, Miss Ley Cameron, Miss Hilda Gardner, Miss J. Thordyke and others from Toronto.

The many friends of Mr. Roy Gardner are very sorry to learn of his illness. He came home from Toronto on Thursday last. On Monday next the Sunday schools of the Methodist church are having an excursion to Lily, Wis., via Peterborough. We hope for a fine day and anticipate a very enjoyable time.

Rev. S. J. Cummings occupied the pulpit in the Methodist church on Sunday evening last to a large congregation. The Rev. A. F. and Mrs. Webster left for a trip to Scotland and other points. Their young friends are exceedingly regret their departure from our midst.

COROCOK.

(From Our Own Correspondent.)
G. McCarty, L. O. L. organizer, addressed a meeting in the C. O. O. F. hall here on Friday evening in the interests of the C. O. O. F. and had charge of the Entrance examinations in Fenelon Falls.

Mrs. Wellwood returned from Toronto on Thursday last, accompanied by her daughter, Mrs. A. McLaughlin, who will visit here for some time. C. Gibson representing the Robertson Co. of Toronto, passed through in an automobile on Wednesday last.

Rev. W. H. Cook and Miss E. Cook were at Omemee on Wednesday. J. J. Keys spent Thursday last in Toronto.

Mrs. Jackson made a business trip to Fenelon Falls on Thursday last. Mrs. Callan, of Innerville, is visiting with her son, R. A. Callan, town. J. Sheridan, of Toronto, made a business trip to town on Friday last.

A. E. Cook and wife, of Rochester, N. Y., are visiting with a couple of weeks with parents here. Dr. Brethour, of Toronto, is spending a couple of weeks vacation at the Patti house.

H. E. Murphy, of Oshawa, spent from Monday till Tuesday in town. Miss W. H. and Mrs. Bircard of Toronto, visited with Mrs. Bircard over the holiday.

Miss Winnie Callan, of Albert College, Belleville, is home on her holidays. F. Peel made a business trip to Lindsay on Monday of last week.

Mr. Harry Holland, H. Keith and Gordon Holland, of Toronto, spent the holiday in town. Rev. A. B. Chace was in Coldwater on Monday.

Mrs. A. Ryckman and Mrs. Harvey were in Lindsay on Friday. Miss W. H. and Miss Sharpe, H. Mann, L. Sharpe and Dr. Brown and wife, of Cananington, were at the Patti house from Saturday till Tuesday.

Miss E. Foster, of Cooper's Fall, is home on her holidays. A party of young men from Cleveland, Ohio, are camped on Silver Lake for a couple of weeks. G. W. Stevens, of the Gull River Lumber Co. is home for a few days. He reports their large drive progressing favorably, and expects to have it here in about three weeks. In the meantime the company have sufficient stock on hand to last till the drive arrives.

Dominion Day passed off very quietly in town. A few attended the celebrations at Lindsay and Kenmore, and a number spent the day on the water, and consequently a large number of catches of fish have been reported. A number of visitors from Toronto and other outside points took advantage of the reduced fares and spent Sunday and Monday in town with their friends.

J. E. Jackson, manager of the Patti house, treated the guests of the hotel to a very pleasant moonlight sail on Monday evening, per Str. Kawartha.

Don't forget the 12th of July celebration here this year. Special trains from Lindsay and also boats from

other points on the Kawartha Lakes. The Manitoba had a large crowd of pleasure seekers on her regular trip on the holiday.

VALENTIA.

(From Our Own Correspondent.)
Mr. Philip Marks, our stationary engineer and thresher, has purchased a new, up-to-date Waterloo engine and separator, with blower attachments.

Our citizens are largely improving our town by laying new granite sidewalks from the main square east on Church-st. and onto the church grounds, and also on the church grounds.

Owing to the lateness of the season the Foresters' entertainment and strawberry festival was postponed till the 9th.

WOODBILLE.

(From Our Own Correspondent.)
Marked here every Thursday. Mrs. Batten and son Leslie, of Toronto, have been visiting her father, Mr. Jas. Lawson.

Our band attended the celebration in Sunderland on Dominion Day. Miss Martha Hopcraft has returned to Toronto after spending two weeks' vacation with her parents here.

Messrs. Lena and Hannah McArthur, of Toronto, spent Dominion Day with their parents here. Mr. Hector Ferguson, of Toronto, spent Sunday and Monday with his mother here.

Mr. and Mrs. E. B. Grigg spent Monday in Sunderland. Mr. and Mrs. Clarence Weeks and Jarvis Stoddart took in the celebration at Sunderland on Monday, July 1st.

Mr. H. McCrimmon spent Monday with his parents in the Glen. Miss Bella Carmichael spent Monday in Sunderland.

Mrs. Gus. Prouse and daughter, Zella, are visiting friends in Greenwood.

Miss Annie Gilchrist, of Toronto, visited her father, Mr. J. C. Gilchrist, on Dominion Day. Misses Annie and Minnie Campbell are spending their summer vacation with their parents here.

Mrs. John McPherson left on Tuesday for a visit with her sons, Messrs. Rick and Frank McPherson, in Bythe.

Mrs. Wm. Thomas and daughter, Ethel, visited Toronto friends last week.

In spite of the unfavorable weather, quite a number from here took in the picnic at Glenora on Dominion Day.

Mr. Ed. Grigg and Mr. Simon Fied spent Wednesday in Cananington. Mr. John Leas, of Toronto, spent Monday with friends here.

One of the firm of Neelands & Irvine, dentists, Lindsay, will be at the Queen's hotel, Woodville, on Tuesday, July 9th, and Campbell's hotel, Kirkfield, on Wednesday, the 10th. Call in forenoon if possible.

COUNTERFEITERS AT WORK

Lindsay Said to be Headquarters for a Skillful Gang of Issuers of Bogus Five Dollar Bills.

CHAS. BURKE, A. BOUYEA AND R. WINN

Already in the Toils, and Other Suspects Will be Arrested Shortly Here and Elsewhere.

PLANT AND PLATES FOUND.

Believed to Have Circulated Bogus Bills on the Montreal, Dominion and Traders' Banks.

Evening Post of July 9.
Like a bolt from the blue, came the arrest of Charles Burke, a well known resident of town, last evening by Chief Vincent, of town, Dominion Detective Parkinson, of Ottawa, and Detective Cowan, of Toronto, on the charge of being leader of the gang who for some time has been counterfeiting five dollar "Traders' Bank bills and circulating them, throughout the country.

Burke has been watched for some time past by the Dominion detective, Commissioner Sherwood, Chief of the Dominion police, was in town last week, ostensibly on a holiday, but in reality in connection with the investigation going on here. With Parkinson and Cowan he had registered at the Fym house, the detectives being incognito. Col. Sherwood, it is understood, marked his man, and left the detectives to draw the meshes around their victim.

THE ARREST MADE
The arrest was unexpected, and Burke was captured at the residence of his brother, in Pumpkin Hollow, where the prisoner lived. A thorough search followed, and the whole coun-

terfeiting outfit found. Photographic apparatus, dies, stamps, etc., were gathered in. Burke had done his counterfeiting by photographing the bills and electro-plating the metal photograph. Necessarily, the counterfeit was blurred a little, and could be easily distinguished from a genuine bill. This paper was of an inferior grade than the genuine, also, and the counterfeits exceedingly crude. The bills were circulated, it appears, by accomplices, who passed the counterfeits in towns and villages, where the citizens scarcely bestowed a glance on them.

The counterfeit bills appeared in Toronto last week, and caused considerable excitement. Archie Bouyea, of town, and R. Winn were arrested as accomplices in Sault Ste. Marie. Winn was formerly a farmer near Honeyville.

A clue was gained from the confession of an English immigrant who was flooding the country around Montreal with the counterfeits. He was arrested there and confessed the names of his accomplices. The latter escaped.

The police made a great "scoop" by the rounding-up of the gang. They had been at work for years past, it is suspected.

Yesterday Chief Vincent visited the homes of several suspected parties in town, and secured sufficient evidence of an incriminating character to justify their apprehension. Warrants have been issued and developments are likely to follow quickly.

The Englishman arrested in Montreal is known in Lindsay as Evely. He was a fireman on the G.T.R. here until recently, and boarded on Albert-st. day before yesterday, and about a week ago along with another party from Lindsay, who has escaped arrest for the time being.

EIGHT DAYS HENCE.
Burke was brought before Police Magistrate Jackson soon after his arrest last evening at 5 o'clock, and was remanded to goal for eight days.

ARRESTS AT THE "800."

Counterfeiters Had an Immense Amount of Paper on Them.

Sault Ste. Marie, Mich., July 8.—An important capture was effected here to-day at the instance of the Dominion police. Two Canadians, named R. Winn and A. Bouyea, were arrested to-day on the charge of attempting to pass counterfeit fives of the Traders' Bank. Both were arrested as workingmen. The local police had been told to look out for them, as it was known they were working their way west from North Bay and Sudbury. Almost from the moment of their arrival at the 800 they were spotted, and when arrested on suspicion 12 fictitious fives of the Traders' Bank were found on Winn and 800 on Bouyea. They will be formally indicted to-morrow.

CONFIRMED AT OTTAWA.

Further Arrests Expected by the Department.

Ottawa, July 8.—Col. A. P. Sherwood has just confirmed the reports of the arrest of Burke at Lindsay, and Bouyea and Winn at Sault Ste. Marie, but declined to give any particulars, as it might defeat the ends of justice, and prevent further arrests.

LINDSAY'S BIG SENSATION.

No Further Arrests—More About the Discovery of Gang.

Evening Post of July 10
No further developments have ensued in the round-up of the counterfeiters who were recently discovered, and whose headquarters were found to be in Lindsay. Charles Burke still languishes in jail, and Archie Bouyea, sr., and Richard Winn, are under arrest at Sault Ste. Marie. Chief Vincent is now in communication with the Magistrate of Algoma District, and they will probably be removed to Lindsay in the near future. Mr. Thos. Stewart has been retained to defend Burke. Robt. Logie, of town, another suspect, is still at large. His home, east of the town, has been searched.

RELATIVES GRIEF STRICKEN.

Burke lived with his brother John and sister on George-st., southward. The house is the last one south on the street, and in a comparatively lonely vicinity. His sister is heartbroken, and his three brothers, Frank, John and Nicholas, feel the strain keenly. (To a Post reporter Mr. John Burke said "They found the incriminating apparatus in what I call a pig sty. He was the oldest boy in the family, and was very quiet.") It is reported that the prisoner was a considerable money by a brother who died recently. Since the law mill was sold, Charles Burke has engaged in no business pursuit.

Archie Bouyea, sr., lives on Redoubt-st. He was formerly a white widower, and the Kennedy & Davis mill, which was destroyed by fire, and he was out of work. He is about sixty years old.

Winn lives on St. Lawrence-st., and is a widower nearly 70 years old. His heart is long and flowing.

Chief Carpenter, of Montreal, made the initial step in the running to earth of the gang when he arrested Evely on a charge of passing a counterfeit bill a week ago last Tuesday. The morning after the arrest Evely confessed he got the money from Burke, of Lindsay.

Detective Parkinson felt this morning in Toronto. Detective Cowan is in town as yet, awaiting orders. No local arrests have been made recently. Houses of suspects have been searched.

GARDEN PARTY.

A garden party will be held by the C.M.B.A. on TUESDAY EVENING, July 10th inst., in the spacious school grounds opposite the Convent. The band will be present. Delicious dainties and other refreshments will be served, and a pleasant, sociable time may be expected. Gate open at 8 o'clock—open for all. Admission 10c.

W. F. O'BOYLE, GEO. BRADY, Chairman—Secy.

An Opening (Philadelpia Press.)

"I tell you what," said the sad-looking man. "It's pretty hard for a man with a large family to live on a small income."

"Yes," eagerly agreed the stranger. "But it's a great deal harder for his family if he dies on one. Now, my line is insurance; let me interest you—Eh? What's your hurry?"

STRUCK THE RATE

Assessment This Year will be 29 1-4 Mills.

INCREASE OF 1-4 MILLS ON THE DOLLAR OVER LAST YEAR.

Short Session of Finance Committee and Council Last Monday.

The Finance committee of the Town Council met Monday and struck the rate for the year's taxation at 29 1-4 mills on the assessment. The estimates had been prepared by the Clerk, and were carefully gone over before the rate was fixed. Those present were: Ald. Eyles, chairman of Finance Committee; Mayor Vrooman, Reeve Bagg, Aldermen Rae, McGeough, Weldon and Dervitz; absent: Deacons Jordan, and Ald. W. Jordan. Ald. Eyles occupied the chair. The Clerk announced that 29 1-4 mills taxation was necessary, to cover the estimates; 29 mills might do with close economy.

Each year's appropriation was called by the aldermen in a vain attempt to find some item that might be reduced. The Board of Works, the aldermen decided, needed and should have a considerable amount of money. Last year it was granted in the estimates \$2,500, and spent double that, this year the appropriation would be about the same.

MIGHT REDUCE HERE.

The aldermen only for the year. Some thought, could be considerably reduced---several recipients could be sent to the House of Refuge. For instance, Jasper LeCombe, who is receiving \$140 a week.

Ald. Eyles would have liked very much to have the rate stand at 29 mills. The jump from 28 to 29 1-4 was in his opinion too steep.

Mayor Vrooman said the rate should cover the expenditures, and the 1908 Council should not be burdened with their decision.

Ald. Weldon---"It is a poor plan to strike a low rate and have a deficit."

Ald. Rees replied that the people would look at the high rate brought with the remark from Ald. McGeough that the people would kick away.

Moved by Myron Vrooman, seconded by Ald. Weldon, that the rate for the year be 29 1-4 mills. Chairman Eyles put the motion, which carried unanimously.

The committee then went into Council and gave the by-law a final reading.

OTHER MATTERS.

Messrs. Brown and Gilson, farmers east of town, were present, with a grievance. It appears their cattle had for some time been impounded for over a week. Gilson had the lead to pay \$27.50 to get his cattle out, and had to sell them at a little over twice that to raise the money. He felt very strongly that it was an injustice, and wanted the Council to redress it. His cattle did little damage and had been in the pound, so the mover missed them for over a week.

Roundkeeper Wilson explained how and where he had found the cattle. Brown's complaint was of similar nature.

The Mayor said the injustice came in because there was no pound. The town should provide a pound and make Wilson take care of the cattle.

Moved by Reeve Bagg, seconded by Ald. Weldon, the town's money of the pound collected, some \$1.20, be refunded, with the extra day Mr. Wilson charged. Carried.

Trouble in regard to a fence in the east ward was passed over, two aldermen having examined the fence. Mr. MacMillan was building the fence, and a neighbor complained that it was on the road. The Council decided to let the matter rest. After some further discussion the meeting adjourned.

DUNDAS & FLAVELLES LIMITED

REGATTA AT STURGEON POINT

ANNUAL DAY OF SPORTS FIXED FOR THURSDAY, AUG. 8TH.

Additions Made to the List of Races--Officers Elected.

The annual regatta held under the auspices of Sturgeon Point Cottagers' Association is becoming known as one of the greatest aquatic events held in the Kawatha Lakes district, and in all probability this year's regatta will further strengthen that impression. Last year's regatta was wonderfully successful, and attracted a great crowd of people to Lindsay's famous summer resort; the result being that this year's executive committee start in with a comfortable balance on hand for the purchase of prizes, and no doubt many will contribute cheerfully as of yore by handing over the dollar fee, which will make them members of the Cottagers and Fish and Game Associations, and entitle them to the emblem of the Cottagers' Association--a green frog in the form of a pin.

A well attended meeting of cottagers was held Monday night in Mr. Hopkins' boothhouse, to arrange for this year's regatta, and much enthusiasm was manifested. Mr. Hopkins occupied the chair, and Mr. Wallace Jones acted as secretary.

After some discussion relative to the most suitable date, it was decided to hold the regatta on Civic Monday, Aug. 8th, commencing at 1.30.

THE NEW OFFICERS.

Mr. C. H. Hopkins last refused the presidency and later his old position of secretary-treasurer, on the ground that it was time for new men to take their innings. Mr. C. H. Hopkins, of Toronto, was elected Honorary President; Dr. B. P. Allan, President; and Mr. F. Holmes Hopkins, Secretary-Treasurer.

The following were elected members of the Executive committee: Messrs. J. D. MacGillivray, W. Lloyd Wood, A. R. McIntyre, F. A. Clardy, J. V. McNamely, G. A. Jordan, W. H. Simpson, R. A. Miller, Bruce Wilson, J. O. Gracie, O. R. Gladman, J. A. Brown, J. M. Knowlson, D. Cinn-

mon, W. Wallace Jones, G. W. Ryerson, E. B. Carruthers, Geo. Beall, Jr., J. W. Anderson, G. H. Hopkins, A. O. Hogg, Chairman of committee. Messrs. Gladman, Carruthers and Geo. Ryerson were appointed a committee to canvass for membership subscriptions.

Some changes were made in the list of races. A men's paddling race for rowers in utility boats, with time limit, was added, also it was decided to have steam launches in a class by themselves.

Results of Cow-Testing.

Potterton Examiner: The June tests of cows at the Shearer Cheese Factory, made by Mr. Hain, show that the highest milk yield was 1,310 lbs. testing at 4 per cent. The lowest was 440 lbs. at 2.7 per cent. The highest was 4.6 per cent. from a cow that gave 755 lbs. of milk; the lowest being 2 per cent. from 875 lbs. of milk. The highest yield of butter fat was 52.4 lbs. from 1,310 lbs. of milk, and the lowest was 11.88 lbs. from 440 lbs. of milk. At Pine Grove factory Mr. Little's cow leads in milk yield, test and yield of butter fat, giving 1,330 lbs. milk during the month, testing at 5.5 per cent., and yielding 73.15 lbs. of butter fat. The lowest milk yield was 400 lbs. testing at 3.5 per cent.

A Weighty Opinion.

Charles Finney Cox, treasurer of sixteen railroad companies included in the Vanderbilt system, made the principal address at the alumni meeting of Oberlin College in Oberlin, Ohio. In the course of his remarks, Mr. Cox surprised his audience by declaring that there can be no great enlightenment in the belief that a college education fits a man for making money. Continuing, Mr. Cox, who was graduated from Oberlin in 1880, said: "My experience confirms me in the idea that the highest form of education has little or no commercial value. Looking upon education merely as a preparation for business success, is practically the same thing as regarding the possession of money as an end in itself. The over-increasing competition for money makes me doubt whether what we call material progress is desirable."

SHIPPING GREEN CHEESE TO BRITAIN IS INJURIOUS.

Letter From English Importer Which Should Be Read And Acted Upon By Every Farmer in Victoria County.

In the annual reports of the Dairy-men's Associations of the Province of Ontario for 1936, appears the following letter bearing on the shipment of cheese less than ten days old: London, Dec. 11, 1936.

J. A. Ruddick, Esq., Department of Agriculture, Ottawa, Ont.
Dear Sir:--When you were over in England you asked us to give you any details in connection with the business of the cheese trade which might be of interest to those immediately connected with the industry. We have noticed very particularly that cheese have been drawn from the factories very young, and this has produced an insipid flavor. We cannot say that this is what is understood as a strong flavor; in fact, it is difficult to define, but it is certainly not conducive to consumption. Of course, we have not the actual experience of putting them on the counter, but it is sufficient for us to know that buyers are dissatisfied and consequently take a great amount of trouble in selecting something that will have a cheesy flavor. It is impossible to explain in a letter what we mean by insipid, but probably your own experience of cheese drawn too soon for use will agree with ours. And there is another side to the question. The shrinkage in weight is large, and it is the cost of the goods because they are sold here. We can turn out weights of cheese fresh landed where the loss is as much as 7 lbs. on five boxes. Now, seeing that the cheese weigh on an average 3-4 cwt. this loss means just one per cent. We have none of these troubles to put up with from New Zealand because they allow us a shrinkage allowance of 1-2 to 3 per cent. It is no use of our preaching to opera-

tors on your side who are very often gamblers. What we want you to do is to use all possible influence with the factorymen to withhold selling any cheese that have not been on the days, as we on this side are fearfully punished when handling such young cheese. Regarding shipping, we have very little fault to find, as the steamship companies have made every effort to fall into line, and adopt suggestions thrown out by importers, and as a consequence we have a better state of things existing now than has ever been previously known. Yours truly, ROWSON, HODGSON & Co., Limited.

ARTHUR J. ROWSON, Director.
The matter of factories selling green cheese is an important one to every farmer who is a patron of a cheese factory. If cheese is shipped green the merchants in Great Britain lose considerable in weight. To them this is an important matter, as it is also to the Canadian farmer. The British importer makes more loss if he thinks his is being imposed upon than he does over a difficulty in quality. If the Canadian factoryman continues to sell green cheese and not allow the British importers a shrinkage allowance, the Canadian cheese will soon take a second or third place on the markets of the Mother Country.

This is not at all desirable, as all classes of Canadian goods should occupy only first place on every market in the world. There is no reason why it should not. Canada has the goods, the men and the machinery, and surely the greed for quick returns will not stand in the way of the country's reputation advancing. Let the farmers of Victoria county take a firm stand and not allow the cheese from their factories to be shipped until they are in a proper condition. The farmer will be, and is the direct loser, while the whole country suffers.

They located two cubs up a tree near Mr. Gassard's farm and while one kept watch the other went for a rifle. They killed one of the cubs and wounded the other, but it succeeded in escaping. The mother came around several times, but it was nearly dark at the time and they did not get a shot at her. Mr. Downer took the dead cub to Peterboro to have it stuffed.

—I will mail you free, to prove merit, samples of Mr. Dr. Shoop's Health Coffee, and my book on "The Dyspepsia, the Heart, or the Kidney." Troubles of the stomach, heart or kidneys are merely symptoms of a deeper ailment. Don't make the common error of treating symptoms only. Symptom treatment is treating the result of your ailment and not the cause. Weak stomach nerves—the inside nerves—mean stomach weakness, always. And the heart and kidneys as well have their controlling or inside nerves. Weakness of these nerves, and you inevitably have weak vital organs. Here is where Dr. Shoop's Restorative has made its fame. No other remedy ever claims to treat the "inside" nerves. Also for bloating, oiliness, nervousness, or constipation, use Dr. Shoop's Restorative. Write to-day for sample and free book. Dr.

Shoop, Inc., Wis. The Restorative is sold by all dealers.

—Wait for St. Paul's Choir excursion to the old Fort York, on Wednesday of next week, post St. Monday.

—World comes from Toronto that the peach crop will be fair. This refers to the kind that grows on trees. The other sort are bruncle this year.

—There are only five hydraulic locks in the world, viz. the Anderton lock in England, the La Cleeuvier lock in Belgium, and the La Four-caps lock in France, each with a capacity of 500 tons, and in Canada, one at Peterboro and one at Kirkfield, each with a capacity of 1,000 tons.

—Make arrangements to attend the excursion Wednesday afternoon to Sturgeon Point and "Thurstonia," the new picnic resort. The St. Estienne will leave town at 2 p. m.; return fare to the Point, 25c; to Thurstonia, 15c. additional. Hot water, swings, etc., on grounds. Boat will return to town after tea.

—Shortly before nine o'clock Tuesday morning the T. V. N. steamer Estienne pulled out from the wharf with a large crowd on board, bound for Rosedale. The excursion was under the auspices of the Catholic Literary Society of Lindsay. The morning was a delightful one, although a little cool. Games and races were on the program for the afternoon's amusements.

—I'll stop your pain free. To show you first—before you spend a penny—what my Pink Pain Tablets can do, I will mail you, free, a trial package of them—Dr. Shoop's headache tablets. Neuralgia, headache, toothache, period pains, etc., are due to a blood congestion. Dr. Shoop's Headache Tablets simply kill pain by coaxing away the unnatural blood pressure. That is all. Address Dr. Shoop, Racine, Wis. Sold by all.

—The Queen's church excursion to Thousand Island Park, on Saturday, July 27-29, promises to be a much larger one than last year. Everyone who went before has become an ardent devotee of the trip. The fare is the same, and by leaving Lindsay a little earlier, all will be able to take in the delightful scorchlight outing through the electrically illuminated islands and 400 miles of travel by train and boat for \$2.25—dinner.

—Mr. P. J. Turner, North Ops, is now occupying his new residence. The house is a brick residence, two stories and contains 10 rooms. It is fitted with modern improvements. Not content with housing himself and family in comfortable fashion, Mr. Turner has likewise raised his barn and placed a 10 foot wall underneath, wherein his stock will find first-class quarters. The stone work was done by Mr. James Bullock. The framing by Mr. Alex. Bell, of the east ward, who will complete his contract in the course of a week.

EX-Patient—"Aren't you jealous of that flamigo, doctor?"

Doctor (surprised)—"Jealous? Why in the world should I be jealous of the bird?"

EX-patient (sneakingly)—"Because no one kicks at his big bill."

Obituary

Our citizens will sympathize with Mr. F. J. Frampton, caretaker of the Union School, in the death of his son, Frederick, linotype operator in New York World office for the past 16 years. Fred learned the printing trade in the office of the Post-Express, and was a bright student. A couple of years ago he contracted consumption, owing to close confinement, and spent some time in Colorado—apparently with no good results. The deceased was married, and leaves a widow and one boy. Burial took place in New York on Thursday.

PRINTERS ARE GOOD CITIZENS.

A Character that has been Commonly Misjudged.

The Columbus Penitentiary News, for many years a famous and flourishing daily paper published by convicts, has suspended publication, for the very good reason that there is not left in that big penal institution a single man who can handle type.

Bankers are there in plenty, more than twenty, and more are on the way. Several convict banks might be operated, with men to spare. Enough lawyers are there to take care of an enormous amount of legal business. Doctors, brokers and other "eminently respectable" citizens are not lacking. Business men, farmers, mechanics and representatives of almost every other department of industrial activity, are common there.

But there is not one printer. The fact throws new light on a character that has long been commonly misjudged.

The printer does not fit his spiritual and moral form. The printer to-day is a three-crown. He is of fixed employment and he has no time for late suppers and night rides in a benzine buggy. He is—always—right above the average man in information and intelligence. All the notable events at human life pass through his hands and make impressions on his mind.

The fact that more than twenty bankers are in the Ohio penitentiary, and not one printer, tells of the relative honesty of the printer of today—and tells more, for there are no printers in the land to one-ank-er.

It shows us that the most common and most dangerous crimes of today are not being committed by the world's workers.—The Philistine.

A Great Pilgrimage.

The seventeenth annual pilgrimage from the Diocese of Kingston to the Shrine of St. Anne de Beaupre, Quebec, will take place this year on the 23rd inst. The pilgrims can go by the C. P. R. or G. T. R. at especially reduced rates. For information see posters at all stations on both lines, or apply directly to Rev. J. P. Kelso, Gananogue, director of the pilgrimage.—W2.

VALENTIA.

(From Our Own Correspondent.) Mr. and Mrs. Barrows of Buffalo, are visiting Mr. and Mrs. Davy and their numerous friends.

It is evident that Mr. Ayres, of Ops, will lease Mr. R. Taylor's farm for a term of years.

Mr. James Moffatt and Miss Elita Moffatt of Toronto, spent their vacation in this vicinity.

Miss Annie Bruce, of Woodville, and Miss Annie White, of Woodville, spent a few days renewing old acquaintances.

Mrs. Carpenter, of Toronto, is visiting her sister, Mrs. Philip Mark.

Our Foresters' strawberry social was a decided success, the weather being all that could be desired. The two contending teams displayed their ability to play a friendly game of baseball. The score terminated in favor of Valentia.

SOME INSURANCE FACTS.

According to the report of the Inspector of Insurance Companies for the Dominion the year 1906 has not been a disastrous one to the Canadian companies. The report shows that for every \$100 of premium income received the Canadian companies have paid out in fire losses \$9.33. In 1904, when the big fire in Toronto went into the business, they paid in losses \$96 out of every \$100 received. The expenses vary less than the losses, and remain fairly constant in the neighborhood of 33 per cent of the premium. In 1906 it reached 34 per cent of cash premium income. According to the statements furnished, the expenditures on gross fire and marine business—losses, expenses and dividends—the business of the Canadian companies shows an excess of outlay over total cash income of \$5.70 per cent. The statement is here given:

	Per Cent.
Acadia Fire	55.97
Anglo-American	81.37
British-American	112.08
Canadian Fire	67.35
Equity Fire	92.48
London Mutual	98.75
Manitoba Assurance	72.71
Metropolitan Fire	162.85
Montreal-Canada Fire	92.29
Nova Scotia Fire	61.58
Ottawa Fire	56.73
Quebec Fire	81.48
Richmond & Drummond	76.35
Sovereign Fire	87.16
Western	71.75
Total	105.70

It is worth noting that these figures are very much greater than those of the several British and United States companies doing business here. The rate of expenditure per cent of premium income of the former for last year is 73.32 per cent, and for the United States companies 67.44. The percentages of losses of premiums income would account for such a disparity. They are given as follows:

	Per Cent.
Canadian Companies	49.33
British Companies	44.53
United States Companies	44.58

Both the British and the United States companies spend less money upon management than Canadian companies. The respective rates of management are given as follows:

	Per Cent.
Canadian Companies	34.22
British Companies	28.88
United States Companies	27.48

The total fire risks carried by the companies in Canada were:

	\$321,131,045
Canadian Companies	
British Companies	\$72,298,115
United States Companies	213,613,168

The net cash received for premiums by the Canadian companies in 1906 was \$3,193,468, and the losses paid were \$1,575,372.

The average rate of losses to premium income was 49.33 as against 46.42 in 1905. How each company fared may be interesting, and we give them here:

British-American	52.02
Canadian Fire	42.57
Equity Fire	46.19
London Mutual	59.61
Manitoba Assurance	42.95
Metropolitan	23.20
Montreal-Canada Fire	54.93
Nova Scotia Fire	30.35
Ottawa	55.96
Quebec Fire	58.90
Richmond & Drummond	13.40
Sovereign	1.87
Western	51.74

WHY SOME GIRLS DO NOT MARRY.

President Stanley Hall, of Clark University, has taken commencement time to renew his charge that the women's colleges are responsible for the falling off in the number of marriages among modern girls. The charge is indignantly denied by the presidents of the women's colleges.

Dr. Hall would study conditions in a factory town for a time, the Brooklyn Eagle thinks, he might discover that the only agency which colleges have in making girls averse to marriage is by fitting them to earn their own living. Any institution which does that postpones marriage, and in that way defeats it in a certain percentage of cases. But it makes not a particle of difference whether the wage-earning agency is a shirt factory, a type-writing school or college. The Eagle gives two instances very much in point. In a shirt factory town a young woman was talking with her chum about getting married. "There's no good talking out the shirt factory girls any more," she complained. "Some of 'em earn \$12 and \$15, and unless you can blow 'em to a swell dinner or high priced show, they won't look at you." To which the friend assented: "Ah, it's fierce. Seems as if them girls didn't care nothing about getting married any more."

A mechanic of a high grade moved from the country into the city, and sent all of their girls through the high school. Not one of them married. Instead, one taught music, one became a high-class dress maker and a third a stenographer. The father's explanation was: "The modern girl won't look at the ordinary man. Unless he earns big wages he stands no chance with 'em at all."

In the old days getting married was the only respectable way in which a girl could be sure of a home and support. She naturally stirred herself to find a husband, and her relatives aided her in that laudable pursuit. She was not in a position to be critical as to the merits or agreeableness. As Rose Terry once put it, "She knows perfectly that it was more honorable to be anybody's wife than nobody's."

Since women began to earn wages that standard has changed. If a woman finds its pleasure to earn her own living then to marry such men as seek her, she is at liberty to do it. The rapid growth of unmarried business women shows vividly how often marriage, in the day before yester day, was a counsel of desperation rather than of love. But only a very small percentage of wage-earning women are college graduates. The factories and business offices have done ten times as much as the college to postpone or defeat marriage. Any social condition which decreases the number of homes is deplorable, but it is unfair to put more than their limited share of the blame upon the college.

The overdressing indulged in by many young women in Lindsay, as well as in other towns, is a good deal another cause tending to discourage young men, when they see a young

woman they admire wearing clothes as expensive as those worn by the daughters of men with large means, naturally conclude that to propose to a young person of that stamp would be a fatal mistake.

The overdressing referred to is due in part to the rivalry indulged in by young women employed in town stores whose parents are fairly well-to-do, enabling the young women to spend all of their earnings on their personal adornment because they have no need to pay on future to provide for. Other young women not so fortunately situated try to emulate or surpass them in attire, and so it goes, the result in every case being to frighten away the young men all of them are after.

EDITORIAL NOTES.

Canadian manufacturing capital has doubled in five years, and still the city is for more.

For the half year the Ontario succession duties "robbery" has netted Whitney \$512,117. That seems a little high for a robbery, but the "ghoulish outrage."

A London hygienist says strawberry acids affect some people's temper. Many become sulky and irritable after eating them. Perhaps that may be the explanation of some of the grumbling done by people at reaching the bottom of the boxes so quickly.

Toronto Board of Health has refused to consider a question of compensation for damages raised by a man who alleges that his child contracted measles while in the isolation hospital as a scarlet fever patient, dying of the latter disease. The child's mother caught the infection and died also.

Montreal Star: The Western Federation of Miners is protesting a general strike throughout the country. Maybe the Western Federation thinks it has got to do something to distract attention, or else it thinks this is a good time for taking advantage of the "moral support" of a pleased and satisfied public.

Canada got her share of the King's birthday honors. There are Col. Herbert, baronet; Hon. Charles Fitzpatrick, K. C. B.; A. B. Decelles and Martin J. Griffin, C. B.; Nathaniel Dunlop, Knight; Lieut.-Governor Clark and S. F. Langlier, K. B.; Sir T. Shaughnessy, K. C. V. O., and Mr. Reid, who gets a K. B., may fairly be claimed as a Canadian.

Globe: All the fatalities that are clearly traceable every year to the use of explosives on the Fourth of July do not seem to cause any falling off in this senseless and mischievous way of celebrating the declaration of the independence of the United States. In Canada the practice is certainly on the wane, and if a public opinion were to assert itself it would not last long across the line. Persistent disregard of human life is sometimes a survival of savagery and sometimes a symptom of reversal of barbarism.

Francis Murphy, the temperance evangelist, is dead, but his works live after him. He was a remarkable man, humble of origin and of disipated youth. With his conversion came a remarkable development of oratorical and intellectual powers and a devotion to the cause of his fellows, which did immense good. He appealed to the individual, and his success was marvellous. He was intensely practical, and his power to awaken the remnants of conscience and intelligence and to strengthen the will of those who seemed to have fallen to rise no more was remarkable.

Peterborough Examiner: The Provincial revenue from succession will probably total a million dollars this year. For the first six months of 1907 the receipts from this source amounted to \$541,417. This is the source of revenue which the Whitney Government when in Opposition wanted abolished. Mr. Whitney declaring it "robbery of the dead." If the finances of Ontario are in a thrifty condition the fact is very much due to the sources of revenue provided by the foresight and statesmanship of the Liberal Government. The Whitney Government owes the Liberals a debt of gratitude. They would not otherwise have got so much money. It spend bread and butter.

Smokers will be interested in the news from across the border that a number of the State legislatures are getting after the Tobacco Trust. The Minnesota food department got busy recently, and the fact was revealed that the trust is preparing all kinds of stuff for the innocent to put in their pipes and smoke. Several popular brands of tobacco being analyzed, two kinds shown were found to contain 40 per cent tobacco, and the balance was common brown paper cut up fine. A splendid cheap kind, which is five cents a package in the U.S. and 15 cents in Canada, contained not a particle of tobacco but was finely chopped brown paper soaked in the juice of tobacco stems and the refuse. A popular "mixture" was only 10 per cent tobacco and the rest brown paper. When a man thinks he is swilling from a mixture of tobacco and a good deal of refuse, it may be nothing but the taste of straw smoke crossed in his mouth.

THE CAMPING SEASON.

Near Approach of Time for "Summer Homes" Under Canvas.

With the near approach of the hot season, the annual camper-out is getting in readiness to enjoy the hot weather away from the busy towns and cities under canvas in the cool delight of the lake margin.

Ever popular with the campers and tourists, the Kawartha lakes are already beginning to swarm with summer visitors. Sturgeon Point is now largely private property, and offers little opportunity for the campers. There are numerous other pretty and inviting spots on Sturgeon lake on which to pitch a tent and spend a few weeks or a month. Bobogayou offers attractive facilities for campers, and the season there this year promises to be better than ever. Pigeon Lake, on the other side of "Caycon," is the rendezvous of hundreds of visitors yearly.

Fenelon Falls, Rosedale, Cobouk, and other points on the northern division of the Kawartha lakes, hold ideal spots in the hearts of many of the campers in which to spend the summer. The fishing at the aforementioned places is excellent, bass and muskellunge being caught in large numbers. Lake Scugog has numerous superb spots for quick retirement from active business life, but the close season for fishing is a drawback.

CANADIAN CAMPING SONG.

A white tent pitched by a glassy lake.
Well under a shady tree.
Or by the rippling rills from the grand old hills.
Is the summer home for me.
I fear no blaze of the noontide rays.
For the woodland glades are mine.
The fragrant air, and that perfume rare,
The odor of forest pine.

The wild woods, the wild woods,
The wild woods give me;
The wild woods of Canada,
The boundless and free!

A cooling plunge at the break of dawn.
A paddle, a row, a sail,
With always a fish for a mid-day dish.
And plenty of Adam's ale.

With rod or gun, or in hammock swinging,
We glide through the pleasant When darkness falls on our canvas walls.
We kindle the camp fire's blaze.

From out the gloom sails the silvery moon.
O'er forests dark and still,
Now far, now near, ever sad and clear.
Comes the plaint of whip-poor-will;
With song and laugh, and with kindling cheer.
We startle the birds above,
Then rest tired heads on our cedar beds.
To dream of the ones we love.
—Sir James David Edgar.

Incredible

A young man whose love of flowers and all things green and growing compelled him to establish his home in the country, invited his old elum.

Brown was received with all appropriate honors, and all the attractions were fully displayed to his polite, but not over keen gaze, for he was somewhat inefficient in that particular. He was a gardener which has come down through the generations from Adam.

At each meal he listened courteously to eulogies of "our own make." He here patiently "our own make" lecture from the frame "you saw, please off the dot at the back," and so on. But at last it got to him.
"Bertie, I can't recommend this chicken especially. I raised it myself." Then the woman turned after the first mouthful of chicken—and with a sad smile, remarked:
"No, Will, I can't believe that. You've only been here a little over five years."

A Town Without a Tax.
The Chicago Tribune's attention has been drawn to the municipal record of the historic shore town of Guilford, in Connecticut, as an example of New England thrift and economy. For political economists, it says, Guilford will hereafter be held up as a model of prudent government.

Guilford has just voted to levy no tax whatever for the coming year. It has all the money on hand that it needs, will have more from the sale of franchises before the year expires, and it has no debt.
When the annual town meeting was passed a unanimous vote to levy no town tax, because there was no need of it, and its collection and investment would be a robbery. For four years a tax of only ten mills has been laid. Guilford is the first town in New England to go a year without a tax levy since the ending of the pilgrims.
Isn't that enough to make you ask why the shrewd Yankee should be in advance of the thrifty Canadian?

SUNSHINE FURNACE

There is no dust

Because the Sunshine is fitted with a dust flue (see illustration.)

When you rock down the ashes (no back-breaking shaking with the Sunshine) what dust arises is drawn from the ash-pan up the dust-flue, then across the fire-pot to the smoke-pipe, as shown in illustration, where it immediately ascends to the outer air.

Only two things to remember in connection with this operation:—open both the dust and direct draft dampers.

Sunshine is just the cleanest, simplest, easiest managed, greatest labor saving furnace that you can buy.

Customer: "How do you know the colors in S.W.P. are durable?"

Dealer: "The colors in S.W.P. are durable and lasting because of the high quality of raw materials used, the care taken in manufacture and the skill employed in mixing and grinding. The S.W.P. Co. has its own dry color plant and produces dry colors second to none for brilliancy and strength; operates its own lined oil mill and manufactures all pure linseed oil for S.W.P. Products; has its own lead and zinc mines, and employs a large staff of chemists to maintain the standard of all raw materials and finished products."

"With materials of such quality, combined with the thorough assimilating they receive in mixing and grinding, is insured the most permanent and durable color it is possible to manufacture. S.W.P. wears as long as any paint can wear and retains its brightness and freshness for the greatest possible time."

JULY'S WEATHER PROSPECTS

MISSOURI PROPHET'S FORECASTS FOR THE PRESENT MONTH.

Severe Storm Periods May be Looked For, He Says.

Those who follow the forecasts of Prof. Ira Hinks on the weather for the month of June were surprised at their accuracy. His prognostications for the month of July are given for the benefit of our readers. Follow them and see if he strikes the weather conditions as well for the coming month as he did for June.

It will be noticed that he again promises storms for the second month of summer. His forecast, as continued in the current issue of his work, *Words and Works*, is as follows:

The first storm period reactionary will centre on the 2nd and 3rd, with moon at first quarter and on the celestial equator on the 2nd. On the 5th earth is in aphelion, and Uranus is in opposition, and Neptune is in conjunction within a few hours of each other. No day, the least, threatening to violent July clouds and thunderstorms will appear generally from the 2nd to 4th. Clouds will need not surprise anyone. Watch your thermometer, again at rising clouds and be ready.

The second storm period, regular, is central on the 8th, with the opposition of Mars on the 6th; moon in apogee and at north declination on the 8th, and a new moon on the 10th. A very warm day will open the country from the 6th to 11th, the thermometer will fall at low readings, and blustering thunder storms will break active to violent calmations on and touching the 8th to 10th. Look for only scattered rains, possible cloudbursts in localities widely separated. A few showers may be expected to cool from about the 10th.

The third storm period, reactionary, is central on Saturday, Sunday and Monday, the 13th, 14th and 15th. The planet Mars is not only passing opposition, but he is nearer us July 14th than for many years past; or than he will be for fifty years to come. This fact enters largely into terrestrial problems through all this part of the month, also Jupiter's conjunction on the 16th, Saturn's.

Those whose birthday this day is will meet with some annoyances.

This is the 15th day of the year; moon's age, 24 days; Mars, morning star. This is another of the doubtful days of which July is fairly full. Do not force a conclusion if you are uncertain about it. It is a good day, however, to hire maids.

BACK FROM NORTH COUNTRY

GOVERNMENT PARTY RETURN FROM LONG TRIP IN NORTH.

Long Portages in Hot Sun Made the Minister of Agriculture Ill.

Mail and Empire; Mr. Thos. Southworth, Director of Colonization, who accompanied the Ministers of Agriculture, Lands and Mines, and Public Works on a trip to the north country, returned to the Parliament Buildings yesterday morning. The party left for New Ontario a week ago last Sunday, but Hon. Mr. Southworth and Hon. Mr. Reame only traveled as far as Ennabenton. Hon. Mr. Southworth and Mr. Southworth, accompanied by four or five others, went nearly 100 miles beyond Ennabenton, to the end of the trail and then camping and portaging until they reached the point where the projected R. and N. O. Railway crosses the Driftwood River. From Ennabenton to McDougall's Chute the road is operated by the contractors and the accommodation consists of box cars with benches. The Government party, however, were given the contractor's comfortable one. Leaving McDougall's Chute they canoed 14 miles down the Black River and then up the Driftwood River to the Falls. At this point they were compelled to portage five miles to the limit of their trip.

It was Hon. Mr. Montet's intention to go even farther north, but owing to the excessive heat he was taken ill and advised by a physician not to return as the long portage in the hot sun was rather trying. So warm was it that one day in New Liskeard the thermometer registered 99 in the shade.

Speaking of the Abitibi district, which includes the clay belt, Mr. Southworth said the soil was much better for agricultural purposes than the Temiskaming, as it contains much richer loam. Timothy hay had grown to a greater height there than in old Ontario, and sweet peas and nasturtiums were already in bloom. Fairly good progress was being made in the construction of the railway, but the contractors, Mr. Southworth stated, were having trouble in getting men to work on the road. Labor was so scarce in New Ontario that it was almost impossible to get men to go so far north. The party were almost 400 miles north of Toronto. The purpose of Hon. Mr. Montet's visit was to locate a place for his contemplated experimental farm.

PET.ROBO CHEESE BOARD.

4,386 Boxes Offered Wednesday—11 5-16c the Prevailing Price.

Evening Post of July 4.

The high price for cheese at Wednesday's meeting of the Petterboro Board was 11 5-16c, and all sold at this figure except fourteen factories, and for these 11 1-4c was paid. All sold except Buckhorn, the salesman for this factory, turning down Mr. Morton's offer of 11 1-4c. The total registration of cheese was 4,386 boxes, as compared with 3,918 two weeks ago, when the first price paid was 11 5-16c. Bidding was brisk and the board was soon cleared.

When bids were called Mr. G. Gillespie offered 10 1-2c, which was advanced to 10 3-4c by Mr. Morton. Mr. Wright then bid 11c and Mr. G. Gillespie made 11 1-16c. Mr. Weir then came in and offered 11 1-8c, but Mr. Wright outbid him with 11 3-16c, and Mr. Cook went one better, with 11 1-8c. Mr. Wright then bid 11 5-16c, upon which there was no advance.

At 11 5-16c, Mr. Wright called the board and took the following: Trewern, Bensford, East Emily, Warsaw, Shearer, Lang and Indian River.

At the same figure Mr. Cook got the next selection as follows: Fine Grove, Maple Leaf, Myrtle, Crown, and Grange.

Mr. Weir took the next lot at the same price, 11 5-16c; Keene, Wagonmaster and Central Smith.

Mr. Cook came in again with 11 5-16c, and took another selection, as follows: Westwood, V. Millers, Selwyn and Lakewood.

Mr. Morton bid 11 1-4c, for the balance of the board and the following: Wood, Oakdale, Oakdale, Nowood, Canavanville, Cedarvale, Killarney, Otonabee Union, Young's Point, Grassville, Mt. Pleasant, Oak Leaf, Hope, North Dunsmuir and South Burleigh.

Buckhorn alone refused this offer, being the only factory on the board that did not sell.

While waiting for two of the buyers, who were telephoning Montreal at the request of President Biddell, a few remarks were made by Thos. Watkin, of Belleville, a veteran cheese buyer. He congratulated the board on the excellent manner in which it was being run and the splendid progress it was making.

He referred to the importance of factories installing cool curing rooms and he hoped the Petterboro district would follow the example that had been set by the factorymen of Belleville, where there were now a large number of cool curing rooms. The board adjourned for two weeks.

ROMANCE OF LOST LITERATURE

Many Masterpieces Lost by Fire and Water.

Many of the greatest treasures of the world's literature have totally disappeared. The last six books of Spenser's "Fairie Queene" were lost by one of the poet's servants. During the French revolution a valuable copy of "The Golden Legend" was used to light a librarian's fire.

Many of the valuable letters of Lady Mary Wortley Montagu were destroyed by her relatives lost literary honors might be gained at the cost of disgrace to the family name.

In 1502, according to the Rosary Magazine, a servant of Warburton used several dramas of Chapman, Green and Massinger to clean shoes and light fires.

After the death of Pierce there was found in his apartments a huge chest filled with letters from eminent scholars of the time. The collection was of immense literary and historical value. His niece instead of complying with repeated requests to have them published, used them for fuel to diminish the expense of firewood.

In the great fire of London in 1696, many manuscripts of the Elizabethan era were lost. Fire in the Cottonian Library at Ashburnham House, Westminster, in 1781, destroyed 228 out of 958 manuscript volumes, all of which had fallen into private hands after the dissolution of the monasteries half a century before.

The burning of the Strasburg Library during the Franco-Russian war destroyed many valuable works, among them the records of the legal proceedings in the controversy between Luther and his associates as to whether or not he invented the art of printing.

In 1835 Guarnio, a learned Italian, travelled through Greece in search of lost manuscripts. His labors were rewarded by the acquisition of a valuable collection. On his return to his native land a storm overtook the vessel and the captain ordered the cargo to be thrown overboard. Such was his anguish at the loss that it is said his hair turned white in a single night.

A similar fate befell, in 1699, a wealthy burgomaster of Middleburgh, who betook himself to China, distinguished as a mandarin. For years he travelled through the Celestial empire, devoting his fortune to the collection of manuscripts. Returning to Europe he was shipwrecked and all his treasures were lost.

The great Pinellian library, considered at one time one of the largest and most valuable in the world, was bought in 1600, after the death of its possessor, by a London bookseller, who chartered three vessels to carry the contents. He was pursued by corsairs, who captured one vessel, and finding it contained a cargo of books and manuscripts, destroyed all by casting them into the sea; the others escaped uninjured.

The Japanese Talmud has come down to us only through the heroic efforts of the Hebrews themselves and the interpreted service of John Rueland. Its reading was condemned by various edicts of emperors and kings; its circulation was prohibited by popes and theologians. Twelve thousand copies of this monumental work were burned in Constantinople in 1582, and a similar fate befell five thousand copies of the Koran, by order of Cardinal Ximenes, on the taking of Granada by Ferdinand and Isabella.

Sappho composed nine books of poetry. Only two ideas and a few fragments remain. Of the seventy-five plays of the Greek dramatist Euripides only eighteen have survived.

Only seven of the one hundred works of Sophocles are extant. The same number is all of the seventy tragedies written by Aeschylus.

Only forty-five out of two thousand dramas written during the time of Aristophanes have come down to us. Only a few fragments exist to prove the wonderful wit and wisdom of Menander.

Only 30 of Livy's 140 books survive. Only two of the thirty books of Tacitus' great history and none of the "Annales" of Atticus remain.

The destruction of more than one hundred libraries, the contents of which were either burned, sent abroad to foreign bookbinders or sold as waste paper. So when Sir Thomas Bodley took up his residence at Oxford, toward the end of the reign of Elizabeth, he tells us he found libraries "in every part wasted and ruined."

The invasion of Ireland resulted in almost the total annihilation of her ancient literature, so that few nations can be compared with her in the extent of her manuscript loss.

Perhaps the largest loss of the world's literary treasures occurred in the destruction of the library of Alexandria. This collection, the most remarkable of the ancient world, is said to have contained in its most flourishing period 400,000, or according to others, 700,000 manuscripts.

Its royal founder collected from all the city most of the library was destroyed by fire. It was later replaced by the collection presented to Queen Cleopatra by Mark Anthony.

But it was not destined to endure long. When the Emperor Theodosius the Great, in 391 A. D., ordered the destruction of all heathen temples within the Roman Empire, the Christians, led by the Archbishop Theophilus, did not spare that of Jupiter, in which were kept the literary treasures. In this general destruction about 4,000 manuscripts escaped, only to be burned in 640 by the Saracens under the Caliph Omar.

An impossibility.

An old, white-haired dandy, living on a plantation, not feeling well, had the doctor pay, him a visit. The doctor told him, as he was getting old, he must eat plenty of chicken and stay out of damp night air.

"But, sir," said the old dandy, "how can you expect me to stay in the house at night and still get my chickens?"

A FIGHT TO A FINISH IS ON.

THE WESTERN MINE OWNERS AND MINE OPERATIVES.

A Calm Presentation of the Basic Facts in the Case.

(From *American Magazine*, July.)

Consider the condition in the mining states of the Rocky Mountains—Colorado, Idaho and Montana chiefly. Here two wealthy men on the one hand own the mines, and to a large extent own or control the mining towns, business and all. Here on the other hand are thousands of miners. In many camps they are of American stock, of the sturdy and adventurous sort, in the ordinary mining town, then, you have two distinct classes—one on one hand the owners and bosses and the business men who depend more or less upon their favor; and on the other the workers.

Basically—and this point must be understood before you can understand the situation, which has led to the present Mayer-Haywood cases—basically, gold-mining is different from almost any other sort of occupation. When there is a clash between the coal operators and the coal miners in Pennsylvania, for example, what happens? If the miners win and get an advance in wages, the operators simply add so much to the price of coal and you and I—the public—pay the bill. So it is in the building trades, and in most other callings. But gold-mining is different.

When the Miners' Union gets an advance in wages the operators cannot pass it along to the public. For gold is a commodity of such wide production and so valuable in proportion to the cost of transportation that its price is set by the world's market. A few Colorado or Idaho mine owners cannot put up the price of gold to make up for increased cost of production. Therefore, when the union forces up wages they must take it out of their own pockets and profits or else close up their mines.

It comes then to the downright struggle for existence between the mine owners and their workers. If there were no great outside world demanding gold the workers, provided they maintained their union, could by constant advances in wages drive the owners to the wall and finally confiscate the property; the exact method, indeed, proposed by some Socialists.

But there is the outside world demanding gold. There is the third party, the public, which is also interested in the strike. It comes, then, to a struggle between the mine owners and the union for own at control the favor of that public. If the public backs up the operators the union, sooner or later, will be crushed and compelled to go back to work; if it backs up the union to the end it will force the state ownership or confiscation of the mines—which is the dream of the Socialists.

In other words, the whole contest is transferred to politics. It comes to be a question: Who can control the governor, the legislature and the courts? That's the trouble in the west; and the industrial problem has been precipitated into politics. Now, the miners and the workers are more numerous than the operators and the business men; they have more votes and they can, if they stick together, elect their own officers. On the other hand, the operators and business men have most of the money, so that after the workers have elected the governors and legislatures and courts they can step in and buy them up.

This is exactly what has been going on in the west—and this is the underlying cause of all the present remarkable trial of the three labor leaders in Idaho.

MAN TO MAN—ABOUT BALDNESS

If you are bald, or partially so, you must realize that it makes you look old. Notwithstanding the desire to have back your one time bushy head of hair, you hesitate before wearing a natural hair covering, simply because you imagine it is going to be noticed by others. Thousands of men, who thought the same as you do, are to-day wearing a

DOREWEND PATENT TOUPEE

and instead of carrying the handicap that baldness proved to them, they are now enjoying the advantage of "looking young," and that is what counts today in business and social life. They act as a protection, preventing colds and catarrh, so common to bald men.

Now do not neglect this opportunity—come and see for yourself. A few minutes' demonstration will convince you.

Some Remarks on

Things in General

By "THE STROLLER."

The Orangemen are a prolific source of amusement to those who are not of their way of thinking—they take themselves so seriously. It is funny to be told, the liberty the world enjoys to-day is due to their unceasing efforts to keep the Pope in his proper place. Poor man, he will have to answer for all they accuse him of is true. We see that Dr. Sprague has been airing his grievances again at Grand Lodge, and he goes over the usual ground. The first thing they always have, a truck called Home Rule or Ireland. It seems to apt to them like a red rag to a bull, and they are just about as reasonable as the bull. For the life of us we cannot see why Ireland should not have Home Rule. Had they had it years ago there would not have been the crimes on record that there are to-day. We cannot see why some statesmen does not come forward over there and propose a general Home Rule Bill all around for England, Scotland, Ireland and Wales, with a confederation for the bunch. A Confederation Act on the principle of either our own or the Australian would seem to us to be just the thing. There are supposed to be Irishmen who grant assent to independence, but they are only the windy ones—the spassie Irishmen know that such a thing would be impossible as long as Ireland lies as close to Great Britain as it does. We think it was the Duke of Wellington—himself an Irishman—who wished the could turn the blooming place out into the middle of the Atlantic and leave it there.

The second thing the Orangemen have a crack at—and this is why they are an existence here at all—is the Grit party and their notorious dealings with Rome. It appears that Sir Wilfrid Laurier called on His Holiness when he was there and took Mr. Fielding along with him, so Dr. Sprague says, although we saw nothing of that part of it in the news. Now, we have nothing particular to say either for or against Pius X. From all we can gather he seems to be a level-headed, sympathetic, sensible old man. We must remember, however, he is the spiritual head of about 40 per cent. of our countrymen, and Sir Wilfrid is one of them, and we do not see anything very wrong, in fact would consider it very peculiar, if Sir Wilfrid, being in Rome, did not call on the Pope. The strange yarn, however, that Dr. Sprague regaled his hearers with was that Sir Wilfrid took Mr. Fielding in with him to get the Pope's consent to Mr. Fielding succeeding Sir Wilfrid as premier. Now those who are not Orangemen will marvel at the brazen effrontery of any man who pretends to be a parliamentarian, putting forth a yarn like that, and at the credulity of any set of people who would believe it, or the sort of thing is the pap the Orangemen must have to live on or the order would die. His audience go back to their homes and lodges and repeat what the Grand Wizard said and it goes down like a bomb, and the drum is beaten with a more vigorous stroke and the principal thing is accomplished—the "boys" are held in line and vote right when the time comes.

Our readers will have noticed that the necessary amendment to the British North America Act to enable Canada to pay the Premiers the additional salaries agreed upon has passed the British House of Commons substantially as passed at Ottawa, the only exception being the clause where it said it was "to be final and unalterable." The British House took the very sensible view that nothing was final or unalterable, and that it is to be amended by the majority of both Houses, and is no use of any man, or set of men, sitting down and decreeing what their children or grand-children will do. When you come to think of it the idea is absurd. In the first place, why should we worry about what our progeny ought to do fifty or one hundred years from now? We won't be here, and the best of us will be entirely forgotten. In the second place, with the weight that being shed abroad in these latter days, it is astonishing how little reverence we have for old-time laws if they happen to stand in the way of advancement; and if we are inclined to levy along those lines, what can we expect of our children? We are expecting to live long enough to see this blooming farce called "vested rights" swept out of existence. The idea that because some man, 100 years ago, "happened on" to a good thing and managed to keep it in the family, and the country prospering, therefore his descendants have a right to exact toll from thousands of others for all time to come, is becoming pretty well "thinned out."

Some day the people who are, giving these vested rights the value that they have are going to do some tall thinking, with the result that they will cease to work for people who don't work and will appropriate their own. The report said that Mr. McBride, the B.C. Premier was very active in trying to get a larger subsidy for his province, and was unsuccessful, but he is given credit for the elimination of the "unalterable" clause. These B.C.s are great people. They have a great province and presumably that accounts for it, but they also have a terrible lot of insurance. We forget the figures they gave, but in arguing their case before the other Premiers at Ottawa they claimed they paid so many dollars per head more into the Customs than the rest of Canada, and therefore were entitled to more. They also claimed that it was more expensive to administer justice in British Columbia than in any other part of the country. The

latter part of their claim we believe to be true. They have the largest province in the Dominion and the most sparsely populated. In addition to that they have those mountain ranges that appall one as they look at them, and yet they have the richest province by far. At the present time they are getting from new timber license alone, \$750,000 per year, and there are the gold licenses the mines and the fisheries, all revenue producers of no mean order. We don't see, however, how they make out that they pay more per capita through the Customs than any other province. We may be dull but we are open to enlightenment, and would be glad to have someone explain.

The different church parliaments have been in session during the past month and all seem to have sounded the note of progress. It would indeed, seem very funny if, with everything else going ahead, the church militant were to be standing still. It is true that it is one of the things that require constant attention, especially in the more fertile parts of our country, and especially in prosperous times, or the forces of evil will surely overcome it. It does not take long for a section, left without spiritual oversight, to become thoroughly bad, and when the better elements of the people do get awakened up to the state of things that are generally too late to do any good. We can see this daily exemplified in the Western States, which were left alone, spiritually, for a long stretch of time, and which to-day are about as godless a range of country as one can find anywhere. We do not want our own West to follow in their steps and we thus find each church trying to do its best to reach out after the settlers and provide for their spiritual needs. In order to do this properly we must have men, and in order to get men we have got to give them at least enough to keep body and soul together.

Our idea of the ministry is that it is the highest calling any man can be privileged to go into. If, however, anyone goes into it as he would into any other profession, simply for making a living, or have a living he is making one of the biggest mistakes of his life. In the first place, he must have a thorough spirit of self-sacrifice and love for his fellow-men and be content to go where he is sent, believing that wherever that is the place for him. We believe that most of our ministers go into the ministry for the money, and should not expect them to do impossibilities and live on wind. A note of complaint, or perhaps warning would be the better word, ran through all the church counts that we must raise the minimum of our stipends or we would soon run short of men. One church has a minimum of \$800 per year, and they are going to try and raise it to \$900 this year and \$1,000 next year. The other churches are not so generous. We are all university graduates, and we expect them to be "read up" in the very latest of everything. We expect them to be at all times well dressed, and if they are married we would find fault if we saw their wives hanging out their own washing. We know that the grocer and baker and butcher charge them just as much for what they get as they do any other member of the community, and we see no reason why a minister, on his wife, or his son should not be as hungry as anybody else, and yet we expect them, or some of them, to do all this on as small a wage as we pay an ordinary day laborer, and very much less than many skilled mechanics get. Some folks think that they ought to be content with what they get. No, they would if they were the grocer, the baker, or the butcher, but they are not. We don't think any minister (the gift) at the same time, we must give them enough to hold up their position decently.

There was a very wild letter in one of the Toronto dailies recently from a very worthy man, and now that he has cooled off, we have no doubt he is thoroughly ashamed of what his letter contained. The man has little imagination as to what we feel, especially when we are "hot up"—at least, it does not go to post or publish at all. It is sometimes relieving one's feelings to write them down, but it is a very wise plan to put the letter away and read it over next day, or the day after and note the wonderful changes you will make in its phrasing before you send it to the printer. The cause of Mr. O'Brien's affluence was one that is all too common in our midst, viz., the poisoning of flowers from his flower beds. Some thoughtful boys, or it might have been girls, for our experience is that the feminine portion of the community is just as liable to do those sort of things as those who are of the other persuasion. It is very aggravating after having spent time and money in recovering to actually find one's place, to have all the fruits of it spoiled in a day, or a night, by vandals, thoughtless or otherwise. The same feeling is apparent when you are trying to cultivate a well-kept lawn and see your neighbor, or anyone, make a habit of cutting across it to save a few steps. Then, if you happen to have any fruit trees or vines, or berry bushes, there is always the risk of having the fruit stolen. It is not what they actually steal, but it is the damage they do in the stealing.

When we were boys our father took a fancy to growing grapes, and nourished them and tended to them far more tenderly than he did to his boys. There was a day passed without his going out and looking over his vines, lovingly and longingly, and it is safe to bet that he knew every bunch of grapes, if not by name, at least by number. It is needless to say the boys were wared, early and often, to leave those grapes alone, and being good, dutiful boys, and further, knowing what was likely to happen if they did not they conscientiously followed his behest. The prohibition did not mean very much to them, as they knew the best would come all in good time. Just as they were ripe, one Sunday night, after all had come in from church and were engaged in discussing the sermon and otherwise, we were called out by our father to witness the destruction of all our hopes, and this was truly pitiful. We waited till daylight next morning to examine the vines, and lo! the grapes had been eaten and the vines were left in a state of ruin. We were all very much shocked, and we were all very much disappointed. We were all very much disappointed. We were all very much disappointed.

INTERESTING FARM NOTES

THE DAIRY CATTLE

One of the most delicate operations, and one that requires the closest and most careful attention on the part of dairymen or the breeder of dairy cattle, is the feeding of the dairy calf. It has been well said that on the first eighteen months or two years of the calf's life does its future usefulness depend, says the Farmer's Guide. We want to go just a little further and this, and say to all who are raising calves for the dairy business, whether it be to make butter, cheese, selling whole milk or cream, or supplying a condensing factory or creamery: raise calves from a strictly dairy breed of cattle. If you have not the pure bred cows, get yourself at least a pure bred sire of good breeding, and the better record his dam has the better he is; that is, the better will his calves be. Now, whichever breed you choose, stick to it, and don't go to trying crosses or you may lose money. If you select a Jersey sire at first stick to the Jerseys and you will soon have a profitable, well-bred and nice-looking herd. The same is true with the Guernseys and Holsteins.

FEEDING HINTS

The cow should be well fed when she is carrying her calf. That is, before the calf is born, so that the calf may be well nourished and the cow return a good margin over the expenses of feed and care. When the calf is born, place it and its dam in a clean, dry, well bedded place, and in a comfortable temperature not below fifty degrees F. It is a good plan to let the calf stay with its dam for the first forty-eight hours. The first milk, or colostrum, is very necessary for the calf, as it acts as a physic and cleans its bowels. After the first forty-eight hours the calf may be removed and fed by hand (after it has been taught to drink) and this, with some calves, is no small undertaking. It takes patience and perseverance, for it is very necessary that the calf has the regular amount of milk twice a day, once in the morning and once in the evening, although one may be tempted to let it go till it will drink. Three pounds of milk, twice a day, is enough for the first week or even two. Care must be taken to see that the milk is warm and the buckets always clean and sweet. If you see to this matter, a dry clean, well lighted and bedded place for the calf, you will never be troubled with calf scours. After the calf is two weeks old it can take four pounds of milk twice a day, eight pounds per day. This milk should be weighed every time and they will never drink too much. A pair of spring balances hung in a convenient place will solve this problem.

A hog of elephantine proportions was recently shipped from Toronto to St. Thomas. The animal weighed 730 pounds. It is the biggest living parcel that the Dominion Express company has handled for some time.

The hog, is, probably, the money-maker of the farm. No other domestic animal has as great a capacity for transforming so varied an assortment of farm products into a merchantable article. Good animals can be bought so reasonable that there is no excuse whatever for any farmer breeding and feeding mongrels.

If the farmers would realize the advantages of pure-bred stock in place of scrubs, a great amount of actual cash would be saved to them, and they would have better herds, says an authority. They put feed and care into a scrub that, expended on a pure-bred animal, would bring in much greater returns. This is a great source of loss to the farmer, and only in systematic breeding and buying can it be overcome.

As soon as the calf will eat it should have all the oats and bran it will eat as well as bright clover hay. There is nothing that will take the place of oats for young calves raised for the dairy. Water should also be provided for the calves at all times. It is a good plan to have a large bucket to set before them all the time and they will never drink too much at one time. After a calf is six weeks old it may be changed to warm, sweet skim milk. If you have a hand separator, this is ideal. To raise a calf it should not fall off in flesh or stop growing at all, nor will it if you give it good care. It is well to add a little oil meal to the skim milk when the change is made. The change should also be made gradually, as half a pound of skim milk replaces so much of the milk, till the change is completed.

In feeding oil meal one should not feed too much at first. Just a little pinch and increase to a small handful. The skim milk should be increased as the calf grows older, so that a six months old calf may take seven or eight pounds at a feed. Six months old, and bran take the place of oats entirely, because of its being cheaper. It is the good, liberal feeder that makes money in the dairy business. It is well, however, to figure out as to feed as cheap a ration as possible as long as it is good.

Waiting until we could have worked every bunch of grapes they had not they had trampled ten under their feet. There was no use of using such words, as it would have done no good; at the same time it would have been very foolish to have chased all the boys on mad in the community as mad, because two or three were guilty.

We don't think the children of Toronto are the worst in the country, nor that the children of cities in the U. S. are better, as Mr. O'Brien says. Our experience is that the children of the U. S. have as little respect for law and order as any children we know of. This is readily seen in the little respect they have when they grow to be men and women, and the contrast between the respect the citizens of the two countries have for law and order is very much in our favor, as we think all will admit. This would surely show that it was inculcated in Canadian youth. At the same time it is a quality that we cannot have too much of, and both parents and teachers would do well to not forget it.

THE OLD-FASHIONED HELL.

The belief in a literary hell—a place of torment—was expressed at the closing meeting in the series of camp meetings held lately at Peterborough by the Free Methodist, in an impassioned sermon preached by Elder Norrington, of Markworth, who, for fifty-five minutes, preached on the subject of hell, its nature, those who shall be turned into it, and the condition of the occupants of the place of punishment.

He pictured, in plain and forcible language, the place described as the ultimate end of those who reject God, and warned his audience against the horrors of hell, which, he declared, God's Word said, was a place where the occupants were forever dying and never dead, where they became more conscious of their suffering condition every hour. The speaker believed God's Word when it stated that hell was a lake burning with fire and brimstone. This place of punishment, he declared, was inhabited by fallen angels and men who sinned against God and were unrepentant.

In answer to the opinion expressed by some persons, who said that hell did not mean all that the Free Methodists made it mean, he declared that it was not what they said it meant, but what God made it.

People those days, the speaker said, did not like to hear preachers refer to hell, and the sad thing about it was that they did not hear much about it from the modern pulpits orators, who preferred to tickle the people's fancy by telling them about the pearly gates of heaven.

THE HORRID KISS.

Cairo, Ill. July 3.—More evil lurks in a poor little kiss than all the other vices put together, according to the Rev. L. D. Bass, of the Calvary Baptist Church, last night, in his discourse Mr. Bass said the kiss was the devil's most cherished and fruitful weapon for bringing in his harvest and did more to fill hell than whiskey, drugs, and all evils invented rolled into one.

He said: "There is something magnetic and thrilling in a kiss. When two sets of lips come together it is like two clouds charged with electricity, the one positive and the other negative. And the result is an emotional passion and ecstasy. Nothing has more of heaven's fire or the fire of hell than a kiss. The things that are the worst instrumentalities for deadly evil. And I know nothing as subtle and as damning as a burning, thrilling kiss. Great God, deliver us from the kissing devil!"

PAGAN FUNERALS.

The Rev. Frederick Spurr, one of the best-known Baptist pastors in London, startled the mourners at the funeral of one of the deacons of his church on Thursday by officiating in a gray suit of clothes. When questioned on the subject, the pastor declared himself a believer in cheerful funerals. He said:

"I am heartily sick of the 'magnificent' connected with Christian funerals. The deacon was 82 years of age. He had been a good Christian all his life, and died of old age, and so at his funeral I wore a gray suit and we sang the Easter hymn."

TORONTO S. A. TEMPLE.

The Salvation Army authorities of Toronto are considering the advisability of selling the present temple on Albert and James-sts. in that city, and building a larger and finer building on one of the principal thoroughfares, probably King or Queen-sts. The present headquarters have become too cramped for the growing institution, as the growth during the last few years has been enormous. No difficulty is looked for in selling the present property, as it is in a place which will make it a convenient acquisition to the T. Eaton Co.

Rev. E. A. Langfeldt, rector of St. Luke's church, Peterborough, has received word that the University of Friedrich Franz, at Rostock, Germany, has conferred upon him the degree of doctor of philosophy.

The Bulletin de La Propaganda de Rome says that there were in Canada in 1901, 2,161,370 worshippers, 3,024 priests, and 2,022 churches. In 1906 there were 2,478,183 worshippers, 3,749 priests and 2,900 churches or chapels.

SERMONS DELIVERED AT THE CHURCHES LAST SUNDAY.

The choir took the solo, "Pray for the Peace of Jerusalem," in the morning at St. Andrew's.

In the evening Mr. R. C. Gray took the solo during the offertory, "O Jesus, we adore Thee!" in his accustomed good style. Miss Ada Little, soloist in the First Presbyterian church, London, sang after the sermon, the solo, "Guard Whil I Sleep." Miss Little is the possessor of a rich, sweet voice, and her solo was much enjoyed.

Gentlemen, if you are Bald,

Advice.

"And now, my son," said the bank manager, "on this, the threshold of your business life, I desire to impress one thought upon you. Honesty, ever and always, is best." "Yes, father," said the young man. "And by the way," appended the graybeard, "I would urge you to read up a little common law. It will amaze you to find how many things you can do in a business way and still be honest."

BOARD OF EDUCATION MEET

IN CONJUNCTION WITH COUNTY COUNCIL COMMITTEE.

Vote Money For Agricultural Classes—Other Business Done.

The Board of Education met on Saturday afternoon in conjunction with the County Council's appointed committee and discussed the estimates prepared by Principal Harstone, Mr. Reed and Mr. Cornish.

There were present of the Board Mr. Stewart, chairman, Messrs. Flavell, Edwards, Jackson, Carew, D. R. Anderson and Mrs. Blanchard and White. The committee appointed of the County Council were Messrs. Grant, Watson and Hopkins. Mr. Grant, reeve of Woodville, and Mr. Hopkins, reeve of Ops, were present, Mr. Watson absent.

The items of expense submitted were read by the chairman.

(Moved by Mr. Flavell, seconded by Mr. Hopkins, that a sum, not exceeding \$300 be expended for apparatus, and a sum not exceeding \$275 for books for the benefit of the agricultural classes, now being established, this money to be expended under supervision of a committee comprising Messrs. Carew, Jackson, J. W. Anderson and J. H. Hopkins.—Carried.)

Mr. Hopkins said a down down office would be necessary for Mr. Reed to make him accessible to the farmers.

The stage of the assembly hall at the Collegiate Institute will be improved for the teaching of the classes, and will be renovated and properly fitted up.

Moved by Mr. Flavell, seconded by Dr. Blanchard, that Messrs. Carew, Hopkins, J. W. Anderson and Jackson be a special committee to arrange for the carrying out of the work, as well as to supervise expenditure of the funds for the apparatus and books.—Carried.

It was thought wise to let the remaining items of the communication from Mr. Harstone stand for a time.

OTHER MATTERS.

The agreement between the teachers and the board, to be signed by the teachers when engaged, recently formulated was next brought up. This agreement is a departure from the regular agreement authorized by the department, but the local B. of E. thought it imperative that something should be done to guard their interests and the interests of the students. Teachers leaving at New Year or Easter, create a serious break in the school work.

Moved by D. R. Anderson, seconded by J. D. Flavell, that the agreement read be approved of by the Board, and after being amended where necessary the Board authorize the printing of the same.—Carried.

The meeting then adjourned. No further meeting of the Board of Education takes place during the summer months unless a special meeting is called by the chairman. The next regular meeting is in September.

WESTERN FLOUR IN ONTARIO.

Purchase of Blended Flour Will Help Our Farmers.

In view of the fact that the freight rate to Montreal from Minnesota is as low as it is to Ontario points, the success of the efforts of the Ontario millers to capture the market of the Maritime Provinces are nothing short of phenomenal.

The farmers of Ontario have lost heavily in the decline in the demand for Ontario wheat, which has resulted not only in lower prices for all wheat, but in the present era of high prices for grain and shorts. Farmers and stockmen need hardly blame the millers for these conditions when agriculturists contribute to Western prosperity by buying Manitoba instead of Ontario blended flour when they purchase the bulky grain of the general store. Even in these districts where wheat remains a staple, it is no uncommon sight to see the miller who has hauled his own wheat to the mill joggling back with a barrel on his back bearing some well known Western brand.

The people of Ontario have taken Western flour partly on its merits "strong flour," and partly as a result of the premium of the Great West, which has been so well advertised throughout the old and long settled parts of Canada. In spite of the vogue of the flour made from the spring wheat of the West, it is an indisputable fact that the flavor of the Ontario wheat is very much superior. If enough Western wheat is added to bring up the proportion of gluten, the resultant blend is much superior to either the Manitoba or Ontario flour. The blend is nourishing and has all the delicate flavor of the Ontario wheat. It is with Ontario blended flour that Ontario millers have captured the Maritime market, to the mutual advantage of the millers and farmers of this province.

The increased market for Ontario flour is a matter of vital interest to farmers all over the province; it offers an incentive to wheat growers and will enable stockmen to procure food for their flocks. The purchase of blended flour for home use will help create a demand for the new flour right here in Ontario, and will mean an enlarged market for Ontario wheat.

ANCHOR STORY CORRECT.

Speculation on How it Came to be at Crookston, North Dakota.

The finding of a Norse anchor at Crookston, N.D., is now an established fact, though how it came to be there cannot be satisfactorily explained. It was lying in clay, which apparently had not been disturbed for centuries, and the discovery will be carefully followed up with the hope that other relics may be unearthed. The anchor will be sent to the Smithsonian Institute. It is thought the anchor may be a relic of the little band of Norsemen whom Leif Erikson left at the coast of North America centuries ago, the presumption being that at that time the Red river valley was a portion of Lake Winnipeg, making navigation from the Atlantic to Dakota possible.

A Commendable Offer.

The Orillia Board of Trade offers a flag for the first steamer to bring an excursion or cargo into the port of Orillia, from any point on the Kawartha Lakes, by way of the Trent Valley Canal, after the formal opening of the Kirkfield lift lock tomorrow, July 6th. The Board hopes that the opening of this section of the Canal may be the means of working up a trade between the two sections of country hitherto cut off from communication by water and makes this offer with the view of drawing attention to the possibilities in this direction. Lindsay Board of Trade might follow the example and offer a prize to the first excursion steamer from Lake Simcoe or Couchiching.

Midland Goes Dry.

The divisional court at Osgoode Hall, yesterday, by judgment, restored Midland's local option by-law, which had been quashed by Chief Justice Mulock, on the ground that it had been passed before the expiring time for application for a scrutiny of the ballot.

The higher court held that the by-law was not rendered void by this action.

OBITUARY.

In Memory of Austin Gilbert Wilson, Son of Mr. and Mrs. John H. Wilson, Who Died July 18th, 1907.

TO DIE IS GAIN.

"For those who are Christ, and to die is gain."—Phil 1:21.

Blinded windows, soles and tear-stained faces.

And a shadowed baby in a bed;

Round the room a tiny maiden paces,

Chattering softly, "Little brother's dead,

All the pain is gone, so still he sleeps,

Jesus Christ our little baby keeps."

In our arms we caught, the simple creature,

Bade her hush her song for mother's sake.

Tried the tale of death and loss to teach her.

Empty, now, wet eyes and hearts that ache,

Pretty baby buried in the ground,

Father, mother, sister, weeping round.

And the maiden listened, wide-eyed, pale,

In the dreary child of churchyard glore;

Then she pleaded the child's faith not failing.

"Yes, I know I shan't see baby more,

But he's one of God's own cherubs;

Oh, how I love a little glad, for him!"

Oh, how I love a little glad, for him!"

How ye shame us poor half-hearted men!

We who know death makes our dead forsaken.

Oh, a joy beyond our farthest ken,

Yet how our loss till faith grows dim.

Can't we be a little glad for him?"

Can't we be a little glad for him?"

Can't we be a little glad for him?"

Can't we be a little glad for him?"

Can't we be a little glad for him?"

OPS COUNCIL IN SESSION.

COURT OF REVISION DEALT WITH TWO ASSESSMENT APPEALS.

South Approach to Ops Swing Bridge to be Improved.

A Court of Revision was held by Ops Council on Monday, July 15th, in the forenoon, and other business transacted in the afternoon.

When the appeal list was produced by the Clerk, the members of the Court were pleased to see there were only two appeals against assessment, namely, James Long, owner of the Willock farm, lot 24 and n. h. 23, con. 2, which was assessed at \$8,900 and W. H. Anderson, tenant on the Clarke farm at Shannon's hill, which was assessed at \$4,500.

Mr. Long said he was assessed higher in proportion to the price he paid for the land than others who had bought land about the same time. He was willing to sell the place at \$9000, and thought it ought to be assessed at \$8000, according to the assessor's rule for assessing. The assessor said the place was not assessed at over half as much as farms near it, and was in his opinion worth about \$10,000. The Court were of opinion the assessment was low enough, and on motion of Messrs. O'Loughlin and Wilson, it was confirmed.

Mr. Anderson contended that the farm he is on had become dirty and does not rent as high as formerly. On referring to past assessments it was shown that the assessment had been reduced, and the assessor said if land becomes dirty through bad tillage, it would not be fair to others to reduce assessment on that account; that the quality of the soil rather than its condition, was the test for assessing. The Court admitted Mr. Anderson's taxes were high in comparison with similar assessments throughout the township, but the excess was owing to the high school rates, over which the Court had no control. The assessment was accordingly sustained, on motion of Messrs. Coulter and Best.

After making some changes in ownership, as requested, and adding about twenty names to the roll—chiefly manhood franchise voters—the Court closed at noon.

ELDON COUNCIL PROCEEDINGS.

MANY ENTERPRISING FARMERS ARE BUILDING WIRE FENCES.

A Lot of Miscellaneous Business Dealt With at Last Session.

Council met pursuant to adjournment in McFadyen's Hall, Kirkfield on Monday, July 15th, at the hour of 11 o'clock a.m. Members all present, with the Reeve in the chair. The minutes of the former meeting of June 29th were read and adopted.

COMMUNICATIONS.

M. H. Roach, stating that he had been consulted by Hector McFadyen in regard to the flooding of his (McFadyen's) land, being lot 6, S.P.R., on account of the improper construction of certain drains which were never brought to a sufficient outlet, and which were allowed to overflow McFadyen's lands; and that his instructions were to compound an action for damages, but before doing so he would give the Council every opportunity of bringing about a friendly settlement, and to arrange a remedy against recurrence of the damage. He also stated that he would be willing to meet the Council on McFadyen's land and endeavor to arrange some settlement.

Notifications were received from the following that they intended to erect wire fences as follows: Robt. Williamson, 45 rods along his property; James Wilson, 73 rods along lot 22, con. 4; John C. Campbell, 60 rods along lot 7, con. 8; Rod McEachern, 80 rods along a bit lot 2, con. 10.

D. F. McEachern, waited on the Council re the water which flows off his and his brother's farms, being lots 20 and 21, con. 3, and other farms, and after running down the road ditches, flooding over his and his brother's property. He waited the Council to take the water to a sufficient outlet.

Spence, Robinson, that the Reeve and Councilor Ross be a deputation to wait on Hector McFadyen and M. H. Roach in regard to the trouble about water complained of by Mr. McFadyen on a date to inspect the territory where complaint was made by D. F. McEachern, for waters flooding their lands.—Carried.

William McEachern (through the Clerk) requested that the township Engineer be placed on the McEachern ditch to see if the same is completed, and if it is to have the same passed.

Ross, Spence, that the Clerk be instructed to write to Mr. Cameron, Engineer, to examine the McEachern drain, and if he find the same completed to pass it and give the necessary certificate to the persons interested that their work is completed.—Carried.

The Reeve reported on the McCann ulver, and stated that he could give no definite report, as there was very little water on the ground, and he examined it, but stated that he would view the situation immediately after a fresh April report.

Robinson, McFadyen, that authority be given to the Reeve to make full arrangements for the manufacture of cement tile for the township.—Carried.

John McFarland, roadmaster on road division No. 20, notified the Council to erect a fence, through the Clerk, that the G.T.R. fence on con. 1, between lots 16 and 17, was on the road allowance, and also that the G.T.R. road crossing sign post was only about two feet from the centre of the road, and asked to have same removed.

McFadyen, Robinson, that the Council instruct the Clerk to notify the G.T.R. of the condition of the fence and sign post as per complaint, and ask them to have the same removed.—Carried.

Peter and John D. Morrison waited on the Council re the ditch on con. 5, opposite lot 12, and offered \$15 each to help to dig the expense of putting in a cement drain.

Ross, Robinson, that this Council should the effect of Peter and John Morrison of \$30 to purchase tile to repair the 5th con. road opp. lot 15, and that Councilor McFadyen be appointed Commissioner to supervise the work of repairing the said road.—Carried.

Spence, Robinson, that the Clerk be instructed to prepare a by-law for the next Council meeting for the appointment of a collector for 1907.—Carried.

A. D. Campbell waited on the Council re the A. D. Campbell drain, and wanted to know if he was justified in going ahead and completing his portion of the drain, under the award of Township Engineer Smith, or under the amendment award of His Honor Judge Harding.

The Council could not instruct him what to do until they heard from Judge Harding.

Ross, Spence, that the Clerk be instructed to write His Honor Judge Harding for information re A. D. Campbell drain.—Carried.

Capt. Neil Patterson, of Woodville, waited on the Council on behalf of the Eldon Agricultural Society, holding financial report for the support of the said society.

Ross, Spence, that this Council grant the sum of \$25 for 1907 for the aid of the Eldon Agricultural Society.—Carried.

Colin N. McDonald waited on the Council, stating that was flooding over his property from the road ditches on con. 7.

McFadyen, Robinson, that Commissioner Spence be instructed to examine the territory on con. 7, where the flooding complained of by Colin N. McDonald flows from, and report at the next Council meeting.—Carried.

Robinson, McFadyen, that a special grant be given for road purposes to cash ward to the amount of \$50.—Carried.

Ross, McFadyen, that the following accounts be passed, and that the Reeve issue his orders on the Treasurer for same: Municipal World, \$1.07; Kirkfield Drug Store, \$1.10; B. Stacey, \$25.00; Sawyer & Massey, \$37.51; Patquhar Stewart, \$75.—Carried.

Robinson, Ross, that the Council now adjourn to meet at Plank's Hall, Kirkfield, on Saturday, August 10th, at the hour of 10 o'clock a.m.—Carried.

NOTE THIS

The attention of the ratepayers is called to 4 Edward, VII, chap. 27, sec. 2, sub. sec. 1, which reads as follows: It shall be the duty of every owner or occupier of land in a municipality to cut down and destroy, or cause to be cut down and destroyed, at the expense of the owner or occupier, all noxious weeds growing on any highway adjoining such land, not being a toll road, from the boundary of such land to the centre line of such road, and in case of default after notice from the inspector or overseer of highways, or where no inspector or overseer is appointed, from the Clerk of the municipality, the Council of such municipality may do the work, and may add the cost thereof to the taxes against the land on the collector's roll, and collect such costs in the same manner as other taxes.

PALESTINE

(From Our Own Correspondent.)

Miss Sinclair, of Stayner, is spending a holiday with Mr. and Mrs. D. Brown, of Glenora.

The picnic on July 1st was, in spite of the rain, a great success. Proceeds amounted to two hundred dollars.

We congratulate Effie MacMillan on her success at the Entrance examinations held in Woodville.

Many of the citizens of this community attended the opening of the Kirkfield on July 15th, and were highly pleased.

The slight damage done by lightning to our school will be repaired as soon as possible.

Frequently when a salesman for Business Systems, Limited, installs a new system for accounting in a large commercial house, he is asked if he can recommend a man who is capable of taking charge of the work.

Right now, if they had them, Business Systems, Limited, could place some men at \$2000 a year; but it is a pretty risky thing to recommend a man for such a position without being thoroughly conversant with his capabilities.

The directors of Business Systems, Limited, have therefore, caused to be started, under the title of Business Systems Commercial School, an up-to-the-times training school where education for real business is given.

Business Systems Commercial School is entirely different from the ordinary "business" college—no student will be permitted to graduate unless he is really capable when he enters a business house, of stepping right in and taking hold in a practical manner.

That, in a nutshell, is the foundation upon which Business Systems Commercial School rests.

Business Systems Commercial School, not confined to the forms manufactured by Business Systems, Limited, includes all modern methods of accounting. The work taught consists of the methods adopted by the largest commercial houses, goes thoroughly into the practical details, and, in the more advanced courses, includes Commercial Law and modern banking.

No teachers will be employed who have not had actual business experience, and both retail and wholesale methods will be taught. For students who already occupy positions and who are desirous of bettering themselves, there will be special night courses.

Business Systems Commercial School has no room for drones—if you merely want to go some place to "put in" a year after school, go elsewhere—don't come to Business Systems Commercial School.

If you are wide awake and anxious to learn, write us.

Fall term begins Tuesday, Sept. 3rd.

must win upon their merits. The International Dictionary has won a greater distinction upon its merits and is in more general use than any other work of its kind in the English language.

A. H. Sayce, LL.D., D.D., of Oxford University, England, has recently said of it: "It is indeed a marvellous work; it is difficult to conceive of a dictionary more exhaustive and complete. Everything is in it—not only what we might expect to find in such a work, but also what few of us would ever have thought of looking for. A supplement to the new edition has brought it fully up to date. I have been looking through the latter with a feeling of astonishment at its completeness, and the amount of labor that has been put into it."

STURGEON POINT JOTTINGS.

Happenings of Note at Lindsay's Popular Summer Resort.

Evening Post of July 12
Mr. Hagerman, assistant accountant in the Bank of Montreal, and family, are occupying Mr. Alfred Parkin's comfortable cottage on Lincoln-ave.

The Str. Kathleen met with a slight mishap yesterday on the afternoon trip from Lindsay. Just after leaving Pleasant Point dock the tugger bar came out of its socket, and for a few seconds it looked as if the boat would poke its nose into the bank. Fortunately Capt. Elliott was at the wheel, and he avoided the danger by ringing full speed astern. Repairs were made in about ten minutes.

The village Council and the cottagers should get their heads together and devise, if possible, some plan for getting rid of the poison ivy which grows so abundantly along the banks and in the woods. It is to be found on the lot of almost every cottager, and whilst in the case of the owners' familiarity may breed contempt, every now and then we hear of some of their children suffering from too close contact with the enemy. People from Toronto and other outside points would rather live in a snake-infested district than anywhere in the vicinity of poison ivy, because if there are a number of children in the party, and only one comes in contact with the weed, the others are sure to get it unless kept apart from the sufferer. The ivy can be eradicated in two or three years, and it would be well to secure all possible information and get the work started. Each owner should be made responsible for the eradication of the pest on his own property, while the Council should undertake the work on the roadside and banks, and along the wood paths.

Crowds flocked to Mrs. Winkley's restaurant a few nights ago to inspect a unique exhibit in the shape of a chicken with four legs. It was hatched by an hen belonging to Mr. Jas. Graham, and enjoyed a brief life, lasting only two days, before some ailment on excess of mother love, proved its undoing.

Neglect of the Lake-ave. cottages are now occupied. Rev. A. P. Bair and family, of Toronto, are occupying their summer home at the Gregory cottage—purchased last season.

The additions and improvements to Mr. W. Wallace Jones' summer home recently purchased from Mr. McKeefy, are about completed, and will greatly add to the comfort of the inmates. In the opinion of many, Mr. Jones' location is the best on the Point.

ARRESTED ON CHEQUE CHARGE

Alleged to Have Issued Fraudulent Cheque on Port Hope Merchants.

Port Hope, July 12.—(Special).—A well-dressed, clean-shaven young man of about 25 years of age, claiming to be Walter Warren of 32nd-st., New York City, was arrested here this evening by Chief Bond, for passing fraudulent cheques on two merchants.

Warren arrived in town from Toronto this morning on the limited (and purchased \$61 worth of food from John Curtis, stating that he was a horse buyer of the firm of Warren Bros., Toronto.

He gave a cheque for \$78 in payment, and received \$17 in cash in change. He also purchased a quantity of winter twine at J. B. White's hardware store, giving a cheque for \$25 and receiving \$9 in change. The cheques were on the east end branch of the Bank of Toronto in Toronto. Some time after the sale of the food, Mr. Curtis became suspicious.

He made enquiry by telephone from the east end branch in Toronto and learned that Warren was unknown there. The prisoner registered at the Queen's hotel at W. H. Warren, of Toronto.

Several Toronto addresses were found among his effects, and it is believed he hid from there. He comes up for trial this morning.

—'Twas Her Fault.
"Poor fellow," said a benevolent lady, kindly, "what brought you to this desolate condition?"
"My wife, mum."
"Your wife? How is that?"
"Well, you see, mum, I've found her three good looks, and blessed if she ain't lost every one of 'em!"

—A Pair of Fine Fish.
Mr. Alex Paton doesn't go fishing as often as in the olden days, but when he does he generally gets the goods. Last week, while trolling in the old river channel, he caught a 14 pound 'lunge. About the same time his son Scott, who was fishing off an old scow, landed, after a short struggle, a small-mouthed black bass that tipped the scales at 5 1/2 pounds.

SLIT MAN'S TONGUE IN FOR A STRUGGLE

Faithful Servant Barbarously Treated By Burglars.

REFUSED TO GIVE UP KEYS

Buffalo Coachman Horribly Tortured and Left For Dead—Tongue Was Slit With Knives and Feet Gashed—Then Thrown Down Stairs—Assailants Escaped But One Has Now Been Arrested.

Buffalo, July 16.—Because he would not deliver to two burglars the keys of his employer's house, Frank Smith, 45 years old, a coachman in the employ of John Gehm, a wholesale meat dealer, was horribly tortured Sunday morning and left for dead by his assailants.

Smith slept in a room above the barn at the rear of Gehm's house. He was awakened shortly after midnight by two masked men, who demanded the keys of the house. Smith refused to give them up and the burglars then began a series of revolting tortures.

Smith's tongue was slit with a knife and the soles of his feet were slashed in a score of places until he became unconscious. The man then threw Smith down the stairs, where he was found the next morning.

The matter was kept a secret by the police until yesterday, when an arrest was made. The prisoner gives his name as Taylor.

ANOTHER HEAD FALLS.

Police Magistrate Woodvatt Dismissed and Successor Appointed.

Toronto, July 16.—"In the public interest," Police Magistrate Woodvatt of Brantford has been removed from office, and W. Churchill Livingston reigns in his stead. The order-in-council was signed yesterday and those interested officially notified.

Ex-Mayor Thomas Elliott had been recommended for the position by the local Conservative Association, he having been selected from several other candidates, of whom Mr. Livingston was second choice. The Government preferred Mr. Livingston, however, on account of his legal training. He is a comparatively young man, and is very popular in Brantford.

Mr. Elliott, it is rumored, will be provided for otherwise.

CAME DOWN IN THE LAKE.

Fatal Ballooning Adventure—Aeronaut Drowned Making Parachute Drop.

Kalamazoo, Mich., July 16.—Chas. Sann, aged 20, of Battle Creek, was drowned in Gull Lake Sunday on making a parachute drop from his first attempt at a balloon ascension.

Small boats reached the parachute quickly, but Sann's body had gone to the bottom.

Descending he was heard to say: "Get a boat; I can't swim."

Sir William Perkins Dead.

London, July 16.—Sir William Henry Perkins died Sunday. He was born in 1838. Sir William Henry Perkins founded the coal tar color industry, by the discovery of the mauve dye in 1856 and its subsequent production on a large scale. Sir William visited America last fall and received the degree of LL.D. from Johns Hopkins University.

When in America Sir William Perkins visited Toronto and was a guest of the Society of Chemical Industry, to whom he explained the romantic story of his discoveries and subsequent success.

Depredations on Farmers.
Berlin, July 16.—James Bunyan, aged 39, whose home is at Roseville, is lodged in Berlin jail charged with committing a series of depredations which have kept farmers in the vicinity in a state of worry during the past few weeks. Horses and cattle have been maltreated and numerous implements stolen.

Bunyan's mind is believed to be unbalanced. The offences charged against him are killing and mutilating cattle, twitching horses and committing various outrages on buildings and crops.

Destructive Forest Fires.
Sault Ste. Marie, Mich., July 16.—Reports yesterday from every direction tell of forest fires.

A report from Rober says that the camps of the Mud Lake Lumber Co. have been destroyed, as well as several farmhouses. Flames swept across Mayfields, driving off before them.

Much live stock is reported to be lost.

Colored Nuns.
Rome, July 16.—The form of organization and statutes for the sisterhood of negroes and Indians, organized by Miss Catherine Drexel of Philadelphia, have been approved and authorized by the Pope.

Drowned While Bathing.
Kingston, July 16.—A. G. Bryant, of Kingston, while in bathing at Pleasant Point, was attacked with heart failure and died before he could be taken ashore. He was aged 23.

Havana Strike Settled.
Havana, July 16.—The settlement of the cigar makers' strike, which was announced last Saturday, has been formally ratified and the men return to work at once.

Explosion in Drug Store.
St. Thomas, July 16.—While T. H. Duncombe, druggist, was experimenting with chemicals an explosion occurred and the store was badly gutted by fire.

Seven Years.
Napanea, July 16.—John Armstrong was given seven years in the penitentiary for improper conduct with a girl under 14 years of age. Armstrong is about 45 years, and is the second to be sentenced on the same charge and in the same case.

Forced Out.
San Antonio, Tex., July 16.—As the result of the Robertson Insurance Bill, which became effective yesterday, 19 life companies have withdrawn from the state.

Steamer Corunna Damaged.
Port Colborne, July 16.—The steamer Corunna of the Canadian Lake and Ocean Navigation Co., arrived here at 4:30 p. m. yesterday from Port Arthur to Montreal, and will be delayed here about 24 hours till repairs can be made to her machinery.

Found Dead On Floor.
Kingston, July 16.—Michael Brown, aged 93, was found dead on the floor in his room at the home of his niece, Mrs. Sarah Michie, Wolfe Island. He had been around up to noon.

Bomb Kills Seven.
London, July 16.—A despatch from Odessa says that seven persons have been killed and many injured in an explosion in a secret bomb factory in that place.

COBALT MINE MANAGERS ADOPT ADVERSE RESOLUTIONS.

LOOKS LIKE HARD FIGHT

Will Adhere to Existing Agreement—Miners Are Determined to Hold Out—Managers Claim Can Get Plenty of Labor—Scale Asked For—Western Federation the Real Cause of the Whole Trouble.

Cobalt, July 16.—A prolonged strike is evidently in store for Cobalt, though several mine managers declare they will be able to bring in all the labor they require.

The committee of the Miners' Union was prepared to modify their schedule of daily wages as follows: Carpenters \$3.50, carpenters' helpers \$2.75, mechanics \$3.50, pipe fitters \$3, blacksmiths \$3.75, helpers \$3, engineers \$2.12 cents an hour, firemen \$7.12 cents per hour, ore sorters \$3, hammermen \$3, teamsters \$2.50, hoistmen \$2.75, cage or bucketers \$3, surface laborers \$2.50, underground labor and cage or bucketers \$2.75, machine helpers \$3, machine men and timbermen \$3.50.

The union also asked for a nine-hour shift all round, and not more than 50 cents per day for board.

The above scale was prepared by the union committee and is said to have been ratified by a mass meeting of union men, but this cannot be confirmed. However, the six union and non-union men on the miners' committee were prepared to recommend the above scale.

Managers' Statement.
The mine managers handed out the following statement: "At a meeting of the representative of the underground mines, in session, the following resolution was adopted unanimously: 'That this body of mine managers and superintendents firmly believe that the schedule of wages offered to the employees of the Cobalt mines is eminently just and fair, and is higher than any other wage scale at present in force in Ontario, unanimously adhere to the agreement and scale of wages and hours published by themselves, and that no deviation be made from the same.'"

Want to Fight Now.
The fact that the Cobalt union is a branch of the Western Federation is the cause of the trouble. The mine managers believe a struggle with this body has to come, and the sooner the better. Some mine managers who have been engaged in prior contests with this Federation have strongly impressed this feeling among other managers and to-day some Canadian managers of small companies are believed to have fallen in line rather out of a dislike to fight with other managers than from a dislike to the proposed schedule. Some, however, of the superintendents of small companies are as emphatic as any in their determination to give no increase.

The mine managers are now busy preparing scales which they say will be uniform, and claim that the union has taken the maximum paid at any mine in camp for each particular class of labor and used it as the minimum in their schedule.

TO SEE FOR HIMSELF.
Keir Hardie Not Favorable to Emigration to Canada.

London, July 15.—Keir Hardie, who sailed Saturday, said he was going to find out whether the efforts which are being made to induce people to go to Canada are justified by the facts. He said he had a strong opinion in favor of organized emigration, and refused to be charmed by the prospect of Canada's empty territories so long as there are three million of acres of good land in England idle for want of men to till them.

Gave Cows Paris Green.
Belleville, July 16.—Robert Cowen, an elderly man, residing in the Township of Bangor, in the northern part of Hastings County, is in jail here charged with poisoning cattle belonging to his neighbor, Joseph Lang. The latter had a cow and a pig, both of which were killed by eating Paris green and it is alleged that Cowen placed the poison where the cattle were feeding.

Orchard's Uncle Insane.
Boise, July 16.—Orchard took the stand during the morning and was examined on some points by the defence. He was on the stand twenty minutes.

Under cross-examination he testified that his uncle, Peter McKinney, was insane and hanged himself in Northumberland county, Ontario, when Orchard was about 27 years of age.

Killed Between Cars.
Chatham, July 16.—J. Saunders, aged 40, an employee of the Wallace Sugar Refinery, was killed yesterday while engaged in uncoupling Fern Marquette freight cars in the factory grounds.

He was on the end of a car when the engine stopped suddenly, and then started, hurling him between two cars. His body was out in two.

He leaves a widow and family.

Revolutionists Counted.
Kiev, July 16.—The court-martial of a hundred soldiers, who participated in a revolutionary meeting on June 17, after the dissolution of the Duma, has been concluded. Six of the men were sentenced to death and the others to long terms of imprisonment.

Steamer Corunna Damaged.
Port Colborne, July 16.—The steamer Corunna of the Canadian Lake and Ocean Navigation Co., arrived here at 4:30 p. m. yesterday from Port Arthur to Montreal, and will be delayed here about 24 hours till repairs can be made to her machinery.

WIDEAWAKES 4, ORIENTALS 1
This was a win, but, oh, how bitter!
To win a game
And then not get it.

The above jingle gives a precise idea of the feelings of a few Wideawakes at present. The one solitary source of comfort and inspiration is that they "showed the Orientals what they could do."

The way it all came about was in this way. The Wideawakes won a seven innings contest some time ago. The Orientals protested, claiming the last innings were too dark. The T. B.L. executive ordered the game to be played over again from the fifth when the Orientals were one run ahead. Two innings were to be played. A five innings contest was played Tuesday, and as the score was 0-0 in the first two innings, the Orientals got the game, they being one run to the good. This is the why and wherefore of the tragedy.

To come back to Tuesday's proceedings the two teams dashed up the field, first base. Koyl was off the Wideawakes and Nesbitt played the second sack. Bill Cinnamon was right on the job and slung an over-mildly. He received good support. Suggitt was a little off, but pulled himself out of holes on occasion. The Wideawakes had three men out and none out in the first, but were unable to score. Bill Cinnamon got a dandy two-bagger in the third that brought in a tally. Millard went to the box to relieve Suggitt in the fourth and was an original to the Wideawakes.

VICTORS 2, MAYBES 2

Both teams struggled hard for a victory, but neither could win. The Maybes started out looking like winners, but on loose innings tied the score. The Maybes have superiority in weight, although both star players played snappy ball. Both star and John Spratt pitched clever ball. Mr. T. Burke umpired.

VICTORS 2, MAYBES 4.

After playing two tie games the Victors and Maybes came together for the third time last Monday, when Harry Soames' team were successful in winning the game, 4-1. The game was loosely contested compared with the previous exhibition. The Victors played their usual snappy ball, but the Maybes were away off. Starr pitched lucky ball for a while, but became discouraged and was upset by the poor support he got. In the third innings the game was lost and won when the Victors scored 4 runs or the foolish plays of the Maybes. John and Peter Spratt, the victors, played great ball for the winners. Faxon was a bustling second baseman and a hustling pitcher. The team appeared handicapped by lack of weight at times. "Bantam" Anderson, the Maybes catcher, played a hard game. He is very efficient in lining the sphere to second. Fee, on first, takes numerous hard throws. Starr pitched good ball and has plenty of speed.

The Victors now head the league and the first schedule is finished. Another will be drawn up and some hard fought games played before the Henley Cup is awarded.

THEY WANT TO WIN

Pieton and Bloomfield are having a hot fight in the Prince Edward County baseball league, and big prizes are being paid for imports. Under the new rules five imports are allowed each team, and they are taking full advantage of the privilege. Bloomfield, with several Toronto Wellington players on the line-up, gave Pieton a terrible whipping, but the losers secured their revenge when they went to Toronto, and paid \$100 for the use of Hobson, the Newark twirler, for the day, and in addition signed up Walsh, the Wrist brothers, and a few other outsiders. Bloomfield had Fred and Joseph. Pieton and Curly Rose were the only players who could do nothing with Hobson's benders, and he shut the home team out, 9-0.

GOODBYE, BILL!

W. G. Cinnamon, expert exponent of Father Chadwick's pastime, left July 12th for Dauphin, Manitoba, to play ball for imports. The fact that he is leaving for the summer, Bill has been in communication with the team for some time, and is to receive as a reward for his skill \$100 a month besides a few extras, likely. The Wideawakes will be handicapped by his absence, he being a pretty good ball player for them recently. Bill will quit pitching out west, and is billed to catch for Dauphin.

FOR THE FANS

Toronto leads the Eastern League. Joe Killen is in town, and will trip the C. L. S. out some.

The ranks of the T.B.L. teams are being badly depleted these days. Flood, the outcast from Toronto, is playing with St. Paul of the American Association. Canucks don't fancy the breed.

To take the place of Lajoie when he drops the title of hero of the American League, there are three youngsters who will probably be lacing for the honor. They are: Ed. Chase, Tyus Cobb, and Harry Adams, and experts say that never have three young ball players shown greater promise of being the three

greatest baseball players in the league at one time—Pittsburg Sun.

May is a baseball pitcher like a cook? Because he frequently stirs the batter up.

Scally, the new Toronto second baseman, is a dandy baseball player. He is a gentleman, too.

Joe Yeager, former Montreal player, now with St. Louis, is out of the game with an injured hand.

The Port Hope Guide claims the Port Hope scorers were at fault, and two hits were got off Quinlan.

The holiday season will make it difficult for the town league teams to keep their line-up complete.

Herbie Hopkins, the "dandy" outfielder, will be the twelfth for Wideawakes in B.L. Cinnamon's place.

Torontos hold the record for the season, with 24 hits. Rochester are next with 19, made off Hughes, of Montreal.

Peterboro were trimmed by Osnawa in a Midland League game by the score 9-5. Evidently Peterboro have not the pinch that they dreamed.

Tim Flood has packed up his grip and said good-bye to Toronto. "I will never come back," Flood remarked on leaving. "This is the worst town I ever struck."

Elmer Frick leads the American League in home runs and three-baggers, his straight batting average being about .333. He also leads in stolen bases and runs scored.

The Cleveland American League team is carrying eight pitchers and three catchers, in addition to an extra infielder and outfielder. Lajoie is well prepared for accidents this year.

Joe Roderick was mistaken for Detective Rogers last week. When he came to think of it, there is a similarity between the two, but our Joe, who takes up the collections at baseball games, has no higher ambition than to keep the T.B.L. out of the hole.

Catcher Bresnahan's innovation has found favor in the West. Cincinnati are a unit in declaring that "Bresnahan's shin guards look like a decidedly sensible innovation," and that "before the season rolls around all the catchers in the business ought to be wearing them."

Strict training rules have been issued to the Chicago White Stockings by Manager Fielder Jones. Every member of the team will have to be in bed by 11:30 o'clock every night hereafter until the championship flag is again within easy reaching distance of the Chicago team.

The "Brooklyn Aces" and the East End "All Stars" two amateur teams, of Cleveland, O., established a world record in a ball game there recently by playing thirty innings, the former winning by a score of 4-1. Only four hits were made by the "All Stars," and eight by the "Aces."

They have a ball trick in the Connecticut League which has already made trouble for one umpire and caused a forfeiture. Soaking a ball in kerosene to check a spit ball pitcher isn't exactly a new trick, but it does not lose any of its effectiveness by repeated use. Just whisper this to C. P. R. Anderson, the headlight of the Orientals.

Philadelphia Times: Pitcher Hughes was so sore over the loss of the first game on the 25th that as soon as the last batsman was retired he threw the ball in play from the pitcher's box clean and high over the left field fence. Inasmuch as the distance from home plate to the fence at Columbia Park is 380 feet, the throw must be regarded as wonderful. This is a new record for Dicky Gray or other T. B. L. pitchers to get after.

Yes, Peterboro's finest will play ball in Lindsay, early next week. Owing to their having played three or four out of town last week it was impossible for them to appear here this week, but just as sure as the ace comes after the pinch of snuff, Peterboro's "best" with their strong battery will try and trim the hard hitters in Lindsay's local league. So put away a shilling in your Sunday vest pocket and have it ready when the umpire calls "play ball!"

LACROSSE

MILLER'S TEAM IMPROVING
In its remarks on Jack Miller's All-Canada team, which is now on the Pacific en route for the Antipodes, the Vancouver Province says: "The east-burners showed a great record of form. Their passing was quick and sure, their system good, and their boxing in tactics on the home, which was completely absent in Westminster, was a revelation. They are a good bunch of players, and should win handsily in Australia."

BEAVERTON WON
The Peterboro lacrosse team ran an excursion to Beaver-ton on July 10 and a crowd went to see their nets get trimmed 15-5. This is two defeats they have taken from Beaver-ton.

Beaverton may get into trouble for playing "Mary" Curran against Peterboro. "Mary" isn't eligible, according to C. L. A. rules.

Peterboro beat Newmarket 6-4 in the former town on Saturday.

STILL MORE COUNTERFEITING ARRESTS

Two Additional Arrests in the Bogus Bill Case—One Here and One in Port Hope.

GEO. MILLER, TOWN, J. GOSLIN, PORT HOPE

Former Was Taken Into Custody Last Friday Evening at Pleasant Point; the Latter Was Apprehended at Port Hope Saturday Morning by Chief Bond.

Evening Post of July 13
Sensation follows sensation in the Lindsay counterfeiting case, and people stop one another on the streets and ask, "Where is it all going to end?" Rumor succeeds rumor and many citizens seem prepared to hear of wholesale arrests without any further expression of surprise than the words, "I told you so."

Truly public opinion has been in a sadly perturbed state for some days, and the climax was capped this morning when it became known about street that Mr. George Miller, of the Walsingham-Warner staff, had been arrested in jail last night on suspicion of complicity in the issue of bogus money.

The arrest was made last evening about 7:30 at Pleasant Point summer resort, opposite Sturgeon Point, where Miller had been camping with his wife and child for some weeks. License Inspector Thorburn, a County constable, drove down with the warrant and returned with his prisoner at about 10:30. Miller was then brought before County Magistrate Vincent.

ber circulated a few years ago. At the time these counterfeits created a panic all over the Dominion, it being stated that there were false bills to the value of over \$100,000 in circulation.

"I am perfectly satisfied," said Chief Vincent, "that the gang we have now under arrest were responsible for the circulation of these notes. They apparently originated a very clever system and one which has been solely the cause of their lengthy immunity from arrest. My view of the matter is that they manufactured the bills of one particular bank until the scare of the appearance of these produced become too widespread. Then they wisely refrained from issuing any more of this particular kind, and at once turned their attention to the making of duplicates of the bills of another bank. Hence we now find them at the game of turning out bogus Traders Bank bills, The Bank of Montreal and Dominion Bank swindles become too warm and they throw us off the scent by frequently, as it were, changing the scene of their operations; but it's a long lane that has no turning, and we have at last been able to lay them by the heels. As a matter of fact, I regard these arrests as being the most important that have taken place in Canada for several years, and I have no doubt that when they appear before the judge in Lindsay, they will receive sentences of sufficient severity to act as a warning to others."

AN ARREST IN PORT HOPE.

Well Known Lindsay Horseman Apprehended Saturday Morning.

(Special to The Evening Post.)
Port Hope, July 13, 2:30 p.m.—This morning, in compliance with a message from Lindsay, Chief of Police Bond arrested John Goslin, the well known horseman, owner of the station "Black Mack", now travelling on a circuit in this section. Goslin is wanted in Lindsay in connection with the counterfeiting case, it being suspected that he distributed some of the bogus bills.

Chief of Police Vincent, of Lindsay, arrived on the morning train and took charge of Goslin. They will reach Lindsay on the 6:00 train.

Additional Arrests in Near Future Hinted at by Police.

John Goslin, the Port Hope Suspect, was Lodged in Lindsay Goal Saturday Night—Five Now in the Toils, With Bouyea and Wynn Yet to Arrive from Sault Ste Marie.

Evening Post of July 15
The arrest of John Goslin in Port Hope on Saturday, following a telephone message from Chief Vincent to the Port Hope Chief of Police, adds another to the list of alleged counterfeiters. The case appears to be getting more complicated every day, and the excitement in town is at a high pitch. The number arrested, and the rather cosmopolitan personal life of the supposed gang, together with wild rumors circulating about other arrests, causes everybody to be on the alert.

Goslin is a well known horse dealer, and lives on King-st., in the east ward. He is a widower with three children living. He has two brothers, William, in Calgary, and James, at home. Chief Vincent brought him to town on the 6:23 train from Port Hope on Saturday night, and lodged him in jail. His brother James was off the train to meet him, and rode up in the back with him. He stoutly avers his full innocence. George Miller also denies any implication in the affair. Mr. I. E. Weldon is defending Goslin, and G. B. Hopkins is Miller's counsel.

The other prisoners are expected down on Wednesday next, and will likely appear in court on Thursday. There are now in the Lindsay goal four prisoners—Logie, Burke, Miller and Goslin. Wynn, Bouyea and Eveleigh are on the way here.

Eveleigh has been here nearly four years, during which time he was a fireman on the Grand Trunk. Goslin was a common figure on Lindsay's streets, and owned the horse "Black Mack".

Prominent citizens attempted to secure bail for Miller on Saturday, but were unsuccessful.

THE MONTREAL BILL.

Statement issued by the Bank, on July 6th, to the Public.

Mr. H. S. Strath, general manager of the Bank of Montreal, issued the following notice to the press on July 6th: "Below I give you a copy of letter received on the 2nd inst. from the Merchants Bank of Canada, Montreal:

"We beg to advise you that we have today cancelled for stamping after the face counterfeits a \$5 note purporting to be your 219,396, dated 2nd July, 1897, series 'D' signed 'W. G. Byrnes, pro general manager Chas. D. Warren, president.' The chief of police here has at present the bill in question in his possession, and is exhibiting it at the different banks. We understand, also, that he intends circulating a description of the note. 'One of these notes' has today come into our possession, and I might say that it is a very poor photographic reproduction. The green '7' on the face of the note in the foreground is of a very light color and badly printed. The green on the back of the note is of a very much lighter color than a genuine note, and the words 'Bank of Montreal' are also very poor. The serial number is 219,396, and the date is 2nd July, 1897. The vignettes of the president and general manager also are very poorly executed."

CHURCH NEWS OF INTEREST.

Sermons Delivered From the Different Pulpits Sunday.

At the Presbyterian church the pastor, Rev. Jas. Wallace, preached the morning sermon from the text: "I beseech thee for my son, Onesimus, whom I have begotten in my bond." Philimon, 1st chap., 10th verse. These were the words of Paul. He discovered the runaway slave, Onesimus, and gave him good advice and teaching, so that the slave returned to his master a Christian. Paul always sought an opportunity to do good and made his Master's work his own.

The highest ambition in life is to make what has been impossible in the past possible in the future. People often make mistakes, but it is only by mistakes we learn. We should not judge too harshly one that had done wrong. In his after life he may repent and live an honorable and respectable life. The runaway slave afterwards became prominent in the church and lived a Christian life. Those who have nothing to do generally are doing evil.

HERD OF DEER NEAR LINDSAY.

South Verulam Farmers' Dogs Have Been Chasing Animals.

Some two or three years ago two deer—a buck and a doe—found refuge in some thick swamps bordering on Emily Lake, about fifteen miles east of Lindsay. The animals in all probability had been chased by hunters' dogs in the fall out of Somerville or Laxton township, and having crossed Sturgeon Lake, found safety close to civilization, because none save duck hunters penetrated the region of their new home.

There the visitors lived in peace, although ever since their arrival some Lindsay hunters were aware of their presence. Like true sportsmen, they desired to protect the newcomers, and as a result the original pair have increased to a herd of eight. Unfortunately, whilst the farmers in the vicinity also spared the deer, they have been unable at all times to control their dogs, and Mr. Archie Bradshaw, Fish and Game Warden, town, has received information to that effect from a prominent farmer residing on the Scotch Line, near Dundas, and has written to the owners of the dogs in question, asking them to grant him an interview at his office in Lindsay at an early date. The deer should be protected, and in taking effective means to that end Mr. Bradshaw will have the staunch backing of Lindsay and Sturgeon Point Fish and Game Associations.

HO! FOR THE 1000 ISLANDS!

The greatest and cheapest trip of the year will be the excursion run by the Queen-st. Methodist church, Lindsay, to Thousand Island Park on Saturday, July 27, to Monday 29, via Belleville. G.T.R. special train will leave Lindsay at 3:25 a.m. Fare \$2.25, children half price. Nearly 400 miles of travel—a Sabbath day, with splendid services at tabernacle, all day Saturday and Monday through the pleasant waters of the Bay of Quinte on the steamers Varian and Elta Ross, makes this the best possible outing of the whole season.

Good accommodation at the various cottages from \$1.00 a day, or 25c. per night, with use of stove, etc., makes a family picnic possible at little cost. For further particulars see posters, dwl.

LINDSAY, FRIDAY, JULY 19th, '07

AN AMUSING INCIDENT.

The opening of the lift lock at Kirkfield last Saturday was not without some very amusing incidents. The chief fun, however, was the disposal of a quantity of Sam Hughes' campaign literature. The proceedings were intended to be non-political. Mr. R. J. McLaughlin, who had charge of the proceedings, had procured invitations for official and prominent citizens of all parties, including Sam Hughes himself. The latter was exceedingly desirous of improving the occasion, and it seems that some twelve years ago, for election purposes, he published a special edition of The Wander in colors. The first page contained a magnificent colored representation of the old flag; the next an equally magnificent portrait of Sam Hughes; then followed in order cuts of some of his then local political supporters, and the last place was given to the then Minister of Railways and Canals, Hon. John Duggan. There was also some reading matter setting forth the pedigree and exploits of Sam Hughes, and incidentally some about the canal, and who was the man who first suggested it, and how it would stay if the Grits got into power. At least, this is what we understand was in it—we have been unable to find anyone who read any of it.

Well Sam had kept a large stock of these on hand for more than ten years, waiting for an opportune time to use them, and now the time had come. An express wagon load was brought down and loaded on the boat. There were enough to go around the passengers and abundance left to distribute among the waiting crowd at Kirkfield. The boat had barely started when Sam commenced distributing them. Mr. Lemieux's copy (presumably by accident) found its way into the river. Some way or other most of the passengers let theirs follow that of the Postmaster-General. Some small boys, seeing this, and desiring to bulk the fun, took advantage of the Col. when he was deeply engaged in reading one of his exploits to Mr. Lemieux, and checked the balance of the bundles into the sea. This was certainly an advantage, as there was considerably more dock room.

We have been told that dead fish with paper in their mouths, are being found daily around the lakes.

We sincerely sympathize with Col. Hughes in his great loss.

Why, if the literature had only reached Kirkfield and got distributed, the people might have cut out his pictures and used them for the same purpose as they did the last issue.

WHY DO YOU GO TO CHURCH?

"Why do men go to church?" That is the question Rev. Dr. Cobb, of Edinburgh's church, Bishopsgate, London, has raised, and to which many questions in Great Britain and America have given varied answers, says The Hamilton Times. The reverend gentleman has been forced to the conclusion that but few attend to fear the sermon. He thinks conventionalism, habit, has much to do with the church-going of many. Others go because of dread of public opinion. Many go to show their neighbors wear, and to criticize their taste. Some go for what attendance is worth in a business or professional way, and make hardly any pretence of other motive. But, on the whole, Dr. Cobb is pleased to believe that the majority of regular church-goers are honestly in search of spiritual consolation.

One can hardly read over this list of motives for church attendance without being constrained to acknowledge that there is abundant cause for the classification. Few of us are unable to pick out among our friends (maybe ourselves) some one or church habit without any obvious or discoverable motive in regard to religion. Perhaps, like Dr. Cobb, we may even suspect that Mr. or Mrs. or Prof. or Dr. So-and-so has his or her own professional gain as his or her external religious form. A Sunday

day or two before the municipal or parliamentary elections the unwelcome presence of certain worshippers in the sanctuaries might also lead us to conclude Rev. Mr. Cobb's contention is proven. Perhaps it is unchristian and uncharitable to suppose that the Easter gowns and millinery and the modest novelties at other seasons, have any influence church-compelling on the fair sex, but there are many people who entertain such notions.

Rev. D. R. Keane Ryan, of Gardfield Boulevard, Presbyterian church, Chicago, has devoted some effort to obtaining among his people specific answers to the why of church-going. He interrogated 100 men, and thus classified the answers:

Fifteen said they attended church in order to hear the music.

Fifteen because they wanted to set a good example to their children.

Fifteen through force of habit.

Fifteen because they wanted to please their wives.

Fifteen because it helped their business.

Five because they had promised duty partners to do so.

Ten because they were not sure as to the future and did not want to run any risk of going to hell, although they did not believe in such a place.

Five because they believed in the teachings of the Bible and enjoyed the sermons.

Dr. Ryan does not regard this as a fair criterion, but he thinks that it proves that many of the faithful church-goers are actuated by far different motives and sentiments than they get credit for.

Rev. Dr. Quyle, of Chicago, thinks that Dr. Cobb's conclusion, that desire for spiritual consolation is a strong factor, is correct. He says that undoubtedly deep down in the heart there is a yearning after spiritual things, which transcends public opinion, and even overlooks the repellent in many sermons. Men, he thinks, go to church or stay away more according to the satisfying of that yearning than for any or all other causes. He regrets that the church-going habit is not stronger, and he wishes that the rule of attendance enforced in Roman Catholic churches were observed generally.

Now, why do you go to church? Have you ever considered it?

THE PROTECTION FRAUD.

John Sharp Williams, of Mississippi, speaking for the Democratic party, warned the Republicans in congress to make a readjustment of the tariff, ending with the words: "If you don't, we will."

This, says an American exchange, was virtually a promise from Democracy to the people, and the party owes it to itself and to the country to continue energetic warfare upon this tariff robbery until it is wiped from existence. The time to strike, too, is at hand; for from many quarters, usually given over to this republican wrong, comes loud complaint of the grand larceny of protection and its shameful injustice to the American people. The misleading cry of "protection to American industries" has been proved, and the disclosures brought to the surface discover to even ordinary intelligence that the "protection" is not for Americans, but for foreigners.

Suppose, instead of the sophistry of words about "protecting the wages of American workmen," the stipulations should come before the country with the facts as they really are. Something like this, for instance: "The people of England, Scotland, Ireland, Germany, France, Austria, Italy, Spain, Norway, Sweden, Denmark, the Netherlands, Russia, Switzerland, Portugal, Greece, Turkey, Montenegro, Serbia and all other foreign countries should be permitted to keep on buying watches made in America at a smaller price than is paid for such watches by citizens of the United States at home." The people of all foreign countries should be permitted to buy American steel rails costing \$16 per ton for \$20 per ton; but people of our own country should be charged \$28 per ton for the same class of rails, and so on throughout the entire calendar of protected goods, including wearing apparel and other necessities of life.

Suppose such a plank in an American platform, how long would it last before American citizens? And yet just such a plank is hidden in the Republican protective tariff. Its real purpose is concealed with high-sounding words, but all the same it is there, and in daily operation, enriching a few Americans, protecting a horde of foreigners, and impoverishing a multitude of the citizens of the United States.

EDITORIAL NOTES.

Ottawa Journal: An up-to-date counterfeit plant has been discovered at Lindsay. Look at Lindsay on a good day and you could imagine yourself in Spark-st. Who would think that within seeing distance of Sam Hughes' austere ivory wickedness could lurk? And yet in the rugged and beautiful fastnesses of Halliburton and Hastings is a territory which we continue to forget is practically a land of battle-ment; where the illicit still, the "aliquator" boat, the "blink" and other "vintners" still abound, all just about on a par line between Ottawa and Toronto.

No New Developments of Note in the Counterfeiting Case.

Chief of Police Vincent Spared the Prisoners the Trial of Running the Gauntlet Between Hundreds of Curious Spectators, Endured by Robt. Logie Last Week—Some Notes of Interest.

Evening Post of July 16

That most of the supposed gang of counterfeiters have been caught is the opinion of many. No developments have taken place since Godwin was arrested in Port Hope. Godwin was arrested in police court yesterday, having been sentenced to three months' hard labor on December 1st, 1902, by Police Magistrate Steers. He secured money under false pretences. A phony watch was in the deal. He has been witness in many other cases, and is well known in police circles.

The Post is in a position to state that there is absolutely no truth in the rumor that two citizens of Lindsay are in the Northwest are suspected of complicity in the counterfeiting case, and that the police are on the lookout for them. Probably not two citizens attached even the slightest importance to the report, which might be true. Many citizens are in the same boat, having suffered from the unjustifiable insinuations of unscrupulous gossip, mole as well as female.

Citizens have been heard expressing surprise at the refusal of the authorities to permit any of the accused to bail. We are able to state that this refusal is in compliance with express instruction issued from the Attorney-General's Department, Toronto. This prohibition may or may not be revoked later on.

BOUYEA AND WYNN HERE.

The 11 o'clock train from Toronto was late this morning. As it drew up to the G.T.R. station among the passengers that delighted the now well-known form of Detective Rogers and Parkinson could be seen. With them were Bouyea and Wynn, the two once respected citizens in town arrested at Saint Ste. Marie, charged with being accomplices of counterfeiters whose headquarters is supposed to be in Lindsay.

Their arrival was an altogether unexpected turn of affairs. No meeting mob greeted them, as was seen the case of Logie. Instead, the detectives led them quietly through the law bystanders and Chief Vincent had a back in readiness. Instantly they were inside with the detectives. Chief Vincent had mounted the car, and they were driven up Durham-st. to the goal, where Burke, Logie, Miller and Godwin are incarcerated. Their transference was accomplished very smoothly and with no undue excitement.

Both men walked beside the police clothes men with downcast mien, and were a bit worried looking, otherwise there was no distinguishing mark to tell them from other men. Wynn wore a pair of brown corduroy trousers and dark gray coat. His hat was a soft black one, and his beard was of customary length. Bouyea had a cap pulled down a trifle over his eyes. His moustache is grey and there was gray stubble on his face. Neither spoke a word or seemed alarmed. When these men were brought out it was the prisoners, a rush was made to get a look at them, and they were off in the back. The news spread like wildfire.

The detectives, Parkinson and Rogers, return to Montreal to-night or to-morrow to bring home the young fireman Eveleigh, who first gave the police an inkling of the existence of a counterfeiting joint.

SOME WILD RUMORS.

To walk the length of Kent-st. is to hear at least a dozen versions and rumors concerning the supposed counterfeiters. A prominent merchant or two, rumor said, would be arrested on Saturday, and the police would be considerable enough to wait till after business hours. Last evening it went the rounds of the park where the band concert was held, that some ten prominent citizens were to be arrested and among them some women would be implicated. As a rule, these are mere idle gossip and with no foundation. A very nice gentleman was looking for the scapegrace who started such a tale about him last week. If the gossip had been found out he would have received condign punishment.

THE LEGAL PRECEDURE.

When all the arrested suspects in the supposed counterfeiting case are collected in Lindsay, and the case for the Crown made out, a preliminary

hearing will be given the prisoners. It has leaked out that the manufacturing of the bogus money was probably done in town, in which case Police Magistrate Jackson will preside at the preliminary hearing; if in the country—say at Logie's place—County Police Magistrate Moore will hear the case. If a case be made out against them, the accused will be tried at the fall session, which begins on September 15th. Unless bailed out, which is improbable, the accused will be imprisoned in the goal during the intervening time.

HAVE THEY CONFESSED?

Last night's Toronto News had the following:

That Charles Burke and Robert Logie have confessed and will plead guilty to the charges which have been laid against them; that it was on the information obtained from them that George Miller and Jack Godwin were arrested; and that other citizens are likely to follow, are the outstanding features of the counterfeiting case here, according to rumor of an authentic nature. That these are not far from the facts of the case was admitted by one of the officials.

It is understood that the confessions point to Miller in a case of five years ago. At that time Miller, it is said, went to Belleville ostensibly for the purpose of purchasing a small printing press with which to start a job printing business here with his brother.

It was alleged that while he was there he passed several counterfeit bills, but when the merchants who had been victimized were confronted with a picture of Miller, they failed to identify him. Owing to insufficient evidence the case was dropped.

Now, however, Burke and Logie are claimed to have stated that Miller not only assisted them with their presses, but at one time sent them a package of counterfeit bills from Toronto. It is also said that Jack Godwin was an accomplice of Miller's at that time.

APPARENTLY OF GOOD HABITS.

A remarkable feature of the case is the fact that of the several men who have been arrested, six have never been known to drink liquor, and most of them, it is said, have any pronounced bad habits.

BURKE'S PHOTO.

A photograph of Charles Burke, the alleged ringleader of the counterfeiters, appears in this morning's Montreal Star. We may add that the representatives of the Toronto papers in town have been tumbling over themselves in attempts to secure photos of Burke and others of the accused. Last week Mr. W. Pepper, following instructions of the police, took three photos in goal. This was sent to Ottawa to the Dominion police office, where the Star likely secured it.

GOSLIN'S STATEMENT.

In conversation with a reporter of The News, Goslin stated that his arrest had come as a surprise to him.

"I have been all over Canada from the Atlantic to the Pacific," he said, "and as far as I know never did I wrong any man in my life."

"Did you know this man Burke?" he was asked.

"Lived within forty rods of him all my life," was the reply, "and I never saw anything wrong."

Goslin did not seem to be at all worried over his arrest, but laughed and chatted with his friends as if nothing had happened.

"They'll have to prove it, that's all," he said. "A man can't go through life without a little trouble."

"Who gave the game away?" one of his friends asked.

"Oh, I don't know," was the reply. "I've been handling quite a bit of money lately, and often had \$1,200 and \$1,500 in my pocket, and when this came out some one who had a grudge against me must have got talking about it."

MR. LOGIE'S BROTHER.

Robert Logie's brother, Henry, has very little to say regarding his brother's arrest. "I have seen nothing suspicious whatever," he said to a reporter of The News yesterday.

"Did you know your brother contemplating going to Buffalo?" he was asked.

"That was his intention when he left here," was the reply. "We have friends in Buffalo, and he said he was going to visit them."

Neighbors speak very highly of both the Logie brothers' particularly of Robert.

STORIES RIFE IN COUNTERFEITING CASE

Col. Sam. Hughes, the Latest Victim of Dame Rumor.

No New Developments in the Line of Arrests, Actual or Contemplated—Eveleigh Reached Lindsay Yesterday.

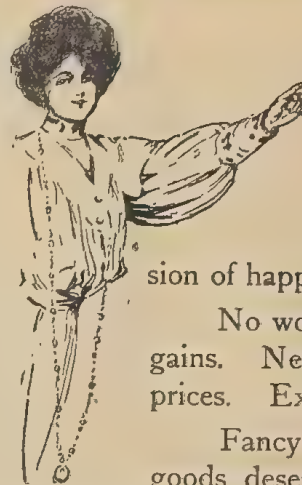

Evening Post of July 17

The arrests of Lindsay citizens on suspicion of having been engaged in counterfeiting has proved a juicy morsel to the palates of our gossips, male and female, and their insidious whispers have cast reflections on the characters of many, including some of our leading citizens. Several of the parties so injured have threatened legal proceedings, and have made diligent enquiry for the author of the detrimental rumor, lest without success. With truth might they exclaim, "Some among himself done this thing." The possession of money far from serving as a reason why suspicion should be directed, seems to

COL. HUGHES A VICTIM.

The latest to suffer in this way is Col. Sam Hughes, Dominion member for Victoria and Haliburton. About 2:30 this afternoon the editor of the paper was called up on the long distance telephone by the editor of one of the Peterboro papers, who asked, "Is it true that Col. Sam Hughes has been arrested in connection with the counterfeiting case?" The man at the other end of the line didn't seem

FOR THOSE WHO CANNOT SEE.

Room at Government School, Brantford, for Such Pupils.

In making his annual appeal to the readers of Ontario newspapers for information which will enable him to locate the children and youths of both sexes who are eligible for admission as pupils of the School for the Blind at Brantford, Principal Gardiner asks The Post to call attention to the need for some institution where the adult blind may be instructed and employed. General experience has demonstrated the inadvisability of combining a workshop for adults with a school for children under one management, yet the adult adults, who are outnumbered the children of school age, should be no longer neglected.

In New York State, it has been ascertained by careful inquiry that out of 6,008 blind persons only 584, or 9.72 per cent. of the total number, are under 1 years of age; 3,103, or 53.14 per cent., are over 60 years of age; while 1,375, or 22.88 per cent., are between the ages of twenty-one and fifty—in the prime of life and capable of being rendered in whole or in part self-supporting. It is probable that the percentages in Ontario are similar to those in New York. Many lose their sight by accident after passing school age, and many who have been blind from birth or childhood need help and direction in order to work profitably. In California, Connecticut, the District of Columbia, Illinois, Indiana, Massachusetts, Michigan, New Jersey, New York, Pennsylvania and Wisconsin work-shops for "blinds" have been provided.

Cramps Prevalent Now.

Hamilton Spectator: How is it that so many swimmers suffer from cramp these days? Forty or fifty years ago the drowning of a swimmer, caused by cramps, was a rare calamity. Now, it is, unfortunately, a very common occurrence. Has there been a change in the temperature of the water? Is the prevalence of cramp due to a change in the mode of living? Or what is it that makes swimming now so dangerous?

BLAZE AT FENELON FALLS.

Boathouses Burned But Contents Saved—Two Yachts Destroyed.

The fire fiend against visited the village of Fenelon Falls Tuesday and wrought considerable havoc on the east side of the river between the locks and the railway bridge. Five boathouses were burned, but their contents were saved.

Docked along the shore were two launches—one gasoline, the other steam. Both were destroyed by the flames, and the loss will be considerable.

The cause of the fire, and other particulars are not available. The village has been frequently visited by fires during the last few years.

STURGEON POINT ASSESSMENT.

An Appeal Will be Taken Before County Judge Harding.

Mr. G. H. Hopkins has filed an appeal on behalf of the Village of Sturgeon Point against the report of the County Valuers upon the equalization of the assessment of the village of Sturgeon Point, and the matter will be threshed out before the County Judge. The Sturgeon Point people are very indignant at having their assessment raised and say that while a few properties may bring fancy prices, it is absurd to say that all the properties are worth three times the present assessment. We understand several other townships will likewise appeal.

C. M. B. A. GARDEN PARTY.

Attendance Was Enormous—Good Music and Appetizing Refreshments.

Large numbers of our townspeople spent a very enjoyable time at the C.M.B.A. garden party last Tuesday. It was held opposite the Convent, in the students' playground, which was lighted up with wire lamps hung at different points amongst the trees. In the centre of the grounds the Sylvester band rendered numerous choice selections to entertain the visitors, and on either side were large green and pop lathes, where the public could cool off at pleasure.

The majority of the people stood or walked around the grounds, while a few availed themselves of the benches to sit and watch the passing crowds. All voted the affair a decided success. From a financial point of view nothing better could be wished, since the attendance was close to eight hundred. Everybody, of course, had to have a treat, so that the gate receipts and the money taken at the booths amounts to quite a large sum.

The public looks forward to these entertainments, and the attendance is greater every year.

Sue the Town for Damages.

Mr. F. D. Moore, of Moore & Jackson, has issued a writ against the town of Lindsay for \$1000, acting on behalf of Mrs. N. Brault, of Cobocook, staying with her son in town, who was seriously injured some time ago by the collapsing of the sidewalk. Mrs. Brault sustained a bad fall, and was confined to her bed for some time.

INTERESTING PARAGRAPHS

GATHERED BY POST REPORTERS ON THEIR DAILY ROUNDS

What is Happening in Town and the Country About Us.

—There was a quiet Tuesday.

—The midnight is no respecter of persons.

—Out the weeds in front of your premises!

—The shortest man sometimes has the longest pockets.

—The conversation case is monopolizing conversation.

—Many of our citizens are away holidaying. Business is slack.

—The bank teller simply piles up money—for the man with the check.

—The fool rocked the boat." is the oft-repeated explanation of many sad drowning accidents.

—Hay making will commence shortly. There is a lot of hay ready to cut in the fields at present.

—There will be a celebration at Fenelon Falls on Aug. 9th, under the auspices of the public library.

—Ted—What kind of an auto has he? Ned—Twenty horsepower going and one horsepower coming back.

—Mr. W. Jewett is having his back repaired. In the meantime he has a double-seated, covered rig on the route.

—The population of Kingston as stated in its recently printed directory is 22,545, over 700 more than it was last year.

—Exchange: With the ward system you can pick your own man. In the old-time system the party chooses the pickings.

—While it may not be summer, the weather prophets slow.

—The job of being second town clerkmaster was not congenial to James Hutton and he quit. Fisher has charge of this greasy once more.

—At a recent celebration at Haliburton a couple of horse racing events were run off. Golden Beau won both races and \$45 in cash.

—When a woman orders a back to call for her she usually takes particular trouble to set an hour when the neighbors are likely to be on the front veranda.

—The freight reductions ordered by the Dominion Railway Commission will be a boon to the shippers. The Canadian Manufacturers' Association express great satisfaction.

—In the report of the Separate school examinations last week M. Jordan was credited with 500 marks by mistake in place of 550 in passing from senior third to junior fourth.

—Toronto News: The arrest of counterfeiters in Lindsay and elsewhere cheers the soul of the journalist by reminding him that mere money-making is an unwholesome occupation.

—Just in word of advice. Close your ears to countless rumors and theories spreading around town. The most of them are absolutely fictitious but are harmful and may lead to trouble.

—Mr. W. Oliver caught a nice small-mouthed bass Monday in Sturgeon lake. Those that saw the fish claimed to be as large as any ever caught, but "Bill" refuses to enter it in the Star competition.

—The Riverside cemetery is a decidedly beautiful place at present. Caretaker McCausland has taken great pains to keep everything in good condition. The cemetery is a popular resting place on Sundays.

—If your name has not yet been mentioned in connection with the counterfeiting case, don't get proud. Dame Rumor, who is working overtime, may have allotted you a prominent place in her next list.

—During the holiday months of July and August the members of the Lindsay bar, and the officials of the local Court shorten their office hours from 10 o'clock till 12 o'clock, instead of from 10 to 4, as usual.

—Miss Susie Fleury, of town, and Miss Pearl Jordan, of Woodville, pupils of Miss Winters, both passed their exams in the recently held College of Music very successfully, taking first class honors in vocal music.

—Piles get quick and certain relief from Dr. Shoop's Magic Ointment. Please note it is made from purest and certain, itching, painful, protruding, or blind piles disappear by its use. Large nickel-capped glass jars 50 cents. Sold by all dealers.

—Police Magistrate Dumble, of Peterboro: "Seemingly some mothers have no control over their children, and in a good many instances the children are boss. There ought to be a school where mothers could learn how to train their children right if they know how. Young boys would not appear so often in police court."

—Many of the road sides and vacant places are rank with weeds. (No other day, a south ward lady sallied out with an axe and attacked a grove of giant buckwheats flourishing being that the weeds obscured her dwelling and kept out the rays of the morning sun so that the family overslept and were late for work.

—Peterboro is in great luck. First of all, Mr. Richard Hall, executor of the Nichols Trust, presented to the city authorities the old Nichols Hall building for a public library, and then the executors of another Nichols Trust followed suit and distributed a sum of \$20,000 among the Protestant churches, Y.M.C.A., Nicholls' hospital and Children's Aid Society.

Trouble of the stomach, heart or kidneys are merely symptoms of a deeper ailment. Don't make the common error of treating symptoms only. Symptom treatment is treating the result of your ailment and not the cause. Weak stomach, stomach weakness, always. And the heart and kidneys as well have their controlling or inside nerves. Wake these nerves, and you inevitably have weak vital organs. Here is where Dr. Shoop's restorative has made its name. No other remedy ever claims to treat the inside nerves. Also for bloating, biliousness, bad breath or complexion, use Dr. Shoop's Restorative. Write me.

to-day for sample and free book. Dr. Shoop, Racine, Wis. The Restorative is sold by all dealers.

—The Evening Post is for sale each evening at Mr. Joe Carroll's tobacco store, and at J. O. Burke's grocery.

—The janitor of the Public Schools will be kept busy during the holidays. Besides making various improvements in several of the schools, all the rooms will be subordinated.

—The Lindsay skating rink is being repaired. Men started work on the building this morning, and will greatly to its appearance.

—The rink will be an up-to-date one next winter.

—The Moore house has secured the services of Mrs. Brown, former cook at the Regency hotel, Toronto, to oversee the culinary department. The kitchen staff also includes a first-class pastry cook.

—Toronto Star: The big cities don't have all the excitement. Lindsay is having the time of its life, the absorbing question on the main street being "Who'll be arrested next?"

—Evidently, the Toronto press desire to place Lindsay in the light of a Canadian Chicago.

—Fishing in Lake Seaway waters, which have been closed for three years, will open on Sept. 1st next. Bass and lunge, of which thousands were destroyed by the unprecedented weather conditions which prevailed in the winter of 1904, are again said to have become numerous, and fishermen are looking forward to some good sport.

—Mr. Harry Pepper, a machinist at Poughkeepsie, N.Y., on the New York Central, a former Lindsay citizen, was severely injured by the explosion of gas in a fire boat recently. The explosion took him off his feet and through him back into the tank. He was severely lacerated about the face, arms and chest, and it will be impossible for him to work for some time.

—I'll stop your pain free. To show you first, before you spend a penny—while my Link Pain Tablets can do, I will mail you, free, a trial package of them—Dr. Shoop's headache tablets. Neuralgia, headache, toothache, period pains, etc., are due alone to blood congestion. Dr. Shoop's Headache Tablets simply kill it by relaxing the spasmodic blood pressure. That is all. Address Dr. Shoop, Racine, Wis. Sold by all.

—Sunday Mr. Joseph Brown made the run from the lower wharf to Sturgeon Point in his fast yacht, Retta, in 59 1-2 minutes. He had the unlucky thirteen on board, too. At the mouth of the river a stop was made to drop off a couple of passengers and the canoe and a call was also made at Pleasant Point for the same purpose. Joe says this is the best time made by any yacht this season, and that he can do it again.

—Fenelon Falls Gazette: At the rate at which guests are coming in, a dozen having arrived this week, Hotel Kawartha will soon be full from cellar to garret. Mr. Priestland is, we are glad to hear, proving himself a model host and the table and cooking of the hotel are praised in the highest terms. Judge Harding, who is one of the guests, is well pleased that he will probably spend his leisure time there throughout the summer.

—Get a free sample of Dr. Shoop's "Health Coffee" at our store. It real coffee disturbs your stomach, your heart or kidneys, then try this clever coffee imitation. Dr. Shoop has closely matched Old Java and Mocha coffees in flavor and taste, yet it has not a grain of real coffee in it. Dr. Shoop's Health Coffee. —Wins the Orillia flag.

Str. Kawartha, of Fenelon Falls, Carried First Excursion to That Town.

Orillia, July 16.—The steamer Kawartha, Captain Bungeyne, brought an excursion party into Orillia from Fenelon Falls to-day, thereby winning the flag offered by the Board of Trade to the first steamer to bring an excursion into this port from the Kawartha Lakes, by way of the Trent Valley Canal. The Kawartha started from the Falls at 7:30 a.m., and reached here at 5:30 p.m., stopping for two hours at the Kirkfield mill lock. She had twenty passengers on board, including several ladies. The excursion was organized by Mr. R. J. Moore, of Fenelon Falls. The Kawartha will make the return trip to-morrow.

OBITUARY.

Henry Proddy, Lindsay.

The death of Henry Proddy occurred on Friday last from the effect of a paralytic stroke.

Deceased was well known in Lindsay, having resided here for the last seven years. He was born in Devonshire, England, and was by trade a Jeweller. He came out from the old land 19 years ago. He was twice married and his second wife and one child survive him. The funeral took place on Saturday to the Riverside cemetery from his former residence on William-st. south. The Rev. Mr. Marsh conducted the funeral services. Much sympathy is felt for the bereaved family.

Police Court Calendar

Liquor cases come up in police court with surprising regularity. These days. The fines are generally heavy. Magistrate Jackson being resolved to enforce the liquor laws. A man named Johnson, of the east ward, was fined \$25 and costs, \$28.70 in all, for supplying liquor to J. Cohen, a forbidden person.

Sylvester Bandsman Returned.

The friends and acquaintances of Mr. Joe Schadt, who was a member of the band last year, were pleased to note his return to town, and to hear of his intentions of again playing with the local band. Mr. Schadt is a skillful bass, both brass and string player, and has been engaged with the band for some time. North German Lloyd liner, Empress Eugenie, during the past few months. This vessel plies between New York and Italy. Mr. Schadt has fully recovered from the illness that incapacitated him last fall.

MARIPOSA COUNCIL DOINGS.

DRAINAGE MATTERS CAME IN FOR A LOT OF ATTENTION.

Steel Bridge at Little Britain to be Erected on New Site.

Mariposa Council proceedings, July 8th. The members were all present, and the minutes of the last meeting were read and confirmed.

Messrs. Alex. Daniels and George Fee waited on the Council respecting matters pertaining to drainage and road improvements.

Messrs. John (Hancock, Thomas Tamin, Wm. Bowler and J. K. Powell were present to make a statement respecting the Hancock drain matters. A discussion ensued and a compromise of \$500 was offered and accepted verbally.

Communications were read from the Hamilton Bridge Co., ratifying the agreement for a steel bridge at Little Britain.

From F. D. Moore, County Police Magistrate, a copy-law relating to public morals.

The Treasurer presented his half-yearly statement of the finances of the township, showing total receipts of \$2576.66, and total expenditures of \$2449.34.

Mrs. Mahala Tinnay, notified the Council that she was assessed for quarter acre of land, \$2.25, on Elder-st. that she did not own or occupy.

Mr. Jos. Gregg notified the Council that the people of Little Britain prefer not to have the bridge at Little Britain of the size specified in the contract with the Hamilton Bridge Co.

RESOLUTIONS.

Motion by Messrs. Shaver and Rogers, that in view of a communication received from the County Police Magistrate re public morals, this Council request the township auditor to prepare a by-law in conformity with the statutes forthwith, and that a copy of this resolution be forwarded to the solicitor.—Carried.

Motion by Messrs. Michael and Varcoe, that the clerk be authorized to notify the Hamilton Bridge Co. that the Council of Mariposa desires the bridge built at Little Britain, on 10th July, but at the 18th, con. 10, instead of at Little Britain, as specified in the contract.—Carried.

Motion by Messrs. Varcoe and Michael, that the clerk be authorized to sign a lease for a gravel pit one quarter of an acre, part of lot 6, con. 4, for a term of fifteen years, for the sum of seventy-five dollars, and dated the first day of June, 1907.—Carried.

Accounts aggregating the sum of \$825 were ordered to be paid, including some \$530 of orders by the Commissioners. These accounts include five days for Mr. Stacey, in speaking roads and bridges; \$35 1-2 days making culvert pipe; Hogg & Little, for cement \$130; Messrs. Murdocks & Slaggett, for operating the grader, and use of steam, some 32 days each at \$2 and \$3.25 per day; Wm. Harkle, travelling con. 10, \$57.33; J. W. Hancock, travelling boundary of Ops, \$45; and various smaller items.

Motion by Messrs. Rogers and Shaver, that this Council adjourn all Wednesday, the 10th day of July, to consider the report of the Brooks drain, and the Council of Resolution re the Dunn drain, as previously provided for, and for any general business that may come before the Council.—Carried.

ADJOURNED SESSION.

The Council again assembled on Wednesday July 10th, as per adjournment. The members were all present and the minutes of the last meeting were read and approved.

The report of the Brooks drain was read, but the Council not being able to reconcile the report to the schedule of assessments, the following resolutions were passed:

Motion by Messrs. Shaver and Michael, that the Engineer's report re the Brooks drain be again referred back to the Engineer for corrections, as the estimates for construction expenses, etc., do not correspond to the total amount of the assessments as shown in the schedule for benefit and outlet liability.—Carried.

By-law No. 612, to provide for the drainage of lands known as the Dunn drain, and to raise funds for said work, was introduced and read a first time and adopted.

Motion by Messrs. Varcoe and Michael, that in the event of an appeal being made from the County valuation by any municipality in the county, that the Reeve and Deputy-reeve be hereby appointed to look after the township's interests.—Carried.

The Council then resolved into a Court of Revision re the Dunn drain, a member of the Council taking the oath of office as required by statute. The following persons were present: H. Davidson, G. Coppleson, John Hooper, W. H. Webster, Joseph Finney, C. Dunn, T. H. Noble, G. C. Wallis and Messrs. E. Donald and McCall, officials of the G.T.R. Co.

Mr. Wallis was appointed chairman, and the several persons interested were allowed an appeal upon resolution of the Council to the effect, that the G.T.R. Co., proposed to build and hereafter maintain the drain across the Company's lands, on condition that they should be freed from all assessments under the drain, and upon the Company assuming full responsibility for this proposition. The resolution was accepted and the Council authorized to sign an agreement to that effect, so long as it did not invalidate the by-law.

After further discussion the following assessments were changed: G. Wallis, \$178.00 for outlet, was reduced to \$25, and the balance of \$153.00 was assumed by the township; E. H. Noble, \$111.48 for outlet, was reduced to \$80; \$181.00 assumed by C. Dunn and \$113.47 by the township. The Corporation also assumed the outlet allotted to the G.T.R. Co., being \$80, on condition that this amount can be deducted from the total of the by-law. These assessments were confirmed, and the Court adjourned to the call of the chairman.

Messrs. Graham and Channon were present in reference to the Dundas drain, and informed that they desire to have that part of the drain constructed through M. Hardy's lot a bit con. 8. The Clerk was ordered to notify each person interested in said

QUICK BUYING INDUCEMENTS.

Wherever you look in this store during this month you will find opportunities of the most uncommon kind for money saving.

IT'S OUR 19th PRE-VENTORY SALE

How About These White Waists

No better time to buy than now—prices are lowest and assortments are complete—besides this is wearing time. Our values will be found extra good and styles exceptionally dainty. Some lines are very low-priced just now for quick clearance. The prices are from 39c to \$3.75.

For Summer—Use Mattings

No better floor covering for summer than mattings being more easily cleaned and sanitary conditions are always better where they are in use. Ours are direct importations previous to the advance in prices and are selling rapidly. Better select your supply now. Prices are 15c to 40c.

Great Savings on Parasols.

Make sure you get yours before the assortments become broken. Silk and silk mixed tops, good frames, dainty natural wood and combination handles. Prices range from \$1.00 to \$3.00.

Do You Need Verandah Shades?

We have still some sizes left in both bamboo and Vudor verandah shades and now would be a good time to supply your needs. Though the Vudor make sold as high as \$4.50 each—and are good—but owing to some sizes being sold out we are making the balance the same price as the bamboo ones, 75c to \$2.90.

Wash Goods Receive a Deep Cut in Price

Many lines of wash goods have become sold down until there is only enough for one dress or even a waist—others, too large a quantity remains to please us as we are taking stock now. Whatever the cause may be we are determined that the end of July will see them all gone and for that reason we have made many deep cuts in their prices. The savings are so important that it will pay to buy now and take chances on the season being a long one—or even though you keep them until next season you will be money in pocket.

AN EXCELLENT WHITEWASH.

Here is a First Class Recipe.

A piece of information that is continually in request is a receipt for whitewash that will not wash off. We do not suppose there is such a thing, but the following is considered as good and reliable as there is in its line. It was used by U. S. Grant to whitewash the White House at Washington. Some time ago there was published an autograph letter in December 1871 by Mr. Grant then president of the United States, to a friend in California, in which this formula was given. Half a bushel of unslaked lime. Slake with warm water, cover it during the process to keep in the steam. Strain the liquid through a fine sieve or strainer; add a peck of salt previously well dissolved in warm water, three pounds of ground rice boiled to a thin paste and stir in boiling hot, half pound of powdered Spanish whiting and a pound of glue which has previously been dissolved over a slow fire, and add five gallons hot water to the mixture, stir well and let it stand for a few days, covered up from the dirt. It

SCHOOL BOOK PRICES:

Now that Dr. Pyne has a little more leisure, says The Globe, perhaps he might be able as Minister of Education, to answer one or two questions:

Was the reduction in the price of school books trumpeted abroad by Premier Whitney some time ago a real thing, or just an ordinary everyday sham? The Globe has been informed, and has evidence to prove, that one of the firms in the school book trust, or partnership, is still selling books at the former prices, and that the reduction of almost fifty per cent. supposed to have been made on the first of July is not in force. Mr. Colquhoun, Deputy Minister of Education, when spoken to last night about the matter, said he certainly understood that the agreement for the reduction in price is now in force. Mr. J. A. Cooper, a member of the school book commission, on whose report the Government took action, said it was the understanding that the agreement was to become operative on the first of July. He would be greatly disappointed if the old prices were shown to be still called for.

The point is that wholesale and retail houses, stocking up with Ontario readers at the present time are doing so for the purpose of meeting the rush when the schools open in the autumn. If they are billed at the old prices there will be no reduction to parents this season, and Mr. Whitney's proud boast that he had cut prices almost in two becomes the merest political petting.

Wake up, Dr. Pyne; thousands of heads of families will soon be counting the change they get from the bookseller; they will ask you, then, what The Globe asks to-day: "Was the reduction in the price of school books a fake?"

FIFTY-THREE PER CENT.

Some revelations concerning the profits of the publishers, or some of them, made in a lawsuit out of the division of the stock of the William Davies Company, a Toronto packing house, are attracting much attention throughout Canada. The consumer who complains of soaring meat prices, and the farmer who believes he is not getting a fair price for his cattle will both be disposed to regard some of the statements made in court as showing that the packers' profits are very generous. It was shown that the Davies Company had paid dividends in recent years as follows: For the year ending March 31, 1893, sixty-five per cent.; 1894, thirty-four per cent.; 1895, forty per cent.; 1896, forty-five per cent.; 1897, 100 per cent.; 1898, 120 per cent.; 1899, eighty-two per cent.; 1900, sixty per cent.; 1901, twenty-seven and a half per cent.; 1902, fifteen per cent.; 1903, thirty per cent.; 1904, forty-one per cent.; 1905, twenty-five per cent.

The Toronto Star warns the public against jumping to too many conclusions after reading these figures but it adds significantly that the average profit for the whole period in question is fifty-three per cent.

and revision of the criminal law by the next Legislature." Surely this is well said. No citizen can be permitted to expose those incidents for all time with a pistol shot.

EDITORIAL NOTES.

Sir Wilfrid Laurier will be warmly welcomed on his return to Canada. His constituency, East Quebec, will especially show its appreciation at this popular leadership.

A New York scientist estimates that if the gases now going to waste at the Pittsburgh blast furnaces were utilized to produce electricity, power would be available to carry all the steel product of the city to tidewater. In this age we are wonderfully prodigal in wasting coal and wood.

Hamilton Spectator: We—that is, Canada—have wonderful resources. Everybody is busy. Everybody is getting high prices for what they have to sell. The cities and towns are booming, and the farmers are buying top buggies and pianos. And yet there's no money in the country. How does this thing work, anyway?

The Stratford Beacon agrees with the Brantford Expositor that the old large system of voting has generally been found to encourage the making of party states, and has not had the promised result of inducing a better class of men to enter municipal life. Not having the fear of the word meeting before their eyes, it has also made the aldermen more extravagant and reckless.

The Globe: Sir David Baird when a young lieutenant was captured by the Sikhs in one of the battles with British troops. News came back to his mother in Scotland that her son had been sent up country, chained to a millstone. Her only comfort was, "Lord help him, but that's chained to our David." That may be the feeling of Mr. Reisman now, that he has Kaid McLean on his hands.

Hamilton Times: The Belleville Ontario advises the Council of that place to sell the gas works, which, it says, "have certainly been anything but a success such as it was predicted as they would be, under municipal management, if a reasonable price can be obtained for them. The taxpayers would thereby be relieved of a financial burden and the City Council of a great deal of work." One by one the towns are gaining their experience, but at great cost to the ratepayers experimented upon.

The Lord's Day Act is felt to be a severe hardship to the cheese and butter factory interests, and it is said that the Ontario Dairy Board has determined to come to the defence of any factory in its district that may be charged under the act. It is just possible that the exceptions under the head of unavoidable work may cover the operations in question.

If the act legalizes Sunday operations connected with the making of maple sugar and maple syrup, it might be supposed that it would extend to the saving of milk by the necessary factory work. It would be a pity to earn the hostility of the cheese and butter interests, if reasonable allowances will avoid it.

PACKAGE FREIGHT MOVING FREELY.

Business is brisk at Both C. T. R. and C. P. R. Offices.

The G. T. R. freight shed presents a busy scene at this time of the year. As one would naturally expect, agricultural implements form the bulk of the heavy packages handled. Other articles of manufacture, and seasonable commodities, dealt in by our merchants, are piled high in the shed.

Shipments of less than carload lots are numerous now, and give Foreman Stollard and his four helpers lots of work. "These keep the men busy," says the foreman, "and they are a good deal of work." A large amount of flour is being shipped in small lots from the local mills.

The office staff at the freight sheds consists of five men. Mr. A. Duck having been recently transferred from the station staff.

ENNISMORE MAN THE CHOICE.

Mr. J. F. Sullivan Appointed Provincial Inspector of Separate Schools. An Ottawa despatch says: J. F. Sullivan, B.A., of the Ottawa Model school staff, it is announced, has been appointed by the Provincial Government Inspector of Separate schools for the province. He will probably have supervision of the northern Ontario district in which a large number of Separate schools have been erected during the past few years. Mr. Sullivan was born at Ennismore, some 45 years ago, and was educated at the Peterboro College Institute, the Ottawa Normal school, the Ontario Normal College, Hamilton, and Queen's University, Kingston, of which he is B.A. He has had a wide experience as a teacher, having spent some 21 years in the schoolroom. He was appointed principal of St. Patrick's Separate school here in September, 1895, and for two years held that position satisfactorily. In 1897 he was appointed on the staff of the Provincial Model school, where he has been engaged for the past ten years. On his recent appointment to accept the position of Separate school inspector for the province of Ontario, the teachers of the Normal and Model schools presented him with a valuable gold pin.

There is more Catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease and prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Science has proven Catarrh to be a constitutional disease and therefore requires constitutional treatment. Baly's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, is the only constitutional cure on the market. It is taken internally in doses from 10 drops to a teaspoonful. It acts directly on the blood and mucous surfaces of the system. They offer one hundred dollars of money if it fails to cure. Send for circulars and testimonials.

STEPHEN ALLEN'S POCKET PIECE.

Maxims for Good Living of a Former Mayor of New York.

In the pocket of Stephen Allen, who lost his life when the steamer Henry Clay burned, was found the following set of rules. He was one Elias Muyor, of New York, and beloved by all who knew him.

Keep good company on none. Never be idle.

If your hands cannot be usefully employed, cultivate your mind.

Always speak the truth. Make few promises.

Live up to your engagements. Keep your own secrets, if you have any.

When you speak to a person, look him in the face.

Good company and good conversation are the very windows of virtue.

Good character is above all things else.

Your character cannot be essentially injured except by your own acts.

If one speaks evil of you live so that none will believe him.

Drink no kind of intoxicating liquors.

Ever five (misfortunes excepted) when your income.

When you retire, think over what you have done during the day.

Make no haste to be rich, if you would prosper.

Small and steady gains give competency and tranquillity of mind.

Avoid temptation, through fear you may not understand it.

Earn money before you spend it.

Never run into debt unless you see a way to get out again.

Never borrow, if you can possibly avoid it.

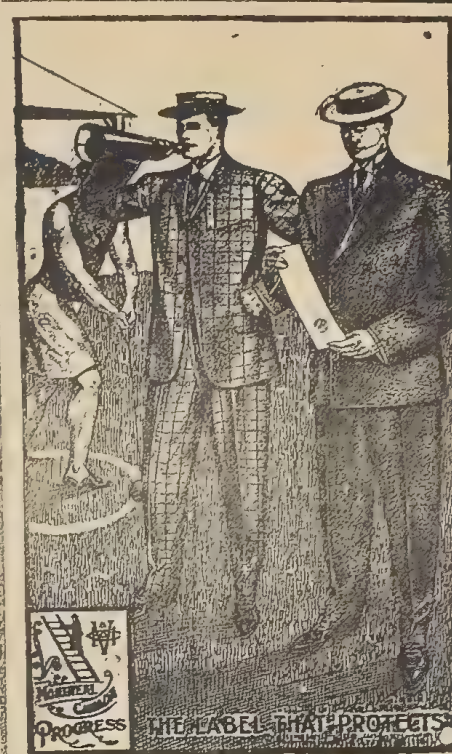

Do not marry until you are able to support a wife.

Never speak ill of anyone. Be just before you are generous.

Keep yourself innocent if you would be happy.

Save when you are young, to spend when you are old.

Read over the above maxims at least once a week.

INTRODUCTORY NOTE.

[There was a real "No. 101." Unpublished M.S. despatches now in the Record Office of the British Museum reveal an interesting fact that on more than one occasion the British Government obtained important French state secrets through an agent known to the British Ministers as "No. 101." Was this mysterious agent was, whether it was a man or a woman, why and how he or she so successfully played the part of a traitor, have not so far as is known to the present writer, been discovered by historians or archivists. The references in the confidential correspondence supply no answer to such questions. If the British Ministers knew all the truth they kept it to themselves and it perished with them. Doubtless there were good reasons for strict secrecy. But it is more than possible that they themselves did not know, that throughout they simply dealt with a cipher, whose secret they never penetrated. It is, however, clear that "No. 101" was a person of the most intricate designs in the policy of the French Court, and that the British Government, through agents, was satisfied of the genuineness of the secrets for which it paid handsomely.—W. C.]

CHAPTER I.

One evening in the January of 1745, the critical year of Pontenoy and of the great Jacobite rising, a middle-aged gentleman, the private secretary of a Secretary of State, was working in the room of a house in Cleveland Row. The table at which he sat was littered with papers, but at this precise moment he had leaned back in his chair with a puzzled expression and his left hand in perplexity pushed this wayward.

"Extraordinary," he muttered, "most extraordinary." The remark was apparently caused by an official letter in his other hand—a letter marked "Most Private," which came from The Hague, and the passage which he had just read ran:

"I have the honor to submit to you the following important communication in cipher, received, through our agent at Paris, from 'No. 101,' etc.

On the table lay the cipher communication together with a second version which the secretary was studying for the third time. In explicit language the despatch supplied detailed information as to certain recent highly confidential negotiations between the Jacobite party in Paris and the French King, Louis XV., a revelation in short of the most weighty state secrets of the French Government.

"No. 101," the secretary murmured, scratching his head, "always 'No. 101.' It is marvellous, incredible. How the devil can it be done?"

But there was no answer to this question, save the fact which provoked it—that closely ciphered paper with its disquieting information so curiously and mysteriously obtained.

"Ah," he jumped up and hurriedly straightened his wig. "Good evening to you."

The new-comer was a man of about five-and-thirty, tall, finely built, and of a muscular physique, with a face of considerable power. Most noticeable, perhaps, in his appearance was his air of disciplined reserve, emphasized in his strong mouth and chin, but almost belied by the glow in his large, dark eyes, which looked you through and through with a strangely watchful innocence.

"There is work to be done, sir?" he asked as he took the chair offered.

"Exactly. To-day we have received most gratifying and surprising information from our friend 'No. 101'—and we have the promise of more."

"Yes." The brief monosyllable was spoken almost softly, but the dark eyes gleamed, as they roamed over the room.

"The communications from 'No. 101' have begun again," the secretary pursued; "that in itself is interesting. The Secretary of State therefore desired me to send at once for you, the most trustworthy secret agent we have. In a very few minutes Captain Statham of the First Foot Guards will be here."

"Sent, I think, from the Low Countries at the request of our agents at The Hague?"

"Ah, I see you are as well informed as usual. You are quite right. Are you," he laughed, "ever wrong?"

The sex, raised, "The communica-

tion then from 'No. 101' concern the military operations?" was all he said.

"Not yet. But," he almost laughed, "we have a promise they will. You know the situation. This will be a critical year in Flanders. Great Britain and her allies propose to make a great, unprecedented effort. His Royal Highness the Duke of Cumberland will have the supreme command. Unhappily the French under the Maréchal de Saxe apparently propose to make even greater efforts. With such a general as the Maréchal against us we cannot afford to neglect any means, fair or foul, by which his Royal Highness can defeat the enemy."

"Then you wish me to assist 'No. 101' in betraying the French plans to our army under the Duke of Cumberland?"

"Not quite," the other replied; "we cannot spare you as yet. But you have had dealings with this mysterious cipher, and we ask you to place all your experience at the disposal of Captain Statham."

"I agree most willingly," was the prompt answer.

"Finds curious 'No. 101,'" continued the secretary slowly, "you do not know personally, I believe?"

The other was looking at him carefully but with a puzzled air.

"I ask because—because I am deeply curious."

"I am as curious as yourself, sir. 'No. 101' is to me simply a cipher number, nothing more, nothing less."

"I feared so," said the secretary. "But it is not incredible? The information sent always proves to be accurate, but there is never a trace of how, why, or by whom it is obtained."

"That is so. Secrecy is the condition on which alone we get it. We pay handsomely—we obtain the truth—and we are left in the dark."

"Shall we ever discover the secret, think you?"

"I am sure not." The tone was conviction itself.

At this moment Capt. Statham was ushered in, a typical English gentleman and officer, ruddy of countenance, blue-eyed, frankness and courage in every line of his handsome face and of his athletic figure.

"Captain Statham—Mr. George Onslow of the Secret Service—" the secretary began promptly, adding with a laugh as the two shook hands: "Ah, I see you have met before. I am not surprised. Mr. Onslow knows everybody and everything worth knowing." He gathered up a bundle of papers. "That is the communication from 'No. 101' and the covering letter. And now, gentlemen, I will leave you to your business." He bowed and left the room.

Onslow took the chair he had vacated and for a quarter of an hour Captain Statham and he chatted earnestly on the position of affairs in the Low Countries, and the war the raging from the Mediterranean to the North Sea, on the vast efforts being made by the French for a great campaign in the coming spring, the military genius of the famous Maréchal de Saxe, the Austrian and Dutch allies of Great Britain, and the new English royal commander-in-chief who was shortly to leave to take over the work of saving France from the arms of Louis XV.

Onslow then briefly explained what the Secret Service agents of the Duke of Cumberland were to expect and why.

"Communications," he wound up, "from this mysterious spy and traitor, 'No. 101,' invariably come like bolts from the blue. They are, of course, always in cipher and they will reach you by the most innocent hands—a peasant's lackey, a tavern wench—some times you will simply find them under your pillow or in your boots. No one can tell how they get there. But never neglect them, however strange or unusual their contents may be, for they are never wrong—never! The genuine ones you will recognize by this mark—" he took up the ciphered paper and put his fingers on the figures "two crossed daggers and the figures 101 written in blood—you see—so."

"Every word you say sharpens my surprise and my curiosity."

"Yes, and every transaction you will have with the cipher will sharpen it more and more. I have been fifteen years in the Secret Service, but this business is to-day as much a puzzle as it ever was. For 'No. 101' has taught me a very important secret, one unknown even to the French King's ministers, which, so jealously guarded as it is, may never be discovered for the King's lifetime or at all. Can you really believe that Louis, while professing to act through his ministers, has stealthily built up a little secret service of his own whose work is to spy on those ministers, on his ambassadors, generals, and their agents, to receive privately instructions wholly different from what the King has officially sanctioned, and frequently directly to thwart, check, annul, and defeat by intrigue and diplomacy the official policy of their sovereign?"

"Is it possible?"

"It is a fact," Onslow said emphatically. "But the King, 'No. 101,' you and I and one or two others alone know it. Let me give you a proof. To-day officially Louis through his ministers has disavowed the Jacobites. The ministers believe their master is sincere; many of them regret it, but their instructions are explicit. In truth, through those private agents I spoke of, the King is encouraging the Jacobites in every way and is actually thwarting the steps and the policy which he has officially and publicly commanded."

"And the ministers are ignorant of this?"

"Absolutely. But mark you, unless the King is very careful, some day there will come an awkward crisis. His Majesty will be threatened with the disclosure of this secret policy which has his royal authority, but which gives the lie to his public policy, equally authentic. And unless he can suppress the first he must be shown to be doubly a royal liar—not to dwell on the consequences to France."

"What a curious king!" Statham ejaculated.

"Curious!" Onslow laughed softly; "more than curious, because no one knows the real Louis. The world says he is an ignorant, superstitious, indolent, extravagant, heartless dandy in a crown who has only two passions—hunting and women. It is true; he is the prince of hunters and the emperor of rakes. But he is also a worker, cunning, impetuous, obstinate, remorseless."

"But why does he play such a dangerous game?"

"God knows! The real Louis no man has discovered, or woman either; he is known to the Almighty or the devil. But you observe what chances this double life gives to our friend 'No. 101.'"

"I would give my commission," he exclaimed "to know the meaning of this mystery."

A sympathetic gleam lingered in Onslow's eyes as he calmly scrutinized the young officer. "Ah," he said, almost playfully, "you begin to feel the spell of this mystery wrapped in a number, the spell of 'No. 101,' the fatal spell."

"Fatal?" Statham took him up sharply.

"Yes, I must warn you. Every single person who, in his dealings with this cipher, has got to the heart of the truth has so far met with a violent end. It is not pleasant, but it is a fact. And the explanation is easy. Those who might betray the truth are removed by accident or design, some by this method, some by that. They pass into the silence of the grave, perhaps just when they could have revealed what they had discovered." He paused, for Statham was visibly impressed. "Really there is no danger," he added; "but I say as earnestly as I can, because you are young, and life is sweet for the young, for God's sake stifle your curiosity, resist the spell—that fatal spell. Take the information as it comes, and ask no questions, push no inquiries, however tempting and easy the path to success seems. As sure as I stand here, His Majesty King George the Second will lose a promising and gallant officer."

Statham walked away and resumed his seat. "And you, Mr. Onslow?" he demanded, looking up with the profoundest interest.

"Do I practice what I preach? Well, I am a spy by profession; to some men such a life is a curse—it is, at times, at times. But I do not conceal from myself that if my curiosity overpowers me my hour for silence, too, will come—the silence of the unknown grave in an unknown land."

"Then is no one ever to know?" Statham muttered with childish petulance.

"Probably not. A hundred years hence the secret that baffles you and me will baffle our successors."

Statham's heels tapped on the floor. "Perhaps," he pronounced, slowly, "perhaps the truth is well worth the price that is paid for it—death and the silence of the grave."

Onslow stared at him. His eyes gleamed curiously as if they were fixed on visions known only to the inner mind. "Perhaps," he repeated gravely. "But really," he added, "in the lightness, there is no one to persuade us it is so. Come, Captain Statham, you have not forgotten supper, I hope, and that I propose to introduce you tonight to the most seductive enchantress in London?"

"No, indeed. All day I have been hungering for that supper. In the Low Countries we do not get suppers presided over by ladies as you have described to me."

"In the French army they have both the ladies and the suppers. Onslow replied, laughing, and his dear Captain, in the vision of the spring will fall the spoils. Tonight shall be a foretaste, and if my enchantress does not make you forget 'No. 101,' I despair of the gallantry of British officers."

He looked up the papers, chatting all the time, and then the two gentlemen went out together.

CHAPTER II.

For some minutes the pair walked in silence, as if each was still brooding on the mysterious cipher whose treachery to France had brought them together. But presently Statham touched Onslow on the arm. Tell me," he said, "something of this enchantress. I am equally curious about her."

"And I know very little," Onslow replied. "Her mother, if you believe scandal, was a famous Paris flower girl, who was mistress in turn to half the young rakes of the noblesse; her father is supposed to have been an English gentleman. Your eyes will tell you she is gifted with a singular beauty, which is her only dowry. Gossip says that she makes that dowry go a long way, for she has two passions, flowers and jewels."

"And she resides in London?"

"She resides nowhere," Onslow answered with his slow smile; "she is here to-day and away to-morrow. I have met her in Paris, in Brussels, Vienna, Rome. She talks French, as easily as she talks English, and wherever she is her apartments are always haunted by the men of pleasure, and by the grand monde. Women you never meet there, for she is not a favorite with her own sex, which is not surprising."

"Pardon," Statham asked, "but is she—is she, too, in the Secret Service?"

"God bless my soul! No; we don't employ ladies with a passion for jewels. It would expose them and us to too many temptations. Besides, politics are the only thing this goddess abhors. Eating, drinking, the pleasures of the body, poetry, philosophy, romance, the arts, and the pleasures of the mind she adores; luxury and jewels she covets, but politics, no! They are a forbidden topic. For me her friendship is convenient, for the politicians are always in her company. When will statesmen learn, that making love to a lady such as she is more powerful in unlocking the heart and unsealing the lips than wise?" And her name?"

"She has not got one. 'Princess' we call her and she deserves it, for she is fit to adorn the Palace of Versailles."

"Perhaps," said Statham, "she will some day."

"Not a doubt of it—if Louis will only pay enough."

They had reached the house. Statham noticed that Onslow neither gave his own nor asked for his hostess's name. He showed the footman a card, which was returned, and immediately they were ushered into two handsome apartments with door leading the one into the other, and in the inner of the two they found some half-dozen gentlemen talking. Three of them wore stars and ribbons, but all unmistakably belonged to that grand monde of which Onslow had spoken. From behind the group the lady quietly walked forward and curtsied deferentially to Statham, who felt her eyes resting on his with no small interest as his companion bowed her head and the agent had not even noticed her. This woman, indeed, strikingly impressive. About the middle height, with a slight but exquisitely shaped figure, at first sight she seemed to flash on you a vision composed of dark masses of black hair, large and liquid blue eyes, and a dazzling skin, cream tinted. Dressed in a

nowing robe of dark-red, she wore in her hair blood-red roses, while blood-red jewels which glittered in the candle-light suggested a curious vulgarity, which was emphasized by her speech, for her English, spoken with the ease of a native, betrayed in its accent rather than its words evidence of low birth. Yet all this was forgotten in the mysterious charm which clung about her like a subtle and intoxicating perfume, and as Statham in turn kissed her jewelled hand, a feeling something in her eyes, at once pathetic and vindictive, shot with a thrill through him.

"An English officer and a friend of Mr. Onslow," she remarked, "is always amongst my most welcome guests," and then she turned to the elderly top in the stars and ribbon and resumed her conversation.

Statham studied her carefully. Superb health, a superb body, and a reckless disregard of convention she certainly had, but the more he observed her the more certain he felt that that wonderful skin as well as those lustrous blue eyes and alluring eyebrows owed more to art than to nature. In fact every pose of her head, every line in her figure, the scandalous freedom of her attire were obviously intended to puzzle as much as to attract—and she succeeded. She was the incarnation of a fascination and of a puzzle.

Two more gentlemen had arrived, and Statham was an interested spectator of what followed.

"Princess," the new-comer said, "I present to you my very good friend the Vicomte de Nerac."

The lady turned sharply. Was it the visitor named Nerac which for the moment disturbed her equanimity?—yet apparently neither the Vicomte nor she had met before.

"Welcome, Vicomte," she said, so swiftly recovering herself, that Statham alone noticed her surprise, if it was surprise. "And may I ask how a Capitaine-Lieutenant of the Chevaliers de la Garde de la Maison du Roi happens to be in England when his country is at war?"

"You know me, Madame!" the Vicomte stammered looking at her in a confusion he could not conceal.

The lady laughed. "Every one who has been in Paris," she retorted, "knows the Chevaliers de la Garde, and the most famous of their officers is Monsieur the Vicomte de Nerac, famous, I would have these gentlemen be aware, for his swordsmanship, for his gallantries—and for his military exploits which won him the Croix de St. Louis."

"You do me too much honor, Madame," the Vicomte replied.

"As a woman I fear you, as a lover of gallant deeds and as a fencer myself I adore you, as do all the ladies whether Versailles or in Les Halles," she laughed again. "But you have not answered my question. Why are you in England, Monsieur le Vicomte?"

"Nine months ago I had the misfortune to be taken prisoner, Madame, but in three weeks I return to my duty as a soldier and a noble of France."

He bowed to the company with that incomparable air of self-confidence tempered by the dulcet courtesy which was the pride of Versailles and the despair of the rest of the world.

"And here," the lady answered, "is another gentleman who also shortly returns to his duty. Captain Statham of the First Foot Guards, Monsieur le Vicomte de Nerac of the Chevaliers de la Garde. Perhaps before long you will meet again, and this time not in a woman's saloon."

"When Captain Statham is taken prisoner," the Vicomte remarked, smiling, "I can assure him Paris is not less pleasant than London, but till then he and I must agree to cross swords in a friendly manner for the favors of yourself, Princess."

"And you think you will win, Vicomte?"

"It is impossible we can lose," the Vicomte replied. "Not even the gallantry of the First Foot Guards can save the allies from the genius of Monsieur the Maréchal de Saxe."

"We will see," Statham responded gruffly.

"Without a doubt, sir." The Vicomte bowed.

Statham stared at him stolidly. He could hardly have guessed that this exquisitely dressed gentleman with the slight figure and the innocently grand air was really a soldier, and above all an officer in perhaps the most famous cavalry regiment of all Europe, every trooper in which, like the Vicomte himself, was a noble of at least a hundred years' standing, but he was reluctantly compelled to confess that the stranger was undeniably handsome, and his manner spoke of an ease and a distinction beyond criticism. His smile, too, was singularly seductive in its sweetness and strength, and his brown eyes could glitter with marvellous and unspeakable thoughts. From that minute he seemed to imagine that his hostess belonged to him: he placed himself next

Ladies' Home Journal.

Sending truth after a lie. It is an old maxim that "a lie will travel seven leagues while truth is getting its boots on," and no doubt hundreds of thousands of good people read the unwarranted and malicious attack upon Dr. R. V. Pierce and his "Favorite Prescription" published in the May (1904) number of the Ladies' Home Journal, with its great black display headings, who never saw the humble, groveling retraction, with its inconspicuous heading, published two months later. It was boldly charged in the slanderous and libelous article that Dr. Pierce's Favorite Prescription, for the cure of woman's weaknesses and ailments, contained alcohol and other harmful ingredients. Dr. Pierce promptly brought suit against the publishers of the Ladies' Home Journal, for \$200,000 damages.

Dr. Pierce alleged that Mr. Bok, the editor, maliciously published the article containing such false and defamatory matter with the intent of injuring his business; furthermore, that no alcohol, or other injurious, or habit-forming, drugs are, or ever were, contained in his "Favorite Prescription"; that said medicine is made from native medicinal roots and contains no harmful ingredients whatsoever; and that Mr. Bok's malicious statement were wholly and absolutely false.

In the retraction printed by said Journal they were forced to acknowledge that they had printed an article of "Favorite Prescription" from a source which they all of whom or any of the alleged harmful drugs. These facts were also proven in the trial of the action in the Supreme Court. But the business of Dr. Pierce was greatly injured by the publication of the libelous article with its great display headings, while hundreds of thousands who read the wickedly defamatory article never saw the humble groveling retraction set in small type and made inconspicuous as possible. The matter was, however, brought before a jury in the Supreme Court and the jury rendered a verdict in the Doctor's favor. Thus his traducers came to grief and their base slanders were refuted.

Captain Statham stared at the sign, entranced.

"A soldier," Onslow remarked with his slow smile, "can always distinguish blood from red ink—is it not so?" Statham nodded. "Remember, then, those crossed daggers with the figures in blood are the only genuine mark. All others are forgeries—reject them unhesitatingly. Let me show it to you again." He produced from his pocket-book a paper with the design in the corner, which, when compared with the one on the table, corresponded exactly.

BABY TORTURED BY ITCHING RASH

Face and Feet Covered—Rest Broken and Would Cry Until Tired Out—"Cradle Cap" Added to Baby's Torture—Tries Cuticura Soap and Cuticura Ointment.

IMMEDIATE RELIEF AND SPEEDY CURE

"My baby was about nine months old when she had rash on her face and feet. Her feet seemed to be the worst, especially at night. They would cause her to be broken of her rest, and sometimes she would cry until she was tired out. I had always used Cuticura Soap myself, and had heard of so many cures by the Cuticura Remedies that I thought I would give them a trial. The improvement was noticeable in a few hours, and before I had used one box of the Cuticura Ointment her feet were well and have never troubled her since. I also used it to remove what is known as 'cradle cap' from her head, and it worked like a charm as it did on the rash on her feet. The Cuticura Remedies are the best, physicians fail. Guaranteed absolutely pure.

Complete External and Internal Treatment for Every Hum of Infants, Children, and Adults can be obtained in the form of Cuticura Soap, Cuticura Ointment, or Cuticura Tablets. Sold in all drug stores. J. G. EDWARDS & CO.

BISHOP McEVAY'S JUBILEE.

Priests of the London Diocese do Honor to Their Head.

A host of friends in Lindsay and surrounding townships will be interested in the following, taken from the Stratford Herald:

On July 9th at London was celebrated the silver jubilee of Rt. Rev. Francis P. McEvay, Bishop of London, he having been ordained to the priesthood on the 9th of July, 1852. His Lordship succeeded Bishop O'Connor as bishop of London when the latter was named for the archbishopric at Toronto. Moving to London from Hamilton in August of 1899, Bishop McEvay has proven himself a wise and prudent administrator, and with the aid of the priests with whom he has surrounded himself, has built up a rapid progress, the diocese of London, Bishop McEvay was born at Lindsay, Ont., on Dec. 8, 1852. He was educated there, at St. Michael's College, Toronto, at St. Francis' Seminary, Milwaukee, and at Montreal College. He was ordained a priest at Trenton in 1882, and served as parish priest at Fenelon Falls for a time, after which he was appointed rector of St. Peter's Cathedral, Peterborough, and chancellor of the diocese. In May, 1889, when Bishop Dowling was translated to Hamilton, he accompanied his lordship thither, where he became a member of the bishop's council and rector of St. Mary's Cathedral. As stated, he moved to London in 1889, to succeed Bishop O'Connor.

The feature of the gathering was the presentation of an illuminated address and a golden cross engraved with the bishop's name, and a gold ring, consisting of a large emerald encircled in an eloquent manner. The evening previous the children of the separate schools of London assembled at the palace and sang a jubilee ode in honor of the event. An address was read by Master Christopher Atney.

At St. Peter's cathedral morning of the celebration a beautiful service was gone through with. The ladies of the altar society presented Bishop McEvay with a beautiful floral design in the shape of a pyramid surmounted with the figures "1852-1924". Each priest of the diocese, the dining-room of the Grand Hotel Convent was presented with a sympathy as a memento of the jubilee.

HEALEY FALLS WATER POWER.

New Lease Issued to Mr. J. A. Culverwell's Company.

A Toronto dispatch, recently published, says: "The new lease of the Ontario Government property and water power rights at Healey Falls to the Northumberland-Durham Power Company Limited, has been received from the Department of Lands, Forests and Mines."

"The form of lease is the printed form adopted for all water power leases from the Government, and sets apart for the use of this company the three parcels of land specifically described, owned by the Ontario Government in the Township of Seymour, adjacent to Healey Falls for a period of 20 years commencing from June 1st, 1907, with the right of renewal for two further and successive terms of ten years. This makes it a forty years' lease provided the conditions are observed and rental paid."

"A minimum rental of \$100 per annum for the first two years, and thereafter \$25 per year up to \$250,000, provided for during the 20 year term. Three thousand horse power is to be developed within two years, and the company are to begin the work necessary for development in a substantial and bona fide manner to the satisfaction of the Minister of Lands, Forests and Mines, within four months from the 1st of June, 1907. This period, it is understood, is to be extended another month owing to the delay that has occurred in the issue of the lease."

"The penalty clause is that which appears in the printed lease form adopted by the Lieutenant-Governor in Council, namely, forfeiture and cancellation for failure to begin the work necessary for development, within the time stipulated, and subsequently for failure to supply the power to the extent of 3,000 horse-power within the two years stated."

Seasonable Hints.

At this season of the year the best game preserve is a refrigerator.

There are many large tales connected with small fish.

The peach crop will probably be a failure this year. This does not apply to the summer girl.

MORE ABOUT BOGUS MONEY SUSPECTS.

Robt. Logie Apprehended in Toronto Last Week.

Interesting Sketch of His Family History—An Airship Will Figure at the Trial of the Suspects, which Will Take Place in Lindsay by Order of the Attorney-General.

(Toronto World July 11.)

An added sensation in the roundup of counterfeiters was afforded in this city yesterday, when Robert Logie was arrested in the act of boarding a C.P.R. train with a ticket to Black Rock, N.Y. He is in No. 3 police station, charged with passing counterfeit bills of Montreal.

Logie is alleged to be the fifth of the big men of the Lindsay band whose duty, in company with John Evelyn, was to "show the queer".

Detectives Tipton and Wallace gathered in the suspect just as he was at the train. The sleuths who had information that the man had been in the city since July 3, when Evelyn was arrested, went to the station on chance. With only a photograph, taken many years ago, to give them their clue, and seeing a man who resembled it, they walked up to him and Tipton with a smile grasped the man by the hand, saying: "Well, well, Mr. Logie, this is good." Wallace also crowded in for a grip of his hand.

Logie was taken aboard. "I guess you've got the advantage of me," he said, but Wallace was back at him before he had a chance to think.

"Oh, but we have the right name, haven't we?" he queried.

"Why, yes," Then he was taken to headquarters.

There Logie, who is over 60 years of age, faced Inspector Duggan, Dominion Inspector Parkinson, Provincial Inspector Rogers and Detectives Tipton and Wallace for over an hour, but gave little information.

He will appear in the police court this morning and will be sent to Lindsay, where all the prisoners will be gathered for trial. Logie had with him about \$500 in cash. In his grip was only such wearing apparel as might be taken on a short trip.

Tipton and Wallace identified the man by a photograph taken at least ten years ago and by the description furnished by Inspector Parkinson.

Inspector Duncan said last night it was all over here. The money has never been shown, here.

SOME FAMILY HISTORY.

The Logie family is one of the oldest families in the vicinity of Lindsay. Hank Logie, a brother, owns one of the most beautiful farms along the banks of the Seagow.

Logie's grandfather was a captain in the British army. Mrs. Logie was a typical English lady of education and refinement. They were given a large portion of land near Lindsay by the government, thinking that it would induce other families to settle there. They raised their family and to the father and boys was given the homestead. The Logie family used to visit Montreal in those days and visited a considerable circle of friends. One day Robert's father was near the St. Lawrence. A young lady—it turned out to be a daughter of Colonel Spauld, a wealthy and influential citizen of Montreal—had fallen into the water. Logie, at great peril, rescued her, and ultimately they were married. Logie, however, drank heavily, and his two boys, as soon as they were able, had to work for their father would not. Matters went from bad to worse until Col. Spauld took the matter into his own hands. Logie, at last, then became a soldier of fortune and fought through the American civil war. As long as Col. Spauld lived he never came back.

The sons, Bob and Hank, as they are called, worked the farm for years and were successful. Their mother died last winter. Bob's wedding came when he took up with Charles Burke, his friend's only.

Henry Logie has not come in for any suspicion. He is highly respected.

Logie is far from being a typical green goods merchant. He is tall and slim and a very bad dresser and not smooth-looking. "It is the most peculiar case I ever heard of," said a prominent Lindsay man when he heard of Logie's arrest. "Not one of the men arrested have brains enough to pull off this work so successfully for such a time. There is more behind this, and I would like to see the details of it. I fancy there will be something doing."

NEARLY CAUGHT IN MONTREAL.

R. Logie Just Got Away Ahead of the Detectives.

Robert Logie, who was arrested in Toronto last evening, had a narrow escape from being caught in Montreal. He registered at a hotel under an alias—W. R. Logan. Evelyn, who was arrested, did not "split" on him till the next morning, and Detective

tective Cowan, who is in town, hurried to the hotel, only to find that his man—who had grown suspicious had left about ten minutes earlier. Logie's home, just outside the boundary of Lindsay in a south-west direction, from the town, has been searched. The police are reticent about the results of their investigation.

"WHY SHOULD MEN WORK?"

Was Burke's Eternal Query—Talked About Building an Airship.

Lindsay, July 10.—It is a far cry from airships to bogus bank bills, but Chas. Burke, of this town, and his gang seem to have made the descent without difficulty. For years he has been working on some scheme to help the people, and the people wondered. At night he would wander to a line barn on the banks of the Seagow, where he and another man would work on their airship for into the night.

The workhouse in this town was a marvel, rumor says. Nobody ever saw the interior save Charles Burke and his intimates. When the gang was engaged, the others were admitted to his holy of holies. And this led to the undoing of Burke and his confederates.

Burke was reputed well to do, and people let it go at that. He toiled not, but he spun—yarns. Every evening it was his wont to congregate with his fellows in the tavern and talk politics. But there was one subject that was dear to him above all others—a religion. "Why should men work?" he would ask. No need at all, he would aver, and prove it.

NOT A NEW GAME.

This counterfeiting game has been played in Lindsay before. Some years ago a gang was caught making bad quarters, and the Murphys are now doing time. Burke is said to have been connected with that gang.

The bills were never put out in large quantities—a few here and there, and then a long rest. A few months ago and there would amount to large sums. This last issue, at the same gang were interested, seems to have been the largest. From Burke's house, and from Logie's farm were taken plates, photo supplies, stamps, dies, all the paraphernalia. Quantities of bills were also obtained. A trunk full of stuff was taken from Burke's room. Among its contents are bundles of letters. These letters are from correspondents who were willing to forward the "stuff".

A remarkable feature is the personality of the gang. Burke is not young—getting on towards 60. Bob Logie, Burke's pal and intimate, is about the same age. He also has money. Wynn and Bouyea are in the same and yellow teeth, nearly 70 years of age and well situated. None would induce other families to settle there. All lifelong residents of Lindsay. Evelyn, arrested in Montreal, is a young Englishman who has been in the country for about three years. He has been working on the Grand Trunk since then, quitting about two weeks ago to go to Montreal to shove the "queer".

Burke and Logie are bachelors, and Wynn and Bouyea are widowers. Evelyn is unmarried also.

BOUYEA'S FRIENDS AMAZED.

Resident of Lindsay for Forty Years—Family Highly Respected.

Mr. Archie Bouyea, who was arrested in Saint Ste. Marie for alleged counterfeiting, has been for forty years a resident of town and hitherto has borne an unapproachable character. During the last few years he was engaged as night watchman at the Kennedy & Davis mill, and was highly thought of by his employers. He worked continuously there till the fire and was not "out of a job" as Toronto papers erroneously stated.

Shortly after July 1st, he left for Toronto to visit his son and daughter, both holding good positions in the city. His wife expected him back and a telegram told her he was in the Strait.

Mr. Bouyea's sympathy is expressed for the family who are highly respected and popular. Mr. Archie Bouyea, Jr., is a young man of good character and of clean habits. No one who knew him would think twice of his doing such a thing.

What led Mr. Bouyea, Sr., to do come complicated in such an affair is a mystery.

R. LOGIE'S INCONSIDERATE RETURN.

Exhorted to His Native Town by Two Officers.

Evening Post of July 13. Between two burly detectives, J. E. Rogers and T. Parkinson, Robert Logie, once an esteemed citizen of town, stepped off the "flyer" from Toronto last evening, and was hustled to a hotel amid a throng of people that crowded to get a glimpse of him. Care-worn and crestfallen his homecoming was anything but pleasant. He was driven to the county jail after having a preliminary hearing before Magistrate Jackson. "Poor old Bob, he looks worried," remarked a former acquaintance of the counterfeiter.

Hundreds of people were at the G. T.R. station to meet him. A reporter, who was coming in by C.P.R., had brought the crowd to that station. Finding that he had not arrived on that train a rush was made for the Grand Trunk station. The 8 o'clock Toronto train failed to bring him. The 9.20 was late, and over an hour rolled by before the train came in bearing the prisoner.

Coming down on the train the prisoner (talked to his custodians about the crops, weather and ordinary things. Never once did he mention the counterfeiting case. It is said the prisoner admitted sufficient facts to incriminate others. The detectives are "mum" about this. They leave tonight for Saint Ste. Marie to bring back Bouyea and Wynn.

Detective Cowan, of the Montreal police force, returned to his home last night. "My honest belief is that the prisoner, now in custody tells the complete story of the making of the bills," he said.

Mr. T. S. Steward, who is defending Burke, said, "I can make no statement whatever regarding the attitude the prisoner will take." "The prisoners will not appear in court on Monday, as was stated, but were remanded until later, probably Thursday. Evidence will be collected, and a case against them made out."

BURKE'S PALS AT LONDON.

Partners of the Alleged Lindsay Counterfeiter Once Operated in London.

A dispatch from London, under date of July 10th, which sounds very promising, says:

Charles Burke, the alleged counterfeit, arrested by Dominion Detective Parkinson, of Ottawa, at Lindsay, Ont., on Monday, is said to have operated in this city, along with Charles Higgins and Decker. The trio are said to have conducted a counterfeit money factory on Mill-st. about the year 1898, and were run to earth and sentenced to long terms of imprisonment at Woodstock after leaving there.

The Higgins-Decker gang of counterfeiters, of which it is alleged Burke was an accomplice, will be well remembered by Londoners. Higgins, who was a short, stout, red-haired man, at one time was employed by the London Printing & Engraving Company at this city. On leaving their employ he went to reside in Mill-st. along with Decker, who came here about 1897. The purchase of a small hand press, and a quantity of paper, printing inks and other counterfeiter's materials, by Higgins, caused the police to suspect that all was not straight, and Detective Parkinson, assisted by the local detectives, set to work to round up the gang. Higgins and Decker, however, moved to Woodstock before the arms of the law closed in upon them, and it was not until they had commenced operations in that place that they were arrested.

Burke is said to have been in this city along with the two bogus money makers, and to have operated, as an agent for their worthless bills, but evaded arrest by leaving in a hurry.

Where Burke has been operating in his time since Higgins and Decker were sent to prison is not known to the local authorities, but judging by the samples of the five dollar bills which he is alleged to have issued, he is far from being as clever a counterfeiter as either Decker or Higgins, who were both expert lithographers, Decker being such an expert engraver that his work could, only be distinguished after the most careful examination, and Higgins being a lithographic pressman of great skill.

Trial to be at Lindsay.

A Toronto dispatch says: Mr. Joseph Rogers, of the Attorney-General's Department, has taken charge of the prosecution for the Ontario Government. Col. Percy Sherwood, chief of the Dominion Secret Service, called upon Hon. Mr. Fox yesterday and asked that the Ontario Department take charge of the prosecution of all five men. The intention is to centralize the trial at Lindsay, so that Evelyn, who has been brought from Montreal, and Wynn and Bouyea from Saint Ste. Marie,

SEE HOW WE GROW.

Canada's Population Over Six and Half Millions.

Ottawa, July 10.—The Census and Statistics Department has figured out the population of Canada to be \$6,650,490. This was the first day of April of the present year. At the last decennial census the population of Canada was 5,371,315 so that in the six years there has been an increase of 1,279,175. If the present growth is kept up the population of Canada will be over seven and a half millions when the next census is recorded. From 1891 Canada's population only increased 538,074.

St. Paul's cathedral, London, has a library of between 10,000 and 11,000 books. The insurance on the edifice, is \$500,000.

The 91st annual report of the American Bible Society shows that the investment funds were increased last year by legacies and gifts to \$725,844.

A "Pocket Testament League" has been started in some western U. S. cities. Every member carries a testament and pledges to read a chapter daily.

The union against Sunday, traveling in England is doing commendable work. Its membership is growing rapidly, its influence ever widening.

Dr. Grenfell, founder of missions in Labrador, affirms that white man's vices are decimating the Eskimos. They are steadily deteriorating.

Bishop Reave reported that north of Vermilion, nearly within the Arctic circle, a farmer had planted 160 acres with grain and reaped 6,000 bushels.

"What country," said the bishop, "do you prefer to work in first?" The young and tender missionary, after a thoughtful pause, replied: "Somewhere, sir, where the natives are vegetarians."

(When Ian MacLaren was asked for a motto for the year he wrote: "Be pitiful, for every man has a hard battle to fight." He lived up to his motto, for few people heard harsh criticisms from his lips.

The authorized version of the bible was prepared by forty-seven scholars, divided into six companies, to each of which a portion of the scriptures was assigned. The work took three years, from 1607 to 1610.

Ruskin: "Take up your cross" means that you are to go the road you see to be the straight one, carrying whatever is given you to carry, as well and stoutly as you can, without making faces, or calling people to come and look at you."

Colorado springs is one of the unique cities of the west, for a saloon has never existed in it. In the deed of property is a clause which forever prohibits the sale of liquor. General W. J. Palmer, who founded the city, in 1871, is responsible for this unusual condition.

At Denver, in Presbyterian Assembly, President Russell, of Westminster university, Pa., declared that the church needs revival with a capital "R," and that evangelical work must be taken up along the lines of the existence of "a heaven and a hell."

J. Campbell White says that fifty millions of dollars annually for foreign missions from the denominations of America would be only an average of a street car fare a week from Protestant church members. It would support 25,000 missionaries instead of the present number of 5,768.

In some of the old time monasteries, patient monks worked year after year making beautifully illuminated copies of the bible in manuscript. When it was desired to make a large number of copies, one monk would read aloud slowly, while another, while a hundred monks transcribed.

Since the flight of Noah's dove every religion has considered the pigeon a sacred bird. Every mosque swarms with pigeons, as do most Italian market places. The Hindoo priests and the old Egyptian priests also have them, while Roman Catholics make it the emblem of the Holy Ghost.

Rev. E. J. Paek, veteran missionary among the Eskimos, who has resided for a year in Winnipeg, has left his wife and two sons at Barris, that he may do deputation work in the east. He will also make a trip to England to publish the Epistles, and Book of Revelations, which he has translated, completing the New Testament in Eskimo.

In the largest Sunday school in the world, at Stockport, England, was recently celebrated its one hundredth anniversary upon its present site. In 1812 "Walking Day" was organized, a school parade held each year. A teacher was present this year who had not missed a "Walking Day" in fifty years. The oldest scholar in the line was eighty-six years of age. The five hundred teachers have raised \$25,000 toward a new building.

Trousers, when introduced into England, told not of respectability. In the original trust deed, drawn up in 1820, of Bethel Chapel, Sheffield, there was this prohibition: "Under no circumstances shall any preacher be allowed to occupy the pulpit who wears trousers." It is apropos to add that knee-breeches and garters were then the correct attire.

MERRY WEDDING BELLS.

Walsh—Trueman.

The marriage of Miss Edith Trueman, daughter of the late Mr. Alfred Trueman, of Brighton, England, and Mr. C. Gordon Walsh, of this city, senior member of the firm of Walsh & Arnaud, son of Mr. Wm. H. Walsh, of Lindsay, was very prettily celebrated in Christ church on Tuesday, the 25th inst., at 2 o'clock, in the presence of a large gathering of friends and acquaintances.

The Rev. C. C. Owen performed the ceremony, while the organ was provided over by Miss Grundy, niece of the rector.

The bride was given away by her brother, Mr. Harry Trueman, and made a charming picture in a lovely gown of shimmering white chiffon over tulle, with white lace, with a picture hat of white lace, with a long white ostrich plume, while she carried a beautiful shower bouquet of white roses and lilies of the valley.

The bridesmaid was Miss Bushy, who wore a very pretty gown of Alice blue dimity over blue tulle, and cream lace hat with touches of black silk velvet ribbon.

The groom was supported by his brother, Mr. C. W. Walsh.

The happy couple received a large number of very handsome presents. The groom's present to the bride was an exquisite pearl necklace, and to the bridesmaid a gold locket.

After an informal reception, Mr. and Mrs. Walsh left amid a shower of congratulations and good wishes from a host of friends, on the Great Northern for their honeymoon. The bride's going away costume was of blue broadcloth with hat to match.

Mr. and Mrs. Walsh will reside at 1153 Howe-st., Vancouver, B. C. Sanes.

Reeves—Zingg.

Toronto Star, Wednesday: At St. James Square Presbyterian church at two o'clock this afternoon, the marriage took place of Mr. George Reeves, of Lindsay, of the Deaf Mute Association, and Miss Eva M. Zingg, daughter of Mrs. M. Zingg, of an under-st. Both are graduates of the Ontario school for the deaf at Belleville.

The ceremony was performed by the pastor, Rev. Alfred Gander, B. D. Mr. R. Matheson, Supreme Secretary of the I. O. O. F. which she was intended of the Belleville school, acted as interpreter. Miss Leona Herod, attended as bridesmaid, and Mr. Harry Reeves, of Lindsay, brother of the groom, was best man.

The groom's gift to the bride was a pair of gold to the bridesmaid, a crescent brooch with pearls, and to the best man, gold cuff links.

Many Lindsay friends will unite in extending congratulations and good wishes.

OBITUARY.

Mrs. Patience Aldridge.

Stamford Herald: Death removed one of this city's oldest residents this morning at 2.30 o'clock in the person of Mrs. Patience Lester, wife of Mr. Enoch Aldridge. The deceased was well known to the circle of friends and her demise is greatly regretted. She had reached her 74th birthday, but she had been ailing for some time. Mrs. Aldridge who was born in Warwickshire, Eng., was first married to Mr. Thos. Lester, a former caretaker of the City Hall, who died in 1871. During the last forty years she has resided in the Church City. She is survived by one son and one daughter, Joseph, of the Imperial Oil Works, Sarnia, and Miss Geo. Nursey, of Lindsay. The funeral will leave the family residence, 320 Queen-st., on Tuesday at 3 p.m. George, Nursey, of Lindsay. Mrs. Ed. C. Armstrong, town, is a grand daughter.

APPRECIATES KAWARTHA LAKES.

Hon. Mr. Lemieux's Trip Over the Waters.

It is gratifying to the people to know that the Hon. Mr. Lemieux, the Postmaster-General and Minister of Labor, was exceedingly interested in the waterways of this district, and formed a very high opinion of the capabilities for navigation purposes. The speedy completion of the Trent Valley waterway will, we believe, have a strong supporter in the Hon. Rodolphe Lemieux. He not only expressed himself strongly personally, to his friends here, but the following is a copy of a letter received by Mr. McLaughlin, since Mr. Lemieux's return to Ottawa:

Ottawa, 10th July, 1907. Dear Mr. McLaughlin—My trip through Victoria was such a pleasant one, that I feel I must write and tell you how much I enjoyed the day, and how much I appreciated the many courtesies which were extended to me.

At every good wish, believe me, I am, Mr. McLaughlin—Yours truly, RODOLPHE LEMIEUX.

R. J. McLaughlin, Esq., C. C. Lindsay, Ont.

Mr. Lemieux's good opinion of this district is only equalled by the good opinion of the people of this district for Mr. Lemieux. We can safely say he placed everybody and he only needs to be better known in this Province to be as popular here as he is in his native Province of Quebec.

When You Take Cold

One way is to pay no attention to it; at least, until it develops into pneumonia, or bronchitis, or pleurisy. Another way is to ask your doctor about Ayer's Cherry Pectoral. If he says, "The best thing for colds," then take it. Do as he says, anyway.

We have no secret! We publish the formulae of all our preparations. J. C. Ayer & Co., Lowell, Mass.

SMALL CROWD AT CIRCUS.

BAD WEATHER AND LACK OF ADVERTISING KEPT PEOPLE AWAY.

Cutting Out of the Parade Created a Bad Impression.

Evening Post of July 13. Lindsay did not respond in the approved style to the call of the circus men yesterday. The crowd that did go were rewarded by seeing a first-class one-ring circus in full action. Many goblets of amber lemonade were quaffed and many sacks of peanuts consumed. The rural citizens revelled in amazement in the side-shows. The day being the Twelfth, interfered materially with the attendance.

Mr. Francis Reed was the ring-master, and kept everything moving merrily.

Dear to the heart of every circus goer, is the menagerie. Wild animals have always a fascination for the old and young, and the Hargrave menagerie attracted many. Jumbo, an elephant of huge proportions, was a prime favorite, and peanuts were fed him by the hundred. A brown bear, a yak, a camel, a pair of pelicans, leopards and other beasts of the jungle were shown.

In the big tent the DeHomo brothers, their athletic feats, proved a first-class attraction. Little Clarence was the favorite of the three. Tessie, a trapeze performer and sleek wire artist, was another favorite. While little Bessie sent the crowd into roars of applause by her acrobatic feats on the trapeze. The clown, under Lew Whitaker, meanwhile cracked a number of jokes, many of them savoring a trifle of the ancient. The drill by young ladies was good, if brief. The equestrians and equestriennes were up to the standard. The performance lasted little over an hour, and was attended by only a fair crowd.

MINOR MENTION

Fortune tellers, jugglers, bag-punchers and others, created amusement in the side shows.

The "barkers" were not as busy as usual.

The big tent would seat 6,000, but it didn't do last night.

No use trying to run a show or business without newspaper advertising and plenty of it.

GOOD ADVICE TO FISHERMEN

Well-known Cartoonist Relates Experience at Stony Lake.

Mr. Sam Hunter, of Millbrook, the well known cartoonist, on the Toronto World staff, who is spending his annual midsummer holiday at Stony Lake, has a bright, catchy letter in this week's issue of the Millbrook Mirror, in which he describes some fishing experiences.

Rain, rain, followed by more rain, such is the record of Stony Lake immediately following the opening of the fishing season.

But it provokes no protest from the settler in rock ridged Barleigh or Dunmer.

The camper may get too much of it, and profanely say so. The native has a different view point. One of these northern farmers, after two days' sunshine following three weeks' continuous downpour which would frighten other folks like work building or the hills, will equate himself cross-legged in the shade of a juniper bush and calmly proceed to show you that "what this here country needs, mister, is a hull lot more rain."

One marvels that such a moist minded people ever had the "heart to vote their district into the aridity of locust option.

It's the soil! Trees here, instead of sending down their roots and growing as other trees grow, spread them horizontally and far in search of a crack in the rock into which they can prospect for soil and a ledge anchor "halt" against the wind.

You may trip over a root in the dark and not come to the tree to which it belongs all you have passed the third connection line. Bare knobs of granite or limestone stick up, all over the farm like bald heads in a swimming hole. These through sometimes rich in what antiquaries call "local color" are "shy" in crops and do not retain moisture to any extent. They are alluded to as "thin spots" by the local yeoman. Angie worms in this shallow soil are of two varieties—large and small and red rustlers—the hard worms and the soft ones. The hard worm known to fisher folk all over this happy land. Barn yards however, being few and widely separated the red rustler is the worm most usually hunted. He is found everywhere under the thin skin of sod. But the stranger to those who do not imagine that all he has to do is to push a red tomato can and a spade and dig him out from under the sod. It requires two persons to insure the capture of a red rustler, for he has the cunning of a fox, and the speed of a cotton tail. He dodges and runs, unless headed off, the moment the spade uncovers him. And to be bunk for running, for he is not only cunning but he has, too, the sharp and prematurely aged look of one who had seen much trouble and privation. As bait they generally go six to the hook, and being so gaily thinner than a bass hook, are tied on Millbrook parties thinking of coming this way for fishing, and contemplating the use of worms, would do well to be in before starting. Many of the bass caught here last week were filled with spawn, due doubtless to the cold, lake spring, which had interfered with spawning. Fishing has been good.

On Our Staff, Too.

It was a noble journalist upon Dominion Day.

Who saw a little maiden tumbling headlong in the bay, Full leisurely he doffed his clothes, pulled on a bathing suit, and leaped in after her, "Jinks, now wasn't he a beauty!" Let all the heroes of the quest in shamoo content their faces, For this reporter sets 'em back about a dozen places.

CELEBRATION OF TWELFTH.

The Lindsay Brethren and Friends Visited Millbrook and Cayceon

Evening Post of July 13. Lindsay District Orange Lodge, celebrated the glorious 12th at Millbrook, headed by the Sylvester brass band, and accompanied by the Princes Boys and True Blues. Leaving here through heavy rain to take their special at 8 o'clock sharp, they formed an important part in the make-up of the County of Victoria, L.O.L., which had its place in the grand parade. The District of Emily L.O.L., being the oldest, had the first place in the County turnout and Mariposa second, Fenelon District True Blues following Lindsay. The Counties of Peterboro, Durham and Northumberland were largely represented, and altogether the parade was a splendid success.

The brethren returned to town, at 7.15 p.m., and headed by the band, paraded by way of William-st. to Kent, and thence to the lodge rooms of L.O.L. No. 557, where a hall was called and all dispersed in true honest style by playing, "Auld Lang Syne" and "God Save the King."

THE DAY AT BOBCAYGEON.

Bobcaygeon was the scene of much jubilation among the Orangemen yesterday. The lodges from Dunfermlie, North Verulam, Bobcaygeon and other points in the district were present with life and drum bands and a number of citizens from surrounding towns and cities. The parade started from above the Hunter house and proceeded to the agricultural grounds, where speeches were made.

FUNERAL OF LATE W. D. HAMILTON

At Lakefield was Largely Attended by Local Oddfellows and Masons.

Review: the funeral of the late W. D. Hamilton, who was killed in a wreck near Kenora was held Thursday, the 11th at Lakefield. The funeral was from the residence of the deceased's father and internment took place in Lakefield cemetery.

The funeral was under the auspices of the Oddfellows and was conducted by Lakefield lodge, which turned out in a body. There were also a very large number of Oddfellows and Masons from Peterboro and Lindsay, and large turnout of railway men from Points all along the line, including Peterboro and Lindsay, Toronto, and other places. The pallbearers were Messrs R. Mulligan, Thos. Emerson, Peterboro; Casement, of Lakefield; McMahon, of Lindsay; Wm. Pilling and Fred Haskill, of Peterboro.

Weak Kidneys

Weak Kidneys, surely point to weak kidney nerves. The kidneys, like the heart, and the stomach, find their weakness, not in the organ itself, but in the nerves that control and guide and strengthen them. Dr. Shoop's Restorative is a medicine specifically prepared to reach these controlling nerves. To detect the kidneys alone, is futile. It is a waste of time, and of money as well. If your back aches or is weak, if the urine is cloudy, or is dark and strong, if you have symptoms of Bright's or other distressing or dangerous kidney disease, try Dr. Shoop's Restorative a month. Tablets or liquid—and see what it can and will do for you. Druggists recommend and sell.

IMPORTANT NEWS OF THE DISTRICT

Told in Interesting Form by the Bright Correspondents of The Post at the Various Centres.

CRESSWELL

(From Our Own Correspondent.)
Mr. Heron, of Vancouver, and Miss Jowett are visiting at Mr. and Mrs. Jno. McDonald's.

Mr. Sam Egan spent Friday last at Orillia.

Mr. Roy Jackson, a former Cresswell boy, will preach in the Presbyterian church here on Sunday next. Our merchant, Mr. Chas. Bell, spent a couple of days in Toronto last week.

Mr. Wilbert Davidson spent Friday with friends in Lindsay.

Miss Maud Dayton, of Little Britain, visited relatives here last week.

Mr. and Mrs. Jas. Woodward spent Sunday in Gageburg, the guest of their son William.

Some of our young people took in the circus in Lindsay last Friday.

Miss Annie McKinnon visited friends in Lindsay last week.

Mrs. and Miss Broad, of Zion, visited Mr. and Mrs. Wm. Broad lately.

The Presbyterian church has been newly shingled and remodeled inside, which adds greatly to the appearance.

Mr. Ed. Woodward called on friends in Lindsay last Friday.

EAST OAKWOOD

(From Our Own Correspondent.)
The funeral of Mr. F. Kemp's little boy, Freddie, took place last Wednesday afternoon at 2 p.m. at the home of Mr. Jesse Gorrell. Just one week before his death Freddie was with his mother and baby brother arrived here from England to meet Mr. Kemp, who was working at Mr. Gorrell's. Soon after their arrival the little boy took the measles, and then pneumonia, which, under the doctor's best attention proved too much for the little fellow, who was always delicate, and so passed away on Tuesday evening last. On Wednesday afternoon his neighbors and friends gathered at the house, and Mr. Brown preached an appropriate sermon, after which the remains were interred in the East Oakwood cemetery, four little boys of the neighborhood acting as pall-bearers. The grief-stricken parents have the sympathy of their friends.

Miss Whiteman, of Peterboro, is visiting Miss B. Webster.

Mrs. Everhart and baby, of Toronto, have been visiting Mrs. H. Robinson.

Mr. Abram Webster, also Mr. and Mrs. Wm. Coak, and two children, were visiting at Kirkfield and the little look over Sunday.

Miss Jessie Harous and Roy Coak were successful at the Entrance examinations, Miss Jessie gaining first class honors of the county.

Several friends here took in the strawberry festival of the Friends' Sunday school.

SCOTCH LINE

(From Our Own Correspondent.)
The crops are looking well, as a result of the excellent growing weather.

Mr. John Beatty has his barn moved into position for milking. The stone work will be done by Mr. Alex. Burgess.

Mr. Donald Robertson has finished shingling his barn, which will help him to withstand the frequent showers.

Messrs. Alex. and Robert Robertson, Harry Kennedy and Will Kingsborough took in the circus in Lindsay on the 12th.

On Wednesday, June 10th, the Baptist Sunday school held their annual picnic at the lake shore. The day was all that could be desired, and from 2.30 o'clock until late in the evening a large crowd of men, women and children enjoyed themselves running races, playing ball and boating on the lake. The picnic was a very successful one, and the happy memories of the happy day will be treasured for many years.

An excellent supper was served beneath the trees at the close of the program, which resulted as follows: Men's race, 1st Norman Robertson; 2nd 18 years, 1st James Robertson; boys 12 years, 1st Howard Kennedy; boys under 12 years, 1st Joe Kennedy; ladies, married, 1st Mrs. Isaac Lewis; ladies over 16 years, 1st Gertrude Robertson; girls under 16 years, 1st Jessie Robertson; freestyle, 1st Alex. Kennedy. Prizes were, for 1st red lodge, awarded to a local team, which was a scripture scene, for 2nd prize a white load. That the picnic was such a success is due largely to the untiring energy of our popular pastor, the Rev. Mr. Bingham.

CAMBRAV

(From Our Own Correspondent.)
Mr. Wm. Becham, Eden, is spending a few weeks with his brother, the Rev. H. Becham, Vancouver, B.C.

Miss Wm. Sinclair spent the past week with her sister, Mrs. W. Becham, Orono.

Miss Daniels and her little niece, D. Gilla are enjoying a few weeks' holidays with their mother at Orillia.

Mr. John Christian, an old resident of our village, passed away on Friday morning, the 12th, and was buried in Eden cemetery on Sunday, 14th. Service for the deceased was conducted by the pastor, the Rev. Mr. Finkler. Appropriate hymns were sung by the choir. A large number of relatives followed the remains to its last resting place.

Miss Rozee, who has been teaching school at Gooderham, is home for her summer vacation.

Our public school closed for the summer holidays on Thursday, 11th. The principal, Mr. Bramble, was presented by the scholars with a suit case as a token of high esteem in which he was held. Mr. Bramble is spending the holidays in London, England.

Mrs. Foley, Bowmanville, is spending a pleasant holiday with her sister, Mrs. Wm. Foster.

A very attractive service was held in the Methodist church on Sunday evening last, in the form of a song service. The large congregation participated thoroughly in the singing, and the very impressive sermon by the pastor, Rev. Mr. Rankin.

Mr. Pittal, teacher, Glen William, W. Glenora, our general merchant, is doing a rushing business these days. He carries a large and well

assorted stock of general merchandise and the prices are as low, and in some cases lower, than any other house in the county, quality considered. He makes farm produce a specialty.

Mr. W. Bryant and family, Toronto, have been the guests of Mrs. W. F. James during the past week.

Mr. James Wells was a happy smile these days. Another young thresher has come to stay.

Mr. McMillan visited his daughter, Mrs. A. Gilson.

Mrs. Joseph Coak and Miss Greta are in Port Carling enjoying a couple of weeks' holidays.

Miss Don McPherson is in Orillia for a few weeks visiting her sister, Mrs. A. R. French.

Master Clarence Hill was wounded in the head while throwing horse shoes. He is under Dr. Vale's care.

The pulpit of the Presbyterian church here was occupied by Rev. Mr. Smith, of Toronto, on Sunday.

Miss Winifred Hogg, of Toronto, is visiting her aunt, Mrs. Silverwood.

Mr. Gordon King was in Toronto Friday and Saturday.

Miss Viola Laidlaw, of Lindsay, is visiting her sister, Mrs. James, at present.

Mr. Roy Gardner is able to be out again. We are glad to hear of this recovery.

Miss Almira Coak, of Toronto, is the guest of Miss Pearl Coak.

We congratulate the pupils of Miss Rennie's class upon passing the entrance examinations, four being successful.

Mr. Dixon and Mr. and Mrs. Mullett, of Bancroft, visited at Dr. Dale's.

Mr. F. G. Perrin is away at present enjoying a well earned holiday.

Mrs. Soden returned on Monday from Toronto after spending a well-earned holiday.

Mrs. Fleury, the oldest lady in this part passed away on Tuesday at the home of her daughter, Mrs. Henry Robinson, at the advanced age of 94.

The many friends of Mrs. (Dr.) Dale will be glad to learn she is recovering after a serious illness.

GOODERHAM

(From Our Own Correspondent.)
What has happened to the Gooderham news lately? Your correspondent must be absent. If you would allow me the space in your valuable paper I would like to say a few words about the little town of ours.

What makes Mr. J. E. Hunter wear such a pleasant smile? Why, they have a bouncing baby boy. Mrs. J. McColl also has a little stranger, who has come to stay.

Mr. and Mrs. Chas. McFadden and little daughter, of Peterboro, are guests of Mrs. A. Hunter.

Mrs. Chas. McFadden is visiting her mother, Mrs. J. A. McConnell.

Mrs. P. A. Barr, of London, spent a few days lately visiting this district.

Mr. Jos. Morrison has his new house under way, and expects to be able to move into it in a couple of weeks.

Miss Annie Madill returned on Wednesday from London.

Miss Jane Madill, of London, and Mr. Wm. Carmichael, of Woodville, spent a few days with Mrs. Madill lately.

Quite a number gathered in the village to celebrate the 12th. Although the day was not what it might have been the people enjoyed themselves. The ball given in the evening at the hall was the best for some time.

Mrs. L. Barr returned on Thursday from a three weeks' visit with friends in Lindsay and Haliburton.

Messrs. Leo and John Gould are here for a holiday.

Miss Jessie Gould was a visitor in Haliburton Monday.

A quiet wedding took place in Lindsay on the 11th, Mr. Geo. White, of Fortoune, and Miss Maud White, of this place, being the happy couple. They will leave for their new home in Glendale shortly.

Our sympathy is felt for Mr. and Mrs. Jas. Johnson in the loss of their son Alex, whose unexpected death has cast a gloom over the village.

Mr. and Mrs. R. H. Beyman have taken up their residence in our village. A number of friends gathered at their home on Monday eve and spent a very enjoyable time. Addresses were delivered by the chairman, Mr. John Maxwell, Mr. F. Vale, pastor, Mr. Jas. Huff and Mr. F. Vale, pastor, Mr. J. Yone Yama. The following address was read by Miss Guid: "The Garden of Eden".

Mr. and Mrs. R. D. Heyman, of the owners of Court Pine Lake, No. 448, have gathered together this evening to tender our congratulations for the way in which you have conducted yourself in advancing the interests of this Court since becoming a member. And we may add that we firmly believe that the position of our village is due to the energy and vision that you have rendered from time to time. We are also of one accord in offering our congratulations upon your marriage. We hope that all good blessings, temporal and spiritual will be yours for all through life. That you will experience much of the sunshine in your journey together and that you will sympathize, cheer and assist your friends in the court and the acceptance of this chair, which is our pleasant duty to offer unto you, and we heartily hope for your length of days

so that it may add to your comfort. Signed on behalf of the members of the Court, in a few well chosen words, thanked the friends in behalf of himself and his wife for the mark of their appreciation. After refreshments were served the crowd dispersed.

Mr. and Mrs. Conkall are visiting relatives in this village.

LITTLE BRITAIN

(From Our Own Correspondent.)
Kearns report that about as improving wonderfully after the cold spring. Alaska fishing is doing well and the weather is just suited for its needs. Roots are good. Apple trees usual. Roots are good. Apple trees seem to show some blight, but plenty of fruit.

Forty or fifty of our young people went to Washington Island for a fine day's fun last Monday.

The Misses Jordan, of Lindsay, are visiting their aunt, Mrs. R. F. White, at Elm Grove.

ARE YOU IN THE RUT?

IF YOU ARE NOT, WE HAVE A GOOD JOB OPEN FOR YOU

What kind of a man are you?

Has your teaching been at fault or are you familiar with all the new loose leaf systems and modern office devices which are used by up-to-date business houses?

The directors of Business Systems, Limited, who are closely in touch with business houses all over the country where modern methods have been installed, are continually being asked to recommend competent office men.

This gave them an idea, and the result is that arrangements were made for the opening of Business Systems Commercial School.

Business Systems Commercial School teaches practical methods such as are actually in use in commercial houses, instructing only by expert teachers who have had practical business experience and aiming at the highest standards of education.

Business Systems Commercial School teaches retail as well as wholesale business methods, and for those now occupying positions and who desire to improve themselves, there are special night courses.

Inasmuch as the directors of the school are now in demand by the largest business houses in the country, to devise new systems and improve present accounting methods, every student has an opportunity to thoroughly acquaint himself with the latest improved systems and most modern office devices.

By this it is not meant that the work of Business Systems Commercial School is confined to the forms manufactured by Business Systems, Limited. The course includes all modern accounting ideas, going into the matter so thoroughly that every graduate is capable of filling the best positions.

And the men who fill the best positions are the men who draw the largest salaries.

Is that the kind of a position you want to fill yourself, and is that the kind of salary you want to draw? If so, write for further particulars and booklet on the courses. Fall term begins Tuesday, September 3rd.

The Best Advertisement.

It has been said that they are "advertisements" in a satisfied customer, but, as an exclamation mark, the circulation of such "ads" is very limited. Furthermore, how is the merchant to get satisfied customers without the aid of newspaper publicity? Advertising in the daily papers is as necessary to the convenience of buyers as it is to the advantage of the dealer. What ever tends to lighten the labor of shopping wins the favor of the shopper. No consumer can be counted upon as a permanent asset by any firm which leaves to its competitors the function of printing in the evening newspapers a daily bulletin of advantageous offerings.

THE POSTCORRESPONDENTS' LETTERS.

PALESTINE.

(From Our Own Correspondent.)
Mr. Duncan McNeill, of Dakota, is home on a short visit to his parents. Mr. Ed. Moran is erecting a new driving house.
Mr. and Mrs. Will Elliott attended a bazaar raising at Eldon Station last week.
On Friday evening the new dignous (haschilist) at Harling journeyed up to play a game with our boys, but met with a crushing defeat. At the end of five innings the score read 18-9 in favor of the home team.
Quite a number of the young men have commenced haymaking.
Mr. Colin Munichson returned to the West last week.

MOUNT HORNB

(From Our Own Correspondent.)
The anniversary services which were held here July 14th were largely attended. The morning service was conducted by the pastor, Rev. Mr. Newell, and in the evening Rev. Mr. McCullough, of Omaree, gave an interesting sermon. The first two choirs supplied music on Sunday, and excelled themselves in good style. Their singing was well appreciated by all.
Mrs. Skuce and son, Charles, of California, gave Hornb friends a full last week.
Mr. and Mrs. Chas. Hickson, of Mendocino, are visiting friends in this vicinity.
Miss Jackson and Miss Vrooman, of Lindsay, and Miss Emily Fatus, of Cadmus, spent a few days visiting at Mr. Wm. Jackson's.
Mr. and Mrs. W. J. Skuce, of Paterboro, called on their many friends here lately. Also Miss Wilma Skuce and Master Harold are spending their vacation at Hornb.
Miss Edith Coulter and Miss Jessie Annett, of Fleetwood, spent a few days visiting at Mr. Samal Coulter's.
Mrs. Edward Moore and family have the sincerest sympathies of the neighborhood in their sad bereavement. Mr. Moore was a man respected by everyone and will be greatly missed in the family.

ISLAY

(From Our Own Correspondent.)
Miss Lena Elford, of Toronto, is spending the holidays at her home here. She is accompanied by Master Stanley Jennings, also of Toronto.
Miss Alma Cowieson, of Cambray, was a visitor at Islay Sunday school last Sunday.
Mrs. J. Kennedy and children, of Virginia, are visiting friends in this section.
Mr. Douglas, of Lorneville, visited his son-in-law, Mr. H. C. Hamill, last week.
Miss Mabel Currins left last week to spend some time with friends in Moragah and Paterboro.
Master Will Robertson, of Pleasant Point, paid friends in this vicinity a short visit this week.
Mr. Thomas Currins returned home last week after spending nearly two months in the West. He visited friends at Islay, Battledore, Newell, and other points, and seems to like the country well.
We congratulate Master Clarence Spence and Robbie Morrow on having passed the Entrance examinations.
Mr. Donald Spence has sold his farm to Mr. Thomas Arham.
A number from this section attended the funeral of the late Mr. J. Christian, of Cambray, who was, until a few years ago, a resident of this section. The widow and family have the sympathy of the entire community.

KIRKFIELD

(From Our Own Correspondent.)
Our teacher, Mr. Gilchrist, is to be congratulated upon the success of his pupils at the recent Entrance examination. Nine out of a class of ten obtained their certificates.
Miss Evelyn Fraser has returned from Moose Creek, where she, with her sister, Miss Fraser, of Detroit, had been visiting for some weeks. A number from the village were guests at the Macfadden-McEwen wedding in Balover last week.
Mr. Alex. Ross, the genial traveler for Spurling & Co., Lindsay, was here last week on business.
Mr. Henry Lacey, tailor, returned from Manitoba and the Northwest on Thursday of last week. He spent some weeks with his son, who is engaged in farming near Regina. Mr. Lacey speaks well of the West, but he thinks he still prefers Ontario as a place of residence.
Mr. Robert Fleming, of the Toronto street railway, spent a few days here last week, the guest of Mr. W. J. Mitchell.
Mr. Jas. Rossland's new house will soon be completed. We understand he will pull down the house adjoining, now occupied by Mr. Harry Ewins.
Mrs. Ead. of Vancouver, and the guest of her son, Mr. Ead, drug-gist, of this town, last week.
A meeting of the Women's Institute was held at the home of Mrs. H. Ewins on Thursday of last week. Owing to various reasons the number present was small. The next meeting will be held at Mrs. J. King's on August the 15th, at 2:30 p.m.
Wild strawberries were very plentiful around here, but none were picked for market, which goes to show that times are good and money plentiful.

FIELD DAY AT OTTAWA.

The Ottawa Y.M.C.A. will hold a field day in connection with the Old Boys' Reunion, to take place in that city on Monday, August 5th.
Some sixteen events will be contested and gold and silver medals will be awarded for each event. A silver cup will be given to the individual who scores the highest number of points during the day, and also to the team scoring the highest number of points. Entrance fee 50c, for each event.

THIRTY-ONE KILLED ONE HUNDRED SANK YACHT IS BLOWN UP

Terrible Head-On Collision Between Excursion and Freight.

INJURED NUMBER SCORES EIGHTY LIVES WERE SAVED

Crowded Cars Smashed to Atoms—Were Completely Telescoped—Passengers In Panic—Harrowing Account by Eye-Witnesses—The Freight Crew Are Blamed for Disobeying Orders.

Detroit, July 22.—Thirty-one killed and half a hundred seriously, some probably fatally, injured, is the result of a head-on collision Saturday morning, near Salem, Mich., 31 miles west of this city. Those killed and hurt were some of the 800 passengers on the annual excursion of the Pere Marquette Railway employees from Iona to Detroit, leaving that town at 6 p.m. The freight train running behind its orders was the cause of the wreck. Westward from Plymouth, in a serpentine, gradually sloping path, runs the track along which the heavy freight thunders to meet the ill-fated excursion train. Rounding one of these sudden turns, and leaving the level, one plunges into a deep, chasm-like cut, with sheer walls of earth some 15 feet high on either side. It was here that the two trains came together without warning until both had rounded the curves to be seen too late for any earthly power to prevent a collision.

The passenger train of eleven cars, carrying employees of the Pere Marquette shops at Iona and their families to the Michigan metropolis for their annual excursion, was running probably fifty miles down a steep grade.

It struck the lighter locomotive of the freight train with such terrific force as to turn the freight engine completely around.

Both locomotives were wrecked, but only a few of the freight cars were smashed.

Six cars of the passenger train were piled up in a mass.

Four of the coaches remained on the track undamaged, and were used to convey the dead and injured to Iona.

One coach was entirely undamaged, with only its forward trucks off the rails.

Two coaches were thrown crosswise on the track and lay from bank to bank, five feet above the rails.

Of the baggage car, not enough remained to show where it had been tossed. Portions of baggage-car and freight cars were mere debris.

Freight Crew Blamed.
Responsibility for the wreck is placed upon the crew of the freight train by officials of the road. Officers who arrived at the scene soon after it happened, obtained from the crew of the freight the orders under which it was running, which clearly show that the freight encroached upon the other train's running time.

The excursion left Iona crowded with men, women and children at 7 o'clock Saturday morning. Every family had its lunch basket, and many of the excursionists were eating when the trains collided.

The impact was so great that a number of passengers sitting near the windows of the rear coach were thrown out of the windows to the ground.

There was a panic among the passengers; the undamaged coaches for a few moments.

Then, when the uninjured realized that they had not been hurt they rushed from the cars to the rescue of their friends and relatives, who were pinioned in the wreckage.

Families were scattered among different cars, and there was frenzied searching for missing relatives.

The sight was sickening. People were running around as though mad. For a few minutes it seemed as though they had all gone crazy. Then they began digging the bodies out. Perhaps it was an arm or a leg that was found. One man in his excitement grabbed an arm that protruded from the mass, gave a slight pull, only to find that it was free at the other end.

A young man about 18 years of age was found with both of his legs nearly off and his right arm hanging by the skin. The man begged his rescuers to kill him, and said: "For God's sake, shoot me. I can't stand this." Two men worked for an hour before the unfortunate man was gotten out, and he died five minutes later.

Rescuers took out a woman of middle age terribly mangled, with the left leg completely severed above the knee. As she lay on the blood-soaked grass faintly breathing her last, a little boy of a dozen years sank beside her, crying: "Mother, mother, but she died without recognizing him."

After the wreck one woman with her arm nearly severed from her body and the clothes nearly stripped from her body was moaning for her child. "If my baby is killed then let me die, too," she kept repeating. "For my little girl is all that I have left in the world."

Soon after the wreck farmers gathered from all over the surrounding country, bringing food, water and liquor with them, and soon there was a crowd of over 1,000 people on hand. Everyone was busy, either attending to the wants of the injured or assisting in getting injured or dead from the demolished cars. Cautions were thrown along the banks alongside the track and the dead and injured were placed on them.

Terrible Midnight Collision of Steamers On Pacific Coast.

Terrible Accident to Pleasure Boat On Toronto Bay.

The Columbia, With Passengers From San Francisco, Rammed by the Lumber Boat San Pedro—Captain of Ill-Fated Steamer Went Down in Angry Deep With His Boat—Sank in Five Minutes.

San Francisco, July 23.—More than 100 lives were lost last Saturday night when the steamer Columbia, bound north from this port for Portland, collided with the lumber steamer San Pedro off Shelter Cove, Mendocino County.

Eighty other persons who were on the Columbia were rescued after being in the water several hours.

There was a heavy fog at the time, and the San Pedro, heavily laden with lumber, struck the Columbia on the port bow with such terrific force that she was cut down to the water and sank in about five minutes.

Of the 130 passengers many succeeded in reaching the San Pedro, which remained afloat. Only 80 of them remained, however, when after many hours the steamer Roanoke came up to their rescue.

Captain P. A. Dorn of the Columbia went down with his vessel.

The San Pedro was picked up by the steamer George W. Elder, and is now being towed into Eureka.

The collision occurred at midnight when all on board save the lookout and officers on the bridge were asleep in their berths.

The Columbia was steaming north at an easy rate, having left here at noon Saturday.

Suddenly out of the fog loomed the dark hulk of the San Pedro, south-bound, which was evidently out of her course.

Whistles were blown and frantic efforts made by the helmsman of each vessel to avert the collision, but they were of no avail.

The San Pedro struck the steamer in the port bow, tearing an immense hole in her side, through which the water rushed in great volume.

Alarms were sounded throughout the passenger ship, and the terrified passengers scrambled from their state rooms in an effort to escape from the doomed vessel.

But the time was too short to aid the life savers. The vessel sank within five minutes of the time of the collision.

A life raft was launched with a number of passengers on board, but only a few of the entire number on board were saved.

During the earthquake and fire the Columbia was lying at the drydock of the Union Iron Works, and the shock loosened some of her blocks, with the result that the vessel was capsized. But she was entirely refitted and when she left here Saturday she carried a full list of passengers.

The assistant to President Frey of the Columbia, and Portland Steamship Co. yesterday gave out the following figures:

"Cabin passengers upon the Columbia 163; steerage passengers 21; total passengers 184; crew 60. This makes a total of 244 souls on board."

"Reported saved 98; unaccounted for 151."

Except for the lists of those on board, Mr. Frey would not vouch for the accuracy of these figures. He said:

"We have made every effort by wire to confirm from Eureka and other points along the coast, but all that we learned thus far has come from the Roanoke and the newspapers."

According to J. C. Flynn, a rescued passenger of the Columbia, every woman passenger on board was lost.

The steamer Roanoke spoke to the steamer George W. Elder, and the latter had on board eight-eight passengers and crew from the Columbia.

The San Pedro is in a water-logged condition. Her stern is gone, her main mast broken off, and her foremast sprung. The San Pedro's cargo was lost.

The Merchants' Exchange of this city has been besieged by anxious relatives and friends of the Columbia passengers since yesterday morning.

The Columbia was owned by the Oregon Railroad & Navigation Co., and hailed from Portland, Ore. She is 310 feet long, registers 1,746 tons, and was built in Chester, Pa., in 1880.

The San Pedro hails from San Francisco, and is 163 feet long, registers 559 tons, and was built in 1899 at Aberdeen, Washington.

Rumor That They Have Been Pawned—Scandal May Result.

Dublin, July 22.—Sensational rumors are current here in regard to the theft from Dublin Castle a few weeks ago of a portion of the state regalia, valued at \$500,000.

His ear now being thrown out that the gems may soon be "discovered" without any explanation as to where they have been or who returned them.

It is said they have been deposited as security for a loan, and the name of the alleged depositor is freely mentioned in private with hints of a tragic social and semi-political scandal.

SCORE FALL IN RIVER.
Railing of Bridge Breaks and Many Men Go Down to Death.

Lorain, Ohio, July 23.—A score of men were precipitated into the river here yesterday morning and several were drowned, a bridge crashing beneath them.

The men were employed in the shipyards. They used a footbridge from the Nickel Plate Railroad bridge to cross the railroad to their work.

Yesterday morning the ponies of the footbridge was open to permit a vessel to pass. The men were leaning against a rail waiting for the bridge to be closed when the rail broke and let about 30 into the river.

Three bodies have been found.

Terrible Accident to Pleasure Boat On Toronto Bay.

Woman Burned Beyond Recognition—Another Seriously Injured—Victims Were Norwegians, Relatives of Sailors—Boat Goes to the Bottom—Boys Hurt by Flying Timber—Loss About \$20,000.

Toronto, July 20.—Death and severe injury accompanied by a considerable property loss were caused by a gasoline explosion on Amelia Jarvis, big auxiliary yacht the Sitarah in the Yonge street slip yesterday at noon.

Mrs. Valberg Backenstein, was burned to death, and Mrs. Christina Johnston lies in St. Michael's Hospital in a critical condition, being frightfully burned; while Neils Olsen, engineer of the ill-fated boat; Alf Johnson, 15 years, cabin boy, and Ernest Johnson, 7 years, sons of Mrs. Johnson, are in the hospital suffering from lesser injuries.

The women, whose husbands work upon other yachts of the R.C.Y.C. fleet of which the Sitarah, a barge ketch, was the queen, had asked and secured permission to cross to the island in the boat, and First Mate Jack Johnston had given the signal for the boat to start when a deafening explosion took place.

Terrific Force.
So great was the force of this that the cabin top was lifted from its fastenings and one of the tenders was blown from the davits to the dock. Immediately there was a rush for the dock as flames leaped from the lower portion of the vessel.

Johnson, who was at the wheel on deck, reached the shore in safety, and Neils Olsen, who was standing by the engines, made his way on deck with his collarbone broken and his clothing alight. Charles Backenstein, a deckhand, who was on the deck, also jumped ashore.

At this point one of the Johnson boys was discovered on deck, and Patrick Jennings, a young bystander, leaped upon the burning craft and seizing the lad in his arms made his way to the dock in safety amid the cheers of the onlookers.

Dived For Boy.
Frederick L. Faulkner, saw the other lad in the water, and instantly dived. He brought him to the dock after a struggle.

Mrs. Johnson appeared in the compartment. Her clothing was ablaze. She gained the deck and ran screaming to the dock, where her clothing was extinguished.

Falls Into Flames.
When Mrs. Backenstein came from the cabin several stepped forward to help her, but just as the hands of the rescuers were upon her she threw up her hands and fell back into the flames.

Meanwhile the Bay street and Lombard street divisions of the fire department and the fire tug Nelly Bligh appeared upon the scene. Struggling hose from the Esplanade the firemen soon had two lines playing on the blazing boat, while an equal number played upon her from the fire tug, which had steamed alongside.

The Bay street chemical engine was brought into play and seemed to be the only thing which had any effect upon the burning gasoline, which was now escaping in large quantities from the 55-gallon tank within the boat.

Fears Second Explosion.
This tank was the great fear in fighting the flames. It had not exploded, and no one could say at what moment it might ignite, causing a still more serious explosion than the first.

When word of this danger spread among the crowds upon the dock, the police had little trouble in keeping the idly curious at a safe distance.

Nevertheless, the firemen worked on determinedly, and at last the supply of the chemical engine was exhausted, and it was sent away to be recharged, which took half an hour.

Vessel Scuttled.
At last it became apparent that to extinguish the flames the vessel must be sunk, and at the word of Mr. Jarvis, large streams were turned into the boat and at 1 o'clock the vessel was in the slip, where she now lies.

Meanwhile the injured had been removed to St. Michael's Hospital, where they were instantly attended.

Horribly Burned.
Mrs. Backenstein's body was horribly burned, and even the firemen were sickened. All the clothing except a garter, and a gold chain, and the ears, nose, fingers and toes were burned away.

When the yacht began to sink half a dozen of the firemen had to make a hurried scramble for the dock.

Mr. Jarvis valued the boat at \$18,000. She was purchased at Detroit in 1905 from Russell Alger, Jr., since which time she has been fitted with her auxiliary engine. She was insured with the Federal Lloyds Company for \$5,000, which will nearly cover the loss on her.

WILSON & WILSON, Proprietors.

LINDSAY, FRIDAY, JULY 26, '07.

WHOSE FAULT IS IT?

Evening Post of July 18.
The Sagoy river between Lindsay and Sturgeon Lake is in a dangerous state owing to sunken logs and other obstructions. A disaster, attended with loss of life, may occur, any day or any evening. It may be an excursion steamer, crowded with happy pleasure-seekers, that will have a gaping hole punched in her side or bottom, or it may be one of the many power launches constantly seen passing up or down the river, with from two to a dozen passengers on board. There have been numerous narrow escapes in both instances already this season. The dangers are so many, and the number of steamers and gasoline launches so numerous, that the dreaded fatality is almost sure to happen—the only point about which there may be said to be any doubt is as to the number of precious lives to be sacrificed.

And why? Because of somebody's neglect. The river is under the control of Superintendent McClellan, of the Trent Canal, Peterboro, who has a staff of overseers and assistants—also of Peterboro. It is, perhaps, unfortunate, that authority is so centralized—under other circumstances some weight might be attached to the fact that almost, if not fully, 90 per cent. of the entire traffic on the Trent Canal waterway, occurs on the stretches between Fenelon Falls village and Lindsay, and Bobey-geon village and Lindsay. Four tugs are busy night and day from the opening till the closing of navigation towing logs and other freight to this town, twelve passenger steamers plying between Lindsay and Lake ports arrive and depart from our wharf daily, and many excursion steamers and large pleasure craft from points on the lower and upper waters call here at intervals. The best interests of all engaged in this trade, and the lives of the thousands of passengers carried in a season, are jeopardized by the continuance of the present state of affairs. It is long since it is absolutely necessary.

We have referred to the risk of life—we also wish to mention an instance of the monetary loss the state of the river imposes on vessel owners. For two weeks the water has been falling and the passenger steamers have been striking sunken logs in the channel on every trip. Tuesday morning the Star, Kathleen struck a sunken log in the long cut, and lost her wheel, the impact snapping the shaft. The wheel sank to 16 feet of water and was not recovered until last evening; the shaft cannot be repaired until Saturday, so that, estimating the expenses and loss of passenger rates, the proprietors will lose nearly \$200. If these sunken logs were picked up regularly the loss would not have occurred. There are thousands of such obstructions, no doubt, on the river bottom, and they become dangerous when the water is allowed to fall beyond a certain point. Half-sunken logs are even more dangerous—it was one of these that caused the Kathleen accident, and which may sink the next craft that runs against it if it happens to be tilted at the right angle.

THE IDOL OF THE NATION.

"Laurier, the idol of the nation," is the appropriate heading under which the "Canada" described the unique happenings of the welcome to Canada's chief minister—we had almost said, her uncorrupted king. Certainly, the welcome given to Sir Wilfrid, in continuity, in numbers and in enthusiasm, is unique in the history of Canada so far, and is not likely soon to be repeated, unless in his person, remarks the Montreal Witness, in comment upon the grand reception tendered the Premier. Enthusiasm, like a wind, nay, a tornado, has swept through crowd after crowd, all the way from Quebec to Montreal and Ottawa; there have been triumphal arches, gorgeous lights and bunting, bands and symphonies and crowds in thousands. No man so far in this country has got so near the hearts of the people as has

Wilfrid Laurier, and it would not be easy to find a parallel elsewhere. Sir John Macdonald, our greatest figure in the past, was the idol rather of a party than of a nation. Gladstone was well-beloved, but he was finely hated too: Lord Beaconsfield, after the Berlin Congress, came home with 'Peace with Honor,' setting one half of the English people delirious with joy and the other half wild with rage or scorn; but nobody hates Sir Wilfrid, no one begrudges him his great European triumph. Even those who profess most to distrust and dislike his policy and some of his colleagues, assure us that for Sir Wilfrid personally they have the highest admiration. This is naturally accounted for by his innate courtesy and the spirit of conciliation that has dominated his policy where the two races are concerned and which has overflowed, as it were, into the field of politics. Add to this that Sir Wilfrid is easily the most knightly figure upon the stage of our life today, and his universal popularity is easily accounted for. So, as the 'Press' expresses it, it is a country, not a party, which expresses the most cordial and the most enthusiastic of welcomes to the chief of the state.

THE PREMIER AT HOME.

Sir Wilfrid Laurier, "the grand old man of Canada," is once more at home in the Canadian capital, after a series of ovations in the old land and the heartiest of welcomes from the time the steamer touched at a Canadian port. The receptions tendered him at Quebec, Montreal and Ottawa were remarkable exhibitions of the love and respect entertained for Sir Wilfrid by all classes of the Canadian people. Nowhere did they favor of a gaudy nature. Enthusiastic crowds and a lavish display of flags and bunting marked the proceedings on each occasion, and the Premier showed in his speeches that he fully appreciated the remarkable and spontaneous character of the people's manifestations of affection and gratitude.

In reply to the address of welcome presented by the Mayor of Ottawa, Sir Wilfrid declared it to be his desire to remain a citizen of Ottawa. He disclaimed any ambition to become High Commissioner, a post for which rumor in some quarters has been slating him. Equally significant was his statement that sets at rest the stories to the effect that Sir Wilfrid will soon retire from the Premiership to make way for a colleague. His words Monday night were: "What I am now I shall remain, so long as it pleases God to 'give me health, and so long as the Canadian people repose confidence in me, as they have done during the 'past few years. If it please God to 'take my health away, or if the 'people should take away their confidence from me, then I would become a simple citizen of Canada, and a resident of the city of Ottawa."

While Sir Wilfrid enjoys good health the people of Canada want him to remain Premier. And all Liberals, and a very large number of Conservatives, who appreciate the invaluable services he has given to his country, hope that the blessing of good health may long be vouchsafed to him, and that for many more happy years he may enjoy the confidence of a prosperous and confiding electorate.

EDITORIAL NOTES.

"Dooley," the acute philosopher and humorist concedes the next presidential election in advance to Theodore Roosevelt; and this seems to be a view commonly held, despite the President's repeated declarations that he will not accept renomination. Governor Cummins, of Iowa, predicts the nomination of Mr. Roosevelt, who, he says, must head the call of the people. Ex-Judge Selden S. Spencer, of St. Louis, professes to have been informed by friends of the latter has decided that he will not decline a nomination if it shall be tendered unanimously. Thomas W. Lawson is confident that Mr. Roosevelt will be the next president. "If the Republicans do not nominate 'him, the Democrats will." Ex-Senator Chandler supports the President's policies, but thinks Senator La Follette should be chosen. Failing Roosevelt, there is increasing interest in Gov. Hughes, of New York, who may prove himself a veritable "man of destiny."

Sir Wilfrid.
(Toronto News.)

In a speech of fine grace and dignity, which Sir Wilfrid Laurier delivered at a university dinner in Toronto a few years ago, he declared his devotion to Great Britain in the simple and touching words which Ruth addressed to Naomi: "Intreat me not to leave thee or to return from following after thee, for whither thou goest I will go, and where thou lodgest I will lodge; thy people shall be my people, and thy God my God. Where thou diest I will die, and there will I be buried; as the Lord do so to me and more also. Where I die death shall be my lot." There is infinite beauty in the language, and an expression of ideal relations between the old country and the outlying British dominions, it is singularly expressive and powerful.

THE AGRICULTURAL CLASSES

NEW TEACHER IN LINDSAY COLLEGIATE WILL BE A BUSY MAN.

Will Have Town Office and Supervise Agriculture in the County.

An important meeting in connection with the course in Agriculture in the High Schools was held on Friday, July 19th, at the Ontario Agricultural College. Mr. C. C. James, Deputy Minister of Agriculture, Dr. Seath, Superintendent of Education, and the principals of the six schools, were present, as guests of the College. In the morning they were driven around the College buildings and over the experimental plots, when President Croelmann and Professor Zavitz explained much of the experimental work which is this year being conducted, paying special attention to the more recent work in plant breeding.

THE NEW COURSE PLANS.

After luncheon at Macdonald Hall a meeting was held for an informal discussion of the details of the new course. At this meeting the six teachers who are spending the month of July at the College were also present. In the discussion a much more uniform understanding of the course was arrived at; some individual misapprehensions were cleared up and many apparent difficulties were satisfactorily arranged. Dr. Seath presented a circular which stated that for pupils who take the two years course in agriculture, or a practical course in the High School, admission shall be in accordance with the regulations that govern the admission of other High School pupils. For 1907 to 1908, however, other pupils may be admitted who, in the opinion of the Principal of the School are competent to take up the work. In changing the time-table it was found that some 20 periods a week are now devoted to non-obligatory subjects of Latin, French, Euclid and Algebra, and that the pupils taking the course in agriculture could take agriculture during these periods and during the other periods, would take the obligatory subjects of the regular High School course. It was also decided that in order to allow the Agricultural teacher time for the other duties it was necessary that all his periods should run consecutively, and it was arranged that he should be at the School during four forenoon each week.

THE TEACHERS' DUTIES.

In discussing the relation of the Agricultural teacher to the members of the Collegiate staff, Dr. Seath explained that this teacher, does the same relation to the School and to the Principal as any other member of the staff, in so far as his school duties was concerned; he would be regularly present to take his classes and would be under the direction of and would have the co-operation of the Principal in all his work. President Croelmann here explained that though the Agricultural teacher would be at the Collegiate only four half days a week, it must not be supposed that he would be idle during the rest of the time. He stated that so numerous were the teacher's other duties that he would probably be the busiest man on the staff. Unlike the other teachers he had no prescribed course, with authorized textbooks, but must outline his own course, and secure his own material for instruction. Part of his afternoons and evenings would be spent in his town office, where he would soon have a heavy correspondence to handle. He would, as local agent of the Department of Agriculture, assist in establishing the various farm organizations throughout the county, and would be present at their meetings; he would conduct short courses, and where desirable, special courses in the Public schools; he would visit all parts of the country to learn the special requirements of the farmers and become familiar with their problems; he would act as a man in any work which might benefit the agriculture of the district.

AN OFFICE DOWN TOWN.

Mr. James explained that the Department of Agriculture had made a special grant for the equipment and maintenance of the town offices; that their offices will be under the control and general supervision of the Department, and the money will be expended by the man in charge, who will draw on the Department as his expenditure requires. He further stated that though under the control of the Department, this office will not be dissociated from the work of the Collegiate, but that here, as at the school, the Agricultural teacher will co-operate with the Principal and the Board of Education. The office sign will indicate this connection, and the Board of Education will thus have a proprietary interest without the burden of the financial outlay.

The course in agriculture will commence with the opening of the Collegiate Institute on the third of September. The revised copy of the regulations for the course will be ready for distribution about the first of August. All satisfactory arrangements can be made, the office in Lindsay will be opened early in September. Any person wishing information concerning the course should address Principal Hurston, Lindsay, or E. H. Reed, Lindsay.

Up to Him.

The fair maid was seated on a sofa in front of the window when the young man entered the parlor.

"Shall I—er—pull down the blind?" he asked.

"Well—er—that depends on where you are going to sit," she replied.

And so the blind was pulled down.

GOOD NEWS FOR STOCK-RAISERS.

Vaccination for Blackleg and Anthrax in Cattle.

The disease known as blackleg in cattle, although entirely unknown in many extensive agricultural sections of Canada, and not at all widespread in any district or province, annually causes quite extensive loss to cattle raisers. Anthrax, which is quite a different disease, although frequently confused with blackleg in the minds of many cattle raisers, is also the cause of serious loss of stock. The former disease is almost entirely confined to cattle under 3 years and is generally fatal. The latter attacks other classes of farm animals and the human subject is not exempt from its infection, which generally results seriously.

By the aid of science, cattle raisers are now enabled to protect their stock against these maladies. As the human family is vaccinated against smallpox, in the same manner cattle are rendered immune from Blackleg and Anthrax. The Department of Agriculture at Ottawa, through the Health of Animals branch, is now in a position to supply preventive vaccine for each of these diseases at the nominal cost of five cents per dose. Until recently, by special arrangement with extensive manufacturers in the United States, these products were secured at a reduced cost, and were placed in the hands of Canadian cattle raisers at 10c per dose for blackleg vaccine and 15c per dose for anthrax vaccine. It is due to the fact that these preparations are now being made at the Biological Laboratory in connection with the Health of Animals branch that they can be supplied at five cents per dose.

The vaccine for blackleg may be administered by any intelligent person by means of an instrument supplied by the Department at fifty cents per dose. Anthrax vaccine, which is also supplied at five cents per dose, is more difficult to administer, requiring a qualified veterinarian to inject an animal. Cattle raisers who have fear of an attack of either blackleg or anthrax would do well to apply to the Veterinary Director-General at Ottawa for the proper preventive treatment.

How It Happened.

"Did you hear about Jim Dougherty?"

"Yes, what about him?"

"He fell off the bridge down at the creek."

"Was he hurt?"

"Yes, he got a crack in the neck."

THE BARTENDER'S VOCATION.

A Glimpse Into His Workroom—The Product Turned Out.

The following article is published at the request of a leading citizen who is strongly opposed to the drinking system. He and others of his class should not forget, however, that the bartender is engaged in a legal business, and that the province and the municipality demand a license share of the cash taken over the bar in the way described. Here is the article:

Let us say a few words to the average "Wine Clerk" as we find him in all his glory—bottles to the right of him, bottles to the left of him, bottles in front of him and bottles behind him. Especially interesting are the latter. How gorgeous they look uniformed in all the glory of lithographic military. It is Satan's army dressed in battle array. "Old Tom" is left-hand man, and "John de Kuyper" is right-hand man of the company. "Hennessy", with three stars on his breast, as the Captain, is supported by Lieutenants "Scotch" and "Irish." Privates "Rye" and "Malt" are conspicuously on "bent" go, while the buglers, "Tom" and "Jerry," have standing orders never to play "lights out." The sergeant-major is "Lager", a mild-mannered gentleman, who attends to business just across the alley and does not associate with his riotous neighbors.

What an lovely picture the bar wherein is done the chains that bind souls to the enemy of souls. And the "Wine Clerk" thinks his vocation is spotless and that he is just as good a man as he who gives the best of his brain work to the end that men may become manly men, and many fathers of those who are to come after them. What a hallucination. Let us watch the proceedings. The barroom is packed with young men who have emerged from their apprenticeship and also a few married men. All feel a certain degree of comfort in the knowledge that their pockets contain a goodly sum of the reward of the week's industry. Tom Jones wants his companions to have something with him. Tom Brown, not wishing to be considered unmanly, calls for another round. Right here Satan's sharpshooters are getting in their deadly work. The fuddling of the brain has commenced. The poison is beginning to take effect. The bulb in the

thermometer of barroom good humor is rising higher and higher. "Little Johnny Jones" rises to the occasion, hits the counter a hard rap, declares that it is his treat, and would be mortally offended if his companions deny him the honor of drinking at his expense. He pulls out his little roll, dashes a bill on the counter and shouts "Come on boys! Come on everybody!" This is round number three and Satan is preparing his ambush. The brains are reeling, the tongues are loosened, each one is beginning to feel that he is a person of very great importance, and he wishes to tell his brother weaklings all he knows—and a good deal more; and his brother weaklings are waiting for an opening to fire volley of meaningless words and undisciplined sentences at all and unsavory of their hearers. The "Wine Clerk" looks happy and the little tickets in the cash register are playing leap frog. The smile on Satan's face has broadened, but it is a smile from the teeth upwards. He has ambushed the drinkers. Some one calls out for another round, and again the glasses tinkle, and again Satan's sharpshooters fly into the hands of the "Wine Clerk", and again Satan's bait is eagerly snapped at, the hook takes hold and Satan's net is full.

The drinkers seek their homes. Their steps are unsteady and the effort is made to brace up and pass muster when the blue coat is met. What was a promising young man a few hours ago is now a man of impossible, senseless act—a thing to be feared at—a thing to be despised. One could imagine that the very dogs cry "Shame!" and when the home is reached the tears flow from the father and mother, and humiliation and wretchedness and sorrow deep and bitter, comes to the happy footsoul. It is all the work of Satan, through his agents, the bartender and the wine clerk. The married man wends his way to wife and children, and oh! what a homecoming! The husband and father unsteady on his feet, the eyes bleared, the tongue powerless, the brain fuddled. Satan, you are a writer once more! For long the barroom gave the loving, trustful, faithful wife not the shadow of domestic architecture. Even the shadow is now gone, and despair is getting in its deadly work on the frame and the mind and the heart of her who looked for better things. And the work day comes again with the terrible headache and the stomach in revolt, and remorse brings a few days more of sobriety, but Satan and his little army are on watch and guard, and when pay-day comes once more many fall again in to his trap. Poor "wine clerk"! All the while he tries to persuade himself that he is just as useful a citizen as his neighbor, and entitled to as much respect as any other Canadian. Poor "Wine Clerk"! Ah, no,

Think! End your services in Satan's army—end your term sending souls to perdition—and take some line of business that will bring a blessing, not a curse, to you and yours. It is well to restrict the liquor traffic, but the most effectual mode of killing the ever-ready business is to leave the Wine Clerk and the devil's imp factory in solitude. May that day come, and soon.

BACK FROM ENGLAND.

Bobcaygeon Citizen Spent a Pleasant Holiday in the Old Land. Both Independent: Mr. James Capstick arrived home on Tuesday from England, after an absence of three months, visiting the old lands, and the scenes of his youth. He came over on the Allan Line's fine turbine steamer, the Victoria, and pronounced the sail from Belle Isle up the St. Lawrence to Montreal, one of the most beautiful trips imaginable. The first few days from Liverpool they made exceptionally fine runs, and it was expected that the voyage would be a record-breaker, but a fair wind off the banks they ran into the worst fog the captain had ever experienced, and for 60 hours they had to shut off steam and drift. Mr. Capstick left home some thirty years ago, but was fortunate in finding his father, and twelve out of thirteen brothers and sisters doing well. A few weeks before he reached England the one brother that he missed, sailed for South America. For nine years he had the management of the Duke of Northumberland's famous herd of cattle, and he had received an engagement to go with him to manage a large cattle and horse breeding farm in South America. He found his father hale and hearty. The way they walk in England more than surprised him. No one thinks of driving there, unless they have something to take or bring back heavier than they carry. Of the old land nothing seems to change. The farm implements and vehicles are all of immense strength

Archer and Mrs. Chris Smith, of Fenelon Falls, passed through town this morning on their way to Rochester, where they will visit friends for a short time. —Rev. J. G. Crozier, of Minneapolis, with his wife and daughter, is visiting his cousins, Mrs. Spence and Mrs. Arthur Irvine, Roset. Mr. Crozier is an ex-student of the old Lindsay Grammar School, and is spending a pleasant time renewing old acquaintances. —Miss Little, of London, who has been visiting friends here, has gone to visit friends in Omemee, Oshawa and Peterboro. Miss Little sang very prettily in the choir at the Methodist church Sunday evening, and we hope to hear her again, as she has a very sweet powerful voice. —Miss Joseph T. Buddick, draughtsman in the Williams' foundry, succeeded in capturing a good-sized bass in the Saugeen near the Madison house, on the shore of the Saugeen. The fish measured 19 1/2 inches long, 13 3/4 inches girth, and weighed about 4 1/2 pounds. His daughter, who was fishing some distance from him, also got a large fish on her hook, but it escaped with part of the line before Mr. Buddick could go to her assistance. —The number of deaths occurring among young children during the summer months is simply appalling. In the city of Montreal last week, 175 children under the age of five years died, and nearly all the deaths were due to stomach and bowel troubles. With ordinary care most of these little lives might have been saved. Watch the food given the children. Do not feed them too much. The milk given is pure, and give an occasional dose of Baby's Own Tablets, a medicine which surpasses all others in preventing and curing stomach and bowel troubles. —A large crowd collected on Tuesday last to witness the loading of one of the Automobile thrashing machines, made by the St. Mary's Motor Mfg. Co., which was being loaded onto a flat car in front of the Company's works. The machine was being shipped to Winnipeg Exhibition, and is one of the most complete yet turned out by the firm, possessing a number of improvements and attachments not on other machines turned out by them. Its appearance and general get up is workmanlike, and it is a credit to its makers, and it is said by those who have seen it in operation, to do its work completely. —I will mail you free, to prove merit, samples of my Dr. Shoop's Restorative, and my book on either Dyspepsia, the Heart, or the Kidneys. Trouble of the stomach, heart or kidneys are merely symptoms of a deeper ailment. Don't make the common error of treating symptoms only. Symptom treatment is treating the result of your ailment and not the cause. Weak stomach nerves—the cause of indigestion, stomach weakness, always. And the heart and kidneys as well have their controlling or inside nerves. Wakeen these nerves, and you inevitably have weak vital organs. Here is where Dr. Shoop's restorative has made its name. No other restorative ever claims to treat the "inside nerves." Also for bloating, biliousness, bad breath or complexion, use Dr. Shoop's Restorative. Write me for free sample and free book. Dr. Shoop, Roset, Wis. The Restorative is sold by all dealers.

BIG JULY SALE

Just five business days remain in which we must close out the surplus stocks of all kinds. We don't want a dollars worth of dry goods that low prices will clear out before the 1st of August, our inventory day. All "odds" and "ends" no matter what they are have been priced low to help along the rush. Smallwares have had a big week's business in little needs for the holiday time and we are going to let the special prices remain on all lines until the end of July.

THERE'S GOOD BUYING AMONG THE REMNANTS ARE YOU GOING AWAY ON HOLIDAYS?

Every department has more or less remnants of desirable qualities that have been low-priced for quick clearance more than for the amount of money they bring in return. A few yards of this and a few of some other line all put together makes a large amount. Now you can always use a few yards of almost any line and it will pay to spend some time in the various sections going through the remnant piles.

If so do not forget that we have many things that will greatly add to the pleasures of your outing. For instance those Japanese wicker Telescopes and Suit Cases carry an immense amount of luggage and are very light as well. Then we have an immense range of little nick nacks for holiday wear that will be a great comfort to the wearer during the very warm weather. Come and have a look through anyway.

We close at 5 o'clock daily, except Saturdays, during July and August.

OBITUARY.

HIS DAY OF REST.

He never had time to rest and he never had time to play; When a man should be at his best, he was old and wrinkled and gray; He never had time to care how others are getting along; He never had time to share the joy of the singer's song. He labored early and late, rugged, pushing ahead; Pleasure, he thought, could wait; he would seek it some day, he said. Dead to the cries of those who struggled in vain below; He heaped new woes on their woes, permitting his greed to grow. He never had time to pause for the purpose of giving praise. He braved no public applause nor hunted for peaceful ways; He never had time to waste of the song that the lover sings; He never had time to taste the sweetness that kindness brings. He hurried early and late, roughly, pushing ahead; Pleasure, he thought, could wait; he would seek it some day, he said; Old and wrinkled and gray when a man should be at his best, He died on the dismal day when he meant to begin his rest. —S. E. Kiser, in Chicago Record-Herald.

"Yes," said the architect, "I once had an independent fortune, but I lost it all." "Ah," exclaimed the shrewd man. "I suppose you built a house for yourself."

Lindsay Young Lady Wins Trip.

Miss Florence Stephenson, of the Labor Temple, Toronto, and formerly of Lindsay, was very successful in the Toronto World's contest for a trip to London. She scored 1,238, 372 ballots. Miss Stephenson has resided in Toronto for three years, and holds a position in the Labor Temple. She is queen of Trades unions in the city and received excellent support from the firm and street railway men.

Mars Close to Earth

On Saturday night last the planet Mars, the very bright star which is visible in the southern sky every evening was nearer to the earth than it has been for 15 years, and nearer than it will again until about the year 1922. Mars was on Saturday about 38,000,000 miles from our globe. Some astronomers who spent the night observing it through their telescopes, were able to discern a faint dark band across a portion of the southern hemisphere of the planet. Magnifying the disk of the planet about two hundred times, it looked to an observer like a ruddy moon in the sky. A number of the beautiful double stars were also observed, and the planet Saturn, whose rings, turned edgewise to the earth, were visible, a circumstance which will not occur after this year until 1920.

MERRY WEDDING BELLS.

Workman—Miller.

A very quiet wedding was solemnized at the Baptist church at 5.30 o'clock last Tuesday, when Miss Maud M. Miller, daughter of Mr. James Miller, was united in marriage to Mr. J. G. Workman, B.A., of Wingham. The ceremony was performed by Rev. L. S. Hugheson, of Wingham.

Railway Notes.

The Crow's Nest Pass Coal Co. has been authorized by supplementary letters patent to increase its capital stock from \$3,500,000 to \$4,000,000. —Construction work on the new section of the C. P. R. being built between Proton on the Owen Sound section, through Durham and Hanover to Walkerton, is being rapidly pushed. The branch is 38 miles in length. Eight per cent of the grading is done, and the laying of the track will soon commence.

MILK AND MORTALITY.

In view of the fact that Lindsay Board of Health some time ago asked the Council to co-operate with them in having Lindsay's milk supply tested and safeguarded, the following from the Montreal Daily Witness will be of interest:

The Health Department lamented that all its efforts have not resulted in a stay of infant mortality. This is chiefly attributed to bad milk. There has been unusual diligence in bringing before the Recorder the vendors of milk not up to the standard. But, so far as appears, the complaint usually made is as to the absence of a due amount of butter fat in the milk. This is easily determined by the lactometer. But it may be all ways an evidence either of the unwholesomeness of the milk, or the dishonesty of the dealer. In very hot weather cows give more watery milk than at other times. It seems to be nature's way, and is precisely a kind provision for thirsty calves. The danger that the milk is not such as the lactometer will expose. They are the results of dirty stables, dirty stables, too long exposure, or some other carelessness. Not till we have checked the distribution of milk which has entered on a stage of putrefaction shall we do anything practical to reduce the mortality that prevails. Even then, the work will be only begun. Milk that is distributed from shops may be perfectly pure when it enters the shops. It is often poisoned there by the vessels it is put in or by the presence of foul atmosphere, and it is not, it is poisoned by the jug sent to it. Again, let some of the purest milk reach the house, and ten minutes after it finds its way into some of the houses it will be polluted by the horrible atmosphere to which it will be exposed. (All milk, especially dry milk, should be in closed bottles. The movement in favor of pasteurizing all milk is said to be gaining ground in such states as New York, Michigan and Massachusetts. In New York the people are officially advised not to use raw milk under any circumstances, but it is not obtained from one of the many pasteurizing stations to bring it just to the boil before using it, this process being supposed to destroy any germs of tuberculosis. Other authorities, again, say that pasteurization robs the milk of certain essential qualities, and that babies will pine upon it. Another supposed reform is the discarding of glass bottles, which may not be perfectly clean, in favor of the paper bottles which only use once. After all, there is no sanitation for the people except instruction for them. We have people who, partly through unconquerable poverty, but generally through thoughtless indifference, live in conditions through which it is a miracle for any infant to survive.

COMMUNICATIONS

A RELIC OF THE PAST.

(To the Editor of The Post.)
Dear Sir,—After reading the article entitled "The old-fashioned bell" in your issue of July 12th, under the title of "The Church," we deem it a privilege, as well as our undoubted duty, to offer to the world of God, which is entirely based upon justice and love.

Who said, "The wages of sin is death," Rom. 6:23, that "The soul that sinneth, it shall die," Eccl. 10:18, "For in death there is no remembrance of this in the grave, who shall give thee thanks," P. 6:15, did not say, as Elder Morrison said, "You shall be forever dying in hell torments, and yet never die." Christ was manifest to destroy the works of the devil, not to perpetuate them. I John, 3:8, and "When that work is complete, the wicked shall be as chaff," Mal 4:13—not in a place of torment where they unceasingly become more conscious of their sufferings throughout the countless ages of eternity, but rather, as God's word clearly states, "For the living know that they shall die, but the dead know not anything, neither have they any more a reward, for the memory of them is forgotten. Also their love and their envy is now perished; neither have they any more a portion forever in the thing that is done under the sun," Eccl. 9:5-6.

That very erroneous and God dishonouring doctrine, which is the church during the dark ages, at which time the correct meaning of the Hebrew word, "Sheol," and the Greek word "Hades," was ignored. It was about this same time that the false doctrine of the immortality of the soul and its haunting, and never, not God, found it necessary to have some place to store the supposed lost dead, yet more alive than ever, souls. They certainly overlook the plain scripture teaching that after our first parents sinned in the garden of Eden, "the way to the tree of life was guarded, and they were left in a dying condition," Gen. 3:24 in order that, in God's good time, "all that died in Adam might be brought back to justification of life, through Christ," Rom. 5:8, I Cor. 15:22. "The creature itself also shall be delivered from the bondage of corruption into the glorious liberty of the children of God," Rom. 8:21.

The meaning of the Hebrew word "Sheol" in the Old Testament, and the Greek word "Hades" in the New, is the same, and should be translated "the grave," "a pit," denoting the abode or world of the dead, and means literally that which is in darkness, hidden, invisible or obscure. (Thanking you for your valuable space, I am, faithfully yours,
BIBLE STUDENT.

MANITOBA AND ONTARIO WHEAT

Blended Flour is Daily Growing in Popularity in Canada.

A few years ago, before wheat-growing in the Great West had reached anything like its present proportions, Ontario farmers carried their own wheat to the nearest mill, and during the grinding took the time to return contentedly with feed or flour for home use. If at that time some soothsayer had predicted that in some sections of the province wheat growing would be abandoned on account of Western competition, and that farmers would refuse to accept flour made from their own wheat when Manitoba flour was available, they would have smiled pityingly on the poor deluded peasant.

But this decline in the market is exactly what has happened to the Ontario farmer. Millers are now able to run only eight or ten hours a day, with the result that feed costs are doubled, and it did in the days before Western competition came out into the market. It is safe to assert that during the last twenty years farmers of Ontario have lost millions through the decline in the demand for Ontario flour in this province.

While here in Ontario, Western flour has gained an enviable ascendancy, enterprising Ontario millers have been able to compete successfully with Western flour in the Maritime Provinces, where Ontario blended flour has captured the market. The Western wheat, added to the finely flavored, nourishing Ontario wheat to bring up the percentage of gluten to the proper strength, and now, even in Ontario, the most popular loaf sold by the largest flour of bakers is made of Ontario blended flour, and the public have been quick to respond wherever the new brand is put upon the market, as it is now shipped daily to a number of towns throughout Ontario.

What has won the unprejudiced approval of the Eastern Provinces is due to the well worth the attention of the Ontario farmer, who, if he is to be best served by doing all in their power to encourage the sale of Ontario wheat. As the new flour finds their way into general use throughout the homes of Ontario, the wheat market will improve, and Ontario farmers will receive a fair and equitable share of a more reasonable figure. Increased demand for Ontario blended flour will doubtless have a great deal to do in evening up the difference in prices between Ontario and Manitoba wheat.

Too Thin.

(Cardiff Times).
A lot of poor children were at a farm. The farmer gave them some milk to drink, the product of a prize cow.
"How do you like it?" he asked when they had finished.
"Gee, it's fine!" said one little fellow, who added, after a thoughtful pause, "I wish our milkman kept a cow."

Ferrie, B. C., has over 1,000 coke ovens.

Fifteen thousand miners are employed in the boundary country of British Columbia alone.

The Crow's Nest coals are estimated to hold enough coal to last for 5,000 years if mined at the rate of 4 million tons a year.

Mineral bounties paid 1906, pig iron and steel ingots, 2 millions; lead, \$90,197; oil, \$291,137.

30 millions have been paid all told in iron and steel bounties. They will be continued until 1917.

Canada has 16 blast furnaces and 18 rolling mills.

Canada's pig iron production, 1906, 541,957 tons.

Canada's steel ingot output, 1905-6, 569,237 tons.

Canada's silver lode mine produced 3 1/4 millions' worth, 1868-1894.

Only one-tenth of Canada's mineral regions are yet explored.

Canada produced 10 millions' worth of copper in 1906.

Canada supplies 85 per cent of the world's total product of corundum.

Canada's world's production, 1906, 1904, reached 347 millions, and 97 millions of silver.

Over 200 Cobalt companies were organized up to Jan. 1st, 1907, capitalized at 250 millions.

About 20 of the 200 are, Jan. 1, 1907, shipping companies.

Canada's silver output, Cobalt, 1906, 5 1/2 million ounces.

The Cobalt silver ore shipped to the refiners has averaged over \$800 a ton in value.

MERRY WEDDING BELLS.

Wilson—Carl.

"Lakeview Farm," Norland, the home of Mr. and Mrs. Levi Carl, was the scene of a pretty wedding on Thursday, July 4th, when their youngest daughter, Nellie Louise, was united in marriage to T. F. Wilson, of Grand View, Man.

The impressive ceremony of the Church of England was fully performed by Rev. Cummer, of Kimour, in the presence of about sixty guests. Promptly at 3 o'clock, to the strains of Mozart's wedding march, rendered by Mrs. N. Carl, the bride entered the parlor leaning on the arm of her father, and preceded by her niece, little Dollie Windham, who carried the bride's train, and carried the wedding ring in a basket of sweet peas.

The bride was gowned in creole tulle, trimmed with silver lace, chiffon, and wide ribbon sash, and wore the customary veil and flowers. Her only ornament was an amethyst bracelet, the gift of the groom. The flower girl looked sweet in a white silk and lace dress.

The house was tastefully decorated for the occasion, the ceremony being performed in a bower of white flowers and garlands, and the bride and groom were seated on a dais. After the usual congratulations a bountiful repast was partaken of on the lawn, followed by the customary toasting.

The varied and beautiful assortment of presents among them is noteworthy. The bride's gift to the groom was a beautiful ring, and the groom's gift to the bride was a beautiful ring. The bride's gift to the groom was a beautiful ring, and the groom's gift to the bride was a beautiful ring.

The bride's going away gown was a jumper suit of brown silk, with cream all-over lace waist, and hat, shoes, gloves and hose to match. Mr. and Mrs. Wilson expect to journey westward to their new home in the near future, but are spending their honeymoon visiting old friends.

her at supper, he absorbed her conversation, and still more annoying, she willingly consented. Statham in high dudgeon had to listen to the polite small talk of his English neighbor, conscious all the while that at his elbow the Vicomte was chattering away to "the princess" in the gayest French. And after supper he along with the others was driven off to play cards while the pair sat in the other room alone and babbled ceaselessly in that infernal foreign tongue.

"The Vicomte," Onslow said coolly, "has made another conquest."

"Is it true, then, that he is a fine swordsman as well as a rake?"

"Quite true. His victims among the ladies are as numerous as his victims of the sword. It is almost as great an honor for a man to be run through by Andre de Nerac as it is for a woman to succumb to his wooing. Do not forget he is a Chevalier de la Garde and a Croix de St. Louis."

Statham grunted.
 "It is not fair," Onslow pursued, throwing down the dice box. "You are not enjoying yourself," he rose and went into the other room. "Gentlemen," he said, on his return, "I have persuaded our princess to add to our pleasure by dancing. In ten minutes she will be at your service."

The cards were instantly abandoned and while they waited the Vicomte strolled in and walked up to Onslow. "That is a strange lady," he remarked, "a very strange lady. She knows Paris and all my friends as well as I do; yet I have never so much as seen her there."

"Yes," Onslow answered, looking him all over, "she is very strange."

"And the English of Madame is, I think, not the English of the quality?" Onslow nodded. "That, too, is curious, for her French is our French, the French of the noblesse. She says her father was an English gentleman, and her mother a Paris flower girl, which is still more curious, for the flower girls of Paris do not talk as we talk on the staircase Des Ambassadeurs at Versailles, or as my mother and the women of my race talk. Mon Dieu!" he broke off suddenly, for the princess had tripped into the room, turning it by the magic of her saucy costume into a flower booth in the market of Paris, and without ado she began to sing a gay chansonnette, waving gently to and fro her basket of flowers:

"Quand on a su toucher
 Le coeur d'une bergere
 On peut bien s'assurer
 Du plaisir de lui faire.
 Et ton, zom, zom,
 Lisette, ma Lisette;
 Et ton, zom, zom,
 Lisette, ma Lisette."

And the dance into which without a word of warning she broke was something to stir the blood of both English and French by its invincible mixture of coquetry, lithe grace, and audacious abandon, its swift transitions from a mocking staidness and a tempting reserve to its intoxicating, almost fishy revelations of uncontrolled passion; and all the while that heartless air song twined itself into every pirouette, every pose, and was translated into the wickedest provocation by the twinkling flutter of her short skirt and the flashes of the jeweled buckles in her saucy shoes. To Statham as to Andre de Nerac the princess had vanished, and all that remained was a witch in woman's form, a witch with black hair crowned with crimson roses and a cream-tinted skin gleaming white against those roses at her breast.

"To the victor," she cried, picking a nosegay from her basket, and kissing it, "to the victor of the spring," and Andre and Statham found themselves hit in the face by the flowers. The nation rang with "Bravos" and "Huzzas" until every one woke to the discovery that the dancer had disappeared.

When she returned she was once more in her splendid robes and frigidly cynical as before.

"I am tired, gentlemen," she said; "I must beg you to say good-night." She held out her hand to the Vicomte. "Au revoir!" she said, permitting her eyes to study his olive-tinted cheeks and the homage of his gaze.

"Your prisoner, Madame," he said, "your prisoner for always!"

"Or I yours?" she flashed back, swiftly.

"The one-fourth that remains," she said, holding it up, and offering it to him, "I give to you, my cur and lackey."

She watched him take it, unfold it, read it. His hand shook, the paper dropped from his fingers, and while he passed his handkerchief over his forehead she put the fragment in the fire.

They faced each other in dead silence. She was perfectly calm, but his mouth twitched and his eyes gleamed with an unblinking fire and with fear.

"Are you mad?" he asked at last, "that you confess such a thing to me?"

"Better to you," she retorted, "than to that infernal libertine, the Vicomte de Nerac, or that infernal simpleton, Captain Statham, eh? No, mon ami, my reason is this: Now, you, George Onslow, who profess to love me, who would make me your slave, are in my power, and the proof is that I order you to leave this room at once."

"I shall return,"

"Then you certainly will be mad,"

"Ah! He sprang forward. "Can you not believe that I love you more than ever?"

"Pshaw!"

The door had slammed. Onslow was alone.

For a minute he stood, clenching his hands, frustrated passion glowing in his eyes. "Ah!" he exclaimed in a cry of pent-up anguish, and then the door slammed again as he strode out.

CHAPTER III.

Two months later Andre, Vicomte de Nerac, was riding in the woods around Versailles, and, poverty-stricken, debt-laden noble as he might be, his heart was gay, for he was not a Capitaine-Lieutenant in the Chevaliers de la Garde, and a Croix de St. Louis; was he not presently about to fight again for honor and France, and was he not once more a free man and in his native land with Paris at his back? The leafless trees were just beginning to bud, though what was still here, but the breath of spring was in the air and the gladness of summer shone in the March sun. Yes, the world bid fair to be kind and good, and Andre's heart beat responsive to its call. Love and honor and France were his, and what more could a noble wish?

He let the reins drop and breathed with contentment the bracing breeze, while his eyes roved to and fro, and his heart was waiting for some one who his anxious gaze up the road showed, might be expected to come from that quarter—the quarter of the Palace of Versailles.

Along the path walked a peasant girl driving a splendid spotted cow. The bell at its fat throat tinkled merrily, the sun gleamed on its glossy spotted hide. The girl dropped a smile to the noble gentleman sitting there on his fine horse and himself so handsome a cavalier, and Andre nodded a smiling reply. She was not pretty, this peasant wench, with her shock of tumbled flaxen hair tossed over her smutty face, and her bodice and short skirt were soiled and tattered, but Andre, to whom all young women were interesting, in the sheer quietude of his heart tossed her a smile, and smiled again his captivating smile.

"May Monsieur le Duc be happy in his love!" the wench said, as she bit the coin before she placed it in her bodice, and Andre remarked with approval the whiteness of her teeth. If her face was not pretty her body was both trim and sturdy, and she walked with the easy swing of perfect health.

He had kissed her smutty face then, just because the world was so fair and he was free.

"You have a magnificent cow, my dear," he remarked.

"But certainly," she answered and her white teeth sparkled through her happy laugh, "better a fat cow for a wench than a lean husband. She carries me, does my spotted cow, which my husband would do," and she scanned him to the glossy back and laughed again, throwing back her shock of flaxen hair. Andre observed, heedful by long experience of such trifles, that not even her clumsy sabots could spoil the dainty neatness of her feet.

"And what may your name be?" he demanded.

"Yvonne, Monsieur le Duc; they call me Yvonne of the Spotted Cow, and some," she dipped into a chuckle, "Yvonne of the Spotted Ankles. I am not pretty, moi, but that matters not. My cow or my ankles will get me a husband some day, and till then, like Monsieur le Duc, I keep a gay heart."

Whereupon she drove her heels into the cow's flanks and the two slowly passed out of sight, though the merry tinkling of the bell continued to tinkle.

"By God!" he broke out, "I wish I knew whether you are more adorable as you are now on that sofa, or as you were dancing in that flower girl's costume."

"Most men in London prefer the short petticoats," she remarked, moving the diamond buckle on her shoe into the light, "but in Paris they have better taste, for only a real woman can make herself adorable in this,"—she gave a little kick to indicate the long, full robe. "Think about it, mon ami, and let me know to-morrow which you really like the better."

"And to-night?"

She stooped forward to adjust her slipper. "To-night," she repeated, "I must decide whether I dislike you more as the lover of this afternoon, the man of pleasure of this evening, or the spy of to-morrow."

He put a strong hand on her shoulder, for an instant she had sprung to her feet.

"No!" she cried, imperiously, "I have had enough for one day of men who would storm a citadel by insolence. Leave me!"

"You are expecting some one?"

"And if I am?"

"Don't torture me. Tell me who it is."

"Perhaps you will have to wait till dawn or longer before you see him."

"I will kill him, that is all,—kill him when he leaves this house."

"I have no objection to that," was the smiling answer. "One rake less in the world is a blessing for all women, honest or—she fingered her rose caressingly.

"Is it one of those who were here to-night?" he demanded. "Perhaps that infernal libertine of a Vicomte de Nerac?"

"Eray, what have my secrets to do with you?" She faced him scornfully.

"This," he came close to her. "You flatter yourself, ma mignonne, that you guard your secrets very well. So you do from all men but me. But I take leave to tell you that three-fourths of those secrets are already mine." She sniffed at the rose in the most provoking way.

"Yes, I have discovered three-fourths, and—"

"The one-fourth that remains you will never discover until I choose."

"Do not be too sure."

"And then—?"

"You, ma mignonne, you the guest of many men, will be in my power, and you will be glad to do what I wish. Oh, I will not be your cur, your lackey, then, but you will—"

She dropped him a curtsy, and walked away to an escritoire, from a drawer in which she took out a piece of paper.

"The one-fourth that remains," she said, holding it up, and offering it to him, "I give to you, my cur and lackey."

She watched him take it, unfold it, read it. His hand shook, the paper dropped from his fingers, and while he passed his handkerchief over his forehead she put the fragment in the fire.

They faced each other in dead silence. She was perfectly calm, but his mouth twitched and his eyes gleamed with an unblinking fire and with fear.

"Are you mad?" he asked at last, "that you confess such a thing to me?"

through the leaves long after she had disappeared.

Andre waited patiently. An hour went by, still he waited. Twice he trotted up the road and peered this way and that, but there was not a soul to be seen, and with a muttered exclamation of disgust he was about to spur away when the notes of a hunting horn caused him to gather up the reins sharply. And now eager expectation was written on every line of his face.

A young lady in a beautiful riding dress of hunting green, and attended by a single lackey on horseback, came galloping down the forest track. At sight of him by the roadside she pulled up her horse in great astonishment.

"Andre—you are back?" she said, and the color flooded into her cheeks.

"Thank God, yes."

"And well?"

"Perfectly. My wounds are healed. I am a prisoner no longer, and in a fortnight I return to the Low Countries to seek revenge from my enemies, and you, Denise, the English."

"The English," she repeated, then dropped modestly. You will find revenge, little Denise," she said, "the Maison du Roi are soldiers worthy of the noblesse and of course, but do you not come to Versailles first?"

"No, my company is not on duty this month at the Palace and in April we shall all be with His Majesty in Flanders."

"Yes," she answered, "I forgot."

She began to stroke her horse's neck in some embarrassment. Andre gazed at her with the hungry eyes of a lover, and indeed this girl was worthy of a soldier's homage. Neither a brunette nor a blonde, for her eyes were grey and their lashes almost black, though her hair was fair and the tint of her cheeks in the morning air delicate as the tint of a tender rose. Beautiful, yes! but something much more than beautiful. A great noble this lady surely, one who saw in kings and queens no more than an equal, and in palaces the only fit home of a noble, nobly born, one to whom centuries of command had bequeathed a tone and quality which men and women can inherit but not acquire.

"And when I return," Andre said at last, "shall I find at Versailles what I desire more than revenge?"

"What is that?" she asked innocently.

"Can you not guess? Have you forgotten? Ah, Denise, twelve months ago you promised—"

"No, no," she broke in, eagerly, "I said I would reflect."

"There is only one thing that a poor village and a soldier of France can desire—your heart, Denise; your love, Denise; the heart and the love of the most beautiful and loyal woman in France, the heart of the Marquise de Beau Sejour. And Andre de Nerac loves the Marquise as he loves France. Can he say more?"

"That is not," she said, averting her eyes, "and the Marquise de Beau Sejour thanks the Vicomte de Nerac for his words and his homage—to France."

"I do not desire thanks—I—"

"Then go and do your duty as a noble and a soldier, and when peace and victory are ours perhaps I—"

"I cannot wait till then. Have pity, Denise, have pity on the man who was your playmate, who loved you then and now, who loves you now. Remember, remember, I beg you, that over there in England, the one thought that consoled my prisoner's lot was the hope that when I returned to you—you would—"

"But, Andre, I cannot give you an answer, here, now—"

"Give me time then before I return to the war, that I may know whether I am to live in hope, or to die sword in hand, in despair."

"There is more than one marquise in the world," she said, quietly.

"Not for me."

Denise looked at him, and he dropped his eyes, for he understood the calm reproach.

"Very well," she said, with decision. "I go to my home to-morrow. You shall have my answer in four days at the Chateau de Beau Sejour if you care enough to come and hear it."

"If," he broke out, "Ah, Denise—I" he stretched out a passionate hand.

"Hush! There is some one coming."

A young man was galloping towards them, a boy he seemed, saucy, insolent, handsome, fair, with great blue eyes sparkling with the gayest, wickedest, most careless joy of living. Removing his plumed hat with an airy sweep he kissed the lady's fingers, bowed low in the saddle, and looked into her face.

"Marquise," were his words, "the comrade and His Majesty await you." His dark devil eyes roved on to Andre's face with a studied insolence, but Andre gave him back the look, and more.

Denise made haste to present the young man, "Monsieur le Chevalier de St. Amant, secretary of the King's Cabinet," she said and her eyes pleaded for politeness from both.

"Monsieur le Vicomte goes to the war," the Chevalier asked, carelessly.

"As all true subjects of His Majesty ought to do," Andre retorted.

"Except," said the Chevalier, bowing to Denise, "those who find more pleasant pastime here at home."

"It is curious," Andre remarked, as if he had not heard, "that I who have known Versailles for ten years learn to-day for the first time of St. Amant. Where is St. Amant?"

"Ah," answered the Chevalier, laughing, "in this life, Vicomte, we are always learning what is disagreeable. The dull philosophers of whom we hear so much in Paris at present say soldiers learn more than others—or ought to? Perhaps you differ from them?"

"I do not. No. For when it is necessary the soldiers teach what they have learned to the young men and the schoolboys, which is very good for the schoolboys. But perhaps you, sir, do not like lessons?"

"No, oh, not my only regret at present is that I cannot stay now and have one at once. But Madame de Beau Sejour will take your place and I can learn, as we ride together, something that she alone can teach. Monsieur le Vicomte, I have the honor to wish you good-morning, and good-by." He raised his plumed hat and galloped with the Denise.

The flush in Andre's cheek did not die out for some minutes. "Upstart! Puppy!" he continued to mutter while his eyes glittered and his fingers twitched involuntarily on the handle of his sword. But his wrath and his scorn were suddenly dispelled in the most unexpected and agreeable way. A crisp tinkle of bells, the crack of a whip, and down the road came driving an ethereal phaeton, azure blue in color, and in the seat an enchantress most bewitchingly clad in rose pink.

She too appeared to be waiting for somebody or something, for she pulled up ten yards off and gazed in the direction of the hunting horns which could be heard distinctly in the depths of the wood. To Andre she was most annoyingly indifferent, but the more he looked at her and marked her exquisite dress, her wonderful complexion, her seductive figure, and her entrancing equipage, the keener was his chagrin. Who was this airy sylph of the royal forest, this divinity floating in the rose of the queen of flowers through a leafless world as Venus might have floated on the sun-kissed foam at dawn? Gods! What a taste in dress, what a bust, and what amorous, saucy charm in her eye!

Andre fell back behind the trees and watched; nor did he have to wait long. In five minutes the royal hunting train swept by. The rose-pink lady curtsied to her sovereign, a cry of distress. Her hat caught by a sudden gust—surely it was very loosely set on that dainty head—flew off and fell almost under the hoofs of the horse of the King of France. His Majesty looked up, coldly, caught her appealing eye, looked down at the hat, and galloped on as if he had seen neither the hat nor its owner. The royal party behaved exactly as did their master, and the rose-pink goddess was left with disgust and indignation in her face and a tear trickling down her cheek.

Andre moved his horse forward, whereupon she threw a glance over her shoulder almost comic in its pathos and its amusement, as if she did not know whether to laugh or to cry; a glance which convicted his susceptible heart that she had been perfectly well aware of his presence all the while and now invited him to take what she had always intended he should have. In a second he was off his horse and was handing her the hat. Her bow and her smile were more than a reward, for if the rose-pink divinity was alluring seen from behind, she was positively bewitching at a distance of four feet in front. What wonderful eyes! They spoke at once of everything that could stir a soldier's soul, and her blush was the blush of Aurora.

With the prettiest hesitation she inquired his name, which he only gave on condition that she should also tell hers. But this she laughingly refused. "My name is nothing," she remarked, "for I am nobody. If you knew it you would despise yourself for having been polite to a bourgeoisie."

"Impossible!" Andre cried.

"But it is so," she persisted, gravely, a challenge stealing from under her demure eyelashes.

"I shall find out," Andre said, "I shall not rest till I find out."

"Then inquire," she retorted gaily, "Rue Croix des Pellets Champs—perhaps you will succeed," and without more ado she flashed him a look of defiant modesty, whipped up her ponies, and the azure phaeton vanished as rapidly as it had appeared.

Andre stroked his chin meditatively. What did it mean? Who was the unknown and why did she come to the woods in that enchanting guise? A bourgeoisie! Pah! it would be well if all the women of the bourgeoisie and some of the noblesse possessed but one of the secrets of her irresistible womanhood. But find out he must, and Andre, hot on this new quest, began to trot away. He was in a rare humor now, for he had noticed with unbounded satisfaction that, while Denise had been of the royal party, that boyish Chevalier had not.

But he had not ridden far when he was amazed to discover by the roadside Yvonne of the Spotted Ankles weeping as if her heart would break.

"What is the matter?" he demanded.

"Monsieur—ah! it is the good Monsieur—she fell to crying again. "They have stolen my spotted cow," she sobbed, "robbers have stolen my spotted cow."

"But yes, three great robbers, and they have beaten me and taken Monsieur's piece too. My cow, my spotted cow!"

"See, Yvonne," he said soothingly, "I am no monsieur, I am only a poor vicomte, but you shall have another cow, a spotted cow, too."

But she would not believe it, whereupon he took all the money in his purse, four gold pieces and three silver ones, and thrust them into her hand.

She stared at the money incredulously.

"There, girl," he urged, for a woman's distress, even though she were only a peasant, hurt him, "be happy and buy a fat and spotted cow."

She knelt to kiss his hand. "Monsieur," she sobbed, "is kind to a poor wench. Surely the good God has sent him to me," and she poured her hot tears of gratitude on the ruffles of his sleeve.

"I am happy again," she murmured. "Yes, I will buy a cow and be happy," and she began to sing, flinging the coarse matted hair out of her eyes.

Andre watched her contentedly; it was pleasant to see her joy.

"Monsieur is not happy," she surprised him by saying, and she turned away.

What Ails You?

Do you feel weak, tired, despondent, have frequent headaches, coated tongue, bitter or bad taste in morning, "heartburn," belching of gas, acid risings in throat after eating, stomach gnaw or burn, foul breath, dizzy spells, poor or variable appetite, nausea at times and kindred symptoms?

If you have any considerable number of the above symptoms you are suffering from biliousness, torpid liver with indigestion. Dr. Pierce's Golden Medical Discovery is made up of the most valuable medicinal principles known to medical science for the permanent cure of such abnormal conditions. It is a most efficient liver invigorator, stomach tonic, bowel regulator and nerve strengthener.

The "Golden Medical Discovery" is not a patent medicine or secret nostrum, a full list of its ingredients being printed on its bottle-wrapper and attested under oath. A glance at its formula will show that it contains no alcohol, or harmful habit-forming drugs. It is a fluid extract made with pure, triple-refined glycerine, of proper strength, from the roots of the following native American forest plants, viz., Golden Seal root, Stone root, Black Cherry bark, Queen's root, Bloodroot, and Mandrake root.

The following leading medical authorities, among a host of others, attest the foregoing roots for the cure of such ailments as the above symptoms indicate: Prof. E. Bartholow, M. D., of Johns Hopkins Hospital; Prof. J. C. Wood, M. D., of Univ. of Pa.; Prof. Edwin M. Hale, M. D., of Hahnemann Med. College, Chicago; Prof. John Kim, M. D., Author of American Dispensary; Prof. J. C. Mendenhall, M. D., Author of Specific Medicine; Prof. Charles Johnson, M. D., Lect. Univ. of N. Y.; Prof. Emory Ellingwood, M. D., Author of Materia Medica and Prof. Bennett Medical College, Chicago. Send name and address on Postal Card to Dr. R. V. Pierce, Buffalo, N. Y., and receive free booklet giving extracts from writings of all the above medical authorities and many others endorsing, in the strongest possible terms, each and every ingredient of which "Golden Medical Discovery" is composed.

Dr. Pierce's Pleasant Pellets regulate and invigorate stomach, liver and bowels. They may be used in conjunction with "Golden Medical Discovery" if bowels are much constipated. They're tiny and sugar-coated.

LINDSAY I.O.O.F. DECORATED GRAVES.

Brethren of Lodge No. 100 Marched in Procession to the Silent City of the Dead Last Thursday, and Placed Emblems and Bouquets on the Last Resting Places of Deceased Members.

Evening Post of July 19.
Riverside cemetery, in the full beauty of its summer foliage, was the scene of the Independent Order of Oddfellows decoration ceremonies last evening. Headed by the Sylvester Band, over seventy-five members of the local lodge marched to the cemetery at about 5:30 o'clock in the afternoon. Crowds of people thronged the sidewalks all the way out, and hundreds were awaiting their arrival at the cemetery. The Scogog was alive with yachts and small boats, carrying parties with flowers.

When the cemetery was reached the evening was well advanced, and the heat was less intense. The beautiful trees with which the burial plot abounds cast delightful and cool shadows on the green carpet of grass. Around the little knoll on the eastern side of the ground the onlookers formed. The hymn, "Shall we meet beyond the river," was sung with fervor. The chaplain, Rev. Jas.

Wellace, then led in prayer, and the decoration of the graves of departed brethren commenced.

On each of the 24 graves was placed the "Three Link" emblem of the lodge. The members all carried bouquets of flowers, and with these the graves of the following departed members of the orders were beautified:

GEORGE LYLE.—Died June 9, 1906. Aged 52 years.
P. S. MARTIN.—Died November 5, 1889. Aged 51.
THOS. NESBITT, Jr.—Died November 25, 1875. Aged 28.
THOMAS S. WILLIAMS.—Died May 13, 1892. Aged 49.

R. N. JOHNSON.—Died September 22, 1894. Aged 36.
Rev. J. WELDON.—Died April 4th, 1885. Aged 49.
W. H. DRUMMOND.—Died Jan. 9th, 1897. Aged 28.
W. A. HELM.—Died December 17, 1897. Aged 24.
CHARLES S. WHITE.—Died Nov. 5, 1897. Aged 43.

JOHN GEORGE WHITE.—Died April 18th 1885. Aged 26.
E. M. WOOLHOUSE.—Died Aug 25, 1884. Aged 27.
JOHN W. BRADSHAW.—Died May 14, 1906. Aged 22.
W. A. WHITE.—Died Oct. 12, 1892. Aged 42.

McGIBBON.—Died April 23, 1903. Aged 43.
FRANK REEVES.—Died Feb. 13, 1907. Aged 39.
M. H. McLAUGHLIN.—Died Feb. 28, 1896. Aged 29.
W. G. WOODS.—Died March 17, 1901. Aged 50.

JOHN McLEAN.—Died Oct. 24, '06. Aged 60.
W. J. HAMILT.—Died January 16, 1905. Aged 40.
J. P. SUTHERLAND.—Died Feb. 3, 1885. Aged 30.
JOHN E. JOBBITT.—Died April 11, 1900. Aged 39.

JAMES WILLIAMSON.—Died June 26, 1896.
WILLIAM B. WILLIAMSON.—Died Dec. 14, 1900.
WILLIAM JACKSON.—Died April 4th, 1891. Aged 67.

The crowd witnessed the ceremonies with interest. Later an address was given by Bro. R. M. Noble Grand, and the hymn, "On the One," was sung. Prayer by the chaplain concluded one of the best and most successful decoration ceremonies ever conducted by the Oddfellows.

Many citizens took advantage of the opportunity to decorate graves of friends and relatives, and at the close the cemetery presented a truly lovely appearance.

Some business men closed their stores to allow their employees a chance to attend the decoration, but many more did not.

He Wished For No More.

Bacon.—They say the business of the bondholders of Venice is being invaded by women. How'd you like to be laddled by a woman?
Expert.—Excuse me I was paddled by my mother when I was a boy. That's all I want.

AS TOLD IN THE POETS' CORNER.

THE LOVE OF A BUTCHER BOY.

Dear heart, I'm in an awful stew
How I'll reveal my love for you.
I'm such a mutton-head, I fear—
I feel so sheepish when you're near.
I know it's only cow-ardice
That makes these lamb-on-tious
fears.
I dread a cut—let me explain.
A single roast would give me pain.
I should not like to get the hooks,
And dare not stir my hopes on looks.
I never sausage eyes as thine
If you would butcher hand in mine
And live a round me every day;
We'd seek some ham-let far away;
We'd meet life's frowns with love's
caresses
And cleaver road to happiness.

WANTED: A GIRL.

"Wanted — a girl, not a butterfly
guy.
Gentle and sweet in a womanly way,
No beautiful picture, languid and fair.
That always seems labelled, "Please
handle with care."
But one in whose heart is hidden
true worth,
And faithfully follows its mission on earth.
Hopeful and earnest, is helpful and giving.
Finds plenty to do in the life she is living.
Fulfilling its duties with sweet content
Whether adverse or pleasant, just as
they're sent.
In the garb of a queen or in homely
spun arrayed;
Whatever her station—is needed that
maiden."

A RAIN MOOD.

(By Wm. Bradley in McClure's.)
We prayed for a day of rain
In the sunny summer weather,
And for long hours spent together
In the heavy hush and gloom
Of a dusky silent room.
And the pattering of drops on the pane,
And a murmuring sigh in the
leaves
And the swish of rain in the eaves,
And a tremulous trouble and start
Of the wind in the great tree's
heart.

We prayed for a day of rain,
That the world might seem less
wide
That the severed us side by side
And the minutes might seem a
more long
Sung to the drowsy song
Of the pattering of drops on the pane
For the glory and glamor and green
Were a barrier set between
Our souls that strove to be one
In the glare of the blazing sun.

We prayed for a day of rain
And the exquisite infinite sense
Of a being more intense,
And the needlessness of speech
For the lips and hands of each
In the pattering of drops on the pane

USE DRAIN TILE.

I am only a hole in an humble
vocation.
Yet I greatly control your civilization.
I am very tenacious and hard as a
stone,
So lay me down, keeping me straight
in the ditch.
And while you are sleeping, I'll be
making you rich.
Every farmer of pride dearly loves
to provide
For the future — the son and the
daughter;
So give me the chance, and I'll
greatly enhance
Every acre I drain of its water.

And here's my great beauty — I'm
always on duty.
Out of reach of the "bulls and the
bears."
And when you're in your grave I'll
continue to slave
For your children—their children —
and theirs.

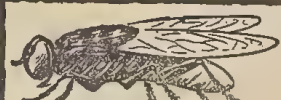

My habits are good—I require no
food!
(My joints are all made without mortar)
And I always abstain, when deep in
the drain,
From everything stronger than —
water.

If your land is too wet and you're
burdened with debt
And encumbrance begins to accrue,
Obey Nature's laws—by removing the
water.
Drain your farm—or it will drain
you.

'Tis foolish to plant yghers the grove
and the brant
Might paddle from March to Septem-
ber.

You might as well sow on a Novem-
ber snow
And expect seed to grow—in Decem-
ber.

Some farmers are failing, weeping
and wailing
And blame the good Lord without
reason!
When if they would stop sowing seed
in the slop
They might raise a good crop every
season.

Most farmers lament the money they've spent
For things only made to break;
But never as yet did a farmer regret
The money expended for tile.

THE COMING MAN.

A pair of vorpalusby legs,
'Encased in scarlet hose;
A pair of little stubby boots,
With rather doubtful toes;
A little kilt, a little coat—
Cut as a mother can—
And lo! before us stands in state
The future's "coming man."

His eyes perchance, will read the
stars,
And search the unknown ways;
Perchance the human heart and soul
Will open to their gaze;
Perchance their keen and glowing
senses
Will be a motion's light—
Those eyes that now are wistful bent
On some "big fellow's kite."

Ah, blessings on those little hands
Whose touch is yet human!
And blessings on those little feet,
Whose pace is yet so true!
And blessings on the little brain
(That has not learned to plan!)
Whether the future holds in store
God bless the "coming man."

HIS MOTHER.

A sudden image of a man.
He lurches down the street,
Unconscious of the scornful scan
Of all of those he may meet—
A wreck, an outcast, hopeless, lost,
A drifting hulk that seeks no
shore,
But follow-borne and limpest-towed
Will drift and drift forevermore.

And yet somewhere each more and
night

His name is whispered soft and low,
In prayers that rise to the light
That shines with an eternal glow;
His name is whispered as of old
By one to whom he still is dear—
His mother with her heart of gold,
Breathes forth a prayer God will
hear.

Though lost to her through all these
years,
He still remains her little boy
That ran to her with childish fears
Or brought to her such broken toy.
She has not given his mottled face
Nor heard his husky whining tone—
She breathes his name to that white
place
Where angels kneel about the
throne.

That mother heart is deep, so deep
That none of us may know how
long
Nor yet how surely it will keep,
The love it has all sweet and
strong;
Each morn and night she breathes
his name
In blessings we may think unheard
She does not know the ways of shame
Down which he looks with eyes all
blurred.

A sudden image of a man,
A wreck, an outcast—but can we
Sense aught of the eternal plan?
Know aught of this great mystery?
She breathes her prayers night and
dawn.

And which among us we would de-
stroy
Her fancies of the day ago.
Her blind faith in her little boy?

Clever Lindsay Student.

Mr. Edward Kinsley, son of Mr. E. J. Kinsley, Chief Train Despatcher for the G.T.R., town, is to be heartily congratulated on the success achieved, in his matriculation exam.

Only 17 years of age, he has been a student at Lindsay Separate School and Lindsay Collegiate, and was up to matriculate this midsummer hearing that the Grand Trunk System offered a four years scholarship to the student taking the highest number of marks in the matriculation exam, at McGill University, Montreal, young Kinsley boldly decided to try for the big prize, and secured the necessary authority for the transfer.

To-day his father received a letter from the Registrar of McGill, conveying the welcome news of his son's splendid success, he having secured the list of all individuals and captured the scholarship, entitling him to four years' free tuition at the University. This prize represents a cash value of \$800. We tender our hearty congratulations to the young man on this superb achievement.

MADISON WILLIAMS FOUNDRY

Many Large Contracts Taken—
Export Mill Machinery to U. S.

Evening Post of July 20.
The Madison Williams' shops are a busy centre of industry at present. The large staff are active, and the big machine shop has the appearance of a bee-hive. The water wheel season is now in full swing, and the foundry is making a brisk run on these producers of motive power. Five wheels were in process of manufacture yesterday, all of which are consigned to eastern points—principally the province of Quebec.

SAW MILL MACHINERY.
The great lumbering industries of Canada support hundreds of saw-mills, and the manufacturing of machinery for these mills is an important source of income for the Lindsay industry. An edger and a saw-mill outfit are at present on the floors of the foundry, to be shipped on Tuesday to the Hawdon Lumber Co., Ramdon, Quebec.

Not only does the firm supply Canadian markets, but a large order from Parker & Young, Barton, Vermont, has been accepted. The American firm has to pay a duty of 30 per cent. on the machinery. Other orders from Hawkesburg and elsewhere keep the employees busy and furnish work for a number of Lindsay hands of families.

President Williams is now in the West, having been called there to take a number of orders.

SYLVESTER GASOLINE THRESHER

A Machine Which Will Transform Harvesting Conditions Out West.

Evening Post of July 19.
Last night about midnight was the time chosen by the Sylvester Mfg. Co. for the testing and examining of a gasoline thresher, preparatory to shipping it to the West.

This machine was minutely described in the columns of The Post last fall. (The present machine, we understand, is a greatly improved type.) Last night it was run under its own power up Victoria-ave. to Colborne-st. and back again via Adglidge-st. The mechanism worked perfectly and the test without a hitch.

This morning the machine was loaded on a flat-car and shipped to the West.

WERE STRANDED IN TRENT CANAL.

Passenger Steamer Stuck at Lock No. 3 Owing to Broken Shaft.

Larrie, July 17.—Two hundred excursionists left here yesterday morning on board the Islay for the Trent Valley Canal. While passing through Lock Three the shaft broke. The steamer was tied up all night. Provisions were scarce, some going without food until the boat landed here at 11:30 to-day. The passengers slept on the decks, the floors, and tables food was bought from neighbouring farmers by Captain McFarlane, who did everything for the comfort of the crowd. On reaching Larrie he was cheered lustily by the returned passengers and several hundred people who were anxiously awaiting the arrival of the boat.

ANOTHER PRISONER ARRIVED

Geo. Eveleigh, Alleged Distributor of Counterfeit Bills, in Jail.

Evening Post of July 18.
The young Englishman, George Eveleigh, who, it is alleged, "shoved the queer" in Montreal, and who was there taken into custody, arrived in town this morning on the flyer from Belleville, in charge of Detective Rogers. He was immediately taken to jail, and will appear in court on Monday.

This morning Magistrate Moore remanded Miller, Gostlin and Logie until Monday. The proceedings on that day will take place in the Court House, in the afternoon at two o'clock.

There are only four corridors in Lindsay jail. Burke, Logie and Miller occupy three of them, while Bouyea, Wygan, Gostlin and Eveleigh occupy the fourth.

Detective Rogers exhibited a full roll of counterfeit Traders' 85 bills this morning. They were expressed to Dominion Police headquarters at Ottawa.

A Few Dots on Man.
(Chicago Trade Journal)

A man's life is full of crosses and temptations.

He comes into the world without his consent, and goes out against his will and the trip between the two is exceedingly rocky. The rule of mathematics is one of the important features of this trip.

If he is poor, he is a bad manager. If he is rich he is dishonest.

If he needs credit, he can't get it. If he is prosperous everyone wants to do him a favor.

If he's in politics it's for pie. If he's out of politics you can't place him, he's no good for his country.

If he doesn't give to charity he's getting cuss. If he does it is for show.

If he is actively religious, he is a hypocrite, if he takes no interest in religion he is a hardened sinner.

If he dies young there was a great future ahead of him, if he has lived to an old age he has missed his calling.

The road is rocky, but man loves to travel it.

STURGEON POINT JOTTINGS.

Happenings of Note at Lindsay's Popular Summer Resort.

A breeze in the afternoon drew out a number of dinghies and sailing craft.

Jack Ross and Redge Rennie, who are under canvas at Pleasant Point, are great fishermen. Before sunrise is their favorite time.

A bunch of newspaper men came down yesterday from Lindsay, where they had assembled for the preliminary hearing of the alleged counterfeiter.

Three boys—Messrs F. Jackson, L. Kay and B. Wilson—undergo a tramp to Fenelon Falls and back from the Point last evening. They accomplished the distance, but found it a long and dusty route.

A Noble Rivality.

(Toronto Star)

My boy, be a land owner, if it is only a piece of land as big as a horse blanket, own a piece of land.

The pleasure of having new potatoes before the man on the next lot is a triumph that only the pure and the good can feel.

A noble rivality! There is nothing man about it, nothing narrow. You talk about a race, talk about horse racing! But there is a sweeter and purer delight in the race between your fathers and his.

Enjoyed a Pleasant Holiday.

Mr. Andrew Jackson and Mrs. Jackson, who returned to town on Tuesday last, had a delightful trip. They went by boat to Montreal, thence to Valleyfield, Que., to visit their cousins, Mrs. Donald McBurn, and her sister, Mrs. (Senator) Young. From there they proceeded to Cornwall, where they had a talk with Rev. James Hastie, formerly of this town, also a pleasant visit with Mr. John Chisholm, barrister, an old Lindsay boy who has done well. On the way back they took the boat and went on to Newcastle, Newmarket on the lake, and other points. Both Mr. and Mrs. Jackson were greatly benefitted by the trip.

Were Three Dairy-men.

A man in a small western town bought a quart of milk, and on arrival home found it was adulterated with water. The next day he posted bills in different sections of the town reading: "I bought a quart of milk yesterday, which I found to be adulterated. If the scoundrel will bring me another quart I'll not denounce him."

The next day he found three quart cans on his doorstep. There were three dairy-men in town.

Back From the Old Land.

Messrs. Wm. White, M. O'Holloran and Edward Daly returned Saturday evening from their trip to the old land, where they visited every place of note, including Dublin Exhibition. While in Scotland, Mr. Daly became very ill, and the local medical men seemed to be unable to do anything for him. Very luckily, he decided to embark, and although he received every attention from the ship's doctor, he was a very sick man when he reached Lindsay last Saturday night. He is now at the Simpson under the care of Dr. Brown, and is being nursed by his adopted daughter, Mrs. Ryan, of Toronto.

A Chapter on Capstans.

Bobaygeon Independent: One of the marvels in connection with the canal is how the boatmen go on year after year wasting time and fuel in towing up the canal. Three men on a windmill at the dock pull six barges into the lock and lower approach. The boats will start and pull and exhaust for two hours and a half, getting one barge out of the upper canal. Any man with ordinary skill with the axe would take a few poles and make a capstan in a few hours. With two capstans on the upper reach two men could wamp the boat and crib through the canal as fast as the wind could blow around the capstan. The interruption to navigation is an irritation to the boating public, and unnecessary snoring day and night of the boats is a nuisance to the village. If the steamboat men prefer wasting time and fuel to making a couple of capstans perhaps the Superintendent of the Canal might have wire-rope placed in position if it were suggested to him in a proper way.

A STRIKING STATEMENT.

Cigarettes are Ruinous to Scholars—Makes Them Dullards.

Orilla Puckett: In an address on cigarette smoking to the scholars of St. James Sunday school, on Sunday, J. E. Dickson, principal of Orilla Collegiate Institute, made some striking statements. He said that in his twenty-eight years' experience as a teacher he had never known a boy addicted to cigarette smoking to be a successful student. He could not recall an exception to the rule. If a boy did well the first year, and then fell off in his studies, he at once suspected that he had begun to smoke cigarettes. As a rule this turned out to be right, and the indications soon began to show in the face and on the hands, as well as arrested mental activity. Cigarette smoking was absolutely incompatible with mental development. The characteristic of the cigarette smoker was stolid stupidity, from which no spur could arouse him. (This is a strong testimony from one who has had exceptional opportunities for observation.)

It Pays to Advertise.

Jefferson de Angelis, who is keeping big audiences convulsed with laughter in the "Girl and the Governor," was holding forth on the value of publicity the other day, and pointed his moral with this:

"When the teacher was absent from the schoolroom, Billy, a mischievous boy of the class, wrote on the blackboard:

"Billy Jones has bought the girls better than any boy in school."

Upon her return, the teacher called him up to his desk.

"William, did you write that?" she asked, pointing to the blackboard.

"Yes, ma'am," said Billy.

"Well, you may stay after school," said she, "as punishment."

The other pupils waited for Billy to come out, and then they began guffing him.

"Got a licking, didn't you?"

"Nope," said Billy.

"What did she do?" they asked.

"She said I was a fool," said Billy, "but it pays to advertise."

C. T. R. CONDUCTORS CHANGED.

"Daddy" Haskill, Toronto, to Take Charge, of the Flyer.

Commencing to-day several changes were instituted among the conductors on this division of the Grand Trunk. "Daddy" Haskill, who has been in charge of the Peterboro-Belleville train, will commence pushing tickets on the "Flyer" between Peterborough, Lindsay and Toronto. Conductor Chas. Adams, who has been running out from Lindsay, will replace Mr. Haskill on the Belleville train, and Conductor Crozier, who has been in charge of the flyer, goes back to his former position as one of the conductors on the Lindsay-Belleville run.

The announcement of these changes will be of considerable interest to the travelling public.—Review.

At a meeting of the Melon Growers' Association it was decided to adopt resolutions to the preservation of all snakes of the chicken and spread-head variety in the melon belt, and the sense of the meeting was that the increase of the reptiles should be welcomed. The chicken and the spread-head snakes are the natural enemies of field mice, and destroy scores of them each day.

In January last G. A. Hogarth, of Toner, Alberta, had printed in the United States circulars and fraudulent advertisements warning Americans that laborers were not wanted in Canada. The matter was taken up by the immigration commissioner, J. Obed Smith, of Winnipeg, and the Leubridge Board of Trade, and a prosecution was begun by the Attorney-General of Alberta. A red suit Hogarth had been fined \$200 "for occasioning an injury to a public interest."

AS TOLD IN THE POETS' CORNER.

A PRAYER.

Our life is long. Not so, when angels say. Who watch us waste it, trembling while they weigh. Against eternity, one squandered day. Our life is long. Not so, the Saints protest, Filled full of consolation and of rest; "Short all, long good, one long unending best."

Our life is long. Christ's word sounds different; "Night cometh; no more work while day is spent." Repeat and work to-day, work and repent.

Lord, make us like Thy Host, who day nor night Rest not from adoration, their daylight, Oying, "Holy, Holy, Holy!" in height.

Lord, make us like Thy Saints, who wait and long Contended, bound in hope and freed from wrong. They sped (may be) their vigil was a song.

Lord, make us like Thyself; for thirty-three Slow years of toil seemed not long for Thee, (Thy wherefore? Thou art, there Thy Beloved might be.

THUNDERSTORMS.

The clouds are scudding across the moon, A misty light is on the sea, The wind in the shrouds has a wintry tune, And the foam is flying free.

Brothers a night of terror and gloom! Speaks God in the cloud and gathering roar; Thank God! he has given us broad sea room, A thousand miles from shore.

Down with the hatches on those who sleep, The wild and whistling deck have we; Good watch, my brothers, to-night we'll keep, While the tempest is on the sea.

Though the rigging shriek in his terrible grip, And the naked spars be snapped away, Lashed to the helm, we'll drive the ship, In the teeth of the whelming spray.

Hark! how the surges o'erleap the deck! Hark! how the surges o'erleap the waves! Ah, daylight will look upon many a wreck, Drifting o'er the desert waves.

Yet, courage, brothers, we trust the wave, With God above us, our guiding chart, So, whether to harbor or ocean grave, Be it still with a cheery heart, —Bayard Taylor.

A CAMPER'S LIFE.

Oh a camper's life is the life for me, Hurrah for the airy tent. It is there, my brothers, I joy to be On recreation bent. I can wear old pants of the fiercest kind, With holes in the knees and a patch behind. Convinced that none of my friends will mind, No matter how large the rent.

Oh, a camper's life is the life for me, It is bliss without allow, I can be swimming from ten till three, As when I was a boy. And then, when the blazing day is done, I can carry wood like a son-of-a-gun.

And think I'm having a lot of fun, A barrel full of joy.

Oh, a camper's life is the life for me, The butter is soft as oil, And I fish out flies with agility, And my temper begins to boil. And the bread is loathed with an earthly smell, And I find a water-snake in the well. And what I say, I refuse to tell, This column I must not soil.

Oh, a camper's life is the life for me, Black beetles are in the soup, The ants in the sugar are gay and frolic, And Willie has got the group. The merry mosquitos joyously laugh, As into my neck they sink the gnat. And the man next tent has a phony-graph. Ah, list to its awful whoop.

Oh, a camper's life is the life for me, It is raining hard to-day, And think of the jollity there must be. In keeping the flies away. The grub is wet and the bed is damp, And I cannot light the coal oil lamp. Oh, there's nothing so sweet as a rainy camp. It's better than a play.

Oh, a camper's life is the life for me, (This line is an airy fiction) In a good brick house I prefer to be. Where there isn't so much much friction. I'm rather sore from mosquito bites, So I like to see the electric lights, The trolley cars and the city sights, And a life without restriction.

VICTORIA CO. CHEESEBOARD.

1,795 BOXES SOLD MONDAY AT 11c.—SOME DISSATISFACTION.

Buyers Called Attention to High Prices at Last Two Sales in Peterboro.

At last Monday's sale of Victoria County Cheese Buyers Flavell and Brown, of town, and Gillespie, of Peterboro, gazed on some glum-looking countenances among the salesmen for the different factories when it became known that the price they were prepared to offer was well beneath the ruling figure of 11 1-4 paid at last week's Peterboro sale. For a time it looked as if an adjournment would be in order, but finally a better feeling prevailed and the Board was cleared.

President Thos. Robertson was in the chair when business was taken up. The following factories boarded the number of cheese placed opposite:

Star	105
Cameron	82
Dunstaff	135
Mariposa	139
Cumbray	78
Omelette	229
North Verulam	165
North Ops	95
Reboar	176
Bobaygeon	220
Moyle Leaf	111
Polsting	78
Red Rock	175
North Harvey	84

THE BIDDING.

When the President called on the buyers to make an offer Mr. Gillespie called 10 1-4, and the salesmen emitted audible gasps of astonishment. Mr. Brown called the bid, and Mr. Flavell made it 10 5-8. Mr. Gillespie then raised to 10 3-4, Mr. Flavell 10 13-16, and Mr. Gillespie 10 7-8.

President Robertson—"Gentlemen, you are evidently forgetting the price paid at the last two Peterboro sales was 11 1-4, and 11 5-8."

Mr. Gillespie—"I've seen the time when Lindsay Board got better prices than Peterboro."

President Robertson—"Yes, we did for one season."

Mr. Gillespie—"The price in Peterboro last week should not have gone over 11 1-4."

President Robertson—"But it did, which shows the advantage of having enterprising buyers."

Mr. Gillespie then called at 10 7-8. Maple Leaf, North Ops, Omelette, Mariposa and Star. All refused.

Mr. Flavell—"I'm prepared to offer 10 15-16, for Bobaygeon only." (Refused.)

President Robertson—"It's enough to set a salesman crazy to see the way prices jump in Peterboro and tumble here."

Several salesmen proposed an adjournment for one week, whereupon Mr. Gillespie remarked, "I'm prepared to offer 10 15-16, for Bobaygeon only."

PERKINS' NATIONAL HERBS

ed to offer 11c. but not a farthing more. That's my limit."

President Robertson—"You're so used to getting our cheese cheap that your firm won't allow you a reasonable limit."

Mr. Staples (salesman for Red Rock factory)—"I don't want to praise the buyers too much—they do wrong things occasionally—but I've looked into the prevailing prices and—all things considered—I think 11c. a pretty good offer to-day."

Mariposa, Star, Dunstaff, Maple Leaf, North Ops and Cambray then accepted Mr. Gillespie's offer, Omelette refusing.

Mr. Flavell at the same figure took Bobaygeon, Reboar, North Verulam, Cameron, Red Rock, North Harvey and Palestine."

The Board then adjourned to meet again on Monday, Aug. 5th.

Railway Notes.

—The Central Ontario Railway has placed an order for one first-class passenger car with the Crossman Manufacturing Co. of Cobourg, Ont.

The Canadian Locomotive Works Co. has been awarded a contract to build 25 big engines for the inter-colonial railway. The work will be completed by the end of 1908.

—The Grand Trunk Pacific Ry. has placed an order for twenty construction cars for its engineering and telegraph departments with the Canada Car Co. Montreal.

—The Canadian Northern Ry. received between May 13 and June 13, seven passenger cars and 100 flat cars from the Crossman Car Manufacturing Co. of Cobourg, Ont.

The C. P. R., between May 15 and June 15 placed orders for ten switching locomotives, 1 standard wing snow plow and one double-track snow plow at its Angus, Montreal, shops.

—The Newfoundland Legislature, at its recent session, passed an act fixing the compensation to be paid in respect of the loss or injury to animals or freight upon the railways in the colony; and a further act respecting the hours of labor of railway servants.

—The C. P. R. have decided to construct fifty giant locomotives, exceeding in size any engine ever built in Canada heretofore, for use in the mountain division. They will have a drawing pull of 40,000 pounds, whereas the greatest traction effort of present locomotives is 31,000 pounds, which will move a trainload of nine hundred tons.

BIG FIRE AT VICTORIA

British Columbia Metropolis Is In Flames.

WATER SUPPLY INADEQUATE

Western Residential Portion of the City Wiped Out For a Mile—Loss Over a Quarter of a Million Dollars—Many Houses, a Church and School Burned—One of Most Disastrous Fire In B.C.

Victoria, B.C., July 24.—The western portion of Victoria is in flames. There is no adequate supply of water.

Victoria is a city of 35,000, and extends east and west along James Bay, an inlet from the ocean running into the lower extremity of Vancouver Island.

The western portion of the town is residential. In the centre stands the Government buildings and the new C.P.R. hotel.

One of the most disastrous fires in the history of Victoria is taking place and a strip of the city almost a mile in length has been wiped out by fire. The conflagration broke out in the middle of the afternoon in a blacksmith shop on Store street, on the waterfront, and the strong wind from the southwest carried the fire across the city. Two whole blocks bounded by Store, Herald, Douglas and Chatham streets were wiped out.

Most of the buildings burned in this area were not of much value, but leaping a block, the fire swept up the southern end of Herald street between Douglas and Blanchard, burning all the residences on that side, and destroying the Calvary Baptist Church and a number of dwellings opposite. The fire then continued along Green and several adjoining streets, until stopped by the open spaces and by the volunteer brigades, which tore down the buildings to stop the flames. Last night the fire was practically checked, but the loss will be a quarter of a million dollars. The water pressure was lamentably low, and the strong wind and dryness of materials, together with inflammable character of most of the buildings, completed a set of conditions which helped to fan the flames.

Is It Dess De Bar?

Detroit "Flying Rollers" Say Notorious Woman Is Arrested.

Detroit, July 24.—It has just been discovered that Dess De Bar, who posed in Detroit and Windsor as Mother Kinnor, head of the Flying Rollers, had plans laid to swindle Col. Lewis F. Newman, a mining stock broker, with offices in Toronto, out of \$50,000 worth of Cobalt mining stock, by representing herself as a sister of J. Pierpont Morgan.

She would have succeeded, members of the Flying Rollers say, had they not refused to go into the game.

Trustee Preston of the Flying Rollers says that Miss Josephine Leslie, arrested in Newmarket, England, for using the name of J. Pierpont Morgan to defraud prominent people out of large sums of fictitious stock deals, is no other than Dess De Bar, and will sail for England at once to identify her.

Two Toronto Suicides.

Toronto, July 25.—Peter Foley, 70 years of age, for 16 years shoemaker at the House of Industry, committed suicide by jumping into the bay at the foot of Frederick street at five o'clock yesterday afternoon. The act was apparently the result of despondency, caused by excessive drinking, he having been detained at No. 1 police station Monday night for drunkenness.

Frank Stephen, 29 Cowan avenue, Parkdale, committed suicide last evening about 7:30 by taking cyanide of potassium, a deadly poison. Mr. Stephens had been despondent, and was thought to be brooding over financial affairs, as all was harmony in his domestic life.

French Officers Resign.

Paris, July 24.—It is reported that Gen. L. F. Metzinger and Gen. N. C. O. L. Michal, members of the general staff, will follow the example of Gen. Hagron, who last week resigned as commander-in-chief of the French army, because he was disappointed in the proposed reduction of the strength of the army.

Russian Registration.

St. Petersburg, July 24.—The period of time allowed officially for the registration of intention to take part in the elections of delegates to the third Russian duma expired yesterday, and indicates a profound indifference. In Odessa there were only 48 registrations out of a vote of 20,000.

Five Dead In New York.

New York, July 20.—Three children and two men died yesterday as the result of the tropical heat wave which has been sweeping over this city for several days.

Francis Allison, a longshoreman, crazed with the heat, jumped from the third-story of Gouverneur Hospital, and was killed.

Had Stroke In Water.

Kincardine, July 20.—Roderick McLeod, a resident of Kincardine from his youth, was drowned while bathing in the river at the rear of his property.

It is supposed that he had a stroke of some kind after entering the water. He was upwards of 50 years of age and unmarried.

Bad Men In Toils.

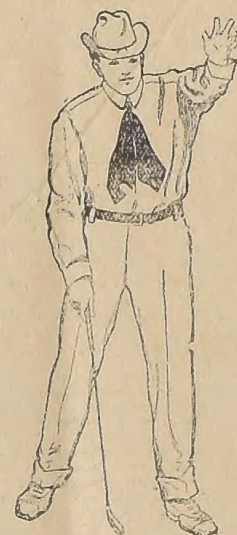

Belleville, July 22.—Two men wanted as members of the gang who committed burglaries and "shot up" Bancroft last spring, have been arrested at Depot Harbor.

Attacks Wife; Kills Self.

Ottawa, July 24.—Freres Derouin, an employee of the E. B. Eddy Co., for unknown reasons attacked his wife and daughter with a knife, but they escaped him by flight. He then shot himself near the heart.

Lorne McDougall Failing.

Ottawa, July 24.—J. Lorne McDougall, the former auditor-general, is failing quickly. He can hardly walk without assistance and his sight is getting very imperfect.
